No. 8¾—6 in. long, 1⅝ in. cutter, japanned trimmings, wt. each 1½ lbs $2.45

No. 15—7 in. long, 1⅝ in. cutter, Japanned trimmings, weight each 1⅞ lbs. 2.75

One in a Box

Knuckle Joint, Nickel Trimmings

Fitted with a patented new form of lever or cap made entirely of steel, making it indestructible

Each

No. 18—6 in. long, 1⅝ in. cutter, weight each 1½ lbs... $3.05

One in a Box.

Knuckle Joint, Nickle Trimmings

Fitted with patented new form all steel lever or cap. Indestructible.

Each

No. 19—7 in. long 1⅝ in. cutter; weight each 1⅞ lbs. .$3.25

One in a Box

CARRIAGE MAKERS' RABBET PLANES

Especially adapted for the heavy framing required in mining work, for carriage or wagon building, or in any work of similar nature. Adjustable cutters. Rosewood handles and knobs.

No. 10½

No. 10.

Smooth Bottom, Rosewood Handles and Knobs

Each

No. 10½—9 in. long, 2⅛ in. cutter, weight each 3 lbs. $6.85

No. 10—15 in. long, 2⅛ in. cutter, weight each 4½ lbs. ... 7.70

One in a Box.

DUPLEX FILLETSTER AND RABBET PLANES

Japanned cast iron frame and handle, tempered and polished tool steel cutters.

Each

No. 78—8½ in. long, 1½ in. cutter, with spur and detachable depth gauge, weight each 3 lbs. $3.95

Has two seats for the cutter, one for regular and the other for buil-nose work. It has a spur and a removable depth gauge. The adjustable fence can be used on either side and slides under the bottom. To work as a rabbet plane, remove fence and arms.

One in a Box.

IRON PLANES

BULL NOSE RABBET

For working close up into corners or other difficult places. Adjustable mouth.

Japanned

Each

No. 75—4 in. long, 1 in. cutter, weight each ¾ lb..... ....$0.90

One in a Box.

EDGE TRIMMING PLANE

Each

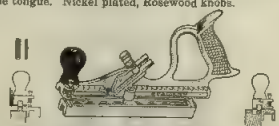
No. 95—6 in. long, ⅞ in cutter, weight each 1¼ lbs. $2.50

Designed especially for trimming or smoothing the ends of boards, such as siding, etc., for a square and close fit. It has a right angle rest or guide from the cutter edge and the cutter works on a skew giving an easy shaving cut. The rest or guide has two screw holes to which wood blocks of various levels may be attached enabling user to make a slanting cut.

One in a Box.

SWINGING FENCE MATCH PLANES

These planes have two plow cutters of the same width, and one extra wide cutter. The fence in one setting exposes two cutters for cutting the tongue, and, when reversed, leaves only one exposed for cutting the groove. On thicker boards than the plane works on center, the extra wide cutter is used when cutting the tongue. Nickel plated, Rosewood knobs.



Each

No. 48—Cuts ⅛ in. groove on boards ¾ in. to 1¼ in. centers on ⅞ in., weight each 3¾ lbs. $6.30

No. 49—Cuts ⅛ in. groove on boards ½ to ¾ in., centers on ⅛ in., weight each 2¾ lbs. 6.30

One in a Box.

ROUTER PLANES

Nickel Plated Stock.

OPEN THROAT

Cutters are adjustable and can be held on the front of the cutter post for regular work or on the back for bull nose work. An attachment for closing the throat, for use on narrow surfaces and regulating depth of cut, is furnished.

Each

No. 71—**Open throat**, 7⅛ in. long, two cutters, ¼ and ½ in., weight each 2⅝ lbs. $4.85

CLOSED THROAT

Cutters are adjustable and can be held on the front of the cutter post for regular work or one the back for bull nose work.

Each

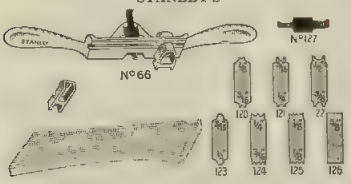
No. 71½—**Closed throat**, 7⅛ in. long, two cutters, ⅛ and ½ in., weight each 2⅛ lbs.....$3.80

These planes are for surfacing the bottom or other depressions parallel with the general surface of the work. They are made in two styles, differing in the form of throat.

One in a Box.

HAND BEADERS

STANLEY'S



Two Curved Handles, All Metal, Nickel Plated

	Each
No 66—11½ in. long, with 8 cutters; weight each 1¾ lbs.	$1.75

This is an excellent tool for beading, reeding or fluting straight or irregular surfaces and for light routering. The sample illustrated shows some of the work that can be done with its use. With each beader are furnished a square gauge for straight work and an oval gauge for curved work. There are also furnished eight cutters sharpened at both ends and embracing the following assortment: 6 single beads, 1/8, 5/32, 3/16, 7/32, 1/4, 5/16, and 3/8 inches; 2 fluting tools 5/32 and 1/4 inches; 4 reeding tools (2 beads 5/32 inch, 3 beads 1/4 inch, and 3 beads 1/4 inch and 4 beads 1/8 inch); 2 routers 1/8 and 1/4 inch, and a 5/16 inch blank, which latter cutter the owner can file as he desires.

The handles are curved so as to insure ample room between the workman's hands and the surface of the work.

One in a Box

SCRAPER PLANES

STANLEY'S

Single Handle

The handle and knob have the same form as the regular "Bailey" Plane, being preferred by some users to the two-handle or double grip form of scraper plane.

The blades are adjustable endwise and for angle, and can be firmly locked in position desired.

Japanned

	Each
No. 112—9 in. long 2⅜ in. blade, weight each 4 lbs.	$5 10

One in a Box

	Each
Extra Blades—For No. 112 scraper plane	$0.20

Open Stock

HANDLED SCRAPERS

STANLEY'S

Double Handle

One piece cast iron body and double handle, Japanned.

	Each
No. 80—11 in. long, 2¾ in. blade, weight each 1¾ lbs.	$1.55
Extra Blades—For No. 80 scraper	.40

The blade may be sprung to a slight curve by means of a thumb screw, giving ease of operation and quickness of cut. The handles are raised to protect the user's hands, and pierced so that the tool can be hung out of the way.

One in a Box.

HANDLED SCRAPERS

STANLEY'S

ADJUSTABLE IRON PLANES

STANLEY'S RABBET

Japanned iron stock, 8 in. long, with spur for working across the grain and detachable depth gauge.

Nos.	190	191	192
Cutter, in.	1½	1¼	1
Weight each, lbs.	2½	2¼	2
Each	$3.60	3.80	3.10

These planes will lie perfectly flat on either side, and can be used with right or left hand equally well, while planing into corners or up against perpendicular surfaces.

The planes of this design which are fitted with spur are adapted for use for working across the grain.

One in a Box.

STANLEY'S IMPROVED DADO

Japanned iron stock, 8 in. long, with skew cutters, adjustable depth gauge and two adjustable spurs.

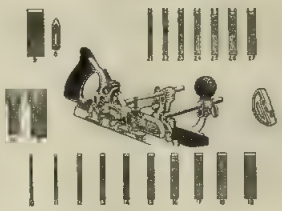
Nos.	39¼	39⅜	39½	39⅝	39¾	39⅞
Cutter, in.	¼	⅜	½	⅝	¾	⅞
Weight each, lbs.	1⅜	1⅜	1⅜	2	2	2¼
Each	$3.85	4.05	4.30	4.50	4.70	4.90

The great advantage of these Dado planes over those of wood is that they will keep true under all conditions even in the narrowest widths. They have skew cutters, an adjustable depth gauge and two adjustable spurs, one on each side of the plane. This adjustable feature permits of the spurs being adjusted to take up wear, as well as for the depth of the cut.

One in a Box.

COMBINATION PLANES

STANLEY'S



Plow, Beading, Rabbet and Matching

Nickel plated frame, selected rosewood handle, knob and fence.

115—⅞ in. ¼ round with bead	1.00
212—⅛ in. reeding tool 2 beads	.40
222—⅞ in. reading tool 2 beads	.40
232— in. reeding tool 2 beads	40

This tool in addition to being a beading and center beading plane, a plow, dado, rabbet, filletster and match plane, a sash plane and a slitting plane, is also a superior moulding plane and will accommodate cutters of almost any shape and size. In fact, it is a **Planing Mill Within Itself.**

One Set in a Box

ADJUSTABLE IRON PLANES

STANLEY'S CIRCULAR

Japanned, Flexible Steel Face, Steel Forged Mouthpiece.

Each

No. 113—10 in. long, 1⅝ in. cutter, weight each 3½ lbs. ...$8 85

These planes have adjustable flexible steel faces for planing the inside or outside of circles. Cutters adjustable endwise and sidewise.

Has graduated scale for setting the faces. Both sides of plane are shown.

One in a Box.

PLANE IRONS

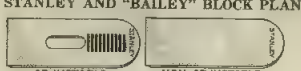
Size	Plane Irons Single Each	Plane Irons Double Each	Plane Irons Caps Each
1¼ in. for plane No 1	$0.45	$0.80	$0.35
1⅝ in for plane Nos. 2, 2C, 602, 602C	.50	.85	.35
1¾ in for plane Nos 3, 3C, 5¼, 5¼C, 20 22, 25, 113, 603, 603C	.55	.90	.35
2 in for plane Nos 4, 4C, 5, 5C, 9, 24, 26, 35, 604 604C, 605, 605C	60	.95	.35
2⅛ in for plane Nos 10, 10¼, 10½	.65	1.00	.35
2¼ in for plane Nos. 5½, 5½C, 27½, 605½, 605½C	70	1.10	.40
2⅜ in. for plane Nos. 4½, 4½C, 6, 6C, 7, 7C, 11, 28, 31, 36, 604½, 604½C, 606, 606C 607, 607C	.75	1.20	.45
2⅝ in. for plane Nos. 8, 8C, 32, 37, 608, 608C	.80	1.30	.50

FOR STANLEY AND "BAILEY" BLOCK PLANES



Size	Plane Irons Per Dozen
1 in for plane Nos 100, 101	$ 1.50
1⅛ in. for plane Nos. 60, 60½, 61, 203	5.00
1⅝ in. for plane Nos. 102, 103	2.50
1⅝ in. for plane Nos. 9½, 9¾, 15, 15½, 16, 17, 18, 19, 63, 65, 65½, 120, 131, 220,	5.00
1⅝ in. for plane Nos. 110, 130	3.80
1¾ in. for plane No. 140	9.00
2 in. for plane Nos. 62, 64	13 45
2 in. for plane No. 64 special	14 95

It will be noted that in many cases the same single iron fits a number of different planes, but the cap iron (which combined with the single iron makes the double iron) is not the same on the iron, wood and circular planes and consequently is not interchangeable. In ordering, it is necessary to give the number of the plane, size of iron and state whether single or double iron is required.

"BAILEY" IRON PLANES

The Knob on "Bailey" planes is of special design, giving great ease in handling.

In the Bailey plane, the frog may be adjusted for width of throat opening after removing the cap and cutter and slightly loosening the screws which clamp the frog to the base

The illustration shows the ribbed construction of the bottom and machined surfaces which give great solidity and solid seating for the frog.

The cutters are made of a thin parallel steel of high quality This cutter is easily kept sharp by honing With occasional grinding insuring little work and small possibility of stubbing the bevel. The cutter is securely bedded clear to the heel.

"Bailey" cutters are adjustable either endwise or sidewise.

BED ROCK—ADJUSTABLE

The Bed Rock Planes differ slightly in appearance from the Bailey Planes. The only difference in construction being the design of the frog and frog seat. In the Bed Rock Planes, the bottom of the frog is machined to form a tongue which fits into a groove in the bottom of the plane, insuring great solidity and perfect alignment. The movement of the frog for adjusting the throat opening is governed by a screw and may be accomplished without removing the cap and cutter.

IRON BLOCK PLANES

STANLEY

NO. 101—NON-ADJUSTABLE

Small cast iron, japanned, non adjustable plane with a removable cap. Sharp steel cutter, 3⅝ inches long; 1-inch cutter, weight each, ¼ pound.

		Each
No. **101**		**$0.50**

NO. 100—NON-ADJUSTABLE

Same as No. 101, except that it has a handle; 3½ inches long, 1-inch cutter; weight each, ¾ pound.

		Each
No. **100**		**$0.60**

NON-ADJUSTABLE

Japanned cast iron plane with screw cap.

Nos.		Length, Inches	Width Cutter Inches	Weight Each, Each, Lbs.	Each
102	Without Knob	5½	1⅜	⅞	**$0.90**
110	With Knob	7	1⅝	1⅜	**1.25**

ADJUSTABLE

Japanned cast iron plane with screw cap and lever adjustment.

Nos.		Length, Inches	Width Cutter Inches	Weight Each, Each, Lbs.	Each
103	Without Knob	5½	1⅜	⅞	**$1.30**
120	With Knob	7	1⅝	1⅜	**1.80**

ADJUSTABLE

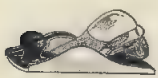
Japanned cast iron plane with lever cap and screw adjustment.

Nos.	Length, Inches	Width Cutter, Inches	Weight Each, Lbs.	Each
203	5½	1⅜	1⅝	**$1.60**
220	7	1⅝	1½	**1.85**

LOW ANGLE ADJUSTABLE

Cutter rests on its seat at an angle of 12 degrees and is adjustable endwise. Japanned iron case with japanned or nickel plated cap and trimmings. Lever cap, and adjustable throat.

Nos.	Finish of Trimming	Length, Inches	Cutter Width Inches	Weight Each, Lbs.	Each
60½	Japan	6	1⅜	1¾	**$2.60**
60	Nickel	6	1⅜	1¾	**2.85**
65½	Japan	7	1⅜	1⅜	**2.80**



BLOCK AND RABBET ADJUSTABLE

With skew cutter. A detachable side changes it from a block to a rabbet plane. Japanned iron plane with rosewood knob. Length, 7 inches; width cutter, 1¾ inches weight each, 1½ pounds.

		Each
No. **140**		**$3.20**

LOW ANGLE, KNUCKLE JOINT

Cutter blades rest on its seat at an angle of 12 degrees. Knuckle-jointed steel cap is practically indestructible. Adjustable throat. Cutter adjustable endwise. Length, 7 inches width of cutter, 1⅝ inches; weight each, 1⅜ pounds.

		Each
No. **65**		**$3.40**

IRON BLOCK PLANES

BAILEY

With improved arrangement for adjusting the cutter both endwise and sidewise. The cutter rests on its seat at an angle of 20 degrees. All have adjustable throats

ADJUSTABLE JAPANNED TRIMMINGS

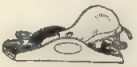
Japanned cast iron with lever cap and screw and lever adjustment.

Nos.	Length, Inches	Width Cutter, Inches	Weight Each, Lbs	Each
9½	6	1⅝	1½	**$2.45**
15	7	1⅝	1⅝	**2.75**

ADJUSTABLE NICKELED TRIMMINGS

Same as the above, except furnished with nickel-plated trimmings.

Nos.	Length, Inches	Width Cutter, Inches	Weight Each, Lbs.	Each
16	6	1⅝	1½	**$2.80**
17	7	1⅝	1⅝	**3.10**



ADJUSTABLE KNUCKLE JOINT CAP

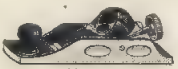
Fitted with a new knuckle joint cap which is made entirely of steel and is practically indestructible. Japanned cast iron plane with nickel-plated cap and trimmings. A screw and a lever provide both endwise and sidewise adjustment of the cutter.

Nos.	Length, Inches	Width Cutter, Inches	Weight Each, Lbs.	Each
18	6	1⅝	1½	**$3.05**
19	7	1⅝	1⅝	**3.25**

ADJUSTABLE ROSEWOOD HANDLE

Japanned cast iron with lever cap and screw and lever adjustment; furnished with handle, making it convenient to work with both hands if desired. Japanned trim.

Nos	Length, Inches	Width Cutter, Inches	Weight Each, Lbs	Each
93½	6	1⅝	1⅝	**$3.05**
15½	7	1⅝	1⅞	**3.25**



STANLEY—DOUBLE END ADJUSTABLE.

Combination adjustable block and bull-nose plane. Made with two slots and two seats for the cutter, so that it can be set in the center as a block plane or set at the end for a bull-nose plane. Japanned iron, rosewood knob. Length, 8 inches; width cutter, 1⅝ inches, weight each, 1½ pounds.

		Each
No. **131**		**$3.00**

NON-ADJUSTABLE

Japanned cast iron block plane. Has two slots and two cutter seats, so that it can be set in the center as a block plane or set at the end for a bull-nose plane. Has screw adjustment. Length 8 inches width cutter, 1⅝ inches, weight each, 1⅝ pounds.

		Each
No. **130**		**$1.85**

IRON BLOCK PLANES

STANLEY

LOW ANGLE
NON-ADJUSTABLE
THROAT

With improved arrangement for adjusting the cutter endwise. The cutters rests on its seat at an angle of 12 degrees. Lever cap and rosewood knob at front. Japanned cast iron with nickel trimmings.

Nos.	Length, Inches	Cutter Width, Inches	Weight Each, Lbs.	Each
61	6	1⅜	1¼	**$2.50**
63	7	1⅝	1⅜	**2.95**

SPECIAL PLANES

STANLEY

CABINET MAKERS'
RABBET

Can be worked either right or left hand and will lie perfectly flat on either side. Adjustable throats and handy grip feature by removing front a chisel plane is obtained. Nickel plated.

Each

No. **90**—Length, 4 Inches; Cutter Width, 1 Inch; Weight Each, 1 Lb. **$4.75**

Similar to No. 90 above but with extension front instead of bull nose. Front may be removed. Extension front produces smoother work

Nos.	Length, Inches	Cutter Width, Inches	Weight Each, Lbs.	Each
92	5½	¾	1½	**$4.75**
93	6½	1	1¾	**5.75**
94	7½	1¼	2	**6.60**

BULL NOSE RABBET

For working close up into corners or other difficult places; adjustable mouth; japanned iron frame; tempered steel blades.

Nos.	Length, Inches	Cutter Width, Inches	Weight Each, Lbs.	Each
75	4	1	⅝	**$0.90**

RIGHT

LEFT

SIDE RABBET

For side rabbeting dados, mouldings and grooves of all sorts; a reversible nose-piece gives tool a form whereby it will work close up into corners; fitted with depth gauges, nickel-plated cast iron frame; rosewood handles.

Nos.	Style Plane	Length, Inches	Cutter Width, Inches	Weight Each, Lbs.	Each
98	Right Hand	4	½	⅔	**$2.35**
99	Left Hand	4	½	⅔	**2.35**

EDGE-TRIMMING
BLOCK

For trimming or smoothing edge of boards for a square or close fit; cutter works on a skew; wood blocks of various bevels may be attached, enabling user to make a slanting cut; japanned cast iron frame and clamp, tempered and polished tool steel cutters.

Nos.	Length, Inches	Cutter Width, Inches	Weight Each, Lbs.	Each
95	6	⅞	1¼	**$2.50**

All Above, One in a Box

SPECIAL PLANES

STANLEY

CARRIAGE MAKER'S
RABBET

Especially adapted for heavy framing and for carriage and wagon building. Adjustable cutters; rosewood handles and knobs.

Nos.	Length, Inches	Cutter Width, Inches	Weight Each, Lbs.	Each
101	9	2⅛	3	**$6.35**
10	13	2⅝	4¼	**7.70**

LOW ANGLE

For heavy work across the grain; cutter is adjustable and set at an angle of 12 degrees; rosewood handle and knob; adjustable throat.

Cast iron body and cap, japanned, adjustable, tool steel cutter, tempered, ground and polished.

Nos.	Length, Inches	Cutter Width, Inches	Weight Each, Lbs.	Each
62	14	2	3⅝	**$6.70**

CIRCULAR PLANES

By means of the Graduated Scale on the Gears, the Face can be Accurately Set to Work an Arc of the Same Circle, both Concave and Convex, by turning the Knob on the Front of the Plane

Japanned, cast iron frames, caps and handles; tempered and polished tool steel cutters; polished spring steel bottoms; screw and lever adjustments; can be adjusted to work on concave or convex surfaces.

Nos.	Length, Inches	Cutter Width, Inches	Weight Each, Lbs.	Each
113	10	1¾	3½	**$8.85**

VICTOR CIRCULAR PLANES

Face is fastened at each end to the plane body and adjusted by a screw at the center. This construction gives great strength. Adjusts to convex or concave surfaces. Japanned iron frame, polished face and cap.

Each

No. **20**—Length, 10 Inches; Width Cutter, 1¾ Inches; Weight Each, 4 Lbs. **$9.80**

BUTCHER BLOCK

For truing up butchers' blocks. Special toothed cutter and a smoothing cutter furnished. Beech handle and knob.

Each

No. **64**—Length, 12½ Inches; Cutter Width, 2 Inches; Weight Each 4 Lbs. **$5.60**

CABINET MAKERS' EDGE

A chisel plane for piano makers and cabinet workers; cutting edges being located at extreme end of plane gives tool form of a chisel, adjusted endwise; japanned iron body, rosewood knob, steel cutters.

No.	Length, Inches	Cutter Width, Inches	Weight Each, Lbs.	Each
97	10	2¼	3¾	**$4.70**

All Above, One in a Cardboard Box

SPECIAL PLANES

STANLEY

DUPLEX FILLETSTER AND RABBET

Has two seats for cutter, one for regular and the other for bull nose work; it has a spur and a removable depth gauge; adjustable fence can be used on either side and slides under bottom. To work as a rabbet plane, remove fence and arms; japanned cast iron frame, tempered and polished tool steel cutters.

Nos.	Length, Inches	Cutter Width, Inches	Weight Each, Lbs.	Each
78	8½	1⅝	3	$3.95

RABBET

Will lie flat on either side and can be used with either right or left hand while planing into corners or up against perpendicular surfaces. Fitted with a spur and a removable depth gauge.

Nos.	Length, Inches	Cutter Width, Inches	Weight Each, Lbs.	Each
190	8	1½	2½	$3.50
191	8	1¼	2¼	3.30
192	8	1	2	3.10

SKEW CUTTER FILLETSTER AND RABBET

Has an extra wide skew cutter and an adjustable spur on each side. The fence and depth gauge can be attached to either side, the fence sliding under the bottom. By removing arms and fence, a skew cutter ratchet is obtained.

	Each
No. **289** Length, 8 Inches; Cutter Width, 1¾ Inches; Weight Each, 3¾ Lbs.	$4.55

DADO

Fitted with skew cutters, an adjustable depth gauge and two adjustable spurs; will keep true even in the narrowest widths. Japanned iron frame and handle; polished and tempered steel cutters.

Nos.	Length, Inches	Cutter Width, Inches	Weight Each, Lbs.	Each
39A	8	¾	1¾	$3.85
39B	8	⅝	1¾	4.05
39C	8	½	1¾	4.30
39D	8	⅝	2	4.50

39G	8	⅞	2¼	4.90
39H	8	1	2¼	5.10

SWINGING FENCE MATCH PLANES

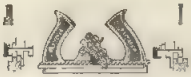
Has two separate cutters a suitable distance apart; when guide or fence is set both cutters work and a tongue can be made, fence is hung on a pivot and can be swung around from end to end; this movement covers one of the cutters and also furnishes a guide for grooving and exact match for tongue; nickel plated cast iron frame and handle; rosewood knob.

Nos.	Cuts Grooves Width, Inch	Depth, Inch	Centers, Inches	Weight Each, Lbs.	Each
48	⅞	¾ to 1¼	⅞	3¾	$6.30
49	⅞	½ to ¾	½	2⅝	6.30

SPECIAL PLANES

STANLEY

DOUBLE END MATCH PLANE



Two cutters, a plow, and a tongue tool, both governed by one permanent fence. The tongue tool has one edge wider than the other, which overhangs one side when tonguing on the center. Both tongue and groove are cut by working the tool in the same direction, by merely reversing it end for end. Nickel plated.

	Each
No. **148**—Cuts ¼ Inch Groove on Bourds ¾ to 1 Inch; Centers on ⅞ Inch, Weight Each, 2⅜ Lbs.	$5.40

DOVETAIL PLANE

Nickel plated cast iron frame and handle; tempered and polished tool steel cutters. Cuts both tongue and groove for dove-tail work. Four Cutters are furnished with each plane, three of which are for cutting grooves of different sizes, and one for cutting tongues of any size. Complete instructions for operating accompanying each plane.

Nos.	Length, Inches	Weight Each, Lbs.	Each
444	9	6	$14.70

One in a Box

ROUTER PLANES

Closed Throat Open Throat

For surfacing bottom of grooves or other depressions parallel with surface of work; a wooden bottom of any size can be attached, enabling user to router on large openings, adjustable cutters can be held on front for regular work or on back of cutter post for bull nose work; a patented smoothing cutter furnished with each plane; nickel plated, cast iron frame; rosewood knobs, tempered and polished cutters. Open throat style is furnished with an attachment for closing the throat.

Nos.	Throat	Length Inches	Cutter Width, Inches	Weight Each, Lbs.	Each
71½	Closed	7½	¼ and ⅜	2⅛	$3.80
71	Open	7½	¼ and ½	2⅛	4.85

ROUTER WITH FENCE

Will router to a depth of ⅞ inches and a width of 3 inches, fence regulates the position of the cut and is governed by a positive stop. Japanned iron frame with rosewood handles.

	Each
No. **171**—Length, 11 Inches; 3 Cutters, ¾, ⅝ and ⅞ Inches; Weight Each, 3 Lbs.	$7.05

SCRUB PLANE

For "hogging" or planing down to a rough dimension, any board that is too wide to conveniently rip with a saw. Cutter is specially shaped, having a round cutting edge instead of square. Japanned iron frame, handle and knob of beech.

Nos.	Length, Inches	Cutter Width, Inches	Weight Each Lbs.	Each
40	9½	1⅝	2½	$2.65
40½	10½	1⅝	2½	3.55

All Above, Each in a Box

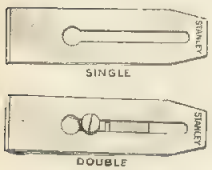
PLANE IRONS

STANLEY

For Bailey and Bed Rock Planes



Proper bevel for grinding cutter is at an angle of twenty-five degrees; when regrinding or rehoning cutter this angle should be observed.

Highest grade English tool steel; oil tempered, ground and hand sharpened; extra heavy bit; full polished.

Single irons will fit a number of different planes but the cap iron is not interchangable for iron, wood and circular planes. Double irons consist of cutter iron and cap iron.

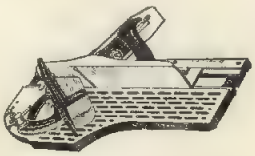
SHOOT BOARDS AND PLANES

STANLEY



For pattern makers, cabinet makers, picture framers, printers and electrotypers. Swivel can be locked at any angle between zero and ninety degrees, the quadrant being graduated between these points. Board is of ribbed construction and has an adjustable runway accurately machined for the plane, sliding back supports work to the edge; sliding back clamp holds any shaped work in position. The plane is especially constructed for the board and has rosewood handle and knob; adjustable cutter set on a skew.

Each

No. **52**—Length, 22 Inches; Length Plane, 15 Inches; Cutter Width, 2⅜ Inches; Weight Each, 17½ Lbs. ... **$23.45**

SCRAPER PLANES

STANLEY

DOUBLE HANDLE

The double grip, rosewood handles placed across the center, give the tool a good balance. The blades are adjustable endwise and for angle, and can be firmly locked in position desired. Japanned iron frame

	Each
No. **12** Length, 6½ Inches; Blade Width, 2⅛ Inches; Weight Each, 3¾ Lbs.	**$5.85**
No. **12B**—Extra Blades	**.50**

DOUBLE HANDLE
ROSEWOOD BOTTOM

Especially adapted for use on very fine work as it reduces the possibility of marring or scratching the surface being worked upon. Bottom is detachable and can easily be renewed when worn. Japanned iron frame and rosewood handles and bottom.

	Each
No. **12½**—Length, 6¼ Inches; Blade Width, 2⅛ Inches; Weight Each, 4 Lbs.	**$7.90**
Extra Rosewood Bottom	**.50**

SINGLE HANDLE

Regular plane style handle and knob. Blade is adjustable endwise and for angle and can be locked in position desired. Japanned iron frame; rosewood handle and knob.

	Each
No. **112**—Length, 9 Inches; Blade Width, 2⅜ Inches; Weight Each, 4 Lbs.	**$5.10**
No. **212**—Knob handle only. Length, 5½ Inches; Blade Width, 1⅜ Inches; Weight Each, 1½ Lbs.	**3.65**

CABINET MAKERS'

Rabbet mouth to work up close into corners; handle and knob can be tilted for convenience when working up close to perpendicular surfaces. Blade springs backward in working, opening the mouth and allowing the shaving to pass through; when working pressure is released, the blade springs back to normal position. Japanned iron frame, rosewood handles and knob.

	Each
No. **85** Length, 8 Inches; Blade Width, 2 Inches; Weight Each, 2⅝ Lbs.	**$5.45**

SCRAPERS

STANLEY—DOUBLE HANDLE

Body and handles cast in one piece; handles are raised to protect the users hands and pierced for hanging up.

IRON BOTTOM

Blade may be sprung to a slight curve for ease and quickness of operation; japanned.

	Each
No. **80**—Length, 11 Inches, Blade Width, 2¾ Inches; Weight Each, 1¾ Lbs.	**$1.55**
No. **80EB**—Extra Blades	**.50**

ROSEWOOD BOTTOM

For use in the finest cabinet work. Nickel plated.

	Each
No. **81**—Length, 10 Inches; Blade Width, 2½ Inches; Weight Each, 2¼ Lbs.	**$2.40**
Extra Rosewood Bottom	**.50**

All above, One in a Box

CABINET SCRAPERS

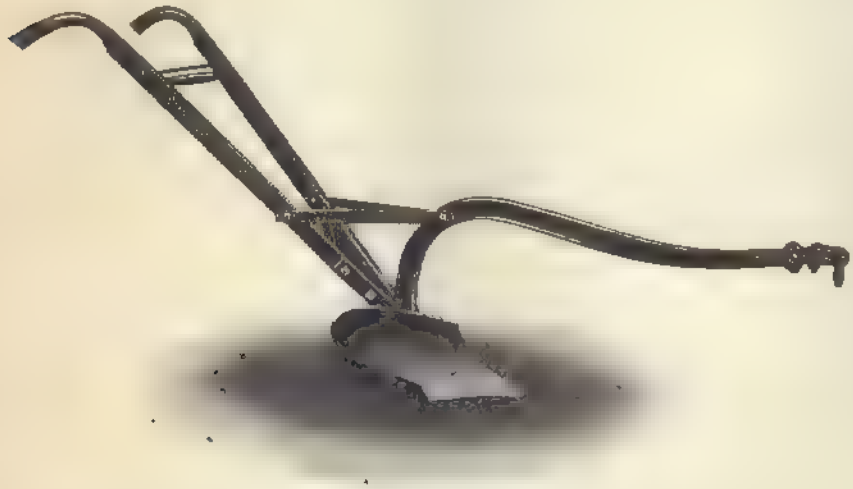
LYNCHBURG CHILLED PLOWS

All goods made by the Lynchburg Plow Works bear this mark.

It guarantees Quality, Fit, Finish and Wear

Lynchburg chilled plows represent all that is modern in successful plow construction. Their scientific construction and excellent shedding qualities makes them wonderfully light in draft and easily handled by plow men. The Virginia iron mixture and special bracing insures long life and reduces liability of breakage. They are economical implements—guaranteed to give entire satisfaction

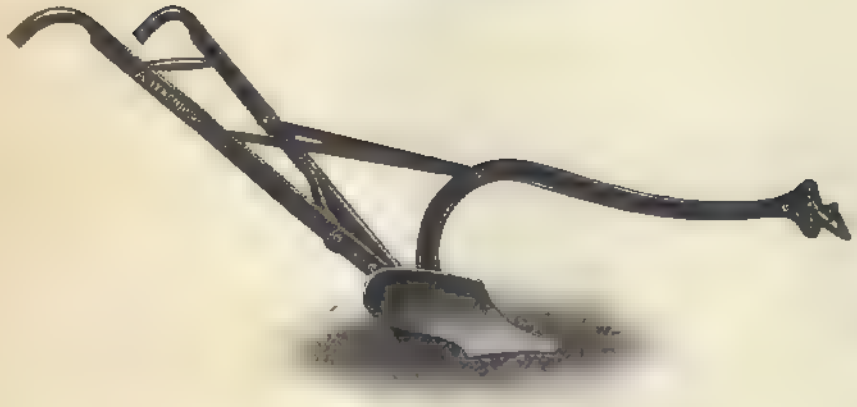
By selling Lynchburg Chilled Plows you get the maximum dealers' profit at the minimum consumers cost.



The "Trucker"

The latest model of light one-horse plow with every modern improvement. Adapted to a wide variety of work, playing no favorites in soils, but running and shedding perfectly in sand, loam, gravel and clay soils. Built with malleable standard, sloping landside and cutter share and can be fitted with medium and small moldboards, thus giving it a wide range of cultivation.

The Trucker—Right hand only; capacity 4½x7½; weight, each 60 pounds ..... Each **$9 25**



No. 3X

Medium one-horse steel beam plow, with sloping landside and cutter share. The properly curved moldboard insures light draft and easy shedding.

Built upon correct lines and adapted to all kinds of one-horse work

No. 3X—Right hand only capacity 4½x8; weight each 65 pounds.. . . . Each **$10.00**

No. 6X

The first one-horse steel beam plow made with cutter share and deservedly one of the most popular with the Southern planter. Its strong construction, high arched beam and practical bracing, coupled with the finely shaped moldboard, make it the one-horse plow for either clay, gravelly or loamy soils. Extension moldboard for terracing can be furnished for this plow.

No. 6X Right hand only; capacity, 4½x9; weight each 70 pounds... . . Each **$10 25**

Department No. 5

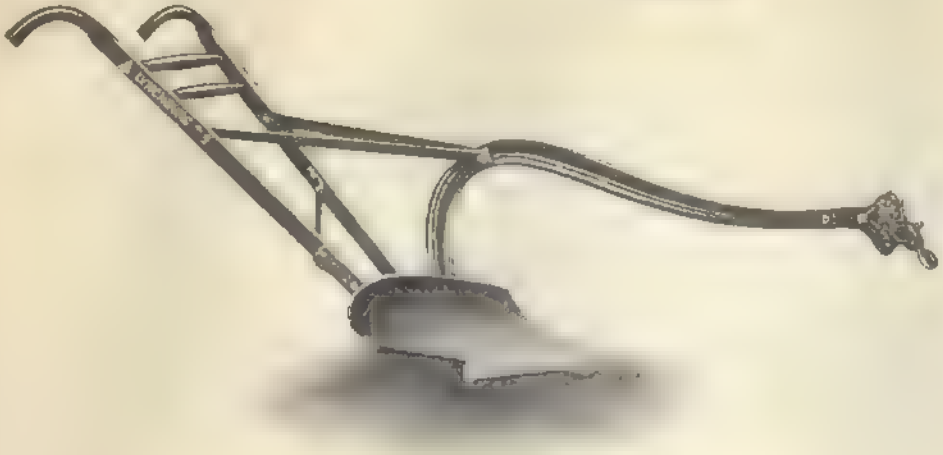
LYNCHBURG CHILLED PLOWS

All goods made by the Lynchburg Plow Works bear this mark

It guarantees Quality Fit, Finish and Wear.

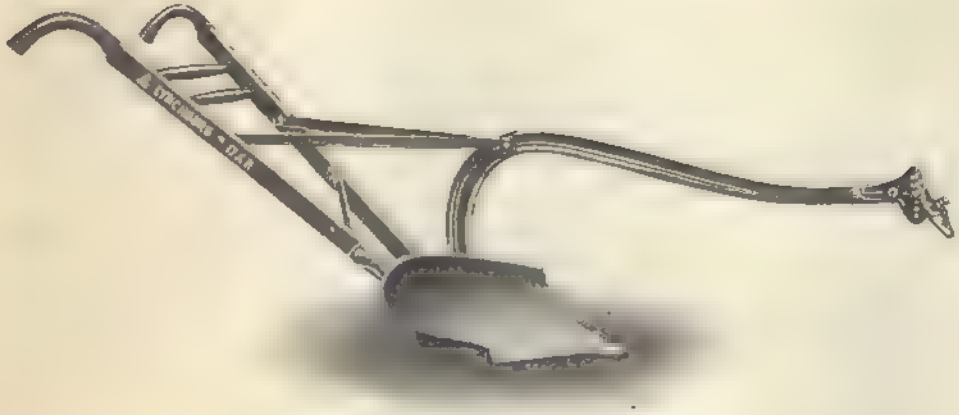


No. 9

A Southland favorite especially built for those desiring a very light two-horse plow. The sloping cutter share and the shape of the moldboard permits turning a wide deep furrow with very light draft.

Built with malleable unbreakable standard

No. 9—Right hand only; capacity 5x10; weight each 85 pounds.....Each **$12 50**

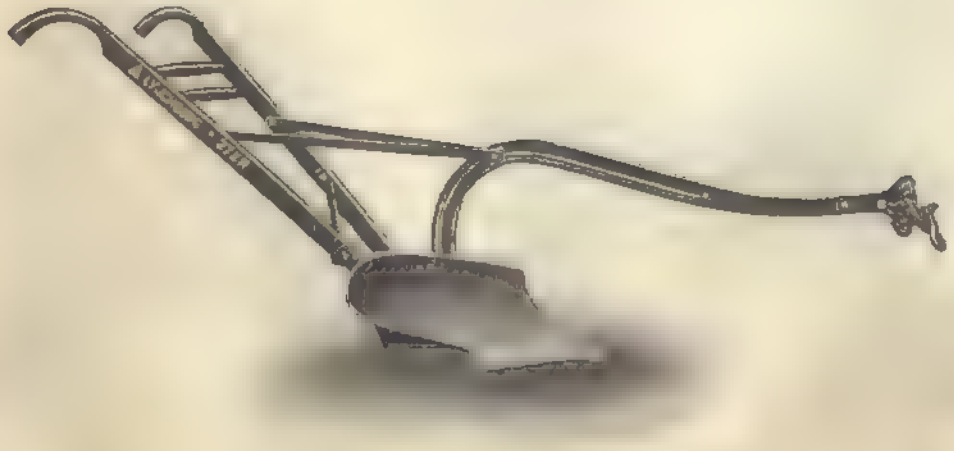


No. 17X

Light two-horse steel beam plow, with a long sloping landside and cutter share. Has all the good features of our large sizes, and is very popular as a light two-horse plow in the south.

Can be fitted with wheel and jointer, or rolling coulter, also with extension moldboard for terracing

No. 17X—For right and left hand; capacity 5½x11; weight each 95 pounds.... Each **$14.50**



No. 27X

Medium two-horse steel beam plow; sloping landside and cutter share, filling the place for which it was designed. One of our most popular patterns, between Nos. 17X and 37X in size; much in demand where light teams are used. Easily handled, very light draft. Can be fitted with wheel and jointer or rolling coulter; also with extension moldboard for terracing.

No. 27X—For right and left hand; capacity 8x11; weight each 105 pounds..... .....Each **$16.00**

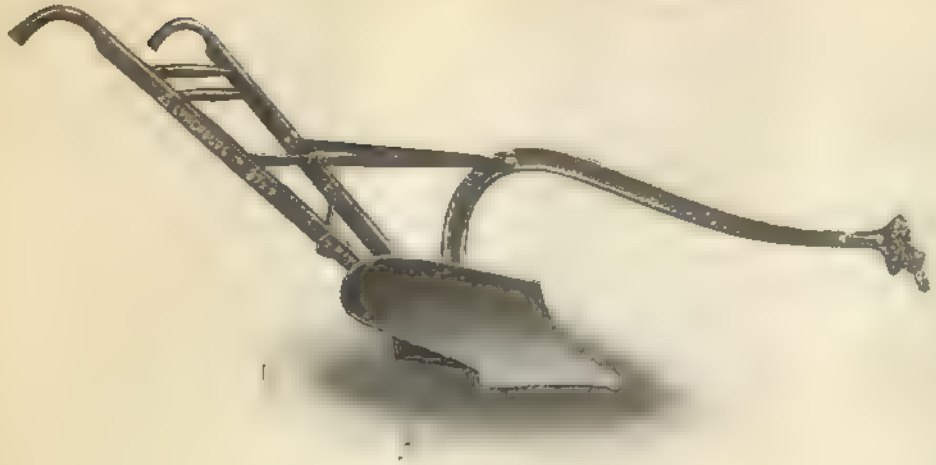
TRADE MARK L REG. U.S. PAT. OFF.

It guarantees Quality, Fit, Finish and Wear

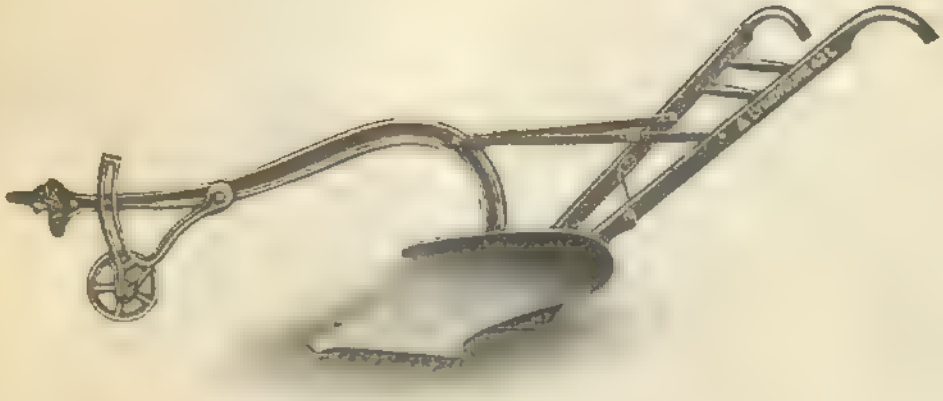


No. 37X

A general favorite two-horse steel beam plow, with sloping landside and cutter share. A popular pattern used by some of the most practical farmers desiring a size between the medium and heavy two-horse plow. It turns a wide deep furrow with very light draft.

Can be fitted with wheel and jointer or rolling coulter, also with extension moldboard for terracing.

No. 37X—Right and left hand; capacity, 6½x12; weight each 105 pounds..... Each **$18.00**



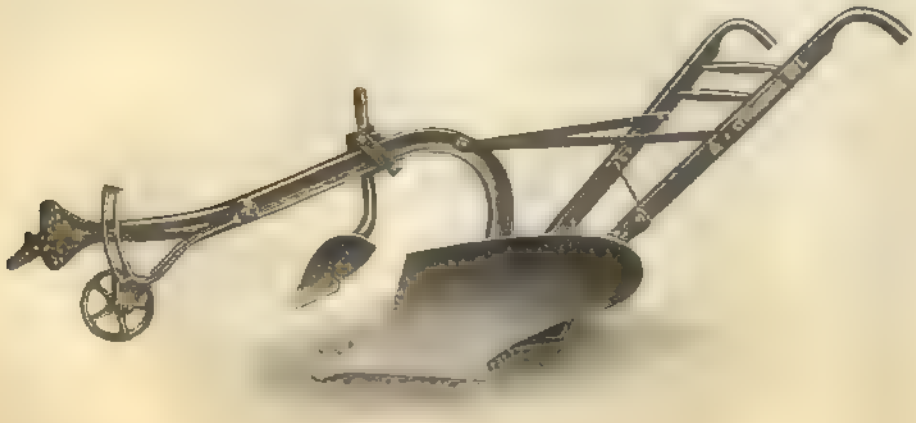
No. 42

Full size two-horse steel beam plow, modern construction with long sloping landside, properly curved moldboard and cutter share

This plow is adapted to a great variety of soils and its work is always to be relied upon

Can be fitted with wheel and jointer or rolling coulter, also, with extension moldboard for terracing.

No. 42—Right and left hand; capacity 7x13; weight each 130 pounds..**Each $19.00**



No. 52

Three-horse steel beam plow. Its large capacity, light draft and ease of handling insures excellent work in all soils and under the most trying conditions. The special "Lynchburg" bracing reduces the liability of breakage

Can be fitted with wheel and jointer (as shown) or with the rolling coulter. Also with extension moldboard for terracing.

No. 52—Right and left hand; capacity 9x16; weight each 150 pounds..**Each $21.00**

LYNCHBURG CHILLED PLOWS

All goods made by the Lynchburg Plow Works bear this mark

It guarantees Quality Fit, Finish and Wear

No. 5 Series Chilled Middle Breakers

No. 5 Series, Chilled Middle Breakers

Strongly braced, well balanced and easy running plow, made with a malleable standard, and two-piece moldboard, preventing breakage and lowering the cost of replacement.

Fitted with adjustable rudder when so ordered, at extra charge of $0 50 each.

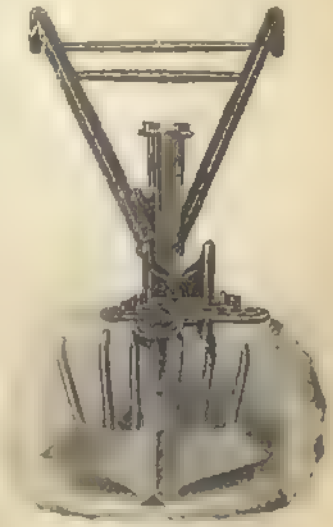
No. 80

No. 80

A medium weight steel beam subsoil plow of large capacity, designed especially for the Southern trade; easily handled with two horses. There is an unanimous opinion among best posted farmers as to the value of subsoiling all lands, particularly those with a stiff clay subsoil and sloping lands of light soil subject to washing The cost of the plow doing the work is small in comparison with the results obtained. The No. 80 is furnished with a wheel if wanted, and can be equipped with potato digger attachment, as shown to the right.

A well designed, thoroughly built plow that will give you satisfaction. It is fitted with a shim piece, taking all wear off the standard and giving a sharp cutting edge

No. 80—Furnished with points of two widths, 2¼ inch and 4 inch .....Each $13.00



No. 80, with Potato Digger Attachment.

LYNCHBURG CHILLED PLOWS

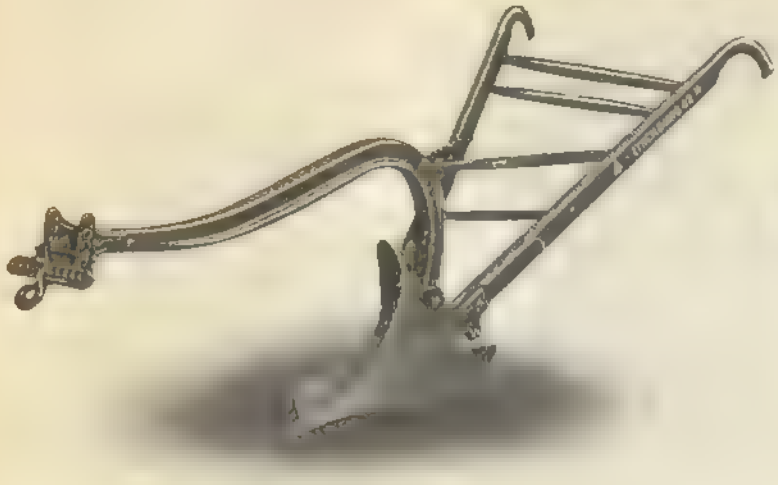
It guarantees Quality, Fit, Finish and Wear

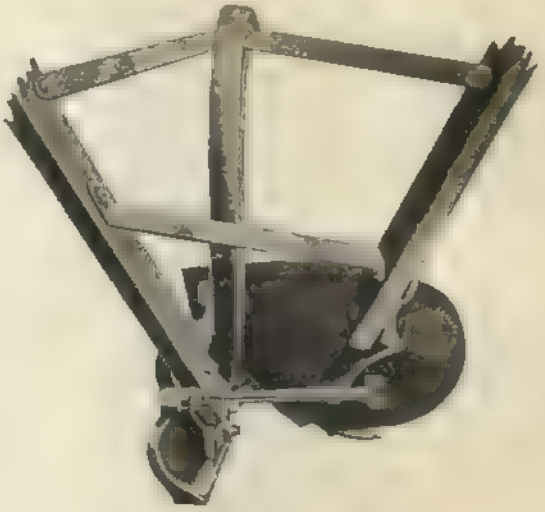


Landside View

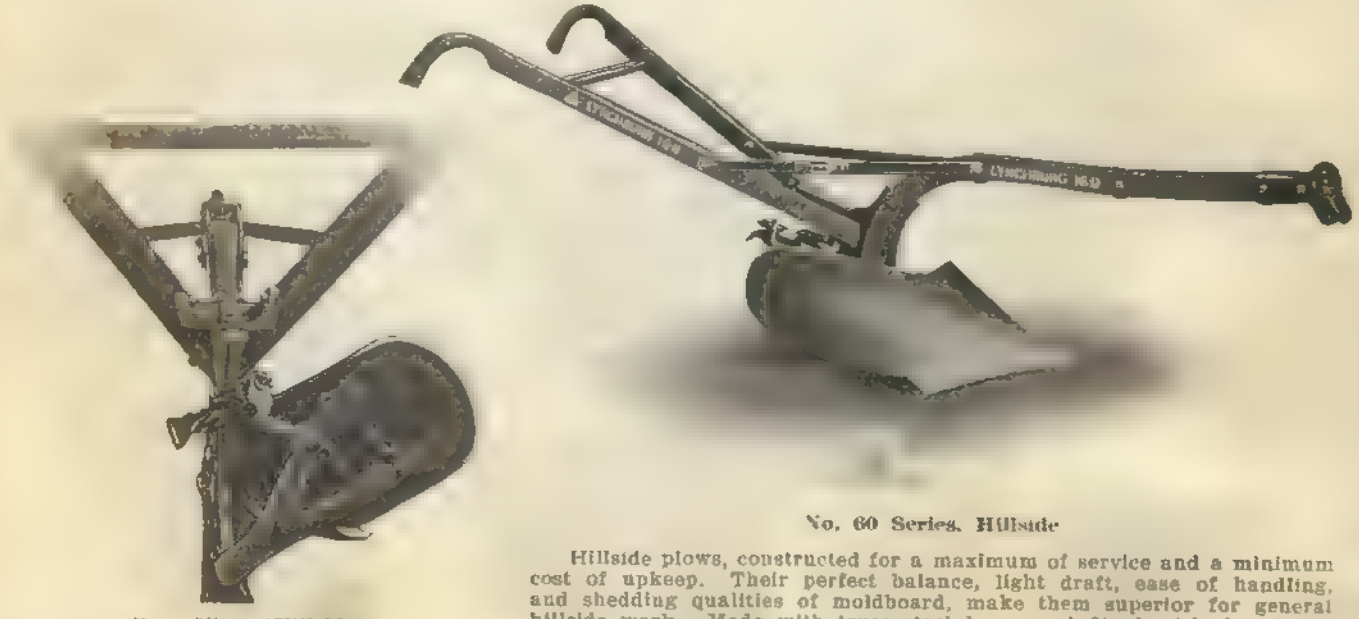
Landside view of the Lynchburg chilled plows, showing the long sloping landside, perfectly curved moldboard and cutter share

Moldboard Braces Direct to Standard

Examine the bracing of Lynchburg plows and see why they are the most rigid built. The moldboard is braced direct to the standard, giving greater strength and better clearance of trash. The moldboard handle is attached to malleable handle part fitted at factory, reducing possibility of moldboard breakage when tightening bolts.



Rear View (Level Land)



Rear View (Hillside)

Note the special handle bracing, truss steel beam and spring foot latch with adjustable tension. The detachable socket piece and the frog protect the moldboard from wear.

No. 60 Series, Hillside

Hillside plows, constructed for a maximum of service and a minimum cost of upkeep. Their perfect balance, light draft, ease of handling, and shedding qualities of moldboard, make them superior for general hillside work. Made with truss steel beam and fitted with detachable standard socket piece and spring foot latch

AUTOMOBILE WRENCH SETS

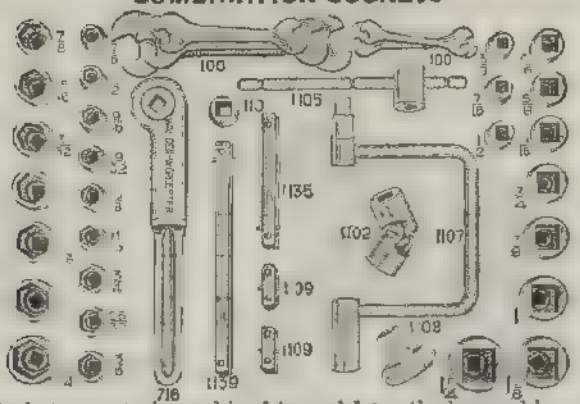
WALDEN WORCESTER COMBINATION SOCKETS



Sockets are steel, machined turned from the bar and broached accurately to size. Inside depth of socket ½ inch more than thickness of nut. All parts are machine finished to size.

Set consists of:

1 No. 716-12 inch ratchet wrench.
1 —No. 1135-5 inch extension bar.
1 No. 1139-9 inch extension bar.
1 No. 1104 combination "T" and offset wrench.
1 No. 1102 Universal joint.
1—No. 1178 brace socket wrench.
2 No. 1109 plug connectors.
2 —No. 1110 socket connectors.
16 hexagonal sockets, sizes 7/16, ½, 9/16, 5/8, 11/16, ¾, 13/16, 15/16, 7/8, 15/16, 31/32, 1, 1 1/16, 1 1/8 and 1 1/4 inches.
11 square sockets, sizes 5/8, 11/16, ½, 9/16, 5/8, 11/16, ¾, 7/8, 1, 1 1/8 and 1 1/4 inches.
1— No 100 set, 5 open end wrenches.
Size box 16x10x2 7/8 inches.

STEEL PLANES

STANLEY

New Stanley items with several new and distinctive features. These steel planes of the regular Stanley "Bailey" type of bench planes have a malleable iron, frog and lever cap, and a steel base. These combined features render the planes practically indestructible and give them an entirely new appearance. Knobs and handles are of selected rosewood.

No. R4564 Ratchet Wrench.....each $0 55

INTERCHANGEABLE STEEL SOCKETS

Interchangeable Steel Sockets. Sockets are machine made from the solid bar. Broaching depth is the thickness of the nut to be fitted, and broached ¼ inch over the size of the nut. Sockets are counter drilled, making extreme bolt use depth of socket ⅛ inch more than the thickness of the nut. The outside diameter of the socket size and taper have been designed to insure strength and service conditions. The broached end is countersunk slightly to relieve the square edges and to allow more rapid placing of socket on bolt head. All sockets are heat treated to toughen them.

WALDEN-WORCESTER SOCKET WRENCHES

DOUBLE END OFFSET WRENCHES

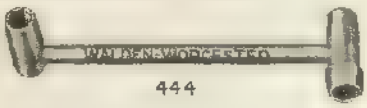
Three Sockets

No. 1620. Socket sizes, 5/8, 9/16, 1/2 inch. Length, over all, 9½ inches. ½ inch rod connects two sockets.
No. 1620 Double End Offset Wrench .....each $0 85



No. 444. Socket sizes, ½, 9/16, 5/8 inch. Length, over all, 9 3/16 inches.
No. 444 Double End Offset Wrench.....each $0 85

No. 5660. Socket sizes, 15/16, 7/8, 1 1/16 inch. Length, over all, 10½ inches.
No. 5660 Double End Offset Wrench.....each $1 10

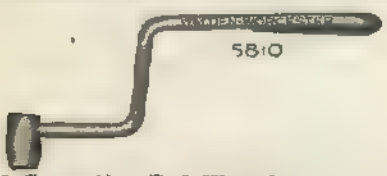
Four Sockets

No. 393. Socket sizes, 1 5/16, 1 1/16, 25/32, ¾ in. Length, over all, 10¾ inches.
No. 393 Double End Offset Wrench.....each $1 80

FLY WHEEL CAP SCREW WRENCH FOR FORD

No. 3822 Wrench. For Ford flywheel cap screws. Socket size, 1 1/16 inch. Length, over all, 11¾ inches.
No. 3822 Cap Screw Wrench.....each $0 70

CONNECTING ROD WRENCH FOR FORD



No. 5810 Connecting Rod Wrench for Ford. Fits all connecting rod nuts, including the fourth connecting rod. Socket size, 5/8 inch. Length, over all, 10 5/16 inches.
No. 5810 Connecting Rod Wrench.....each $0 60

DOUBLE END SPARK PLUG WRENCHES

Double End Spark Plug Wrench. Pressed steel and case hardened. Two sizes in one. 1/64-in. oversize of spark plug.
No. 2933. 7/8 and ¾ in..... each $0 45
No. 2937. 7/8 and 1 1/8 in..... " 45
No. 3137. 15/16 and 1 1/8 in..... " 45

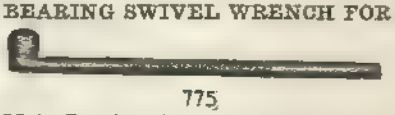
CARBURETOR AND GENERATOR WRENCH FOR FORD

No. 771 Wrench for Ford. 9/16-inch hex end designed to reach both flange bolt nuts with carburetor and intake manifold in place on engine. 5/8-inch hex end for generator gives sufficient length of shank to clear breather pipe and commutator. Length, over all, 9 7/8 inches.
No. 771 Carburetor and Generator Wrench....each $0 80

CONNECTING ROD SWIVEL WRENCH FOR FORD

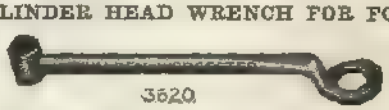
No. 774 Fourth Connecting Rod Swivel Wrench for Ford. Swivel action of the socket on the handle allows the use of handle at many angles. Useful also for both inlet and outlet water cylinder connection cap screws. Socket size, 5/8 inch. Length, over all, 13 3/4 inches.
No. 774 Connecting Rod Wrench.....each $0 90

MAIN BEARING SWIVEL WRENCH FOR FORD



No. 775 Main Bearing Swivel Wrench for Ford. Swivel action of socket on handle permits using wrench on front and center main bearing without taking out motor. Socket size, 9/16 inch square. Length, over all, 13¾ inches.
No. 775 Main Bearing Swivel Wrench.....each $0 90

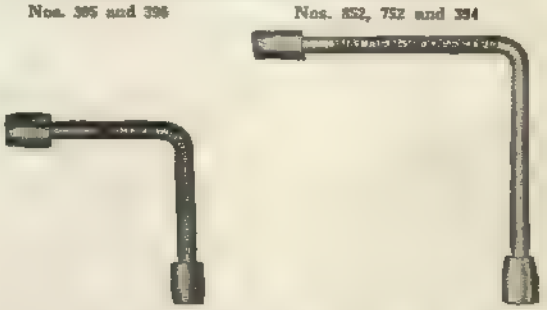
CYLINDER HEAD WRENCH FOR FORD



No. 3620 Spark Plug and Cylinder Head Wrench for Ford. Used also on water cylinder inlet and outlet, differential oil plug drain, transmission drain plug. Socket sizes, 15/16 and 5/8 inch. Length, over all, 11 inches.
No. 3620 Cylinder Head Wrench .....each $0 85

L TYPE WRENCHES, TWO SOCKETS

Nos. 395 and 396 Nos. 852, 752 and 394



No. 395 L Type Wrench. Socket sizes, ½, 9/16 inch. Shanks, 4x4 inches.....each $0 70
No. 396 L Type Wrench. Socket sizes, 3/8, 7/16 inch. Shanks, 4x4 inches.....each 70
No. 852 L Type Wrench. Socket sizes, 7/16, ½ inch. Shanks, 8x8 inches .....each 80
No. 752 L Type Wrench. Socket sizes, 9/16, 11/16 inch. Shanks, 8x8 inches.....each 80
No. 394 L Type Wrench. Socket sizes, ¾, 7/8 inch. Shanks, 8x8 inches.....each 85

Each	$6 30	7 50	8 40	9 15

Twenty-five in wood case.

BROAD CROSS CUT SAWS

Handles must be ordered separate from saws.

—BLUE GRASS—

Blue Grass Cross Cut Saws are made of the same extra quality materials and the same infinite care characterizes their production as with other Blue Grass tools.

The needs of the lumberman and the peculiarities of the different timbers have been carefully studied in order to make the Blue Grass Cross Cut saw a tool that in real use would respond readily and constantly to the demands of the user under any and all conditions.

A Blue Grass Cross Cut saws are ground an even gauge throughout the entire tooth edge and then tapered to an extra thin back, which insures quick cutting ease of operation, with just the right flexibility and stiffness to prevent buckling.

Each saw is beautifully polished and the set altogether a tool in a class by itself unequaled in appearance—unapproachable in performance, and covered from tip to tip with our guarantee.

Extra quality crucible spring steel, evenly tempered, polished and set ned. Ground gradually thinner from teeth to back, filed and set ready for use.

—BLUE GRASS—

Canadian, Lance Tooth, Perforated, 14 gauge at tooth edge, 19 gauge at center of back, extra thin back.

Fifty pair in wood box; wt per pair 1¾ lbs.

—BLUE GRASS—

Selected beechwood handle, thoroughly seasoned; plain finish; revolving washer; steel loop, with 3⅜ in. slot; malleable nut forms end cap, steel ferrule.

Per 100 Pair

No. 46—Length 11½ ins; diam 1⁵⁄₁₆ ins..$172 50

Fifty pair in wood box; wt per pair 1½ lbs.

—PINE KNOT—

Selected hardwood handle, thoroughly seasoned, black japanned cast iron ferrule and washer; malleable iron loop with 4 inch slot.

Per 100 Pair

No. 40—Length 13 ins, diam 1½ ins.....$120 00

Fifty pair in wood box; wt per pair 1 lb.

CLIMAX PATTERN

Hardwood handle, thoroughly seasoned, 2⅝ inch plain malleable iron clasp, malleable bolt, lock rivet and thumb nut.

Per 100 Pair

No. 7—Reversible; length 13 ins; diam 1¼ ins.....$91 50

100 pair in wood box; wt per pair 1½ lbs.

CROSS CUT SAW HANDLES

Hardwood handle, thoroughly seasoned, heavy japanned bell ferrule, and notched, revolving washer; malleable iron loop with 4¼ inch slot.

Per 100 Pair

No. 8—Length 10½ ins, diam 1¾ ins.....$132 00

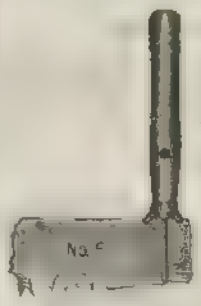
100 pair in wood box; wt per pair 2 lbs.

Hardwood handle, thoroughly seasoned; malleable iron ferrule, bracket and thumb nut, malleable iron loop with 4¼ inch slot.

Per 100 Pair

No. 5—Length 14 ins, diam 1¼ ins.....$150 00

Fifty pair in wood box; wt per pair 2 lbs.



Hardwood handle, thoroughly seasoned malleable iron ferrule and revolving washer malleable iron loop with 4¼ inch slot.

Per 100 Pair

No. 6—Length 10 ins; diam 1¼ ins.....$111 00

One hundred and fifty pair in wood box; wt per pair 1¼ lbs.

ATKINS

Selected hardwood handle, thoroughly seasoned; plain finish; japanned malleable iron clasp; steel bolt and malleable thumb nut.

Per 100 Pair

No. 22—Reversible; length 14 ins; diam 1¼ ins.....$141 00

Fifty pair in wood box; wt per pair 1¾ lbs.

CROSS CUT SAW HANDLES

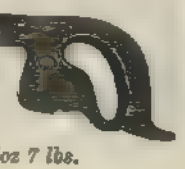
One Man, Supplementary.

Per Doz

No. 6-1M—Beechwood handle, varnished, malleable iron ferrule, shank and hook with rivet length 6 ins.....$6 00

One doz in cardboard box; wt per doz 4 lbs.

One Man, Regular.



Per Doz

No. 2-0M—Beechwood, plain sides and varnished edges, not bored and without screws; length 8½ ins.....$8 70

One doz in cardboard box; wt per doz 7 lbs.

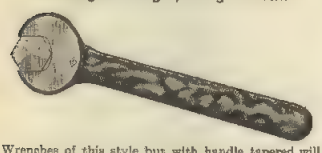
Williams Drop Forged Steel Wrenches

The steel from which these drop forged wrenches are made is selected for this particular purpose. Every detail of forging, milling and finishing is given closest attention. All drop forged steel wrenches will be furnished under the following headings.
"Unfinished"—Plain forging, not hardened with openings either milled or unmilled. Milled openings sent unless otherwise ordered.
"Semi-Finished"—Edges ground, case hardened, heads bright, openings milled.
"Finished"—Openings milled, ground, polished, case-hardened, lacquered, with heads finished bright.
These wrenches can also be furnished in full finish.
Unless otherwise ordered we will fill all orders with Semi-Finished Wrenches.

Engineers' Wrenches

15 Degree Angle, Single Head



Wrenches of this style but with handle tapered will be furnished on orders for the larger sizes, beginning with No. 11.

The following have hole in end of handle.

Williams' Drop Forged Steel Wrench Display Boards

For US and S.A.E. Nuts and Cap Screws

Styles A and B

Styles E and F

Style S

Style "A" For Garage and Auto Supply Houses

Length 54 in. Weight of board and 102 wrenches 56 pounds, consisting of 6 wrenches of each of the following numbers:

Engineers' Wrenches—15° angle Nos. 21, 25, 29, 23.
Check Nut or Thin Wrenches—15° angle, Nos. 623, 627, 631, 635.
High Service Wrenches 22½° angle, Nos. 77S, 79S, 81A, 83A.
Cap Screw Wrenches—15° angle, Nos. 721, 725A, 727, 728, 731B.
Price, complete.... **$80.64**

Style "B" for Machine Shops and Mfg. Plants

Length 54 in. Weight of board and 120 wrenches 72 pounds, consisting of six wrenches of each of the following numbers:

Engineers' and Cap Screw Wrenches—15° angle, Nos 23, 725, 25, 27C, 28S, 731A, 34, 736.
Set Screw Wrenches—22½° angle, Nos. 525, 527, 529, 531.
S Wrenches with Flat Handle—22½° angle, Nos. 661A, 662B, 663G, 664B.
Textile Machine Wrenches—22½° angle, Nos. 260B, 761G, 763A, 764B.
Price, complete.... **$96.60**

Style "E" for Machine and Auto Work

Size 8x27 in. Weight of board and 36 wrenches 14 pounds, consisting of 3 wrenches of each of the following numbers:

Engineers' Wrenches—15° angle, Nos. 23, 725, 725B, 25, 727, 27, 29, 731A.
Light Service Wrenches—22½° angle, Nos. 75B, 77B, 79C, 81A.
Price, complete.... **$23.94**

Style "F" for Farm, Machine and Auto Work

Size 8x27 in. Weight of board and 36 wrenches 13 pounds, consisting of 43 wrenches of each of the following numbers:

Engineers' Wrenches—15° angle, Nos. 23, 725, 725B, 25, 227, 27, 29, 731A.
Check Nut or Thin Wrenches—15° angle, Nos. 623D, 626S, 630E, 632X.
Price, complete.... **$23.58**

Style "S" Socket Wrench Board

Size 19x47 in. Weight of board and 66 wrenches 40 pounds, consisting of 3 wrenches of each of the following numbers:

Offset Pattern for Hex nuts and cap screws. Nos 263D, 264A, 265D, 266D, 267A, 267D, 268A, 268D, 269A, 270A, 270D.
Straight Pattern with pin handle Nos. 963D, 964A, 965D, 966D, 967A, 967D, 968A, 968D, 969A, 970A, 970D.
Price, complete.... **$35.26**

Williams Drop Forged Steel Wrenches

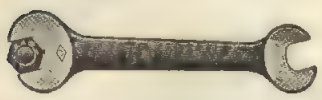
Heavy Cap Screw Wrenches

15° Angle, Double Head

For Hexagon Head Cap Screws



This is a line of extra weight designed to withstand the strain in turning cap screws, and is considerably stronger than the screws themselves. *For smaller sizes and lighter cap screw wrenches, see other pages

In stock with openings for U. S. Standard Hexagon Head Cap Screws; Whitworth Standard, Metric Measure or special openings milled to order.

POWER AND ELECTRIC BLOWERS

CHAMPION POWER

NOS. 0 TO 000

Heavy steel shaft, strongly made and perfectly balanced. For forge fires, conveying dust from emery wheels, ventilating, etc. No platform or other frame is required, but they can be fastened direct to the wall, ceiling or floor and blast made to discharge in any direction. Dimensions: No. 0, height 10 inches; opening, for 2-inch pipe; capacity, one forge fire. No 00, height, 14 inches; opening, for 3-inch pipe; capacity, two forge fires. No. 000, height, 17 inches; opening, for 4-inch pipe; capacity, three forge fires.

No.	Weight	Each
0	15 lbs	$15.00
00	30 lbs.	20.00
000	50 lbs.	25.00

One in a crate.

CHAMPION ELECTRIC

No. 50

One fire, variable speed, steel pressure. For all kinds of general blacksmith work. The 12-inch steel fan case is built for high speed and high pressure blast. The blower is furnished with a Universal motor wound for both alternating and direct current Pressure from 2,000 revolutions per minute, 110 volts, with detached totally enclosed regulator with six speeds with attachment cord and plug to fit any light socket. The Universal motor is built with a hammered steel shaft, phosphor bronze bearings, self-aligning, commutator of hard drawn copper with 24 bars and large flat brushes and silk-covered wire of the best insulation Fan, 6 inches in diameter; outlet for 3-inch pipe, base, 7x9 inches

No.	Weight	Each
50	70 lbs.	$60.00

Note—Motors for 220 volts can be furnished from factory only.

One in a case.

BLACKSMITHS' BLOWERS

CHAMPION

No. 400

Ball-bearing. Patent direct drive, high speed spiral gearing, with "whirlwind" blast, anti-clinker Tuyere iron and piping complete. All working parts are made from the best tool steel and phosphor bronze, enclosed in an oil-tight casing. The blast is produced by turning the crank in either direction.

No.	Diam. fan	Weight	Each
400	12 in.	150 lbs.	$47.00
Whirlwind Tuyere Irons			15.00

One in a crate.

TROJAN

No. 500

Cog gearing. All cogs and gearing are in an oil-tight casing, with Tuyere and piping complete. The blast is produced by turning the crank in either direction.

No	Diam. fan	Weight	Each
500	12 in	100 lbs.	$30.00

One in a crate.

Note—No allowance for Tuyere Irons when Blowers are sold "without Tuyere Irons."

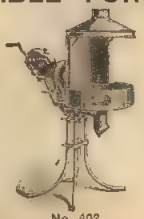
STEEL PORTABLE FORGES

NOS. 401 AND 401½

Ball-bearing. Adapted for government use, street and steam railroads, bridge and tank builders, miners and prospectors, boiler repairers, or any portable work requiring compactness. No. 401, with shield, hearth 18 inches; diameter fan, 9 inches; height, 30 inches. No. 401½, with shield, hearth 22 inches; diameter of fan, 9 inches; height, 30 inches.

No.	Weight	Each
401	115 lbs	$47.00
401½	120 lbs	52.00

One in a crate.



No. 402

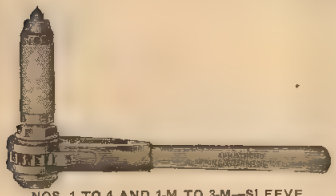
Ball-bearing. Adapted for tool makers, jewelers, bicycle repairers, tempering tools, tank builders, miners, prospectors, repairing on boilers, steam and street railroads. With half hood, hearth, 18 inches; diameter of fan, 9 inches; height, 30 inches.

No.	Weight	Each
402	120 lbs.	$45.00

One in a crate.

RATCHET DRILLS

ARMSTRONG IMPROVED PACKER



NOS. 1 TO 4 AND 1-M TO 3-M—SLEEVE

NOS. 1-B AND 2-B—BOILER

All steel, hardened throughout. Spindle bears on a strong collar nut. Extra strong teeth and pawl.

No.	Length	Size of drill socket	Head	Feed	Wt. each	Each
1	10 in.	No. 1 square taper	6 in.	2¼ in.	4 lbs.	$ 8.75

POWER BENCH DRILLS

CHAMPION

No. 0

For light and rapid drilling. Particularly adapted for garages, pattern makers and machine shops. Strictly high grade, powerful and well built. The top of the drill base is planed off to use as a table when the regular drill table is turned to one side, thus giving a space of 16 inches between the chuck and base table. The upper cone pulley is between two bearings to equalize the strain and increase the power. The counter shaft is supplied with a belt shifter on the tight and loose pulley.

Drills to center of 9-inch circle. Bores holes up to ⅝-inch diameter. Up and down run of spindle, 3 ¼ inches; up and down run of table, 9 inches. Greatest distance from table to spindle, 10 inches; greatest distance from planed base to spindle, 16 inches. Diameter of column, 2 ½ inches. Size of tight and loose pulleys, 4x1 ¾ inches. Size of large cone pulley, 4 ½x1 ½ inches. Size of small cone pulley, 3x1 ½ inches. Spindle is bored with No. 1 Morse taper hole. Height, 32 inches.

COMBINATION WRENCH SETS

Machine turned sockets, accurately broached 1/64 inch oversize

Each

No. 10—Set, in heavy wooden box with hinged cover, mahogany finish, weight per set 24 lbs. $25 00

Contents of set:

Contains 9-in. ratchet wrench, 2 extension bars, brace wrench, Universal joint, 2 spark plug sockets, 5 open end thin wrenches, pliers, combination tee and offset handle, double end screw driver, valve grinding attachment, cotter pin puller, 16 hex. sockets, sizes 7/16, 1/2, 9/16, 5/8, 11/16, 3/4, 13/16, 7/8, 15/16, 1-in., 1 1/16, 1 1/8, 1 1/4-in., and 11 square steel sockets, sizes 7/16, 1/2, 9/16, 5/8, 11/16, 3/4, 13/16, 7/8, 1 1/16, 1 1/8-in.

One set in a box.

Desirable for garage or shop use.

Each

No. 8—Set, complete with ratchet wrench, sockets, extension bars, etc., in wooden box, weight per set 13 5/8 lbs. $16.80

Contents of No. 8 Set:

16 Hexagon machined steel sockets, sizes 3/8 to 1 1/4-in. inclusive.
3 Machined steel square sockets, sizes 7/16, 1/2, 9/16-in.
1 Ratchet wrench, 9-in. handle
2 Extension bars, 6 and 10 inches long
1 Universal joint
5 Open end wrenches
1 Combination tee and offset handle
1 Spark plug socket double end

For Ford owners. Will cover all standard nuts and bolt heads.

Each

No. 4—Set, complete with ratchet wrench, sockets, universal joint and extension bar, in wooden box, weight per set 5 5/8 lbs. $9.15

Contents of No. 4 Set:

7 Hexagon machined sockets, sizes 1/2, 7/16, 9/16, 11/16, 3/4, 13/16, 15/16-in.
1 Square machined socket, 7/16-in.
1 Ratchet wrench, 9-in. handle
1 Universal joint
1 Extension Bar

Desirable for car owners.

Each

No. 6—Set, complete with ratchet wrench, sockets, extension bar, etc., in wooden box, weight per set 9 1/2 lbs. $13.40

Contents of No. 6 Set:

15 Hexagon machined steel sockets, sizes 3/8 to 1 1/4-in. inclusive
1 Ratchet wrench, 9-in. handle
1 Universal joint
1 Extension bar, 8-in.
1 Combination tee and offset handle.

Small set for automobile, motorcycle, etc.

Each

No. 2—Set, complete with sockets, extension bar and combination tee and offset handle, weight per set 2 1/2 lbs. $3.25

Contents of No. 2 Set:

6 Hexagon machined sockets, sizes 1/2, 7/16, 9/16, 11/16, 3/4 and 7/8-in.
1 Combination tee and offset handle
1 Extension bar, 8-in.

One Set in a Box.

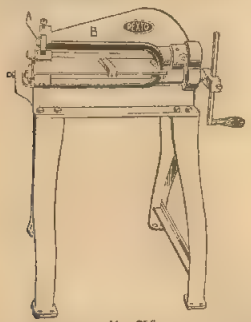
RAPID SLITTING SHEARS



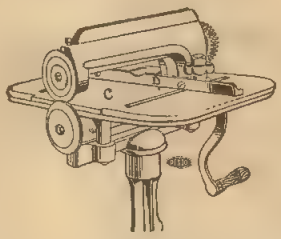
No. 255

These shears provide a rapid means for slitting iron used in cornices, furnaces, blow pipes, ventilation work, etc. Will conveniently cut irregular curves and circles in a small fraction of the time required by ordinary snips and bench shears. Cutters forged from special high grade tool steel, properly hardened and tempered; have two cutting edges, making them reversible. The crank is adjustable to different leverages, bearings adjustable to take up wear of cutter, cutting head compact construction, mounted on heavy cast iron legs. Capacity 16 gauge iron and lighter. Diameter cutter, 3⅜ inches; depth cutting head to gauge, 18 inches, to frame, 19 inches; size table, 20x8 inches.

No.	Weight	Each
255	330 lbs.	$137.50

All the above, one in a crate.

ROTARY SLITTING SHEARS

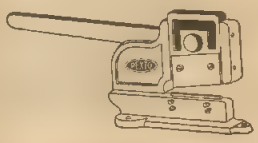


No. 250

Rotary shears, solid frame, and easily adjusted. Forged steel cutters scientifically designed and tempered. **Carefully and substantially built and in every way thoroughly reliable.** Capacity 20 gauge iron and lighter. Diameter cutters, 3 inches; depth cutting head to gauge, 9 inches; to frame, 10⅛ inches. Will cut as narrow as ½-inch strip.

No.	Weight	Each
250	100 lbs.	$75 00

CUT OFF SHEARS

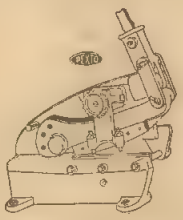


No. 253

Eccentric lever. Capacity iron or steel, ⅛-inch and lighter. Length of blade, 3⅛ inches; length of bed, 10½ inches; height, 6½ inches; length over all, including lever, 18 inches.

No.	Weight	Each
253	17 lbs.	$23.50

LEVER SLITTING SHEARS



No. 0296

For slitting heavy sheets. Capacity 10 gauge iron and lighter. Semi steel frame. A serviceable shears for slitting sheet iron in any length or width and for cutting light narrow bars ⅞ inch square and ¼x1½ inches. Length of cutting blades, 7¾ inches; length gauge rod, 14½ inches.

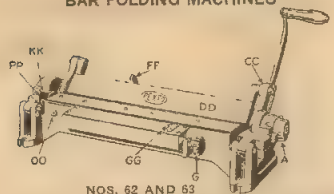
No.	Weight	Each
0296	175 lbs.	$100.00

All the above, one in a box.

SHEET METAL WORKERS' MACHINES

PEXTO

BAR FOLDING MACHINES



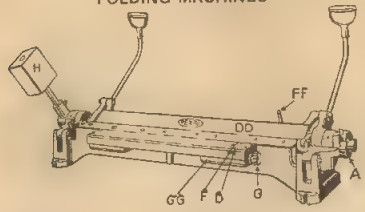
NOS. 62 AND 63

Same general description as No 055 but of smaller capacities. Will form closed or open locks ⅛ to 1 inch open locks to receive work up to ¼-inch diameter. Capacity ⅝-inch locks and wider on 22 gauge iron and lighter ⅛ inch locks and wider on 24 gauge iron and lighter, ⅜-inch locks and wider on XX tin

No.	Size	Weight	Each
62	20 in	140 lbs. . .	... $ 87.50
63	30 in	220 lbs . .	115.00

Loose.

FOLDING MACHINES



No. 055

For folding or edging sheets or strips of sheet iron, soft steel, brass and copper. Adapted for forming the edges of metal at various angles to form locks and square joints, and to turn round edges for inserting wire. Gauge is adjustable and regulates the width of fold by turning gauge screw at right end of machine. Adjustable stop permits forming of any desired angle in addition to regular square or bevel stops. Gripping jaw clamps material securely, guaranteeing forming of square joints or angles, narrow or wide locks of uniform width the entire length. Capacity ⅝-inch locks on 20 gauge iron and lighter; ⅞-inch locks on 22 gauge iron and lighter; length, 37 inches. Will form closed and open locks, ⅛ to 1 inch

No.	Weight	Each
055	420 lbs	$190.00

Loose

SHEET IRON FOLDERS

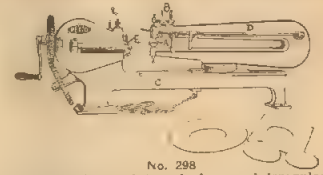
No. 2

Capacity, 22 gauge iron and lighter. Will form locks ⅛ to ⅝-inch. The most inexpensive, practical and durable sheet iron folder for ordinary use.

No.	Length	Weight	Each
2	30 in.	105 lbs.	$35.00

Loose.

RING AND CIRCULAR SHEARS



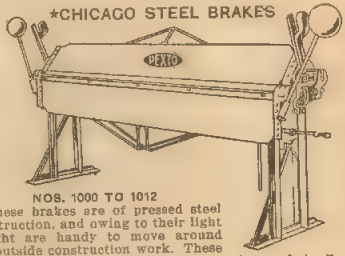
No. 298

For cutting circles or internal rings and irregular curves Quick-acting eccentric lever holds work firmly and insures accurate cutting Permits clamping and removing of blanks with greater rapidity than old style crank screw method. Tail of bed graduated in inches and fractions for quick setting Angular position of cutters provides clean cutting on the inside as well as the outside of circle. Capacity 20 gauge iron and lighter. Diameter cutters, 1⅝ inches; clamping discs, 2¾ inches; depth cutting head to gauge, 9¼ inches; to frame, 10 inches; of circle arm, 16¼ inches. Will circle from square blanks 3¼ to 22 inches; will cut rings as small as 3¼ inches inside and as large as 22 inches outside diameter

No.	Weight	Each
298	200 lbs.	$120.00

One in a box.

★CHICAGO STEEL BRAKES



NOS. 1000 TO 1012

These brakes are of pressed steel construction, and owing to their light weight are handy to move around for outside construction work. These are the most inexpensive brakes that the market offers

NOS. 1000 TO 1003

Capacity, 18 gauge iron and lighter.

No.	For sheets width	Weight	Each
1000	60 in.	750 lbs	$260.00
1001	72 in.	800 lbs.	290.00
1002	96 in.	1000 lbs.	330.00
1003	120 in	1900 lbs.	600.00

NOS. 1004 TO 1008

Capacity, 16 gauge iron and lighter

No.	For sheets, width	Weight	Each
1004	36 in.	400 lbs.	$200.00
1005	48 in.	500 lbs.	230.00
1006	72 in.	1200 lbs	370.00
1007	96 in	1500 lbs	450.00
1008	120 in.	2500 lbs	700.00

NOS. 1009 TO 1012

Capacity, 14 gauge iron and lighter.

No.	For sheets, width	Weight	Each
1009	36 in.	650 lbs.	$250.00
1010	48 in.	800 lbs.	300.00
1011	96 in.	2000 lbs.	600.00
1012	120 in.	3000 lbs.	840.00

Furnished with one forcing bar and five formers for making circular and semi-circular bends. Size of formers, ⅝, 1, 1⅝, 2¼ and 3 inches.

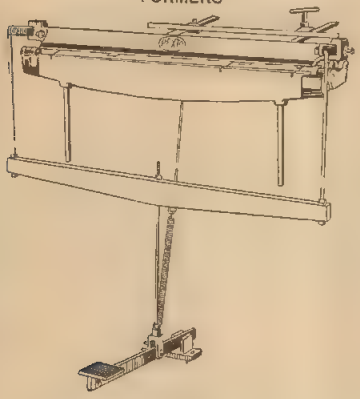
★Shipments of these brakes are made from Chicago.

Loose

SHEET METAL WORKERS' MACHINES

PEXTO

SQUARE AND RECTANGULAR BOX AND PIPE FORMERS



No. 433

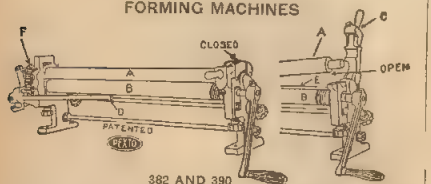
A machine of simple construction for forming the bodies of square and oblong cans, heater pipe, boxes, etc., with either lapped or locked side seams. A depression of the foot treadle clamps the material. The folding bar is brought up and the bend made. The work forms around the clamping bar. Sheets can be formed at right angles or less. All parts are smoothly and accurately machined and finished, well proportioned to their size and for the work they are intended to do. Smallest square pipe that can be formed, 3 inches. Capacity, 26 gauge iron and lighter.

No.	For sheets, width	Weight	Each
433	30 in.	90 lbs.	$50.00

Furnished complete with gauge equipment.

One in a box.

FORMING MACHINES



382 AND 390

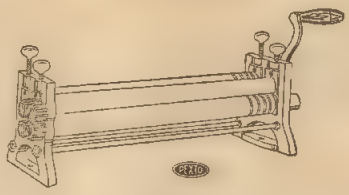
Slip roll pattern. Rolls hard steel, smoothly finished and free from indentations, with grooves to allow forming of work previously wired. Machine cut steel compensating gears. Formed work readily slipped off the end of rolls, a feature which also aids in forming of pipe from a flat sheet with a lock-seam, and is an advantage in forming pipe of very small diameters. Capacity: No. 382, 22 gauge and lighter; No. 390, 16 gauge and lighter.

No.	Rolls	Weight	Each
382	31x2 in.	185 lbs.	$ 60.00
390	37x2½ in.	390 lbs.	175.00

One in a box.

COMPENSATING GEAR FORMERS

SOLID HOUSINGS

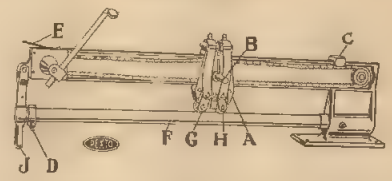


No. 373

Plain pattern. Machine cut compensating gears. Work slipped from machine over the rolls. Rolls hard steel, smoothly finished and free from indentations. Grooves cut in rolls to allow finishing of work previously wired. Capacity, 22 gauge iron and lighter.

No.	Rolls	Weight	Each
373	31x2 in.	140 lbs.	$50.00

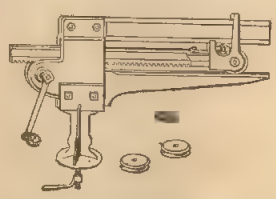
GROOVING MACHINES



No. 518

Improved automatic groover, with flattening attachment. Capacity, 24 gauge iron and lighter. Furnished with three grooving rolls—one each ⅛, 5/32 and ⅞-inch grooves and one flattening roll. Will groove work 30 inches long. Smallest pipe that can be grooved, 2 inches.

No.	Weight	Each
518	200 lbs.	$110.00



No. 502

For tinware and small work. Capacity, 24 gauge iron and lighter. Will groove work 20 inches long. Size of grooving horn: large end, 3 inches; smallest end, 1⅝ inches. Furnished with three grooving rolls, ⅛, 5/32 and 3/16-inch.

No.	Weight	Each
502	110 lbs.	$57.00

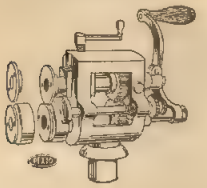
All the above, one in a box.

SHEET METAL WORKERS' MACHINES

PEXTO

TURNING MACHINES

COLUMBIAN PATTERN



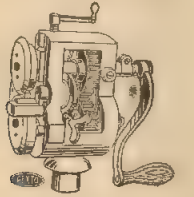
NOS. 540 TO 542

Columbian pattern. Capacity, 22 gauge iron and lighter. Solid open frame combines every modern improvement. Nos. 540 and 541 will take wire $\frac{3}{16}$ to $\frac{1}{4}$-inch in diameter; No. 542 will take wire $\frac{1}{8}$ to $\frac{3}{16}$-inch in diameter. Diameter rolls—No. 540, 1½-inch; No. 541, 2$\frac{3}{16}$-inch; No. 542, 3-inch. Furnished complete with one extra pair of thick turning rolls and standard

No.	Weight	Each
540	22 lbs.	$32.50
541	26 lbs.	32.50
542	31 lbs.	35.00

WIRING MACHINES

COLUMBIAN PATTERN



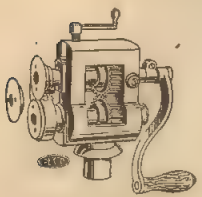
No. 525

For working metal around wire after seat has been prepared with the turning machine. Capacity, 22 gauge iron and lighter. Diameter rolls, 3 inches; will receive wire up to $\frac{1}{4}$-inch in diameter. Complete with standard.

No.	Weight	Each
525	31 lbs.	$37.50

BURRING MACHINES

COLUMBIAN PATTERN



NOS. 576 AND 577

For burring or flanging bottoms and bodies of vessels, etc. Capacity, 22 gauge iron and lighter. No. 576 has 1½-inch rolls; widest flange or burr that can be turned, $\frac{3}{4}$-inch. No. 577 has 2$\frac{1}{16}$-inch rolls; widest flange or burr that can be turned, ¼-inch. Complete with one extra upper roll and standard.

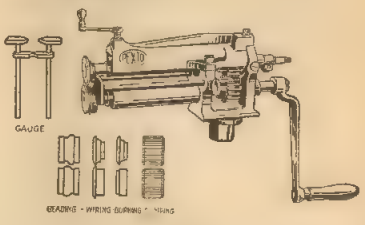
NOS. 576 AND 577

No.	Weight	Each
576	21 lbs.	$27.50
577	25 lbs.	30.00

All the above, one in a wooden box.

ALLINWON ROTARY MACHINES

Five Operations with One Machine.



No. 622

The introduction of this combination machine does not substitute the use of separate machines for different operations. For the active shop there is no economy found in one machine that will do the greatest number of operations. The changing of rolls many times a day is a time killer. Where several mechanics are employed machines should be set up ready for use. However, for the one man shop where a set of machines are idle a great part of the time a combination machine of this type will answer all purposes

Depth throat to frame, 6¼ inches; depth throat to gauge, 5½ inches. Width crimping rolls, 1$\frac{7}{16}$ inches; width beading rolls, 1$\frac{7}{16}$ inches. Diameter turning and wiring rolls, 1⅞ inches. Smallest wire that can be used with turning rolls, 11 gauge. Wiring rolls will receive wire up to 5 gauge. Widest flange or burr that can be turned with burring rolls, $\frac{3}{4}$-inch Distance between shaft centers, 1⅞ inches. Packed one in a box, weight approximately 60 lbs

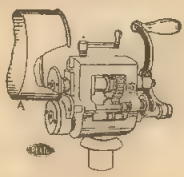
Capacity: Using crimping or beading rolls, 26 gauge iron and lighter; using turning, wiring or burring rolls, 24 gauge iron and lighter.

Note—Furnished complete with standard and five pairs of rolls, viz.: crimping, beading, turning, wiring and burring and one extra gauge. Extra special rolls quoted on receipt of specifications. Provided with forward and reverse drive.

No.	Weight	Each
622	60 lbs.	$65.00

One in a wooden box.

ELBOW EDGING MACHINES



No. 551

For edging elbow sections. Capacity, 24 gauge iron and lighter. Diameter rolls, 2⅛ in. Complete with one set elbow edging rolls and standard.

No.	Weight	Each
551	25 lbs.	$33.00

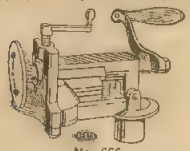
Note—Section corresponding to that in illustration is edged over the lower roll. Special elbow edging rolls quoted on application.

One in a wooden box.

SHEET METAL WORKERS' MACHINES

PEXTO

SETTING DOWN MACHINES



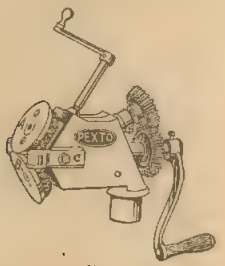
No. 556

For setting down seams in tinware, etc., preparatory to double seaming. Capacity, 24 gauge iron and lighter. For seams up to ⅛-inch. Complete with standard.

No.	Weight	Each
556	23 lbs.	$45.00

One in a wooden box.

With Inclined Faces



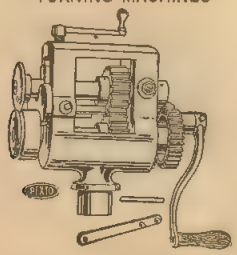
No. 561

For setting down seams preparatory to double seaming, and for closing seams in other work. Capacity, 24 gauge iron and lighter, for seams up to ⅜-inch. Complete with standard

No.	Weight	Each
561	60 lbs.	$45.00

One in a case.

TURNING MACHINES



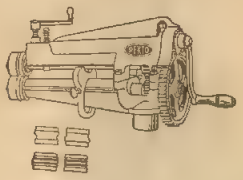
No. 0547

Capacity: 18 gauge iron and lighter. Made from heavy patterns. Machine cut, steel connecting gears; driving gears cut from solid cast iron. Frames extra heavy. Geared 2 to 1; diameter rolls 3¼ inches. Will take wire ⅛ to ⅝-inch. Complete with one set of rolls and standard.

No	Weight	Each
0547	130 lbs.	$80.00

One in a wooden box.

BEADING MACHINES

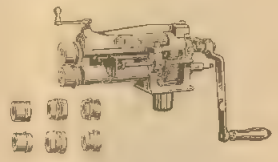


No. 617

Capacity, 20 gauge iron and lighter. Furnished with three pairs regular rolls and bench standard. Depth of throat 12 inches. Size, single bead in rolls, ⅜-inch; ogee bead in rolls, 1 inch; triple bead in rolls, 1 inch.

No.	Weight	Each
617	165 lbs.	$90.00

One in a case.



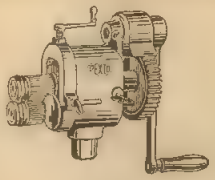
No. 620

Capacity, 24 gauge iron and lighter. Depth of throat, 5½ inches. Furnished with four pairs of rolls—one pair each ogee, ⅝-inch; triple, ⅜-inch and single, ⅛ and ¼-inch. Complete with standard.

No.	Weight	Each
620	50 lbs.	$45.00

One in a case

CRIMPING AND BEADING MACHINES



No. 585

For facilitating the putting together of pipe. Capacity 20 gauge iron and lighter. Spiral crimping rolls. Adjustable for two speeds—geared, for heavy work and direct for light iron. Width crimp rolls, 1¾ inches; bead rolls, 1 inch; size ogee bead, ½-inch. Complete with standard and one pair blank collars to substitute for beading rolls when crimping alone is desired

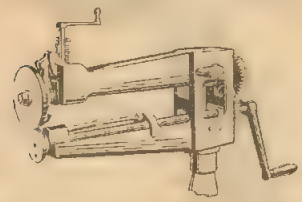
No	Weight	Each
585	65 lbs.	$45.00

One in a wooden box.

SHEET METAL WORKERS' MACHINES

PEXTO

DOUBLE SEAMING MACHINES



NOS. 644 AND 646

For general use. Especially suitable for trade which desires machine for small work. Capacity, 28 gauge iron and lighter. Size of lower face determines smallest size bottom that can be double seamed. Extra discs are not required with this machine. No. 644 will receive work 15½ inches deep, size lower seaming face, 2¾ inches. No. 646 will receive work 10 inches deep, size lower seaming face, 2¾ inches.

No.	Weight	Each
644	100 lbs.	$105.00
646	65 lbs.	95.00

One in a case.

MACHINE STANDARDS

No. 975—REGULAR OFFSET No. 976—WIRING OFFSET

Size of hole, 1⅝ inches. Height over all, from bench, 9¾ inches.

No. 969

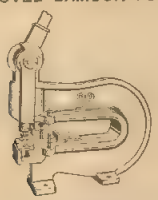
HOLDALL REVOLVING MACHINE STANDARDS

A labor-saving installation that should be found in every up-to-date shop. Provides means of operating small machines to the highest degree of efficiency. Revolving turret holds four machines. Four operations can be completed without changing position. Four machines always ready for action. Designed with ample room for accomodating one to four operators. Occupies only 31 inches of floor space. Hand lever holds revolving turret in a fixed stationary position. Adjustable machine holders that raise, lower or swivel suiting machine to the convenience of short or tall operators. A distinct advantage in working large members in that it provides 40 inches more room from the floor to the working edge of tools of machine, a feature that cannot be obtained in the use of machines on wooden benches on a fixed height. Lower stationary turret holds four additional machines, arranged for quickly interchanging with any machine set in upper revolving turret. This turret also provides handy shelf for holding oil cans, tools, etc. Two additional reserve machine posts out of the way supported on brackets to hold any large bench machine that will not fit in the holes provided for the small machines. Ten posts in all go with each standard.

No	Weight	Each
969	268 lbs.	$95.00

One in a crate.

IMPROVED SAMSON PUNCHES



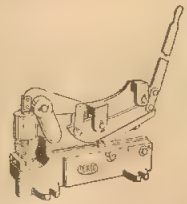
No. 675

With adjustable gauge. Capacity: With stay bolts in place, 9 gauge iron; with stay bolts removed, 12 gauge iron. Depth of throat to frame, 15 inches. Depth of throat to gauge, 14½ inches. Will center sheets, with stay bolts in place, 7 inches wide; with stay bolts removed, 30 inches wide. Furnished with three dies and punches: ⅛, ¼ and ⅜-inch.

No.	Weight	Each
675	160 lbs.	$70.00

One in a case.

COMBINED SHEARS AND PUNCH



No. 679

Cutting capacity, iron ⅛-inch thick or ¼x¼-inch. Will punch iron ¼-inch thick, center sheets 5½ inches wide. Length cut, 4¾ inches.

No.	Weight	Each
679	140 lbs.	$75.00

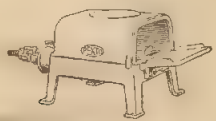
GAS FURNACES



No. 333

Double burner. Sheet iron top. Brick lined.

They burn freely with a blue flame of intense heat. Without the use of a blower they will burn natural or artificial gas. The burner is fitted with a regulator of improved type, on the shutter principle for regulating the proper mixture of air and gas for the best results. Hole in top provided to receive lead pot. For a direct pipe connection, hose nipple is easily removed. All double burner furnaces have a sheet steel and asbestos guard underneath the burners to prevent burning of bench and which further serves to retain the heat.

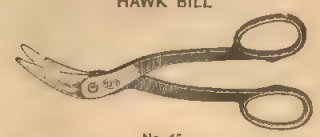
S-414	14 in.	4 in.	3 lbs.	2.30

One in a display box.

HAWK BILL



No. 15

Forged steel blades blued. Polished steel. Blades. Blades are hawk bill shape and have a clearance bevel between the cutting edges which permits the blades to turn a sharp corner or work around a small curve without buckling. The blades being unusually narrow and ground to extreme narrow points, are adapted to cutting openings in pipe or cylinders for furnace work, thimbles, etc. They are especially adapted for cornice work in tight places.

Work can be cut on a straight line and they will cut circles of smaller dimensions than any other snip. Will cut 28 gauge iron

No.	Length cut	Over all	Wt. each	Each
15	3 in.	11¾ in.	1¼ lbs.	$6.00

One in a carton.

BULL DOG

NOS. 20-C TO 30-C

Cast iron blades, hardened. Japanned handles. Polished blades

No.	Cuts	Length	Wt. each	Each
20-C	2 in.	10 in.	12 ozs.	$0.70
25-C	2½ in.	11 in.	1¼ lbs.	.80
30-C	3 in.	11½ in.	1½ lbs.	.90

Six in a box.

SUNSET

No. 2 POCKET NOS. 2½ AND 3 HOUSEHOLD

Solid drop forged steel, tempered and hardened. Hollow ground blades, polished. Japanned handles.

No.	Cuts	Length	Wt. each	Each
2	2 in.	7 in.	8 ozs.	$0.90
2½	2½ in.	10 in.	1 lb.	1.20
3	3 in.	12½ in.	1¼ lbs.	1.40

Six in a box

MECHANICS' SNIPS

COMPOUND LEVER

Require only from one-fourth to one half the force used on ordinary snips. Cut with practically the same ease the entire length of blade. Made of solid crucible steel, carefully tempered for the work required. Guaranteed perfect and free from flaws.

No. 7-CL

Vest pocket size.

POCKET CUTLERY

"HAMMER BRAND"

This is the New York Knife Company's factory brand and is one of the best known and best advertised make of pocket knives in the United States. Their factory is the largest and most complete in the country. Their patterns are the latest and their finish is excellent. The knives are all hand-honed after finishing, which makes them sharp and ready for use, and which overcomes the general complaint on inferior American-made knives. English Wardlow Steel is used exclusively in the blades and none but the most experienced and skilled workmen are employed. The knives are guaranteed both by the factory and ourselves against defect of temper, flaws or workmanship. Hammer Brand pocket knives are made with the old fashioned idea of Quality first.

Extra blades, per pair				

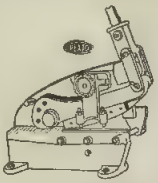
NOTE—No. 122B furnished with short front arms. Other numbers are furnished with long front arms. No. 137B and No. 142B have hold-down attachment. Comple'e gauge equipment furnished with all numbers. Side tables and wood shelf will not be sent unless specified.

SLITTING SHEARS

These shears are constructed on entirely original principles. They surpass all other shears in the variety of work performed. A splendid, practical shears for range manufacturers and for general use in car shops, automobile plants and other shops where a variety of straight and irregular cutting is being done. They often prove a desirable substitute where work is too large or not of a sufficient quality to warrant the use of costly dies.

Capacity—18 Gauge Iron and Lighter

New No.	248A
Length cutting blades, in.	6½
Depth cutting head to gauge, in.	9½
Depth cutting head to frame, in.	10
Size of table, in.	12x15½
Shipping weight approximately, lbs.	165
Each	$
Extra cutter, per pair	



These shears are commended for the slitting of sheets, length or crosswise, with ease up to their full rated capacity. They are patterned so as to allow sheets to pass freely, and proportioned so as to obtain the greatest strength and durability. They are furnished with or without rod cutting attachment.

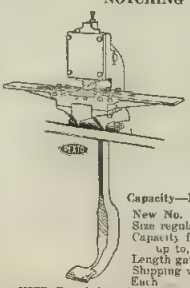
It must be remembered that the service a lever shears will give depends greatly on the care exercised in keeping up the adjustments provided for the blades and in keeping the blades sharp.

Capacity—No. 10 Gauge Iron and Lighter

Will cut Bar Iron ¼x1½ in.
No. R0296 will cut Rods up to ½ inch diameter.

No.	Plain 0296	With Rod Cutter R0296
Length cutting blades, in.	10	10
Length gauge rod, in.	14½	14½
Weight, lbs.	185	190
Each	$60.00	70.00
Extra blades, per pair		

NOTCHING MACHINE



An exceedingly well constructed, pendulum lever notching machine intended for notching blanks of pieced sheet metal ware, for cutting the corners of square pans and hinge notches of boxes and similar work. Dies are made in sections, so that they may be easily sharpened and reset. Dies and punch are made from Jessop Tool Steel, scientifically hardened and tempered. A most convenient notching machine of high grade quality for bench use.

Capacity—No. 20 Gauge Iron and Lighter

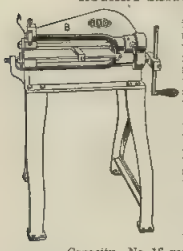
New No.	737A
Size regular dies, in.	1x2
Capacity for receiving special dies up to, in.	2x2
Length gauge supporting arms, in.	13½
Shipping weight, lbs.	175
Each	$70 00

NOTE—Furnished complete with one set regular dies and full equipment of supporting gauge arms and gauges. Special dies quoted on application.

Prices Quoted on Application

PEXTO SHEET METAL WORKING TOOLS

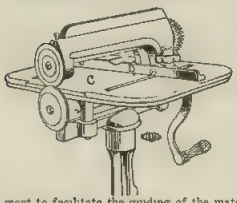
ROTARY SLITTING SHEARS



Permits means for slitting iron used in cornice, furnace, blow-pipe, ventilation work, etc. They may be utilized for conveniently cutting large irregular curves and circles when following a scribed line in a fraction of the time it takes to do the work with snips or bench shears. The cutters are made from a special high-grade tool steel, properly hardened and tempered and have two cutting edges, making them reversible. The crank is adjustable to different leverages, bearings (A) are adjustable to take up wear of the cutters and the cutting head (B) is of compact construction and is mounted on heavy, cast iron legs.

Capacity—No. 16 gauge iron and lighter

No.	255 A
Diameter cutters, in.	3-8
Depth cutting head to gauge, in.	18
Depth cutting head to frame, in.	19
Size table, in.	20x8
Shipping weight approximately, lbs.	325
Each	$
Extra cutters, per pair	

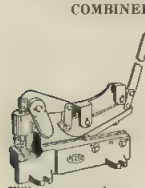


These Shears are intended for bench use and are well suited for slitting brass, copper, silver, aluminum and sheet iron. The machine is compact, nicely proportioned and will give the best of good service. Adjustments for taking up the wear of cutters are provided. The table (C) is wide and accurately planed. The gauge (D) is provided with an attachment to facilitate the guiding of the material while cutting, for insuring very accurate slitting.

Capacity—No. 20 gauge iron and lighter.

No.	250A Hand
Diameter cutters, in.	3
Depth cutting head to gauge, in.	9
Depth cutting head to frame, in.	10¼
Narrowest strip that can be cut, in.	1/8
Shipping weight approximately, lbs.	100
Each	$
Extra cutters, per pair	

COMBINED SHEAR AND PUNCH

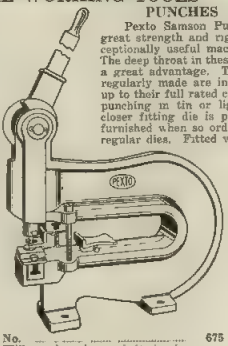


High-grade quality with an extremely wide range of punching and cutting usefulness possessing a combination of features that make them highly adaptable for general use.

Furnished with one combination die and five punches, viz.: 1/8, 5/32, 3/16, 7/32 and 9/32 in.

No	679
Will punch iron, in.	5/16
Depth punching gap, in.	2¾
Will center sheets, in.	5½ wide
Length cut, in.	4¼
Will cut iron, in.	1/8 thick 1/4 and 1/4
Will cut narrow bars, in.	
Weight, lbs.	120
Each	$
Extra punches, each	
Extra dies, each	

PUNCHES



Pexto Samson Punches are designed for great strength and rigidity, making them exceptionally useful machines for general work. The deep throat in these machines will be found a great advantage. The dies and punches as regularly made are intended for use on stock up to their full rated capacity, but where clean punching in tin or light metal is desired, a closer fitting die is preferable, which can be furnished when so ordered at the price of the regular dies. Fitted with adjustable gauge.

No. 675 furnished with three dies and punches, viz.: 1/8, 5/32 and 1/4. No. 676 furnished with three sets of dies, viz.: 3/16, 7/32 and 9/32.

No.	675	676
Will punch with stay bolts in place iron, gauge	9	1/4, 5/32, 3/16 in. hole in 3/8 in. iron

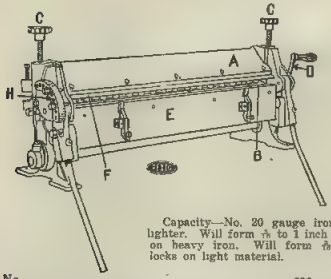
PEXTO SHEET METAL WORKING TOOLS

BENCH FOLDER AND BRAKE



Capacity—No. 20 gauge iron and lighter. Will form ⅜ to 1 inch locks on heavy iron. Will form ⅛ inch locks on light material.

No.	696	697
Length, in.	36	42
Shipping weight approximately, lbs.	430	500
Each	$	

NOTE—Furnished regularly with folding blade for sharp or closed locks and adjustable front and rear gauges. Extra blades for forming open or wire locks can be furnished at an extra cost.

General Description

With these new bench combination folder and brake patterns a variety of folding operations are possible. Like the regular floor brake, the jaws allow for the forming of any size of angle, the sheet remaining stationary while the folding takes place. It will form edges for lock seams with a neety. Fitted with adjustable gauges, the scribing of sheets before each bend is not necessary.

The clamping bar (A) can be adjusted for great clearance above the bed (B) from 1 to 3 inches. This is effected by turning knobs (C). By turning the crank (D) the bed (B) is lowered 1 inch. The sheet placed between the jaws to be edged or folded is securely clamped with a turn of crank (D). The folding bar (E) is of solid steel and so proportioned that its upper edge is only ⅜ inch wide for permitting the forming of very narrow locks and angles. It is adjustable up and down for forming open locks for wiring with not more than ½ inch radius, but a special folding blade to substitute for the blade (F), as fitted regularly, for sharp locks, is recommended in order to secure the best results. Folding blade (F) can be readily removed to allow substituting others of different shapes.

A rear gauge, adjustable from ¼ to 10 inches, is provided and can be easily removed when not needed.

A front gauge, that is adjustable ¼ to ¾ inch, is also provided. This gauge is attached to folding bar (E).

Pins (H) can be adjusted for stopping the folding bar (E) to form different angles.

Sharp or closed locks for lock seams can be formed ⅛ to 1 inch on heavy stock, and as small as ⅛ inch on light material. With the proper special rounded blades, a wide range of wire locks can be formed.

A combination folder that will never stand idle in the active shop.

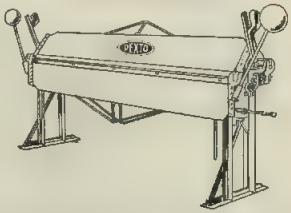
SHEET IRON FOLDER

An indispensable folder having adjustable gauge. All parts are machined and is smoothly finished. A highly serviceable folder.

No.	10A	18
Capacity gauge iron and lighter	22	24
Length, in.	31	42
Will form locks, in.	¼ to ½	¾ to ½
Weight, lbs.	85	107
Each	$	

Shipped Boxed Regularly

STEEL CORNICE BRAKES



These Brakes are of pressed steel construction, and owing to their light weight are handy to move around for outside construction work. These are the most inexpensive brakes that the market offers.

Capacity—No. 18 Gauge Iron and Lighter

No.	1000	1001	1002	1003
Length, in.	61	73	97	121
Shipping wt. approximately, lbs.	750	800	1000	1200

Shipping wt. approx., lbs.	400	500	1200	1500	2500
Each	$				

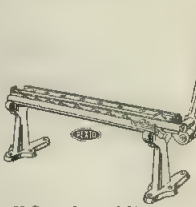
NOTE—Furnished with one forcing bar and five formers for making circular and semi-circular bends.

Capacity—No. 14 Gauge Iron and Lighter

No.	1009	1010	1011	1012
Length, in.	36½	48½	97	121
Shipping wt. approx., lbs.	660	800	2000	3000
Each	$			

NOTE—Furnished with one forcing bar and five formers for making circular and semi-circular bends.

PIPE FOLDING MACHINES



For folding the edges for the side seams of round pipe, after being formed, as well as for folding the edges of straight sheets. Their improvements over the Wright's Patent Sheet Iron Folders consist of an adjustable gauge. Variations in the hardness of the material will have no effect upon the uniformity of the lock.

Capacity—No. 22 Gauge Iron and Lighter

No.	11A	13
Length, in.	32	42
Will form locks, in.	⅛ to ⅜	¼ to ½
Shipping weight approximately, lbs.	100	195
Each	$	

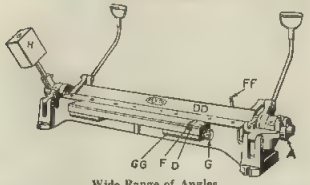
Shipped Boxed Regularly

NOTE—No. 13 folders have a handle at each end, one of which can be removed when not required.

Prices Quoted on Application

PEXTO SHEET METAL WORKING TOOLS

BAR FOLDING MACHINES



Wide Range of Angles

Capacity—$\frac{1}{8}$ locks on No. 20 gauge iron and lighter.
Capacity—$\frac{1}{16}$ locks on No. 22 gauge iron and lighter.

Intended for folding or edging strips or sheets of sheet iron, soft steel, brass and copper. They are adapted for forming the edges of sheet metal at various angles to form locks, square joints and to turn round edges for inserting wire.

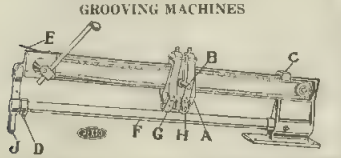
Gauge (GG) is adjustable and regulates the width of fold by turning gauge screw knob (G) at right end of machine. The indicator (F) points to graduations in fractions of inches on brass plate (D) for showing how the gauge is set. If the gauge becomes worn or filed, the plate (D) can be so shifted for always keeping the graduations in accurate line with movement of the gauge. Separate teeth are screwed to the edge of the gauge. These gauge teeth pieces becoming worn can be easily replaced, saving the expense of a complete new gauge each time it becomes worn out. A new folder and another Pexto innovation.

Adjustable stop (A) is provided to permit the forming of any desired angle, in addition to regular square and bevel stops.

No.	055	058
Length, in.	37	42
Will form closed and open locks, in.	$\frac{1}{8}$ to 1	$\frac{1}{8}$ to 1¼
Shipping weight approximately, lbs.	365	415
Each	$	

NOTE—Furnished regularly with Counter Balance (H).

GROOVING MACHINES



The Pexto Machine of this kind for grooving the longitudinal seams of stovepipe and other sheet metal cylinders. The traveling carriage (A) is quickly and easily returned to the starting point by means of handle (B). Adjustable stop (D) on upper bar engages the traveling carriage at any desired point to suit length of work. Adjustable stop (D) on lower bar prevents work from slipping while being grooved. Spring (E) holds latch (J) out of the operator's way when work is removed and in setting the machine.

Lower bar (C) is reversible, so that either the flat surface or face of the groove which is placed into the horn can be turned upward in setting up for the starting of seams or the rear of the outside of the work. The seam is put on the inside of work by means of the roll which presses the seam into one of the grooves thereof at the horn. Outside grooving done in the usual manner by using the grooves and flat surface of horn. The traveling carriage (A) has two rolls, one for grooving (G) and one for flattening (H) the seam at the same operation.

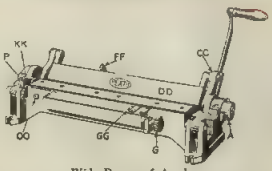
Capacity—No. 24 gauge iron and lighter

No.	518 A
Will groove work length, in.	30
Diameter of smallest pipe that can be grooved, in.	2
Shipping weight approximately, lbs.	200
Each	$

Shipped Boxed Regularly.

NOTE Rolls are furnished, one each with ¼, ⅜ and ⅝ in. grooves and one flattening roll.

BAR FOLDING MACHINE



Wide Range of Angles

Capacity—$\frac{1}{8}$ in locks on No. 22 gauge iron and lighter.
Capacity—$\frac{1}{16}$ in. locks on No. 24 gauge iron and lighter.
Capacity—$\frac{1}{32}$ in. locks on No. XX tin.

The tough mixture of good iron and accurate designing evidenced only in the Pexto line of folding machines makes up for proper proportionment of the folding bar, eliminating cumbersome weight, and where speed and great durability are essential, especially in tinware and other light manufacturing, these patterns will prove superior over any other makes.

Open or round locks for wiring are made by raising the folding bar (CC) at right angle. The wing (DD) is then adjusted for the size of wire to be used through the setting of wedge (FF) that moves to left and right on folding bar. An improvement, consisting of a pin in the frame, prevents the dropping of the wing below the gripping jaw, the wing (DD) dropping in a proper position automatically in the process of folding, producing accurate and uniform round locks. This improved adjustment permits for more rapid execution, the blanks sliding more easily between the gripping jaw without obstruction.

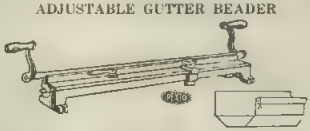
Gauge (GG) is adjustable, and regulates the width of fold by turning gauge wheel (G). The width to which the gauge is adjusted is indicated on graduated dial on gauge wheel and after set is firmly secured through lock screw (OO).

Adjustable stop (A) is provided to permit the forming of any desired angle, in addition to regular square and bevel stops (KK PP)

A gripping jaw clamps the material securely while the bending takes place, guaranteeing the forming of square joints or angles, narrow or wide locks of uniform width the entire length.

No.	62 B	63 B
Length, in.	20	30
Will form closed and open locks, in.	⅛ to 1	⅛ to 1
Will form open locks to receive a wire up to, in	¼	¼
Shipping weight approximately, lbs.	102	185
Each	$	

ADJUSTABLE GUTTER BEADER



Gutter Beaders are intended for forming a bead on the edges of gutters. This machine is so constructed that it can be easily adjusted to be used with rods from ⅜ to ⅝ in. in diameter. The thickness of the metal is determined by the size of the rod. It has a gauge or stop on the left-hand end, so that after adjusting the jaws and setting the gauge for the size of the rod to be used, the jaws can be easily opened to remove the work and rod, and then closed in exactly the same position as when the bead was formed, so that the operator can form any number of beads of exactly the same size. The jaws are adjusted by a hand wheel with rack and pinion, which adjusts both ends of the movable jaw.

No.	700
Length, in.	31
Shipping weight approximately, lbs.	75
Price complete with one rod ⅜ to ⅝ in. in diameter as may be ordered	

NOTE—Where specifications do not accompany orders, ½-in. rod will be sent.

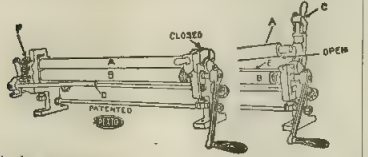
Prices Quoted on Application, Shipped Direct from Factory.

PEXTO SHEET METAL WORKING TOOLS

FORMING MACHINES

SLIP ROLL

They are greatly improved over old slip roll pattern forming machines and those which the present market offers. A careful study of the illustration shows the time and steps saved through being able to perform all operations at one end of the machine, the convement end where the crank is fitted. Without necessitating the changing of positions the sheet to be formed is placed between the gripping rolls (A) and (B). The cylinder formed, open latch (C), then by means of lever (D) raise upper gripping rol. (A) and slip the formed cylinder from the roll (A). It will be readily seen that all operations are performed at the crank end of the machine—a Pexto innovation that can be well appreciated by the mechanic who has operated the old pattern slip roll former. Rolls (B) and (E) are adjustable with knurled screws, and once adjusted they cannot slip. The gears (F) are steel, machine cut, running more smoothly than cast iron gears without danger of slipping or breaking with whatever thickness of metal is used.



Number	382 A	381 A	6381 A	390 A	400 A
Length rolls, in	31	37	43	31	31
Diameter rolls, in	2	2	2	2½	2½
Gripping rolls open, in.	½	½	½	½	½
Shipping weight, app lbs.	165	180	200	350	300
Each	$				

Note In these formers gripping rolls (A) and (B) have an extreme clearance of ½ inch. Groves cut in rolls are intended to allow work with a wire to be formed. Tight pulley, or tight and loose pulleys and iron floor legs can be fitted when so ordered. No. 390A and 400A are back geared and have rolls 2½ inches in diameter with a ratio of gearing 2 to 1.

FORMING MACHINES

WITH MACHINE CUT STEEL COMPENSATING GEARS

These formers have solid housings and are fitted with machine cut steel compensating gears. Gears to run smoothly should mesh constantly to a certain depth and the shape of the teeth should be accomodated to such depth. In these formers the gears on the gripping rolls do not mesh with each other, but with two gears so hung that when the gripping rolls are moved the mesh of the gearing is unchanged. This insures uniformity of action and durability for the gears, they running more smoothly than cast iron cogs, without danger of slipping or breaking with whatever thickness of metal is used.

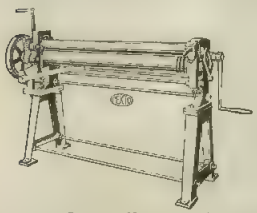
Length rolls, in	43	37	31	20½
Diameter rolls, in	2	2	2	1¼
Shipping weight approximately, lbs.	185	165	140	60
Each	$			

Shipped Boxed Regularly.

Note—Grooves cut in rolls are intended to allow work with a wire to be formed. Wire should only be formed between the grooves cut for that purpose.

FORMING MACHINES

HEAVY FORMING MACHINES, BACK GEARED SLIP ROLL PATTERN



These forms are constructed for heavy duty, having finely finished rolls made from a special piston rod hard steel, with large driving gear cut from solid cast iron, and steel machine cut connecting gears. When furnished for hand power, heavy cranks are fitted on both ends. Adjustment of clamping and rear forming roll is secured through screws. Grooves are cut in rolls for receiving wired sheets. Rolls are of the slip type, permitting the work to be removed readily from roll after being formed.

Longer rolls will be quoted on receipt of full particulars. When making inquiries state gauge iron to be used and diameters of cylinders to be formed

Capacity—No. 14 gauge iron and lighter.

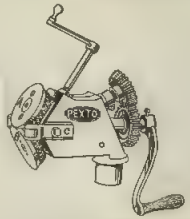
SETTING DOWN MACHINES



The improvements in Pexto pattern setting down machines adapt them for setting down the seams on differently shaped vessels to better advantage than any other design. The inclined position of both upper and lower faces (A) and (B) allows work to be held up or down the seams to be started inward while setting down, thereby facilitating the operation of double seaming. Adjustable gauges with idler rollers (C) are fitted.

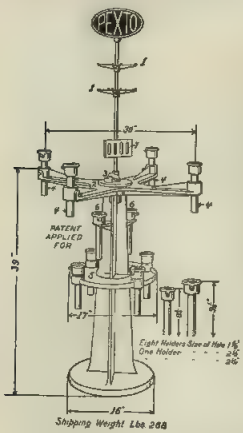
PEXTO SHEET METAL WORKING TOOLS

REVOLVING MACHINE STANDARD



A place for everything and everything in its place. Revolving turret holds 4 machines. Hand lever for holding turret in a fixed stationary position, adjustable machine holder, lower stationary turret holding 4 additional machines, 2 additional reserve machine posts out of the way. Ten posts in all go with each standard.

Each

No. 969—39 in. high, 16 in. diameter base, 30 in. across top, eight holders, size 1⅝ in., one size 2½ in. and one size 2¾ in., weight each 268 lbs. $

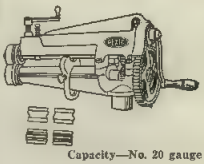
A revolving turret holding four machines. Four operations can be completed without changing positions. Four machines always ready for action and to be found in good condition when their use is required. Designed with ample room for accommodating from one to four operators

Lower stationary turret for holding four additional machines arranged for quickly interchanging with any machine set in upper revolving turret. This lower turret also provides for a handy shelf holding oil can, tools, etc., which are used in connection with equipment mounted.

Two additional reserve machine posts, out of the way, supported on brackets to hold any large bench machine that will not fit in holders provided for the smaller machines.

Ten posts in all go with each standard.

BEADING MACHINES



Reinforced caps and frames giving maximum strength, solid cast iron cut driving gears, machine cut steel connecting gears.

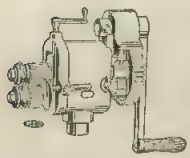
PEXTO SHEET METAL WORKING TOOLS

CRIMPING AND BEADING MACHINES



For producing a neat, uniform crimp and bead or crimp without bead these machines recently made from new patterns will be found superior to any other make for general pipe-crimping or beading They have been designed with a view to giving maximum strength and rigidity and can be depended upon for producing snug-fitting pipe joints that hold when put together. A very practical feature is offered in the arrangement of the driving gears. Two speeds are provided for; back geared for heavy stock and direct drive when lighter gauges of materials are used. The driving gears can be removed and the machine converted instantly into a direct acting crimper by attaching the crank to lower shaft. Connecting gears are of machine cut steel, the frame and cap machined to insure perfect fit of all working parts for accurate and uniform work. Rolls are made of a high-grade steel, scientifically hardened, and the gauge is of extra wire proportions made from tool steel properly hardened. Adjustments are provided for regulating the relative depth of crimp and bead The adjustment will be found in a wedge between the rear bearings. This wedge is adjusted by wing nuts in front and back of frame near handle end. The upper shaft can be tipped toward front or back, as desired, thus making a deep crimp and shallow bead, or shallow crimp and deep bead. With the combined crimping and beading machines, blank collars are furnished and may be substituted in place of beading rolls, where crimping alone is desired.

Capacity—No. 20 Gauge iron and lighter.

No.	585 A	0585 A
Diameter beading rolls, in.	1 1/2	1 1/8
Diameter crimping rolls, in.	1 1/2	1 1/8

Price with standard	$	

Shipped Boxed Regularly

Note—No. 589 has spiral crimping rolls; No. 0589 has straight crimping rolls.

Prices Quoted on Application.

ROOFING DOUBLE SEAMERS

These roofing double seamers for standing lock will do the work more evenly than by any other process and leave the formed lock of uniform height. They will work well over uneven roof boarding and will double seam hips and ridges with perfect ease.

The first pair of common-gauge seamers finish 1 in. seam single lock, and is numbered 7 on the outside bar and 8 on the center bar

The second pair of common-gauge seamers finishes ¾ in. seam, double lock, and is numbered 9 on the center bar and 10 on the outside bar

The first pair of wide gauge seamers, finishes seam 1¼ in., single lock, and is numbered 5 on the outside bar and 8 on the center bar

The second pair wide-gauge seamers finishes seam 1 in, double lock, and is numbered 4 on the center bar and 6 on the outside bar.

Number	742	742½	0742
Weight per set of two pairs, lbs.	40	40	40
Per set of two pairs	$		

Note—Nos. 742 and 742½ are fitted for I. C. tin No. 0742 is fitted for iron roofing not heavier than 28 gauge for single or double seam. Common gauge seamers No. 742 follow 1 and 1⅛ inch tongs, finishing a lock ⅞ inch high. Wide gauge seamers No. 742½ follow 1¼ and 1½ inch tongs, finishing a lock 1 inch high. Iron roofing double seamers No. 0742 are made in wide gauge only and follow 1½ and 1¾ inch tongs, finishing a double seam 1 inch high. Specify by number Where seamers are ordered in half sets, be sure to specify whether the first or second set of seamers are desired.

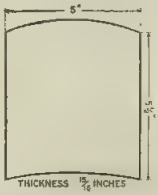
HAND DOLLY



With the introduction of the hand dolly the sheet metal mechanic has found a profitable tool to aid his progress. The illustration will suggest many uses for the hand dolly. As a support inside of tanks when seaming by hand the dolly is invaluable. A variety of operations in general sheet metal working practice which cannot be handled to advantage over the regular bench stake might be more economically effected with a stake of this pattern. A desirable addition to equipment in the auto repair shop. Your set of stakes is not complete without the hand dolly. Well balanced with snug fitting handle and Pexto quality commends this tool to the practical worker.

Each

No. 947—5x5½ in. face, 1/16 in. thickness of head, weight each 8½ lbs. ..... $

Open Stock.

Searight's, Vest Pocket

Each

No. 7S—7 in. long, 1¼ in. cut, solid crucible tool steel, weight each about 5 oz. $3 00

Searight's, Solid Crucible Tool Steel

Nos.	8 S	10 S	12 S
Length, in.	8	10½	12
Cut, in.	1⅝	2½	3
Each, lbs.	⅞	1⅛	1⅜
Each	$1 50	6 75	9 00

The design of the compounding lever action gives an evenly distributed cutting strain from a close-throat start to the finish at the point of the blade

In difficult cutting it is not necessary to start the operation with blades open to the full span of the hand, because of this even hand pressure for cutting at any point or position of the blade.

From the 8-inch to the 12-inch sizes, inclusive, the short cutting blade is connected to the short lever handle by links on each side with close-fitting shouldered rivets, making a rigid connecting frame without side-springing tendencies.

EQUIPMENT FOR FORD CARS

MILWAUKEE TIMER FOR FORD

The World Famous Milwaukee Timer now has a Bakelite shell, absolutely shortproof.

Bone dry Egyptian fiber race pressed to a tight fit in the Bakelite case. Remains satin smooth for thousands of miles.

Fine steel contact points with welded stems. Locked in position. Extra thick throughout for longest life.

First roller type timer with a Bakelite case. Makes the Milwaukee absolutely "shortproof." Puts it in a class with high priced ignition units.

Famous Milwaukee Timer Brush Assembly. Two bronze castings, fitted and gauged for accurate alignment. Hardened steel roller, finished like a ball bearing.

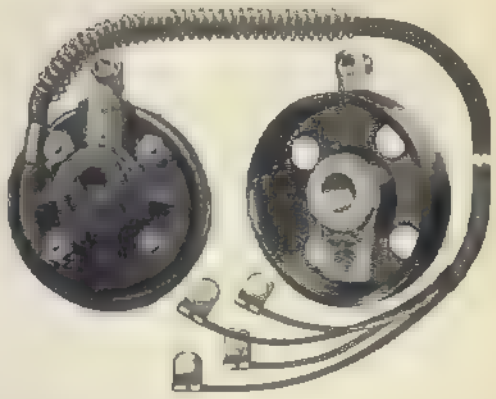
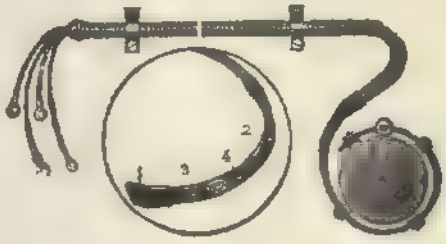
BELL TIMER AND WIRE CABLE



Bell Timer and Wire Cable for Ford is the only high grade ignition system which makes a complete electrical circuit on copper with Bakelite as insulation. It is made dust, oil and water proof by special washers and will last the life of the average Ford car.

Bell Timer and Cable	complete	$3 00
Bell Timer Rotor	each	50

POPULAR TIMER WIRE ASSEMBLY FOR FORD



No. 200 Popular Timer Wire Assembly for Ford Cars. Built up of flexible oil-and-water proof metal hose, containing the four New Code insulated wire (250-Volt Underwriters' Laboratories Inspected) and has the usual spark-coil terminals at one end. At the timer end the cords are enclosed in a fabric sleeve, the wires being permanently connected at the factory to eyelet terminals spaced to fit the timer terminal studs. The fabric is treated and sealed by a special chemical process, making it absolutely impervious to the action of oil, water or dirt, yet leaving it perfectly flexible. Instructions with each assembly provide for the extra wires required for cars equipped with starters or generators.

Packed in an attractive two-color carton with complete directions for installing. Approved by the Underwriters Laboratory.

No. 200 Popular Timer Wire Assembly....complete $1 50

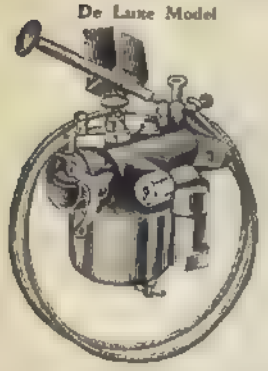
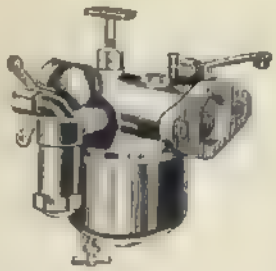
EQUIPMENT FOR FORD CARS

KINGSTON CARBURETORS FOR FORD

De Luxe Model



Model L4-K



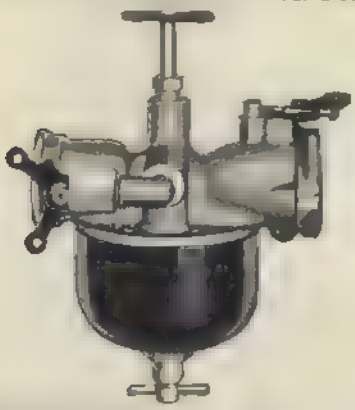
De Luxe Model for Ford. In this carburetor is embodied the new fuel cleaner and exclusive Kingston feature. It insures a saving of fuel functions perfectly under all conditions, gives a more flexible motor with quicker pick up and greater speed, and gives more power on the hills. Also has steering column control.

De Luxe Model for Ford ....each $8 00

Model L4-K Carburetor. The standard cast iron Kingston Carburetor for Ford, fitted with fuel cleaner

Model L4-K Carburetor... . ...h $4 60

HOLLEY CARBURETOR FOR FORD



Model N-H Holley Carburetor for Ford. It is provided with an intake shutter, and in addition has a primary air passage, so designed that the cold fuel is lifted off the nozzle into the main air stream, thus insuring ease in starting. The inlet needle seat is detachable.

Has fewest possible moving parts.

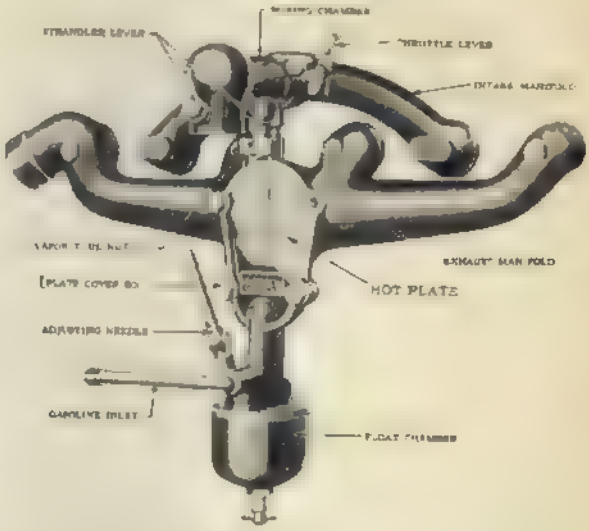
Model N-H Holley Carburetor for Ford.....each $4 50

UNIVERSAL CARBURETOR CHOKER SPRING

Universal Carburetor Choker Spring. Installed instantly and stays put. Fits all models Holley and Kingston carburetors. Hits directly at a difficult service job and handles it satisfactorily. It snaps into place instantly and is a big help in rendering fast service to Ford drivers.

Universal Carburetor Choker Spring.....each $0 15

HOLLEY VAPORIZER FOR FORD

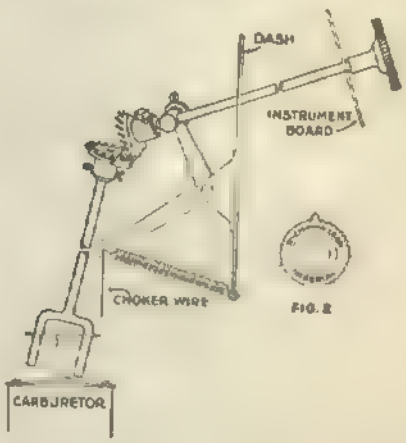


No. 705 Holley Vaporizer for Ford. Vaporization is caused by bringing the liquid fuel to a hot plate made of thin sheet steel, which covers a large opening in the exhaust manifold. The Hot Plate gets very hot almost instantly. Gives smooth engine operation, positive acceleration, eliminates crankcase dilution, a 25 per cent reduction in fuel consumption, one adjustment and easily installed. Overcomes the problem of the present-day fuel.

No. 705 Holley Hot Plate Vaporizer for Ford...ea. $15 00

IMPERIAL CARBURETOR AND CHOKE CONTROL

For Ford

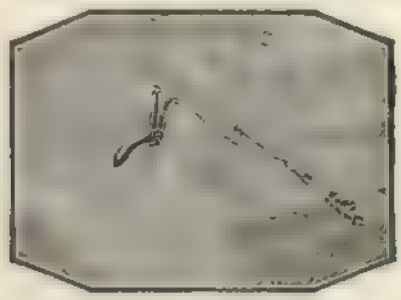


No. 32R Imperial Carburetor and Choke Control. The operating rod is rotated to adjust carburetor and pulled out to operate the choke. For all model Ford cars. The operating rod goes through the hole which the regular Ford choke occupies in the instrument board. Consists of operating rod, indicator handle, lug for connecting choker arm, gears and full length carburetor fork rod, all complete ready to install.

No. 32R Carburetor and Choke Control...complete $1 25

ACCELERATORS AND FOOT RESTS

WILLIAMS SENIOR ACCELERATOR FOR FORD



Williams Senior Accelerator with its exclusive features of mechanical perfection gives a direct, positive and even foot control of a Ford car, leaving the hands entirely free for steering and signaling. Simple to install with only three quick connections. Not necessary to alter a single nut, screw or bolt of the Ford chassis. Adjustable to all types of Ford cars.

Williams Senior Accelerator.....complete $2 50

EWALD FOOT ACCELERATOR FOR FORD

The Ewald Foot Accelerator works independently of the hand throttle. Saves gasoline by keeping the engine from racing. Insures the maximum of safety as the hands are free to operate steering wheel, brakes, etc. Very easy to install. Guaranteed for the life of the car.

Ewald Foot Accelerator for Ford.....complete $0 80

STANWOOD ACCELERATOR FOOT REST

Stanwood Accelerator Foot Rest. Indented rubber roller vulcanized to a steel tube which revolves on a spindle. Adjustable to various heights. Prevents unintentional rapid acceleration and also relieves the muscles of the leg.

Stanwood Accelerator Foot Rest.....each $1 60

ADAMS ADJUSTABLE FOOT RESTS

No. 105 Senior

No. 110 Junior

No. 105 Senior Foot Rest. Permits driving in comfort all day without foot burn or leg strain. Protects shoes and floor boards. It is adjustable to all size people and cars, and makes possible an easy, even pressure that means a smooth start and even acceleration over the roughest roads. Substantially made of highly polished aluminum, with best quality rubber inserts. Steel parts treated to resist rust. Fits all cars having an accelerator.

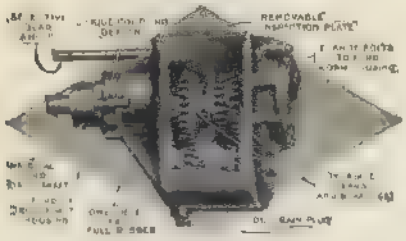
No. 105 Senior Foot Rest.....each $3 50

No. 110 Junior Foot Rest. Is made of highly polished aluminum and is corrugated instead of having the rubber insert. It has four adjustments for height as well as the adjustable heel. Fits all cars having an accelerator. Easily and quickly installed without alteration.

No. 110 Junior Foot Rest.....each $1 25

EQUIPMENT FOR FORD CARS

LINCOLN UTILITY TRANSMISSION FOR FORD TRUCK



Lincoln Utility Transmission For Ford Truck. Uses original Ford drive shaft without cutting the frame. Not a single bronze bushing used any where in the transmission. Over size gears and bearings with unusual factors of safety. One piece cast case is scientifically braced against strains. Selective gear changes possible under all road conditions. Power increased 100%, Speed increased 50%. Easily installed.

Lincoln Transmission .... complete $110 00

CORK FELTBAK TRANSMISSION LINING SET

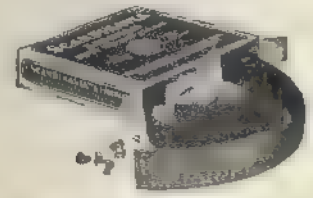
Advance Cork Feltbak Transmission Lining Set. Stops Ford chatter permanently. Feltbak lubricates itself and softens brake action. Has a felt cushion between the band and the lining. Embodies cork-in-fabric principle for friction and in addition has 21 oil holes in each band for lubrication to prevent burning. Holds oil like a wick.

Per Set

Advance Cork Feltbak Lining Set, 1925 and previous..$2 75

Advance Cork Feltbak Lining Set, 1926 ....2 75

SCANDINAVIA TRANSMISSION LINING SET



Scandinavia Transmission Lining for Ford Cars is made of the best long staple cotton, interwoven into a close compact mass and then impregnated with special compound.

Sets for old model car consists of three bands 2¼" long, 1⅛" wide, 5/32" thick. Sets for 1926 improved model car consists of two bands for speed and reverse 2¼" long, 1⅛" wide, 5/32" thick and one for brake 2⅜" long, 1 25/32" wide, 5/32" thick.

Scandinavia Lining Set for old models.....per set $2 25

M. & M. COTTON TRANSMISSION LINING SET

M. & M. Cotton Transmission Lining Set. Impregnated with special wear-resisting composition. Consists of 3 pieces of woven lining and rivets necessary for attaching.

M. & M. Cotton Transmission Lining Set....per set $1 00

GOODRICH BRAKE SHOES FOR FORD

Goodrich Unlined Brake Shoe for Ford Cars. Is made of a good substantial grade of gray iron. Neither too hard nor too soft. Just right for the maximum of wear that can be expected from this type of shoe.

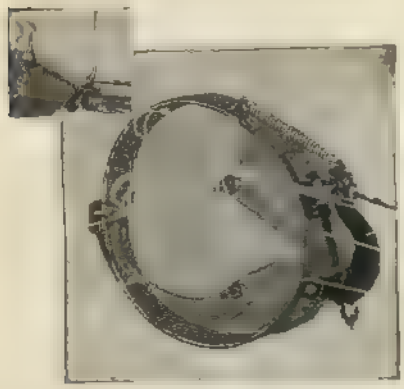
Goodrich Unlined Brake Shoe for Ford.... . .each $1 50

Goodrich Lined Brake Shoe is made in two pieces. The lining is of the best quality, with copper inserted wires. The two-piece construction, fitted with the brake lining permits of much longer wear and service than the one-piece unlined shoe, and is recommended for Ford cars that see the hardest service.

Goodrich Lined Brake Shoe for Ford.....each $2 00

BRAKES FOR FORD CARS AND TRUCKS

LINCOLN BRAKES FOR FORD



Lincoln Brakes for Ford accomplish a smooth, quick and positive stop because they apply the braking power direct to the rear wheels. No change is made in the original Ford design. Lincoln brakes are simply auxiliary brake bands that fit over the Ford drums and connect with the Ford foot pedal. It is a simple and easy installation to make—and once made it will "stay put" for a long time without adjustment

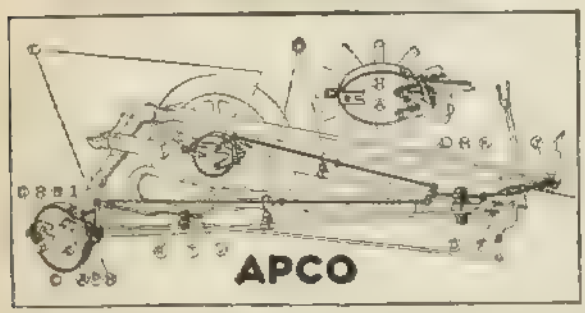
The Ford transmission brake is merely loosened so that it is in-operative. Lincoln brakes are perfectly equalized so that the lightest pressure on the pedal is reflected the same on each band. A demonstration will prove this conclusively. Unusual ease of operation makes the Lincoln brake especially desirable for the woman driver

Only the regular Ford tools are needed in making the installation of Lincoln brakes, as there are no holes to drill—no cutting, filing or fitting. Being accurately built by the most skilled mechanics, working with the highest quality of material, complete and continuing satisfaction is assured.

These brakes are for standard Ford chassis. If wanted for a car with extended frame, specify wheel base when ordering.

Lincoln Brakes. For Passenger Car ..per set $16 00
Lincoln Brakes. For One-Ton Truck .. " " 25 00

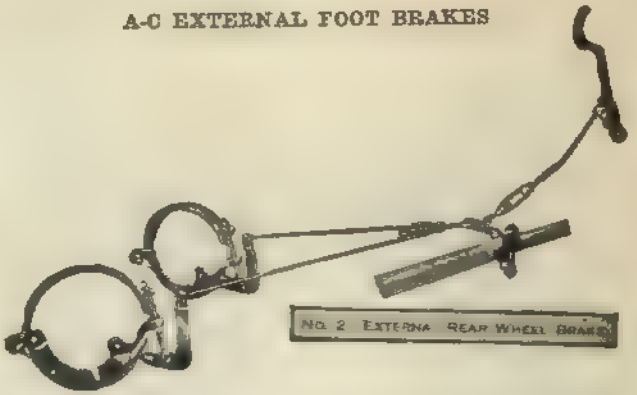
APCO REAR WHEEL BRAKES FOR FORD



No. 11 Apco Rear Wheel Brake. An external foot brake which eliminates the destructive and annoying chatter of the regular Ford brake. Has bronze bushings, drop forgings, rods instead of cable, quarter-inch lining, double adjustments, equalizers, etc. Weight, one complete set, packed in heavy box, 12 pounds.

No. 11 Apco Rear Wheel Brakes, up to 1926 .....per set $12 50
No. 10 Apco Rear Wheel Brakes, 1926 cars. " " 12 50

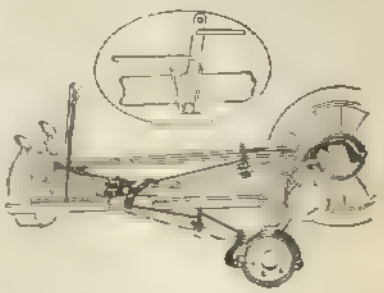
A-C EXTERNAL FOOT BRAKES



A-C External Foot Brakes. Deliver the braking power direct to the rear wheels, taking all the strain off the rear axle shaft, gears, keys and transmission bearings. A-C Brakes will permit overloading 100 per cent above normal, without damaging the rear axle and will prevent skidding. Guaranteed against all imperfections. They do not interfere with your regular equipment or any shock absorbers.

For Model T Car.....per set $14 00
For One-Ton Truck ..... " " 20 00

CLEVELAND EXTERNAL BRAKES FOR FORD



Cleveland External Brakes for Ford. Give instant and certain control on all hills and at all speeds. They are of the external-contracting type and operate from the regular Ford brake pedal. These brakes function evenly on the rear brake drums, reducing tire wear to a minimum and overcoming any tendency to skid. These brakes, for Ford touring cars and trucks, are the outgrowth of a positive and well defined need. They bring strength to your Ford at the point where strength is needed.

One of the outstanding features of the Cleveland Brake, which places it beyond all competition, is the perfect acting equalizer. This member affords an absolute equal pull on both brakes as well as an instantaneous release.

Model T, for roadster and touring.....per set $16 00

EQUIPMENT FOR FORD CARS

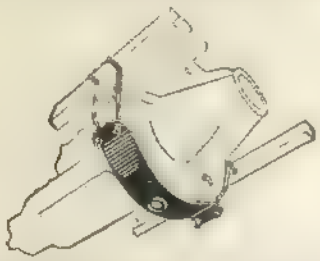
TRUSKO TRANSMISSION BRACE FOR FORD

Trusko Brace for Ford Car and Truck. Is an easily attached support for the rear end of the transmission of Fords that eliminates the cause of most of the vibration. No holes to be drilled. Can be installed in 10 minutes by any one. Trusko consists of three parts, instantly assembled and quickly set in position. The yoke—a steel plate correctly formed—fits up snugly under the transmission case, just ahead of the ball cap flange. This is hung from the frame sides by two hooked brace rods.

Trusko Brace for Ford Passenger Car.....each $2 00
Trusko Brace for regular Ford Truck.....“ 2 50
Trusko Brace for Ford Truck, equipped with Warford Transmission.....each 2 50

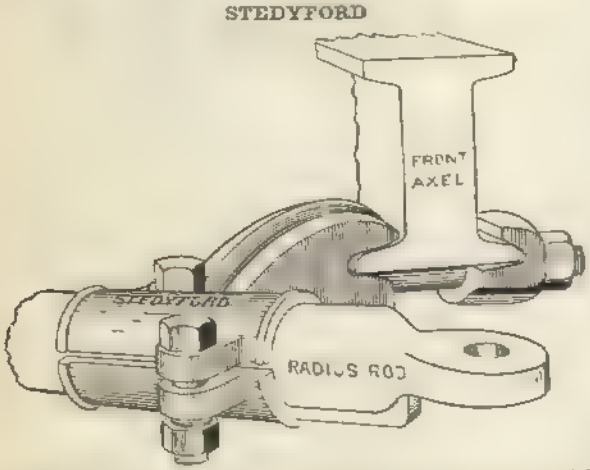
VICTORY MOTOR SUPPORT FOR FORD



Victory Motor Support. Fits all models Ford cars and trucks. A hammock type support composed of a pressed steel plate fitting under the Ford crankcase and attached by four hook bolts. Prevents crystallization of crankcase walls and arms. Nothing to drill or remove. Easily installed.

Victory Motor Support.....each $2 50

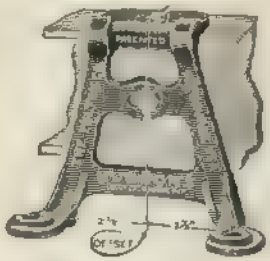
STEDYFORD



Stedyford grips the radius rod firmly, connecting with the front axle in such a manner which makes it semi-rigid, permitting of a free movement of the axle up and down, yet positively preventing any tilting or vibrating of the axle, assuring a smooth even movement of the car under all conditions.

Stedyford.....per set $4 50

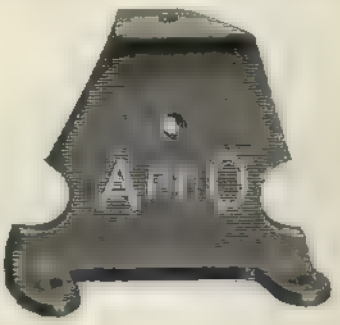
HUDSON'S CRANKCASE REPAIR ARM



Model B Hudson's Crankcase Repair Arm for Ford is different from any other. Fits perfectly either side of Ford crankcase without drilling, filing or forcing. Supports the motor properly and holds it in perfect alignment. This is made possible by exclusive Hudson features—two holes in top of arm and elongated hole in center. These features are patented. Designed to meet a condition actually existing in the Ford frame and crankcase. Because of its perfect fit, the Hudson's Arm insures better jobs with less labor, more profit and better satisfied customers. Made of tested, malleable iron, accurately drilled. Reinforced at all points of strain.

Model B Hudson's Crankcase Repair Arm.....each $1 50

APCO CRANKCASE ARM FOR FORD



No. 30 Apco Crankcase Arm. Replaces broken Ford crankcase arms in a few minutes, without taking motor down or welding of any kind. Made from boiler plate steel, ¼ inch thick, finished in black enamel.

EQUIPMENT FOR FORD CARS

M. & M. TUBULAR RADIATORS FOR FORD

M. & M. Tubular Type Radiators. A popular type of radiator with some Ford owners. The main features are: Maximum number of continuous brass cross fins. Folded edges of fins add strength and protection to core. Maximum number of large vertical copper tubes, heavily tinned inside and out, making them non-corrosive. Original one-piece drawn tank construction, top and bottom; no soldered seams at vital points. Attached to car with patented underslung cradle which removes all twisting strain on frame or lower tank. Black core.

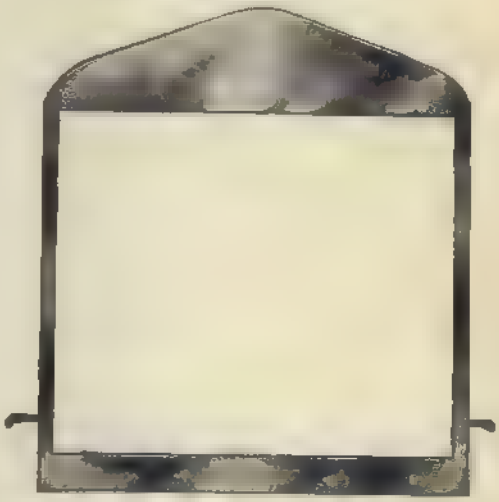
SPECIAL RADIATOR SHELLS FOR FORD

Nickel



Nickel Radiator Shell for all model Fords up to and including the 1925 model. This shell is not a steel one nickel plated but is made of nickel silver which has been highly polished. The woven anti-squeak fabric which is part of the shell prevents any rattling. These shells are a product of high grade workmanship and will greatly improve the appearance of any Ford. The weight of each one complete is about 6 pounds. Packed individually in a fibre carton.

Nickel Radiator Shell for Ford.....each $10 00

Black Radiator Shell for all model Fords up to and including the 1925 models. Is the same high class shell as the nickel only this one is made of steel, black enameled.

Black Radiator Shell for Ford.....each $3 00

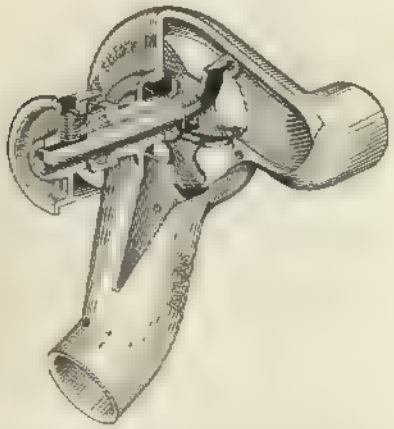
RADIATOR PROTECTING RODS FOR FORD

Radiator Protecting Rods for Ford. There are six protecting rods in all, attached firmly to a cross bar at the top and one at the bottom making the rods a complete unit. The rods are of ½-inch brass tubing level at the top and heavily nickel plated.

Radiator Protecting Rods for Ford.....complete $2 00

WATER PUMPS, PULLEYS AND HOOD FASTENERS

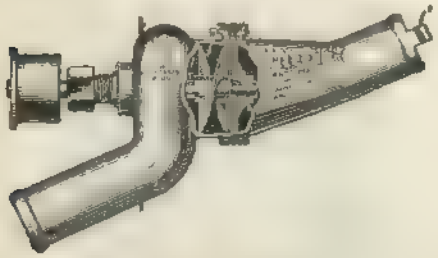
ATLAS CIRCULATING WATER PUMP FOR FORD



Atlas Circulating Water Pump for Ford. Strong, light, efficient and is of the most approved centrifugal design, carefully made of the best materials, and is proportionately efficient to the circulating pumps installed in the highest priced automobiles. Its two bronze bearings insure long life. There is nothing to get out of order or prevent its outlasting the car on which it is placed. It keeps the engine cool under all conditions and at all speeds. It permits using the highest percentage of anti-belt slippage and that will not interfere with circulation prevents steaming and evaporation; keeps the water always below the boiling point.

Atlas Circulating Water Pump for Ford.....each $4 50

U-NEED-IT ROTARY PUMP FOR FORD



U-Need-It Rotary Pump for Ford. A pump that will give a positive flow of water at all speeds of the Ford motor. It is a pump that really pumps; not just an impelling pump but a compelling pump that will not cause belt slippage and that will not interfere with circulation should belt break. It saves alcohol in cold weather because of the perfect temperature at which the solution is kept. Does not bolt onto the side of the block but merely takes the place of the pipe—using the same hose connections and does not interfere with any other attachments. Runs with a loose belt, not a tight belt. Includes Gates belt. Weight, 7½ lbs., packed in separate cartons.

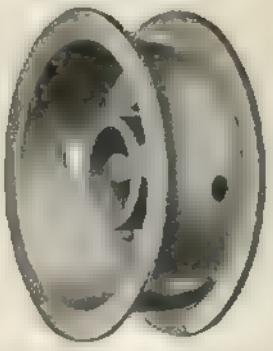
U-Need-It Rotary Pump for Ford.....complete $5 50

Double Flange Pulley.....each 75

Extra Belts. Either leather or Gates Vulco . " 50

MILWAUKEE FLANGED CRANKSHAFT PULLEYS

(For Ford)



No. 1 Milwaukee Flanged Crankshaft Pulley. For Ford crankshaft. Guaranteed to keep the belt on the pulleys under all conditions of the belt. It is made of extra heavy drawn steel throughout. Note the extra thickness of the hub. Fits all 1917 Ford cranksh fts

No. 1 Milwaukee Flanged Pulley.....each $0 75

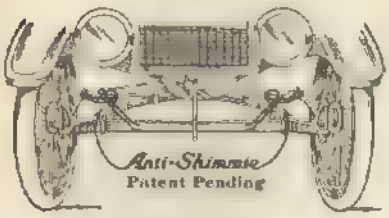
EQUIPMENT FOR FORD CARS

ANTI-SHIMMIE FOR FORD



Anti-Shimmie for Ford. Can be also installed on Dodge, Chevrolet, Overland and Oldsmobile. Takes the wobble out of the front wheels no matter how rough the road may be. Installed in three minutes without the aid of tools, or any alteration of the car. Eliminates wobbling of front wheels, no jar or vibration; relieves strain on driver's arms

To install insert the "hooded" end of the Anti-Shimmie into the "U" shaped yoke on each end of the long rod holding the front wheels together, first cramping or turning the front wheel as far to the left or right as possible.

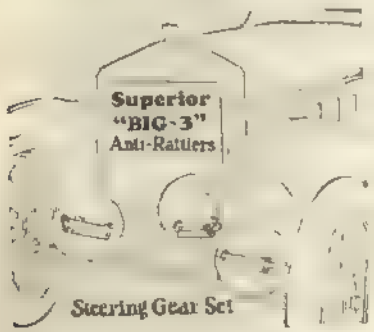
All the "loops" of the Anti-Shimmie spring to go over and under the long rod.

Place the other end of the Anti-Shimmie within the channel of the Ford axle, but first turn the front wheel in opposite direction, so as not to cause undue strain on Anti Shimmie for this operation.

Packed one set in a carton.

Anti-Shimmie .....per set $0 70

SUPERIOR ANTI-RATTLERS FOR FORD



Big 3 Superior Steering Gear Anti-Rattler Set. Consists of one for the arm and two for the rod. Furnished in display carton of twelve.

Big 3 Superior Anti-Rattler Set.....per set $0 75

No. 5 Superior Steering Arm Anti-Rattler. For Fords only. Stops the rattle and takes up steering wheel play. Furnished in display carton of twelve.

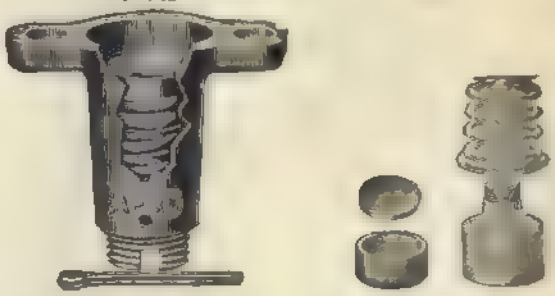
No. 6 Superior Brake Rod Anti-Rattler . . . . " 50

No. 7 Superior Steering Rod Anti-Rattlers. For Fords and 85% of all other cars. Stops the rattle of the steering knuckle joints. Reduces wear, takes up the play and improves the car control. Furnished in display carton of twelve.

No. 7 Superior Anti-Rattlers.....per pair $0 50

ANTI-RATTLERS AND VALVE ADJUSTERS FOR FORD

No. 21 No. 33



Apco Anti Rattlers. Take all the rattles out of the steering rods and radius rod. Malleable iron castings, black enameled, heavy springs, pressed steel cups, machine cut screw plugs. Easily installed.

No. 21 Apco Radius Rod Type.....each $0 35
No. 51 Apco Steering Rod Type.....per pair 35

No. 33 Apco Valve Adjusters. Silence the valves by reducing the play between valve stems and push rods. Consists of eight cups and a quantity of thin discs to take up the wear as it occurs.

No. 33 Apco Valve Adjusters.....each $0 25

TURKO STABILIZER FOR FORD

Turko Stabilizer for Ford Steering Columns. Takes the vibration out of the Ford Steering Column. It is most appreciated when driving over rough roads or on long trips, because it holds the Steering Wheel Column steady. Makes driving more comfortable, more pleasant and safer.

Semi-steel, nickel plated .....each $1 50

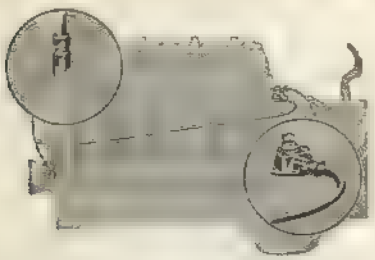
APCO STEERING COLUMN BRACE FOR FORD

No. 42 Apco Steering Column Brace for Ford. Supports the steering column and prevents the base of the column loosening at the dash. It also prevents excessive vibration of the steering wheel and makes it as solid as a rock. Finished in black enamel.

No. 42 Apco Steering Column Brace .....each $0 75

EQUIPMENT FOR FORD CARS

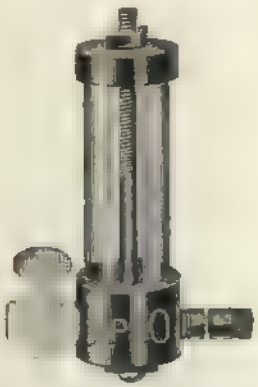
APCO OILING SYSTEM FOR FORD



No. 60 Apco Oiling System. Provides an auxiliary pipe outside the motor so that if the regular small pipe inside the cylinder block through which oil is circulated becomes clogged the motor is still supplied with oil. A special fixture takes the place of the regular magneto plug and a pipe attached to this fixture carries the oil to the breather pipe, which is also a special design. Installation takes 15 minutes. Packed in box; weight, 10 ounces.

No. 60 Apco Oiling System.....complete $2 00

APCO GLASS OIL GAUGE FOR FORD



No. 12 Apco Glass Oil Gauge. Heavily nickeled castings, Scotch glass, leather packings make it reliable, and it is indispensable.

No. 12 Apco Glass Oil Gauge.... .. .each $0 40

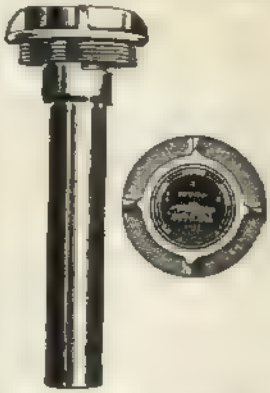
F-B OIL GAUGE FOR FORD

F-B Oil Gauge. Solid construction; can't clog or come apart.

F-B Oil Gauge.....each $0 27

OFFICIAL GASOLINE GAUGE

For Ford and Chevrolet



No. 34 Official Gasoline Gauge for Chevrolet. Takes the place of the filler cap and tells at a glance the quantity of gasoline in the tank. The mechanism is entirely protected by a heavy coppered tubing 1¼ inches in diameter. The luminous silver etched dial, 1¾ inches in diameter, is enclosed by a crystal glass.

No. 34 Official Gasoline Gauge for Chevrolet..each $1 50

No. 33 Official Gasoline Gauge for Ford. Is the exact duplicate of the Chevrolet gauge, excepting the dial is 1½-inch instead of 1¾-inch and the float barrel is 1 inch in diameter instead of 1¼-inch.

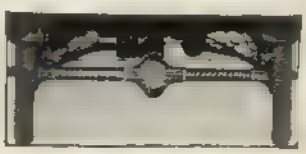
No. 33A, for Touring and Rdstr. up to 1919...each $1 50
No. 33B, for Sedan and Coupes, all years..... " 1 50
No. 33C, for Touring and Rdstr., 1920 and later " 1 50

PRESTO HUB GREASER FOR FORD

No. 3750 Presto Hub Greaser. For Ford front hubs. Greaser consists of a receptacle for the grease which screws onto the hub after removing the hub cap. The water, old grease and dirt in the hub are forced out by screwing down the plunger, forcing new clean grease in their place. Gives the hub, spindle body and bearing assembly a thorough cleaning and greasing without the necessity of removing the wheel.

No. 3750 Presto Hub Greaser.....each $1 50

KEYSTONE GREASE RETAINERS FOR FORD

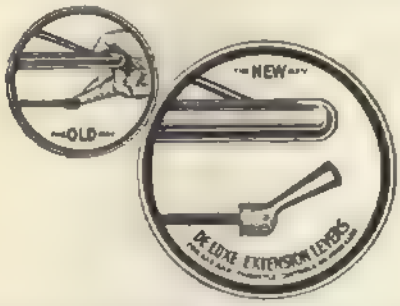


Keystone Grease Retainers for Ford. Made of quality steel and are easily attached. One of the retainers is inserted over the left axle shaft and the other over the right shaft. As the axle turns through them it works the grease back toward the differential instead of letting it work out through the axle ends.

Keystone Grease Retainers for Ford.....per pair $0 75

EQUIPMENT FOR FORD CARS

DE LUXE EXTENSION LEVERS FOR FORD



De Luxe Extension Spark and Throttle Levers bring the Ford spark and throttle controls within easy reach of the driver's fingers regardless of the type of steering wheel his car may have. They are highly polished nickel aluminum die castings. They are hexagon in shape.

De Luxe Extension Levers.....each $0 25

DE LUXE EXTENSION DOOR HANDLE FOR FORD

De Luxe Extension Door Handle for Ford cars is a hexagon shape nickel aluminum die cast handle, which should be on every Ford to ease the opening of doors. Readily attached. Display card free with every dozen.

De Luxe Extension Door Handle.....each $0 25

REX ADJUSTABLE EXTENSION HANDLE FOR FORD

Rex Adjustable Extension Handle. It is a long awkward reach down to the regular hand levers on a Ford. This extension shortens the reach and adds safety and comfort. Adjusted to fit any model Ford car or truck.

Rex Adjustable Extension Handle.....each $2 50

DOLLUP HUB SETS FOR FORD AND CHEVROLET

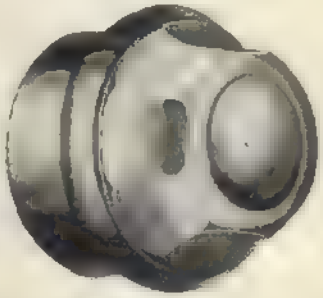
DollUp Hub Set. For Ford. Made of highly polished aluminum. Can be installed in a few moments by anyone. To install, remove the old Ford hub caps, slip the shields on, then screw on the new Red Spot caps; that's all. Set consists of 8 pieces: 4 flanges and 4 hub caps.

DollUp Hub Set. For Ford.....per set $3 00

DollUp Hub Set. For Chevrolet. Of same material and finish as Ford sets, but no hub caps are furnished, 4 shields only; used with standard Chevrolet cap.

DollUp Hub Set. For Chevrolet.....per set $2 20

HUB CAPS FOR FORD



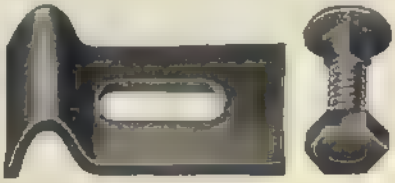
Aluminum Hub Caps for Ford. Made of especially hard aluminum of heavy gauge. Highly polished and retains a permanent and attractive finish. The threads are rolled into the metal insuring conformity to the threads on the hub. Has convex face permanently enameled red.

Aluminum Hub Caps for Ford.....per set (4) $0 60

HUB CAP FOR FORD

Hub Cap. Finished nickel plated brass.....each $0 50

BATTERY HOLD-DOWNS FOR FORD



Battery Hold-Downs for Ford.....per 10 pair $1 50
Bolt and Nut for Battery Hold Down.....per 100 3 70

EQUIPMENT FOR FORD CARS

DUPLEX CANTILEVER SHOCK ABSORBERS

Duplex Cantilever Shock Absorbers for Ford. Duplex not only absorbs all road shocks but completely snubs the vicious rebound. Has no bumping block or artificial stop so necessary in other shock absorbers. No solid block can register on the body. Gives under slung action—looks like a part of the car. The Duplex Shackle allows it to assist and work in perfect harmony with Ford springs; snubs violent upthrow, checks rebound, eliminates bounce, sideway and vibration.

Duplex Cantilever Shock Absorbers for Ford.
Per set (4) $19 00

GEMCO TRI-CHEKS

The Tri-Chek is a shock absorber, a snubber, and an equalizer—all in one.

The conical shape, and the size of this spring is so evenly balanced that its action as a shock absorber does not in any way stop the full action of the car springs. This easy action and also the two axle reenforcing bars allow us to guarantee that the Tri-Chek will not in any way harm the axle.

It's the rebound that breaks springs. The Tri-Chek snubs this rebound, and in fact will pay its initial cost by the saving on broken springs alone. Unexpected shocks break most springs. Prepare yourself for the unlooked-for bumps in the road by attaching a Tri Chek.

The Tri-Chek is the right kind of an equalizer for the Ford car, as it does not attach to or interfere with the steering mechanism in any way. It is securely fastened between the front frame and the axle of the Ford. The tension of the spiral spring holds the axle from swinging in the shackle bolts and stops the side swing that makes steering so hard on a rough road.

C4859 Tri-Chek, for Fords, with single spring clip..$5 00

RUBBER BUMPER

Rubber Bumpers. Made of the finest quality [illegible] and are designed to withstand severe shocks

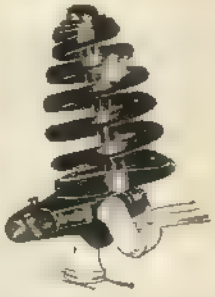
Leather Straps—for attaching, [illegible]		"	30

APCO SHOCK ABSORBERS



No. 200 DeLuxe Apco Shock Absorbers. With conical or bee-hive springs. The springs work with the Ford spring instead of against it. Apco Shock Absorbers are made to last without rattles. There are twelve hardened steel bushings in each set, "nut and bolt" adjustment for other places to take up wear, convenient spring cap oilers and high grade drop forgings instead of malleable iron.

Made in Three Types Touring, Sedan and Runabout. In ordering be sure to state which type is desired.

No. 200 DeLuxe Apco Shock Absorbers...per set $25 00

CRADLE SPRINGS FOR FORD

Cradle Springs for Ford are stronger and longer than others. They are scientifically designed and marvelously easy riding. The overall length of this spring (69 inches) including the two extension arms, which also are made of spring steel, is considerably more than twice the length of the ordinary Ford spring. When installing the Cradle Spring, we substitute an extension arm, made of Spring steel for the rigid Ford perch, thereby getting 69 inches of spring action instead of the 33½ inch action with the standard Ford installation.

Champion Electric Driven Blacksmith Forges

The four forge outfits described below offer a wide range of choice, the No 443 being suitable for those who do not have very heavy work or a great amount of it and the No. 442 Large Blacksmith Forge intended for constant service.

Illustration shows forge equipped with a No. 1 Blower, but the No. 50 and No. 51 are so great an improvement that we are furnishing the different outfits as follows:

Nos. 440, 441 and 443 are provided with a No. 50 Blower, and No. 442 with a No. 51 Blower. These blowers have variable speed controlled by a detached rheostat and a big motor using either alternating or direct current. For detailed description refer to page on blowers

No. 443. Electric driven light forge, ball tuyere iron, cast-iron hearth 23x25 inches, tubular legs, height 30 inches, with hood, weight 225 pounds. Price **$67.50**

No. 441. Electric driven forge, whirlwind blast, anti-clinker heavy nest tuyere iron, cast-iron hearth 32 x 45 inches, height 30 inches, with hood, weight 400 pounds. Price **80.00**

No. 440. Electric driven forge, same as No. 408 forge except with electric blower, whirlwind blast, anti-clinker heavy nest tuyere iron, hearth 30x36 inches, height 30 inches, with hood, weight 300 pounds. Price **86.00**

No 442 Electric driven large forge, same as No. 430 forge, except with electric blower, whirlwind blast, anti-clinker heavy nest tuyere iron, hearth 38x42x7 inches deep, height 26 inches, with hood and coal box complete, weight 530 pounds. Price **115.00**

Nos. 440, 441 and 442 Forgers furnished with water tank, $5 00 extra.

Champion "Midway" Spiral Geared Cast Iron Hearth Forges

No. 71 with Half Hood

No. 75 with Shield

No. 72 with Shield

No. 73 with Half Hood

The Champion "Midway" Spiral Geared Cast Iron Hearth Forges are well built, thoroughly reliable in every respect and we recommend them as strong and durable cast-iron forges The blower is the Champion "Midway" with its cross spiral gearing, enclosed in a dust-proof case This blower is simple in construction and without small gears or pinions, but does not have adjustable ball bearings as used in the Champion 400 line. It produces a strong blast, however, and crank can be turned in either direction.

The Midway forges, while not as well made as the Champion 400 line, are good, dependable, medium-priced forges and are especially desirable for mechanics who do not have constant use for a forge.

No.	Style Forge	Size of Hearth	Price Each	Size of Fan	Height	Weight
75	Shield	22 inches in diam	$30.00	10 inches	33 inches	165 pounds

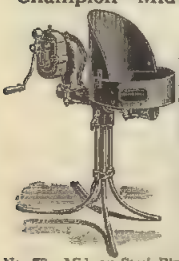
Champion "Midway" Spiral Geared Rivet Forge



No. 78 Champion Midway Spiral Geared Rivet Forge is intended for those who do not wish to invest their money in the highest grade forge, No. 401, and do not wish a Midway forge with a cast iron hearth, such as the No. 75. It produces a good blast, by turning crank either way, and is sold guaranteed to be a strictly first class medium price forge.

No. 78. Midway Steel Rivet Forge with shield; hearth 18 inches in diameter; height, 30 inches; fan 10 inches; weight 120 pounds. Price.. ..... **$31.00**

Champion "Midway" Steel Forges

No. 80 with Half Hood

A substantial and firmly built steel forge, constructed of heavy steel plate, legs riveted to the hearth and strongly braced. The sides of the hearth of the No. 80 are 6 inches wide and cover every requirement for an up-to-date blacksmith fire. The Midway blower with its spiral gearing is used. Equipped with a heavy nest tuyere iron weighing 50 pounds; the same as furnished with the Midway blower when sold separately. A first-class moderate priced forge.

No 80. Midway Steel Forge, hearth 30 x 36 x 6 inches deep, height 30 in., fan 12 in.; with half hood and 50-lb. heavy nest tuyere iron; weight 300 lbs Price .**$86.00**

Extra for water tank . **5.00**

No. 79. Midway Steel Forge; hearth 24 x 24 in. height 30 in.; fan 10 in.; with shield, weight 185 lbs. Price **$40.00**

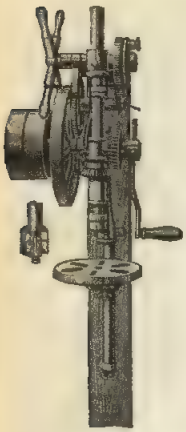
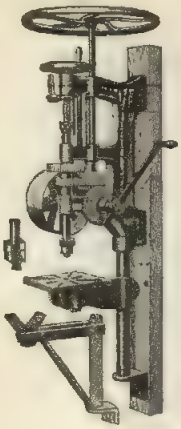
Western Chief Blacksmiths' Post Drills

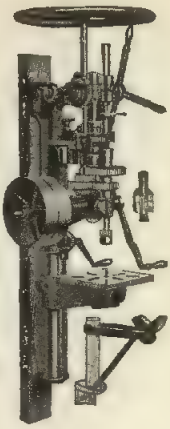
No. 19



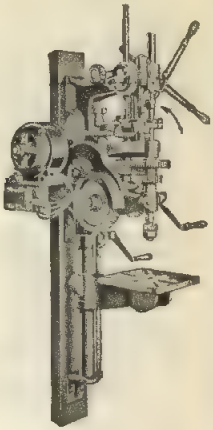
No. 7



No. 16



No. 16E



No. 19

A low-priced combined Hand and Self-Feed Drill, adapted to ordinary shop use. Hand and self-feed operated independently. A good drill for wood boring. Size of pulleys, 8x2 inches. Should be run at about 190 revolutions per minute.

No. 7

This drill is a hand and power drill with cut gears. Has automatic self-feed, and fast and slow speed, which can be changed instantly. Size of tight and loose pulleys for power, 10¾x2¼ inches. Drills should be operated at about 175 revolutions per minute.

No. 16

This drill is a ball-bearing drill with power attachment, hand-lever feed and horizontal, gear-driven positive self-feed. Each feed works independently of the other. Has cut gears and rack for raising and lowering table. Size of tight and loose pulleys, 10¾x2¼ inches. Drills should be run at 175 revolutions per minute.

No. 16E

This drill has all the time and labor-saving features of the No. 16 Drill, and in addition is equipped with electric motor drive, which costs less than 25 cents per day to operate. No belts are necessary, the motor being directly connected with spur cut gears.

No.	Price for Hand Power Only	Price With T. & L. Pulleys	Price With Electric Motor	Drilling Circle, Inches	Drills Holes Size, Inches	Up and Down Run of Table, Inches	Up and Down Run of Spindle Inches	Bored for S. S. Drills, Inches	Wheel Holder Attachment	Weight Pounds

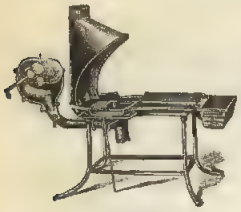
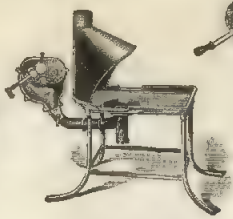
In these machines chuck is not separate but is attached to spindle.
In ordering, always state whether spindle is wanted bored for ½ or ¾ straight shank drills.
We always furnish spindles bored for ½-inch straight shank drills unless otherwise ordered.

Champion "Lancaster" Geared Forges



No. 41 with half hood.



No. 43 with half hood.

No. 45 with shield.

No. 48 with shield

In this catalog we offer for the first time a line of direct driven forges equipped with the Lancaster Geared Blower. This line is made by the makers of the Champion 400 and Midway Blowers and Forges, and is their third grade. The Lancaster Blower is described in detail on another page. It does not have ball bearings, but is smooth running and crank turns either direction to produce blast.

The No 41 Blacksmith Forge is a well built, direct-driven forge with cast iron hearth. The Lancaster Geared Blower is attached as shown in illustration. A heavy nest ball tuyere iron weighing 50 pounds is furnished with each forge. A complete, well built blacksmith forge at a very reasonable price.

No. 42 Agricultural Forge is a well made, low priced, direct-driven forge, especially recommended for agricultural use. It is nicely finished and with its large hearth and fan it is very suitable for farm use. The No. 43 is the same as No. 42, except that it is provided with a half hood instead of shield.

Nos 45 and 46 are strong, light, direct-driven, portable forges with cast iron hearths 22 inches in diameter and differ from each other only in that one has a shield, while the other has a half hood.

No. 48 is a new steel rivet forge of the same pattern as the Champion No 401 and equipped with the Lancaster Geared Blower. It is a very light, convenient and serviceable rivet forge at a moderate price.

No.	Style Forge	Size of Hearth	Size of Fan	Height	Weight	Price each
*41	Half hood	32 x 45 inches	12 inches	30 inches	390 pounds	$50.00

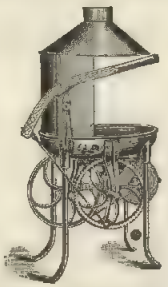
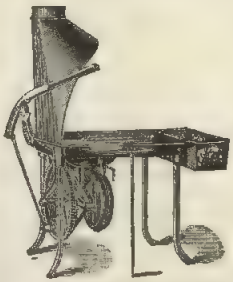
*No. 41 fitted with water tank, $5.00 extra.

Champion General Purpose Lever Forges

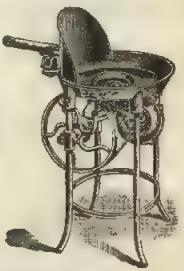
No. 55 with Shield



No 59 with Half Hood.



No. 61 with Half Hood and Water Tank.



No. 150 with Shield.

The Champion General Purpose Lever Forges are made with double ratchet, strong and substantial, adapted for all kinds of medium work, and will be found reliable and first class in every respect. The No. 61 is provided with an improved, revolving anti-clinker ball tuyere iron for regulating blast. No. 150 and 151 have single ratchet and are intended mainly for farmers who have only occasional use for a forge, and then only for light repair work.

Whirlwind Blast

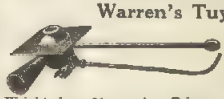
Champion Whirlwind Blast Tuyere Iron

Produces a circular rotary blast and prevents the heat from going to waste up the chimney. Concentrates the blast and heat in tuyere nest, making a hotter fire. Also has revolving pick which keeps slot free of clinkers Dimensions are Depth, 5 inches; width 8¾ inches, length 10½ inches, overall, 12⅞x14¾ inches Weight 60 pounds
Price each $12.00

Champion Tuyere Irons Patent Adjustable Nozzle

Made with large inlet for free access of air. The small necked patterns should not be used except with bellows or positive blower
Price each $4.00

Warren's Tuyere Iron



Blast is regulated by revolving a bull, which has three unequal sides. Open bottom valve and all cinders and ashes drop out.
Weight about 31 pounds. Price each $4.40

Norton's Tuyere Iron

To regulate, turn large rod. Levers and springs can be easily changed for right or left hand use. Draw out small rod to drop ashes.
Weight about 27 pounds Price each $4.00

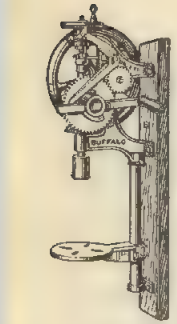
Buffalo Ball Bearing Drills



No. 611 Drill

Nos. 61 and 611 Ball Bearing Drills

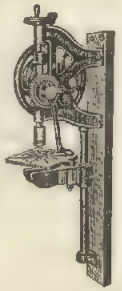
These are low priced machines designed for light work where a small drill is entirely satisfactory.

Each has a single speed and hand and automatic feed. Both are equipped with round adjustable tables.

No. 611 can be furnished with extended shaft.

	No. 61	No. 611
Drills to center diameter circle, in.	11½	11
Holes up to, in.	¾	¾
Spindle diameter, in.	⅞	⅞
Run of feed, in.	10¾	10
Run of table, in.	32	33
Weight crated, lbs.	70	90
Price, each	$8.25	$10.25

No. 619 Ball Bearing Drill

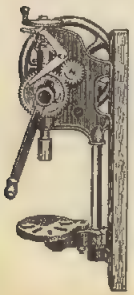


A heavy, powerful machine for all round work. Shafts and spindle are steel carefully machined and finished. All bearings bored and reamed in the solid metal of the frame, insuring accurate alignment and smooth running. End thrust of spindle sustained by two hardened steel bolts. Two speeds. By changing crank from front to rear gear, slow or fast speed is obtained. Handle turns forward on both feeds. Hand and automatic feeds—the latter adjustable to three speeds. Buffalo improved chuck regular equipment.

Drills holes to 1¼ in. diameter to center of 19 in. Spindle diameter, 1¼ in.; run of feed, 5 in.; run of table, 15 in. Length over all, 52 in Weight, 220 lbs.

Price, hand power only $26.50
Price, with pulleys, 8 in. dia. . . . $2.00

Nos. 116 and 118 Ball Bearing Drills



Two speeds changed instantly by means of sliding collar. Hand feed obtained by planetary gears and rack and pinion operated by four arm lever. Automatic feed. Four speeds, obtained by planetary gears. Change from hand to automatic feed instantly by means of sliding collar.

Drill to center of 18 and 16-inch circles. Drill holes up to 1½ inches. Diameter of spindle, 1¼ inches. Size of pulley, 8 x 3 inches. Run of table, No. 118, 17 inches; No. 116, 15 inches Length, No. 118, 66 inches; No. 116, 63 inches. Shipping weight, No. 118, 300 lbs.; No. 116, 270 lbs.

List Price—No. 118, hand operated $46.25
List Price—No. 118-A, hand and power $52.75
List Price—No. 116, hand operated $42.50
List Price—No. 116-A, hand and power $47.50

No. 614 Ball Bearing Drill

This machine has a strong, well ribbed frame with steel shaft and spindle carefully turned and fitted. One spindle speed, two feeds, hand and automatic, the latter with three speeds.

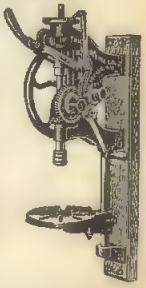
Steel balls take up friction between spindle and feed screw. Slotted table easily raised, lowered or swung aside. Fitted with Buffalo Improved Chuck.

Specifications

Drills holes up to 1¼ in. diameter to center of 14 in. circle. Spindle diameter, 1 in.; run of feed, 3 in.; run of table, 11 in.; chuck bored, ½ in.; length over all, 41 in.; shipping weight, 96 lbs.

Price each $13.00

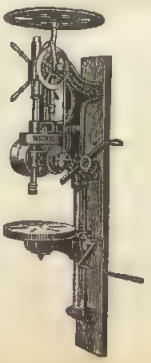
No. 515 Ball Bearing Drill



A strong, powerful hand drill with heavy cast iron frame mounted on large post. Lever feed. Cut cast iron gears. Bearings bored and reamed in solid cast iron frame. Two speeds, lever and automatic. Slotted adjustable table. Improved Buffalo Chuck. Drills holes up to 1¼ in. diameter to center of 15 in. circle; run of feed, 3 in.; run of table, 12 in; pulley diameter, 6 in.; length, 40 in.; weight, 140 pounds.

Price, hand power, No. 515 . . . . $23.75
Price, with pulley, No. 515-A . . . 27.50

No. 124 Ball Bearing Drill



This drill is simple in design and gives maximum service with minimum wear Cast iron frame on heavy post. Slotted adjustable table. Two speeds for light and heavy work obtained by means of sliding adjustable collar. Can be furnished for hand power only or with T and L pulleys and hand crank. Hand and automatic feeds. Hand feed has 4 arm lever. Automatic feed adjustable.

Drills to center of 24 in. circle; drills holes up to 1½ in.; run of feed, 7½ in.; run of table, 17 in.; length over all, 72 in. Weight, 390 lbs.

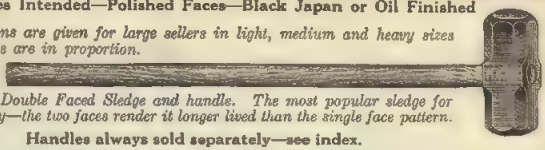
List Price No. 124, (hand operated) $66.00
List Price, No. 124-A, (Hand and power) $71.50

Furnished with Buffalo "Improved" Chuck.

Sledges and Heavy Hammers

Quality Tools—Forged from Well Balanced Designs—Heat Treated and Properly Tempered for Purposes Intended—Polished Faces—Black Japan or Oil Finished

Dimensions are given for large sellers in light, medium and heavy sizes —other sizes are in proportion.



Showing Double Faced Sledge and handle. The most popular sledge for striking only—the two faces render it longer lived than the single face pattern.

Handles always sold separately—see index.

Blacksmiths' Sledges

While known to the trade as Blacksmiths' Sledges, these types are used by contractors, railroads, mining companies, as well as other industries requiring heavy hammers or sledges.

Eureka Geared Forges

No. 143

No. 145

No. 147

The Champion Eureka Forges are equipped with cut-geared crank-driven blower, helical gearing being used to give smooth running and noiseless operation. The gear ratio gives 48 revolutions of the blast wheel to one turn of the crank, making a strong, steady, high pressure blast with smooth easy turning—crank turning either direction. The gear case is oil-tight and dust-proof.

No. 142 Forge, with Shield. Hearth 23x30 inches. Height 30 inches. Fan 10 inches. Weight 135 lbs. $35.00

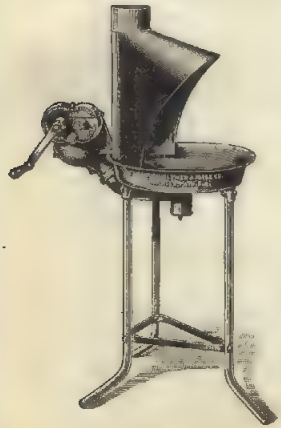
No. 143 Forge, same as No. 142 except with Half Hood. Weight 140 lbs. 40.00

No. 145 Forge, with Shield. Hearth is 18 inches. Height 30 inches. Fan 8 inches. Weight 70 lbs. 14.00

No. 146 Forge, same as No. 145, except with Half Hood. Weight 75 lbs. 16.00

No. 147 Forge, with Shield. Hearth 22 inches. Height 30 inches. Fan 8 inches. Weight 85 lbs. 24.00

No. 148 Forge, same as No. 147, except with Half Hood. Weight 90 lbs. 27.00



No. 146-S with Half Hood

Forges Nos. 145S and 146S

These Forges are designed for light and medium work on farms, plantations and in garages where a comparatively light weight Forge is desirable.

The fan is driven by cut helical gears running smooth and noiseless in a dust-proof oil-tight gear case.

The hearth is stamped from a single steel sheet of extremely heavy thickness, making a light weight low-priced rigid forge for general agricultural use.

The legs are bolted to the hearth with a heavy steel leg socket, and are strongly braced. 18 inch diameter Hearth—10 inch Fan Case.

No. 145-S with Shield. Weight 55 lbs. Price each $12.00

No. 146-S with Half Hood. Weight 60 lbs. Price each 14.00

No. 145-S with Shield

Bullock Warranted Anvils

Wrought Base, Solid Crucible Tool Steel Face

General Blacksmiths' Pattern

Farrier's Cliphorn Pattern

Our Bullock Anvil is strictly an American product, and because of this is sold on its merits alone and not upon tradition. While the principal features of manufacture are essentially the same as the Peter Wright, it varies in one important particular, i. e., the face *is made in one piece*, whereas the old English method was to weld the face on *in sections about six inches in length*, a fair sized anvil requiring several sections to complete the face.

With the single exception of the face, the Bullock anvil is made in exactly the same manner as the famous old Mousehole and Peter Wright, but with newer and better equipment.

The process of manufacturing the Bullock anvil is as follows The base or bottom part is formed by piling up scrap iron, carefully selected, of course and welding into a solid mass. While still hot it is placed in a die and blocked to shape, the power used being steam. The whole of the upper part including the horn and tail, is also forged from selected scrap Next the tool steel face is welded on, the hardy and pritchel holes punched the tail or heel squared and the horn finished to shape. The two pieces, base and upper part are then welded together at the waist The anvil is then thrown on a finishing block and finished so far as forging goes, with hand tools.

The Bullock is an anvil with horn and heel in perfect proportion, large base that does not require strapping, tempered edges to prevent chipping, level and true face of correct size, also hardy and pritchel holes and other mechanical details of correct accuracy. In addition to this it has the proper resilience between anvil and hammer and a real musical ring. Its proportions overall are correct, its design is graceful, and above all it is stable on the block. Everything considered it is

The Ideal Anvil for Particular Workmen

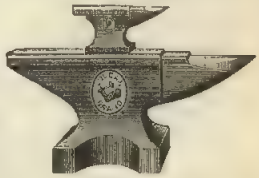
Vulcan Anvils

Cast Iron Base—Tool Steel Face



These anvils are cheaper than our Bullock warranted anvils, but for occasional use will give satisfactory service.

The body or base is made of Lake Superior charcoal iron of superior mixture—no scrap used.

The face is one solid piece of tool steel thoroughly welded to body by special process.

Face is ground tempered and polished.

Horn is covered with and its extremity made entirely of tough untempered steel.

Number	Approximate Weight, Pounds	Size of Face, Inches	Hardy Hole	Pritchel Hole	Purpose	Price Each

Champion Steel Rivet Forges (400 Series)

Equipped with the Famous Champion 400 Blower

No. 401 Forge with Shield. Also furnished with Half Hood and Closed Hood.

The 400 series of Champion Steel Rivet Forges are equipped with the famous "400" noiseless, high-speed geared blowers. The "400" blower is equal to a power machine and will produce a white heat blast which cannot be obtained with the regular hand blower. Operates with marvelous ease, produces a strong, regular and positive blast and will create a welding heat on 4-inch bar iron in ten minutes. Handle can be turned in either direction. Fitted with the highest possible grade of adjustable bearings, with cups and cones lathe turned from the solid bar, hardened as hard as glass, ground and polished to the highest finish, making them perfect and durable high-speed adjustable bearings.

This line of forges is especially intended for railroads, bridge and tank builders, structural steel workers, etc., who know it is always economical to buy the best. They are easily taken apart and set up again. Made of steel throughout, strong and light. Made in several sizes and styles as shown in list below. The No. 401 is the most popular forge.

No.	Price, Each	Style of Forge	Diam. Hearth, Inches	Diam. of Fan, Inches	Height of Forge, Inches	Apprx. Wt. Lbs.
401	$35.00	With Shield	18	9	30	135
402	38 00	With Half Hood	18	9	30	140
403	40 00	With Closed Hood	18	9	30	150
401½	40 00	With Shield	22	9	30	140
402½	43 00	With Half Hood	22	9	30	145
403½	45.00	With Closed Hood	22	9	30	155

Champion Steel Rivet and Toolmakers' Forges

Furnished with Shield, as shown, or Half Hood.

These forges have hearths 24 inches square to which are riveted the angle steel legs. They are equipped with the famous 400 blower, the same as furnished with the No. 401 forge, which is described in detail above, and is large enough to cover the entire surface of the hearth with a hot fire should it be necessary. The blower is noiseless and blast is produced by turning crank in either direction. For many kinds of work a hearth 24 inches square is preferable to one 18 inches in diameter, there being more room for fire, coal and tools. These forges are first quality in every respect and are very popular numbers. Hearth 24x24 inches, height 30 inches; fan 9 inches in diameter.

No. 404. Rivet Forge with Shield as illustrated. weight 180 pounds. Price.....$45.00

No. 405. Toolmakers' Forge with Half Hood Complete, weight 185 pounds. Price..... 49 00

Champion Steel Boilermakers' and Machinists' Forges

These forges have hearths 30 x 30 inches and the blower fan is 10 inches in diameter. The blower is the same as in the No. 401 forge, except that it is a size larger, and is powerful enough for almost any work that can be placed on the hearth. The forges are made of steel throughout with legs riveted to hearth and thoroughly braced, making them firm and rigid. The illustration shows the No. 407 forge which is furnished with half hood. The No. 406 is exactly the same except with shield. Hearth 30x30 inches; height 30 inches, fan 10 inches diameter.

No. 406. Boilermakers' Forge, with shield, weight 255 pounds. Price.....$55.00

No. 407. Machinists' Forge, with half hood, as illustrated. weight 275 pounds. Price..... 60.00

Champion Steel Horseshoers' and Blacksmiths' Forge

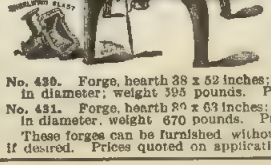
The hearth in this forge is made of unusually heavy steel plate with perpendicular sides 6 inches high, and can be bricked up to suit the needs of any blacksmith. Provided with the famous 400 blower and the Champion whirlwind blast tuyere iron without extra charge. No. 408 Forge can be furnished with tight and loose pulleys for turning blower with power. Height of forge 30 in.; fan 12 in. diam.

No. 408. Hearth 30 x 36 inches, half hood as illustrated; weight 300 lbs. Price.....$65.00

No. 408½. Same as No. 408 with tight and loose pulleys for power, weight 345 pounds. Price... 76.50

No. 409. Hearth 30 x 40 inches; half hood as illustrated; weight 310 pounds. Price..... 70.00

Champion Large Combination Forge



This is an extra heavy cast-iron forge, designed for use in railroad and large blacksmith shops, plow works, etc. The hearth is 6 inches deep and very heavy. It can be built up with fire brick and have every advantage of an all brick or stone forge. Equipped with a 400 blower, whirlwind blast tuyere iron, hood and water tank complete. Height of forge 26 inches.

No. 430. Forge, hearth 38 x 52 inches; fan 12 inches in diameter; weight 395 pounds. Price.....$80.00

No. 431. Forge, hearth 80 x 63 inches; fan 14 inches in diameter, weight 670 pounds. Price..... 90.00

These forges can be furnished without hood and blower if desired. Prices quoted on application.

Blacksmith's Anvil Tools

Highest grade, forged from well designed dies Uniform in size and weight. Properly heat-treated and tempered for the purpose intended. All scale is removed—the tools are sand blasted and finished in black paint—baked on

Wrenches, hooks and board, packed for shipment. 80 lbs.
No. 39B complete with 30 wrenches **$23.25**

WALDEN-WORCESTER SOCKET WRENCHES

STEEL MERCHANDISING CABINET

No. 1100

FOR INTERCHANGEABLE WRENCHES, SOCKETS AND PARTS

A "merchandiser" in every sense of the word—all steel—substantial—convenient—attractive—carrying a selection of interchangeable handles, sockets and parts. An ideal cabinet for dealers who are selling to mechanics and car owners.

All parts and sockets are interchangeable with each other, enabling mechanics to make innumerable combinations to take care of unusual demands.

Sockets are chrome nickel, insuring strength and wear. Braces have solid steel grips and forged square ends for sockets.

The Tee handle wrenches have a sliding bar or handle so that they may be used as Tee or L wrenches.

The reversible back spin ratchet can be used in combination with Tee handles (long or short shank), offset handles or brace speed wrenches.

The assortment has been selected in proportion to the demand, with ample space for additional sockets or wrenches as the individual needs may require.

Contents

No.	
3—1119	Long Shank Speed Wrenches, 21 inches over all, 10-inch shank, with solid steel grips.
3—1115	Short Shank Speed Wrenches, 14⅛ inches over all, 4¼-inch shank, with two solid steel grips.
3—1127	Long Shank Tee Handles, 12-inch shank with 10-inch sliding cross bar.
3—1106	Short Shank Tee Handles, 6-inch shank with 8-inch sliding cross bar.
3—1113	Back Spin Reversible Ratchets, 2¾ inches over all, 1-inch diameter.
3—1111	Sliding cross bars, 10 inches long, ⅜-inch wire.
3— 712	Ratchet Wrenches.
3—1109	Plug Connectors.
3—1139	9-inch Extension Bars.
3—1110	Socket Connectors.

WALDEN-WORCESTER SOCKET WRENCHES

INTERCHANGEABLE SOCKET WRENCH SETS

No. 27

A complete heavy duty socket wrench set for use by mechanics or millwrights in station, garage or general factory and mill service. All parts nickel plated.

Contents

No.
712—11-inch Ratchet Wrench.
1143—Tee Handle and Extension Shank.
1125—Offset Handle.
1163—Brace Wrench.
1102—Universal Joint.
1109—Plug Connectors (2).
1108—Extension Top.
1139—9-inch Extension Bar.
16 Hex. Sockets—$\frac{1}{4}$, $\frac{5}{16}$, $\frac{3}{8}$, $\frac{7}{16}$, $\frac{1}{2}$, $\frac{9}{16}$, $\frac{5}{8}$, $\frac{11}{16}$, $\frac{3}{4}$, $\frac{13}{16}$, $\frac{7}{8}$, $\frac{15}{16}$, $1\frac{1}{16}$, 1, $1\frac{1}{8}$, $1\frac{3}{16}$, $1\frac{1}{4}$.
11 Square Sockets—$\frac{3}{8}$, $\frac{7}{16}$, $\frac{1}{2}$, $\frac{9}{16}$, $\frac{5}{8}$, $\frac{11}{16}$, $\frac{3}{4}$, $\frac{7}{8}$, 1, $1\frac{1}{8}$, $1\frac{1}{4}$.

THE ALL-STEEL TOOL BOX

in which this set is furnished is strong and substantial, yet light and compact, with a place for each part. It is designed for convenience and durability, with space provided for additional tools.

The leather grip handle makes it easy to carry the set from one job to another while the lock assures safety.

No.	Wt. per set		Per set
27	Set	21 lbs	**$26.00**

No. 16

A most desirable socket wrench set for owner's use and for general service. All parts nickel plated.

Contents

No.
712—11-inch Ratchet Wrench.
1130—9-inch Extension Bar
1102—Universal Joint.
1109—Plug Connectors (2).
16 sockets—Hex. $\frac{1}{4}$, $\frac{5}{16}$, $\frac{3}{8}$, $\frac{7}{16}$, $\frac{1}{2}$, $\frac{9}{16}$, $\frac{5}{8}$, $\frac{11}{16}$, $\frac{3}{4}$, $\frac{13}{16}$, $\frac{7}{8}$, $\frac{15}{16}$, $1\frac{1}{16}$, 1, $1\frac{1}{8}$, $1\frac{3}{16}$, $1\frac{1}{4}$.

THE ALL-STEEL TOOL BOX

in which this set is furnished is strong and substantial, yet light and compact, with a place for each part. It is designed for convenience and durability, with space provided for additional tools.

No.	Wt. per set		Per set
16	Set	10 lbs.	**$14.00**

No. 26

Especially well adapted for use in service stations, garages and repair shops, on all classes of automotive work. This set is the same as the No. 27 set, except that it does not contain the series of square sockets. All parts nickel plated.

Contents

No.
712—11-inch Ratchet Wrench.
1143—Tee Handle and Extension Shank.
1125—Offset Handle.
1163—Brace Wrench.
1102—Universal Joint.
1109—Plug Connectors (2).
1108—Extension Top.
1139—9-inch extension bar.
16 Hex. Sockets—$\frac{1}{4}$, $\frac{5}{16}$, $\frac{3}{8}$, $\frac{7}{16}$, $\frac{1}{2}$, $\frac{9}{16}$, $\frac{5}{8}$, $\frac{11}{16}$, $\frac{3}{4}$, $\frac{13}{16}$, $\frac{7}{8}$, $\frac{15}{16}$, $1\frac{1}{16}$, 1, $1\frac{1}{8}$, $1\frac{3}{16}$, $1\frac{1}{4}$.

THE ALL-STEEL TOOL BOX

in which this set is furnished is strong and substantial, yet light and compact, with a place for each part. It is designed for convenience and durability, with space provided for additional tools.

The leather grip handle makes it easy to carry the set from one job to another, while the lock assures safety.

No.	Wt. per set		Per set
26	Set	22 lbs.	**$20.00**

No. 25

Designed for garages, service stations and repair shops. Reasonable in price. Has extra heavy duty handles and interchangeable steel sockets which offer quick change possibilities and give a wide range of use.

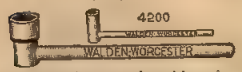
WALDEN-WORCESTER SOCKET WRENCHES

OFFSET TYPES

SINGLE END OFFSET—1 SOCKET

4200 Series



The 4200 series meets a demand for an improved type of heavy duty offset wrenches. The sockets are so designed as to provide a reasonable depth of clearance for places where the bolt may extend through the nut. The outside diameter of the socket is held down as far as practical to permit of the greatest possible clearance in operation. The sockets are all heat treated, plain lacquer finish.

We call particular attention to the complete data chart with specifications shown below.

No. 6218 **Each $1.20**

SPEED WRENCHES

No. 6000 Series

Length overall 10".
Brace socket speed wrenches are most effective when used on a series of nuts or bolts of the same size, upon work such as the removal and replacement of cylinder heads they effect remarkable time saving.

Also especially useful on the following places:

Crank case or oil pan
Cylinder head
Transmission cover
Transmission support
Clutch case support
Timing gear case cover
Rear axle housing
Intake Manifold
Exhaust Manifold.

TEE HANDLE TYPES

2700 Series

Handle 9" Shank 12"

This Tee Handle type socket wrench is our original design and has been popular with the mechanic and the trade in general for over twelve years. The loop type handle has always been a great favorite with the user on account of the special hand fitting design, permitting the operator to get a good grip without hurting hand when setting up tight.

No.	Size	No.	Size
2714	7/16	2722	11/16
2716	1/2	2724	3/4
2718	9/16	2725	25/32
2719	19/32	2726	13/16
2720	5/8	2728	7/8

2700 Series. All Sizes. Each $.85

UNIVERSAL JOINT TEE HANDLE WRENCHES

The "TeeFlex" series offers mechanics a tool with all the rugged reliability and serviceability of a Tee Handle Socket Wrench of rigid type with the added advantage of a universal joint, built integral with the tool. The "TeeFlex" series, therefore, can be operated in difficult and seemingly impossible places; on such work as taking off cylinder to base bolts, removing manifold (certain cars), removing body bolts, removing oil pan (certain cars), brake support.

1016-1/2"	Each $2.00
1018-9/16"	Each 2.00
1020-5/8"	Each 2.00

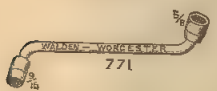
1024-3/4"	Each 2.50
1028-7/8"	Each 2.50

WALDEN-WORCESTER SOCKET WRENCHES

WRENCHES FOR FORD CARS

FOR CARBURETOR FLANGE AND GENERATOR



Socket sizes 9/16" and 5/8".
Length overall 9-7/8".

The 9/16" hex. end is properly designed to reach both flange bolt nuts with carburetor and intake manifold in place on engine. It allows carburetor flange bolts to be tightened in place or the carburetor to be taken off or put on without disturbing the intake manifold.
The 5/8 end for generator gives sufficient length of shank to clear breather plate and commutator. The other end is so designed that the end will clear both radiator shell and fan, thus permitting the generator cap screws to be tightened with ease and convenience.

No. 771 **Each $.80**

FOURTH CONNECTING ROD SWIVEL WRENCH

Socket size 5/8".
Length overall 13-3/4".
An innovation in socket wrenches for reaching the fourth connecting rod. The new feature —the swivel action of the socket on the handle—allows the use of the handle at many different angles.
The wrench is, therefore, especially well adapted for reaching the fourth connecting rod because it can be used with the crankshaft in any position.
The offset design of the wrench allows an increased angular swing of the handle. By turning the socket so that the large end is on the opposite side to the position in starting, this increased swing is made possible.
Also useful for both inlet and outlet water cylinder connection cap screws.

No. 774 **Each $.80**

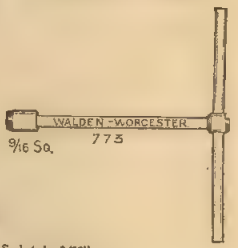
MAIN BEARING SWIVEL WRENCH

Socket size 9/16" sq.
Length overall 13-3/4".

The swivel action of the socket on the handle (illustrated below) permits using this wrench on the front main bearing and the center main bearing *without taking the motor out.* The offset design and the swivel action of the wrench gives it extra swing and leverage.

No. 775 **Each $.80**

MAIN BEARING TEE HANDLE



Socket size 9/16" sq.
Length overall 10".
This wrench is so designed that it may be used on the center main bearing *with the motor assembled* and on the front main bearing *when the motor is out.*

No. 773 **Each $1.50**

RATCHET WRENCH

11/16" hex. opening.
Length overall 6-3/8".
Used on: Ford brake and reverse transmission bands.

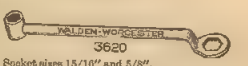
No. R4564 **Each $.55**

CONNECTING ROD WRENCH

Socket size 5/8".
Length overall 10-5/16".
Fits all connecting rod nuts including the fourth connecting rod.

No. 5810 **Each $.60**

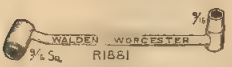
FOR SPARK PLUG AND CYLINDER HEAD



Socket sizes 13/16" and 5/8".
Length overall 11".
Used on: Cylinder head cap screws, spark plugs, water cylinder inlet, water cylinder outlet, differential oil plug drain, transmission drain plug.

No. 3620 **Each $.80**

DOUBLE END OFFSET—2 SOCKETS



Socket sizes 9/16" hex. 9/16" sq.
Length overall 9-7/16".

The 9/16" square socket end on this wrench, redesigned to take both the center and front main bearing on the Ford car. The socket has been so put as to enable the operator to get a good grip without hurting hand when setting up tight.
The 9/16" hex. socket on the other end has a very thin wall for clearance and is intended for wrist pin use only. It is not guaranteed for general use.
Used on: Front main bearing, center main bearing, wrist pin clamp screw, running board bracket, running board to fenders, front spring clamp bolt center.

No. R1881 **Each $1.20**

UNIVERSAL JOINT TEE HANDLE

Socket size 5/8".
Length overall 13-1/4".
Used on: Connecting rod, cylinder head, water cylinder inlet connection.

No. 1620 **Each $2.00**

FOR FLY WHEEL CAP SCREW

Socket size 11/16".
Length overall 11-3/4".
Used on: Fly wheel cap screws.

No. 3822 **Each $.70**

For prices, see page 1474

WALDEN-WORCESTER SOCKET WRENCHES

TEE HANDLE WRENCHES

4300 Series

This is a Tee Handle wrench of extra strength with extra depth sockets, heat treated for heavy duty work. The sliding bar can be used as an L or Tee as the case may require. Plain lacquer finish.

We call particular attention to the information chart listed below.

DRAIN PLUG SERVICE SET

The hexagon and square sockets and plugs in this set were especially selected for draining and re-filling crank cases, transmissions and differential housings. It will do away with a lot of make-shift equipment heretofore used, thereby saving considerable time and also preserving the life of the head of the plugs themselves.

This particular assortment will take care of better than 90 per cent of the passenger cars and trucks being built. The sliding bar handle can be used as a Tee or Offset as the case may require. specially useful in all oil and service stations and equally convenient and necessary for regular garage use.

Contents:

1 No. 1124 Tee Handle having a 4-inch shank with cross bar for use with sockets and plugs.
7 Hexagon Sockets—1/2, 9/16, 11/16, 1, 1 1/16, 1 1/8, 1 1/4.
9 Square Sockets—5/16, 3/8, 7/16, 1/2, 9/16, 5/8, 11/16, 3/4, 13/16.
8 Plugs—7/16, 3/8, 7/16, 1/2, 9/16, 5/8, 11/16, 3/4.

Packed in substantial tool box 12 1/2 x 5 1/2 x 2 5/8 inches. Weight of set complete, 4 lbs., 8 ozs.

QUINTET
TRADE MARK REG.

TIRE AND RIM WRENCH

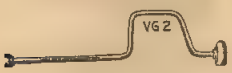
Length over all, 14 inches.

A very substantial brace with 12-inch sweep. On shank of brace is a holder for five interchangeable sockets which are held by ball-friction, so the sockets will not drop off. Sockets include standard sizes 5/8, 11/16, 3/4 and 7/8. Any socket may be replaced from regular stock. The longer shank on brace provides ample clearance for all standard tires and rims.

WALDEN-WORCESTER SOCKET WRENCHES

WRENCHES FOR FORD CARS

LONG SHANK BRACE GRINDER



Length overall 18-11/16".
Fork end flexible and will reach all valves including one under dash board.

No. VG2 — Each $.96

LONG SHANK BRACE GRINDER

Length overall 18-3/16".
A valve grinder which is semi-universal in that it has a swivel end with two prongs which can be used on valves for Ford cars.

No. VG4 — Each $1.25

SHORT VALVE GRINDER

Weight 8 oz.
The original wire handle valve grinder redesigned with 5/8" bar handle which swivels on cone bearing. The fork end fits the head perfectly.

No. VG3 — Each $.55

WHEEL ASSEMBLY WRENCH

A Brace (speed wrench), with two sockets, each socket having two broached openings to take four parts; front hub cone and axle nut, hub cap and rear axle nut.
Dimensions: Extreme length, 18-5/8", 9/16" diameter, 6" leverage, 12" sweep, swivel handles on each end adjoining socket.
When assembling cars at railroad station this wrench will save at least one third of your time. Only one wrench to handle. Around the repair shop this wrench will speed up your work.

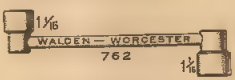
No. 1490 — Each $2.75

SINGLE END OFFSET—1 SOCKET

Socket size 1/2".
Length overall 5-1/16".
Used on: Front spring clamp bolt nut, differential drive gear cap screw, differential housing bolt and nut, rear spring clamp bolt nut, crank case oil pan, coil box to dash.

No. 494 — Each $.50

DOUBLE END OFFSET—2 SOCKETS



Socket sizes 1-1/16" and 1".
Length overall 10-3/4".
Used on: Rear spring perch to housing, steering gear wheel nut.

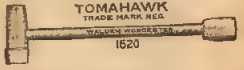
No. 762 — Each $1.35

DOUBLE END OFFSET—2 SOCKETS

Socket sizes 9/16" and 3/4".
Length overall 9-3/16".
Used on: Spindle pivot nut, spindle tie rod clevis connecting rod bolt nut, radius rod bolt and nut (rear) differential case nut, differential case stud nut, brake shoe support bolt and nut, universal ball cap screws, muffler head to frame bolt nut, muffler rod nut, main bearing (rear) intake and exhaust manifold to cylinder block clamp nut, cam shaft bearing set screw, commutator case support bolt, crank case arm bolt and nut, fan bracket bolt, fan bracket support bolt, battery bracket to frame bolt, transmission drive plate screws, head lamp bracket.

No. 2418 — Each $.80

DOUBLE END OFFSET—3 SOCKETS



Socket sizes 5/8", 5/8" and 1/2".
Length overall 9-1/2".
Used on: Drive shaft roller bearing housing cap screws, hub brace rod support, muffler rod nut, cylinder head cap screws, steering tube flange bolt nut, running board nut, motor support front, water cylinder inlet connection, water cylinder outlet connection, fender to running board, dash bracket to dash.

No. 1620 — Each $.75

DOUBLE END OFFSET—3 SOCKETS

Socket sizes 15/16", 7/8", 11/16".
Length overall 10-1/2".
Used on: Front radius rod nut, spindle pivot with oiler, tire rod, steering arm nut, spring clip nut, spring hanger nut, front wheel flange nut, front spring perch nut, drive shaft castle nut, differential oil drain plug, rear spring clip nut, rear spring hanger nut, brake shoe support nut, rear wheel to brake drum, battery clamp bolt and nut, body bracket connecting bolt.

No. 5660 — Each $1.10

UNIVERSAL JOINT TEE HANDLE

Socket size 9/16".
Length overall 13-1/4".
Used on: Intake manifold to cylinder block clamp nut, exhaust manifold to cylinder block clamp nut, universal ball cap nut, commutator case support nut, carburetor flange (on cars without self starter).

No. 1018 — Each $2.00

WALDEN-WORCESTER SOCKET WRENCHES

WRENCHES FOR FORD CARS

TEE HANDLE TYPES

Socket size 9/16", handle 6-3/8", shank 12". Weight 1 lb 6-1/2 oz.

Used on: Commutator case support, crank case to lower base, cylinder cover, fan adjustment, magnet cap screw, radiator support, universal ball cap, cap screws.

No. 2718 **Each $.65**

Socket 5/8", handle 6-3/8", shank 12", Weight 1 lb. 7-1/2 oz.

Used on: Cylinder head cap screws, drive shaft roller bearing, water inlet.

No. 2720 **Each $.55**

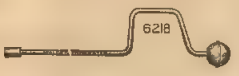
SHORT SHANK SPEEDER

Socket size 1/2".
Length overall 13-5/8".

Used on: Crank case lower cover, differential drive gear, muffler bolt, rear axle housing bolt and nut, steering tube flange nut.

No. 6064 **Each $.80**

LONG SHANK SPEEDER



Socket size 9/16".
Length overall 28-1/4".

Used on: Radiator support nut, front fender iron (side).

No. 6218 **Each $1.20**

SPEED WRENCH

Socket size 9/16".
Length overall 19".

Used on: Ball and socket bolt nut, intake manifold to cylinder block, exhaust manifold to cylinder block, cylinder to lower base, fan bracket bolt, magnet cap screws, transmission cover bolt and nut, transmission drive plate screws.

No. 6018 **Each $.90**

NUT AND BOLT SPEEDERS

Socket sizes 1/2" and 1/2".
Length overall 20 1/4".

Used on: Rear axle housing bolt and nut.

No. 6316 **Each $3.00**

Socket size 5/8".
Length overall 19".

Used on: Cylinder head cap screws, battery cable terminal to floor.

No. 6020 **Each $.90**

Socket sizes 9/16" and 9/16".
Length overall 20-1/4".

Used on: Ball socket bolt and nut, crank case arm bolt and nut (side), muffler support bolt and nut, steering post bracket bolt and nut, steering yoke clamp bolt and nut, transmission cover bolt and nut.

Socket size 11/16".
Length overall 19".
Used on: Truck, rear axle housing split.
... 5022 **Each $.90**

No. 6318 **Each $3.00**

WALDEN-WORCESTER SOCKET WRENCHES

No. 1452

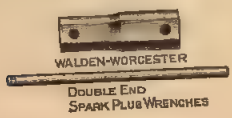
The new Walden service station rim wrench, equipped with ⅝, ¹¹⁄₁₆, ¾ and ⅞-inch sockets. A substantial brace with 12-inch sweep, permitting sufficient pressure. If additional pressure is desired, turn handle at right angles to socket, making it an offset wrench with a 14-inch handle. Weight, 3 lbs.

DOUBLE POWER SPEED WRENCHES

No. 7000 SERIES

The loop on the handle is the grip for extra leverage in releasing or final tightening, as the wrench may be used. An offset wrench is many times necessary, but this double power speed wrench will prove sufficient.

DOUBLE END SPARK PLUG WRENCHES



Pressed steel and case-hardened, two sizes in one. ¹⁄₁₆-inch over size of spark plug. No. 2937, ⅞ and 1⅛-inch. No. 3137, ¹³⁄₁₆ and 1⅛-inch.

LONG SHANK BRACE GRINDER

Length over all, 18-⅞ inches.

A valve grinder which is semi-universal in that it has a swivel end with two prongs which can be used on valves for Ford cars or can be used as a screw driver on cars which have valves with slotted heads.

BRACE LEVER WRENCHES

No. 1720 ..... ⅝ in.
No. 1722 ..... ¹³⁄₁₆ in.
No. 1724 ..... ¾ in.

No. 1728 ..... ⅞ in.
No. 1705 for Disteel wheels.

NOS. 1710 AND 1715

No. 1710, ¾ and ⅞-inch socket extra deep for Disteel wheels. No. 1715, ¾ and 1-inch with extra deep sockets for Budd Michelin wheels.

No. 6072

Short shank expander with ⅞-inch socket. Weight, 1¼ lbs.

No. 771

Ford carburetor and generator wrench. ⅜ and ⅝-inch sockets. Weight, 1 lb.

For prices, see page 1474

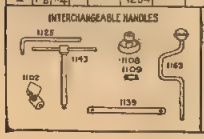
ENLARGED copies of this chart (on heavy paper) for posting in stores, stock rooms or garages will be furnished upon request. In ordering specify chart No. AD 9

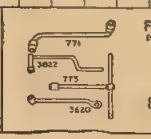
It pays to have the right wrench for the job — this chart will assist you in your selection.

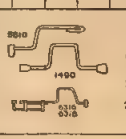
How This Chart Will Assist You in Selecting Wrenches

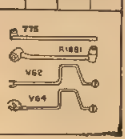
To arrive at stock number of wrench wanted, first decide size and type of nut, bolt or cap screw for which wrench is intended.

Locate this size in table at left of chart the corresponding socket size will be found at extreme left in the first column. Then follow through on the same line to the right until column showing type of wrench needed is reached. The number there indicated is the wrench you require









PARTS FOR FORD CARS

All parts illustrated correspond with the standard Ford repair parts of corresponding numbers. The letter "A" prefixed to numbers is merely to designate Automobile Department.

FENDER BRACES

Rear.

Steel, black enameled. Designed to protect fenders from sagging. Hooks over the outside edges of fenders. Equipped with lock nut which fits against turnbuckle to prevent loosening. Length 64 inches; diameter rod ⅜ inch.

No.	A-126R
1 to 12, Each	2 25
12 or more, Each	2 16
Last, Each	$1 00

One in paper bag; wt each 1½ lbs.

A-R-G. For Ford Cars.

Front.

Steel; black enameled finish. A fender brace that rigidly and permanently prevents front fenders rattling or cutting tires. Adds greatly to the car's appearance; does not touch lamps or radiator; holds license tag up out of mud.

Per Doz

No. A-15FB—Complete with necessary bolts and rivets to attach $66 00

Half doz in wood box; wt per doz 85 lbs

A-R-G. For Ford Cars, Rear.

Steel; black enameled. Especially designed to protect rear fenders on all model Ford cars.

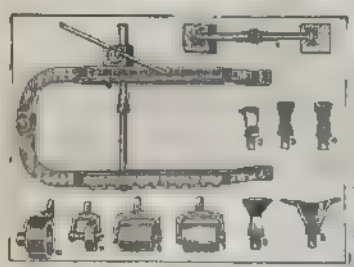
Fastens to chassis of car by regular body bolt through rear channel iron, one rivet in splash shield of fender and two in flange holds fender absolutely rigid. So formed as not to interfere with the use of any shock absorber Eliminates vibration and rattling.

Per Doz Sets

No. A-16FB—Complete with necessary rivets for attaching $66 00

Packed loose; wt per set of two 5½ lbs

FENDER STRAIGHTENERS



STILES ROLLS-EM-OUT

The device consists of an adjustable yoke constructed from two malleable iron arms hinged and slotted as shown in illustrations and through which the tension adjustment bar passes.

By means of this tension bar, the distance or spread between the arms is controlled and operated on the principle of an arbor press.

No matter what type of fender, whether flat, extreme roll or how badly crushed, the Stiles Rolls-Em-Out fender straightener set includes special shaped straightening tools to press and roll out the worst abrasions. Special attachment is included for rebeading Ford fenders. Doors, bodies, cowls, hood covers, etc., can be repaired as easily as fenders when damaged parts can be made available for application of the device.

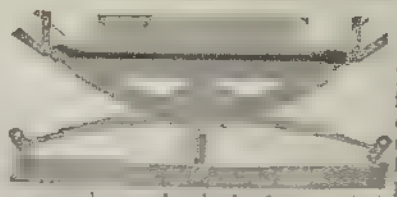
Each

No. A-55RFS—Outfit consists of malleable iron yoke and ten attachments; affording every combination necessary ..... ✦$126 00

One set in wood box; wt per set 45 lbs.

✦F. O. B. Missouri Factory Only.

CROSS MEMBER BRACES



For All Model Ford Cars.

Steel, black enameled. Designed to hook over fender braces, reinforces cross member, prevents radiator sagging, keeps front fender braces tight, prevents spring clips from coming loose also body from twisting caused by weak cross member. To install on late model Fords, turn up pointed part of front fender, install brace turn points of front fenders down over brace.

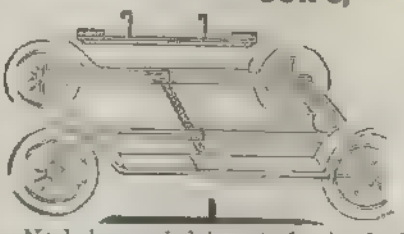
Per Doz

No. A-199—Length over all 26 ins; diam ½ in $13 50

Packed loose; wt per doz 24 lbs.

AUTO BODY BRACES

DOW'S,



For Ford Cars.

Supports the running boards, keeping them on a perfect level regardless of the weight or strain they are subjected to. It also holds the fenders firmly in place, preventing all noise and rattle.

No holes needed to attach, simply fasten the brace to the chassis and tighten the wooden absorbers which are furnished.

Each

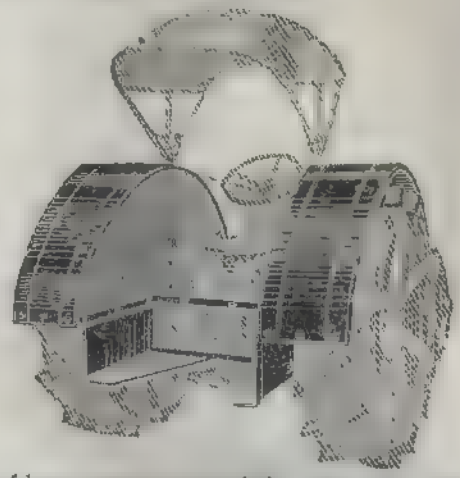
No. A-1DBB—Made of 1½x1½x¼ in. angle steel; ½ in. round steel hooks; wt each 15 lbs $4 20

No. A-2DBB—Made of 1"x1"x⅛ in. angle steel; ⅜ in. round steel hooks; wt each 10 lbs 3 15

Packed loose.

TRACTOR EQUIPMENT

MOTOLINE REGULAR FENDERS AND PLATFORM



Made of heavy gauge rust-resisting, auto sheet steel; edges rolled over heavy wire. Steel platform is very low, a few inches above the draw bar cap; well braced. Apron joined to top of fender by rolling in process. Fenders have a clearance of full 5 inches above top of drive wheel lug. By removing four bolts, platform can be removed allowing use of side-hill hitches and other such attachments.

Per Set

No. A-79MF—Painted gray; fenders and platform complete ..... ✦60 00 *$24 00*

Crated; wt per set 190 lbs

MOTOLINE CANOPY—Model T.

Each

No. A-83MC—Three bow ash frame; covered with water repellent duck, Khaki colored. Can be attached to junior fenders or regular fenders without drilling ..... ✦19 50 *$8 75*

One in bdle; wt each 12 lbs.

✦F. O. B. New York Factory Only.

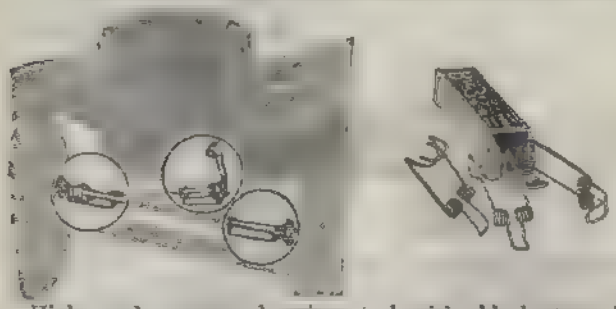
STEERING ANTI-RATTLERS



High grade, tempered spring steel wirie, black enameled. Designed to prevent rattle and reduce wear.

STEERING GEAR SETS

For Ford Cars.

Per Gro Sets

No. A-3—Set consists of 3 springs, 1 for steering arm and 2 for steering rod $156 00

One set in cardboard box; 12 sets in counter display box; wt per gro sets 78 lbs.

STEERING ARM ANTI-RATTLERS

For Ford Cars.

Per Gro

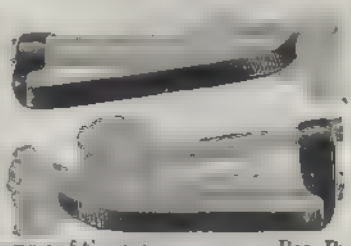
No. A-5—Steering arm anti-rattler only $78 00

One in cardboard box; 12 boxes in cardboard counter display box; wt per gro 3¼ lbs.

ANTI-RATTLERS

CHAMPION, For Ford Cars

Made of carbon spring steel, black enameled. Takes the rattle and wear out of spindle arm bolts and steering rod socket joints; keeps the bolts in place if a nut is lost, thus eliminating the cause of frequent accidents; takes the road wobble out of the front wheels; diminishes wear on the front castings and improves the steering of the car.



Per Pr

No. A-15C—Length 12 ins; ⅛ in. thick; ¾ in. wide 1 95 *$1 00*

Two doz pr in carton; wt per pr 1¾ lbs

BRAKE LEVER SPRINGS

UNIVERSAL

For Ford Cars.

High grade tempered steel wire. Designed to replace flat steel spring in brake lever handle, holding all parts firm, eliminating all noises.

Per Card

No. A-79—25 mounted on counter display card $5 55

One card in paper bag with instructions for applying

WINDOW ANTI-RATTLERS

For Closed Cars.

A rubber button so made that when fastened to the frame it turns in and down against the glass forming a wedge. As the screw it works on is off center and can be set at any tension desired by adjusting screw, it holds them firmly in place.

Per Card of 3 Doz

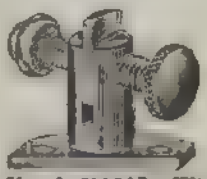
No. A-BWAR—Wt per doz ½ lb 12 00 *$5 40*

Three doz on display card.

WINDOW ANTI-RATTLERS

SEGAL

For Closed Cars.



Brass, nickel plated. Swivel base permits adjustment to any angle or position. Automatic locking clutch which prevents working loose, permits ventilation and locks window. Complete with screws for attaching.

Per Doz

No. A-6018AR—Wt per doz 2 lbs 3 90 *$4 50*

One doz in cardboard box.

For Closed Cars.

Full nickel plated, rubber-tipped, has lock nut which prevents coming loose. Prevents the annoying rattling of windows in closed cars. Complete with nickel plated screws for attaching.

Per 100

No. A-50WA—Small size; wt per doz ½ lb $39 00

One in carton; 25 in display box.

For Closed Cars, With Special Built Winter Tops.

Heavy brass, heavily nickel plated; vacuum rubber tip which creates a suction and resilient.

Per 100

No. A-53—Heavy size; wt per doz 1½ lbs $49 50

No. A-52—Junior size; wt per doz 1 lb 52 50

One doz in carton.

HOOD SILENCERS

JORGENSEN

Black rubber, made with vacuum cup at one end and slot at other into which the hood fastener fits. Designed so that the vacuum cup creates a suction that holds them tight against the car hood with a vicelike grip.

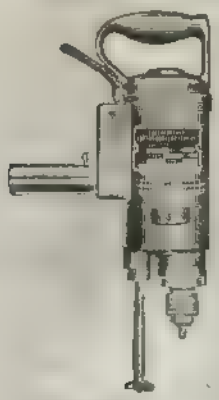
COMBINATION DRILL AND VALVE GRINDERS

GARAGE SPECIAL—PORTABLE, SINGLE SPEED



For Either Alternating or Direct Current.

Body made from aluminum alloy; for drilling in metal or wood and valve grinding. Offset of spindle from side of frame 1⅛ inches for close corner work; equipped with spade handle; oscillating spindle for valve grinding. Especially adapted to use in garages, service stations and light work in machine shops. Will operate on direct or alternating current; improved universal motor, heat treated alloy steel gears; ball-bearings; improved ventilation with air intake so located that clean air is drawn through motor. No load R. P. M. 600; length over all 13 inches; diameter gear case 3⅝ inches; complete with chuck to take straight shank bits. Capacity shown over number: 10 feet heavy duplex electric cable with attachment plug

No. A-1F—Wt per doz boxes about 3 lbs	$9 00

+F. O. B. Kentucky Factory Only.

ANTI-RATTLING BALL SOCKETS

APCO, For Ford Cars. For Steering Rod.

Hard brass casting, black enameled finish.

Designed to replace steel cap on both ends of steering gear connecting rod. Adjustment is secured by means of a screw plug in the base of the shell. Eliminates steering gear rattling and vibration, makes steering easier, and saves wear and tare.

No.	**A-1BS**
1 to 9 pairs, Per Pair	$0 69
10 to 99 pairs, Per Pair	66
100 or more pairs, Per Pair	60

One pair in carton; wt per doz pair 4¼ lbs.

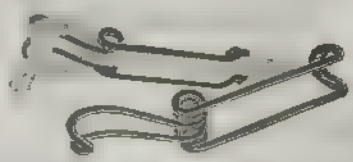
APCO, For Ford Cars. For Radius Rod.

Same as No. A-1BS, except of larger and heavier construction, and is for use on radius rod.

No.	**A-3BS**
1 to 9, Each	$0 69
10 to 99, Each	66
100 or more, Each	60

One in cardboard box; wt per doz 10 lbs

BRAKE ROD ANTI-RATTLERS



LITTLE BRATS

Eliminates rattles in Ford brake rods, adds to safety of construction. Two "Brats" are used on each brake rod; at rear of rod, the loop end slips over hub brake expander lever and other around the rod; at front, loop slips over brake shift lever, other ends around rod.

Made of high grade tempered spring wire, with baked japan finish; intended for Fords but will fit majority of other makes of cars also.

	Per Doz Sets
No. A-1LB—Wt per doz sets 10 lbs	$7 95

One doz sets in attractive counter display box.

ANTI-RATTLERS OR STEER AIDS

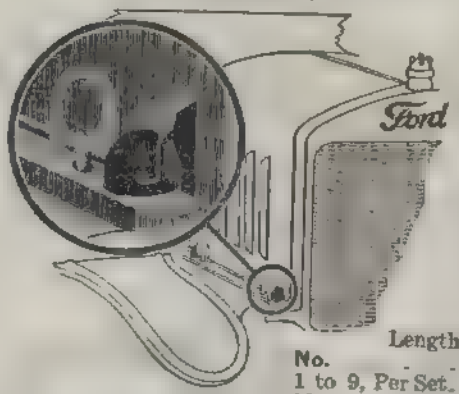
Especially Adapted to Ford, Dodge and Maxwell Cars.

A simple device that fastens on the steering rod, which does away with all rattle and noise in the steering rod; they keep wheels in alignment, cut down front tire wear, saves bushings and reduces skidding.

	Per Doz Pair
No. A-10AR—Oil tempered steel wire, baked japan finish	$7 95

One doz pair in cardboard box; wt per doz pairs about 9 lbs.

HOOD SILENCERS
JORGENSEN, For Ford Cars.



Black rubber. Slips over the head of the hood, where it fits snugly into place and forms a live rubber cushion between the edge of the hood and the sill, on which the hood rests, eliminating hood rattles.

Length 1⅛ ins.

No.	A-4F
1 to 9, Per Set	0 98
10 or more, Per Set	90

Wt per doz, lbs	16	19
Per Doz	$24 00	27 00

Half doz in carton.

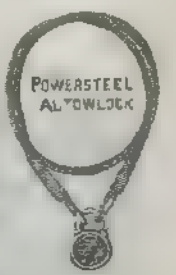
BULL DOG

Strong weldless steel chain covered with leatherette and arranged so that the two ends can be secured with a padlock. One ring is passed through the other, so that the chain can be drawn up as tight as desired, or arranged to encircle two tires. The covering makes it pleasant to handle and obviates scratching of the paint-work of the car.

	Per Doz
No. A-1TC—Length 42 ins	$22 50

Half doz in cardboard box; wt per doz 10 lbs.

POWERSTEEL



Highest grade steel wire rope, covered with an exceptionally strong fabric; heavy brass lock with steel key. This lock will be found very convenient for many purposes.

	Each
No. A-2PS—Length of rope 4 ft	6 15
Packed loose; wt each 2 lbs.	*$2 50*

SAFE GUARD LOCKS

An ideal lock for safe guarding robes, coats, tires and whatever else may be left in the car. Nickel plated steel 1¼x1¾ inches, with two steel keys and case hardened chain.

	Per Doz
No. A-25—With 25 in. chain; wt per doz 6 lbs	$39 00

Half doz in cardboard box.

TIRE CLAMPS

HERCULES

For Ford and other small cars.

Consists of strong black enameled malleable casting, that takes the place of regular rim wedge on tire carrier. In the lower end of casting is hinged a strong steel band that goes around tire and fits on to rim band of carrier.

To attach, remove present rim wedge, slip one end of protector over exposed stud, swing hinged band up at back of tire and pass padlock through both ends of protector.

Without Padlock.

No. A-14SWA—Genuine walnut rim $8 25

One in cardboard box; wt each 6 lbs.

SHELLERITE

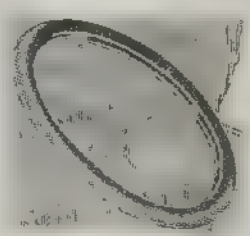
Corrugated, composition shellerite rim; inserted aluminum spider. Rim will not warp, crack or fade. These wheels are now standard equipment on many cars. Size 17 inches.

	1 to 9 Each	10 or more Each	List Each
No. A-55FSF—For Ford cars	10 50	9 75	*$5 00*
No. A-56FSD—For Dodge cars	10 50	9 75	*5 00*
No. A-57FSC For Chevrolet and Star cars	10 50	9 75	*5 00*

One in carton; wt each 4½ lbs.

STEERING WHEEL COVERS

RID-GED GRIP



Black para gum. Easily applied; non-skid feature on the inner circumference prevents slipping and creeping on rim and holds the cover in place.

On all Ford regular and lock wheels, as on several other makes, the spokes or arms of steering wheel project over the edge of steering wheel rim. To eliminate the grip bridging over the end of steering wheel spokes, there are four loop beads on one side of cover. To make cover lay snug to the wheel, with overlapped spokes, cut out the rubber at inner edge of the loop beads, this allowing the cover to fit around projected spoke end when applied.

	1 to 9 Each	10 or more Each	List Each
No. A-1516—Medium size for standard size Ford steering wheel and others of like size	3 75	3 45	*$1 75*

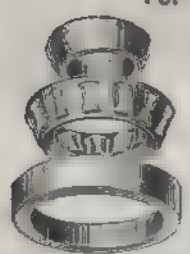
ROLLER BEARINGS

SHAFER SELF-ALIGNING

For Ford and Chevrolet 490 Cars.



Highly tempered steel. Takes place of old bearings in front wheels. Shafer bearings are furnished interchangeable into the Ford and Chevrolet 490, without machining or modification of either bearings, hubs or axles. The cone surface contact represents a ball segment, the concone rollers operate between these two segments on an approximate 20° angle. Designed on same principle as tapered bearings on high priced cars. When dissembled the retainer holds rolls in their place on the cone making mounting easier and less liable for misadjustment.

No.	A-6SRB
1 to 6, Per Set	12 00

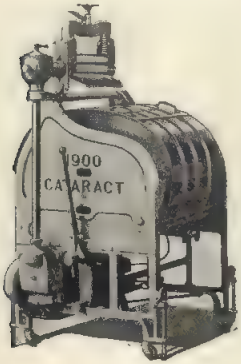
WASHING MACHINES



1900 CATARACT—FIGURE 8

Operates on the most approved principle for washing clothes, constant, swift, passage of hot soapy water through the texture of the cloth. This method quickly loosens and removes all of the dirt without any harsh pulling or rubbing of the clothes. All kinds of fabrics, even the most delicate, may be safely washed. As the tub rocks back and forth the water is dashed back and forth in a "Figure 8" movement. It washes through the clothes first from the bottom and then from the top and carries away all of the soil and stain.

The peculiar forceful action of the water in the tub is the result of a double action movement whereby the tub is rocked up and down and at the same time swung back and forth. The force and swiftness of the water cleanse the clothes very rapidly without undue wear.

Tub is made of heavy solid copper, tin-planished on the inside and lacquered on the outside; frame is of heavy steel, thoroughly braced and rigid. Motor driven, swinging, reversible wringer has a safety lever for instant release. Tub is equipped with a drain cock for drawing off the water and if desired, a gas burner for heating the water may be attached; adjustable rods on each leg, provide for firm and rigid standing on uneven floors.

A quiet motor drives both the tub and the wringer, both at the same time if desired; the control is simple and convenient and all gears are protected; the operating belt is held at constant tension by a strong wire spring.

Each

Model D—Capacity, 12 Lbs. of Clothes Equal to 8 Full Size Sheets; Floor Space Needed, 28½x32 Inches, Height to Top of Wringer, 53 Inches; Net Weight Each, 275 Lbs. **$155.00**

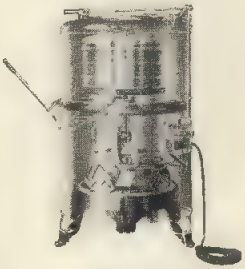
JUNIOR MODEL F

A smaller but fully efficient washer built on the same principle as the Model D. For the small family or for the apartment where space is limited. The wringer will clear a 36 inch set tub.

Each

Model F—Capacity, 6 Sheets or 9 Lbs. of Clothes; Floor Space Needed, 25¾x26½ Inches; Weight Each, 220 Lbs. **$130.00**

CLOTHES DRIERS



BOCK CENTRIFUGAL

Operated by electricity, requires no oiling or adjustment; will dry entire tubful of clothes in six minutes.

Each

Bock Drier—Height, 36 Inches, Floor Space Needed, 24x24 Inches, Weight Each, 310 Lbs. **$150.00**

IRONERS

1900

Gray enameled cast iron framework, adjustable metal airing rack, no exposed gears or bearings; ironing shoe automatically adjusts itself to various thickness of cloth; special mechanical construction transmits even pressure to each end of shoe and roll, gas burner has patent thermostatic control keeping temperature of shoe at proper degree of heat; burner easily removed for cleaning; gears are automatically oiled; entire operation of ironer is controlled by the foot treadle.

Each

No. 1G—Capacity, 10½ Ft. Ironing Speed per Minute; Height, 38 Inches; Width, 27 Inches; Weight Each, 440 Lbs. Complete with Thermostatic Control **$160.00**
No. 1W—Without Thermostatic Control **$150.00**
No. 1E—Electrically Heated **$200.00**

SPARK PLUGS

A. C. TWO PIECE, FORD SPECIAL
Carbon Proof.

Spring terminal clip permit wire to be instantly detached and reconnected while motor is running. Facilitates testing spark plug and coil. No nut to be unscrewed or lost. By merely unscrewing the bushing, plug may be taken apart. Only one gasket is used. Patented carbon proof porcelain. Saw tooth edges attain sufficient heat to burn oil deposits thus offering effective resistance to carbon.

An exact reproduction of the Splitdor Green Jacket spark plug, fitted with an automatic flashing device. It is constructed of the best materials; lithographed in attractive durable colors; outfit consists of a base complete with flashing device, one 25 watt mazda lamp and 12 feet of flexible cord with standard base attachment plug. Height 18 inches.

Free with order of 100 of one number or assorted of Splitdorf spark plugs.

No. A-SLH—Shipped from factory only Newark, N. J..... ‡Free

One in crate; wt each 12 lbs.

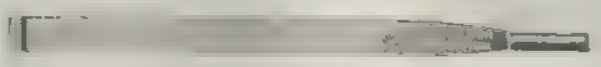
SPARK PLUG AND MAGNETO FILES

Best grade steel, finely milled; adapted for filing and cleaning platinum points. The chisel point permits opening contact points without disturbing adjustments.

	Per Doz	Per Gro
No. A-18PF—Length of cut 4½ ins; width ¾ in; thickness ⅛ in; shank ⅛ in. in diameter; length over all 6¾ ins	$2 40	26 25

One doz in cardboard box; wt per doz ½ lb.

NICHOLSON



For Tungsten Points.

Best grade steel, extra hard; for filing Tungsten points and other similar hard-to-cut metals. Tungsten point files are in correct thickness to gauge the proper width between spark plug terminals. Length cut 3 inches; width ¼ inch; thickness [illegible] inch; ⅛ inch shank; length over all 5½ inches.

No.	A-2NTF
Per Doz	$2 40
Per Gro	27 00

One doz in cardboard box; wt per doz ¼ lb.

Repair men and garage men are inclined to underestimate the value and opportunities of the front of the building.

Most repair men say that the shop is where they make their money and that they have no time to fool with decorating the front end, and that there is more grief than profit in selling tires and tubes, which, they think, make up the bulk of accessories to be sold. They are all wrong. Repair men and garage men should sell tires, tubes and accessories.

No. A7924. Each... 7.00

Outside Wall Bracket for A7910 and A7912 machines. Each bracket equipped with lock and key.

No. A7916. Each... .60

Ad-Lee 1-2-3 Penny Ball Gum Machine

Ad-Lee 1-2-3 Ball Gum Vending Machine. This is something entirely new, the alternating delivery plan gives it an earning power for above the ordinary vending machine. Operates as follows: First penny delivers one ball of gum; second, two balls; third, one ball; fourth, two balls; fifth, three balls; in other words, nine balls of gum for every five pennies. Machine is made of cast iron, finished in bright red enamel, nickel plated trim. The heavy glass globe holds 1200 balls of gum, coin box in rear can be easily emptied without moving machine.

A big profit maker, because this vending machine empties very quickly and, therefore, the turnover is much greater.

No. A7925. Each..... 15.00

Vending Machine Supplies

One in carton; wt each 13 lbs.

RADIO

Radio Sets and Supplies that measure up to a high standard —and the prices are rock-bottom. A merchant needs only one set for demonstration purposes and "Our Drummer" at his elbow to hook-up with one of the biggest money making opportunities in today's merchandise field. We carry the stocks and you send us your orders as you make sales. (See Important Notice Bottom of Page.)

"AMEREX" Ace Tuned Radio Frequency Set and Outfit

Marvelous performance, distinctive appearance, low price—the "AMEREX" ACE offers more value dollar for dollar, than any other set on the market today.

Five Tube Set

NON-RADIATING—Air core radio frequency transformers of special design prevent oscillation thus eliminating squeals and howls which are transmitted causing tuning troubles for other radio owners.

EASY TO OPERATE—3 major dials—numbers are identical for all 3 dials for a given station.

CABINET—Golden oak, 19 inches long, 10 inches high, 6½ inches deep. Nickel plated piano hinge, felt base feet.

DISTANCE—Tests by our Radio engineering department in New York City brought in Davenport, Iowa, Kansas City, Mo., St. Louis, Mo., Chicago, Ill., Montreal, Canada, Louisville, Ky., etc. All were received clear and distinct on a loud speaker without the slightest interference, while local New York stations were in operation. Possibly greater results may be secured in better receiving locations and with practice.

APPEARANCE—The golden oak cabinet combined with mottled mahogany panel dials engraved in gold and all panel hardware gold plated make a fitting addition to any home.

Receiving Set. Without Any Equipment

3H9124—"Amerex" Ace 5 Tube Tuned Radio Frequency Set only, without equipment. Each **$32.50**

Complete Receiving Set

3H3188—"Amerex" Ace 5 Tube Tuned Radio Frequency Set, with the following equipment which makes a complete receiving outfit.

2 Batteries, 1 half size, 45 volts.
1 Pair headphones, 2,000 ohms.
1 Phone plug.
1 "Manhattan Sr." loud speaker.
1 Antenna outfit.

Each **$76.50**

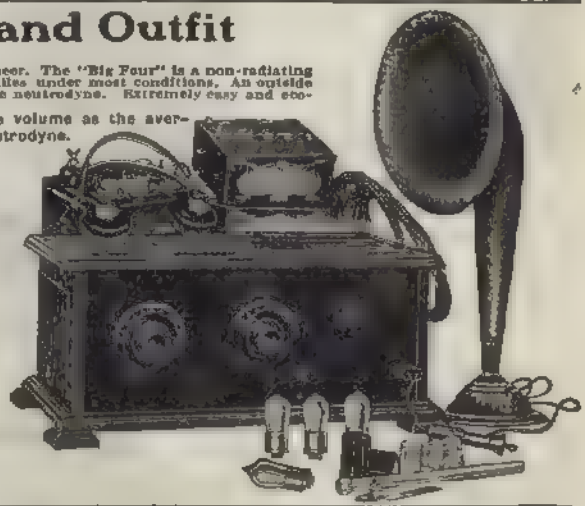
Aladdin—"BIG FOUR" Set and Outfit

Pfanstiehl Non-Oscillating

Especially designed for Butler Brothers by Carl Pfanstiehl, noted scientist and radio engineer. The "Big Four" is a non-radiating radio frequency set with close selectivity and acute sensitiveness. Receiving range 2,000 miles under most conditions. An outside aerial is recommended for best results. This set gives the same volume as the average 5 tube neutrodyne. Extremely easy and economical to operate. Licensed under Pfanstiehl Patents Pending.

Famous "Pfanstiehl" Circuit

Gives the same volume as the average 5 tube Neutrodyne.



4 Tube Set

Mahogany hand finished cabinet 20½ in. long, 9½ in. high, 11 in. wide, piano hinges, bakelite panel. Circuit consists of detector, 1 stage of tuned radio frequency and 2 stages of audio frequency. Removable resistances used, set can readily be adapted to either dry cell or storage battery tubes. The remarkable volume of the "Big Four" is due to the "Pfanstiehl" non-oscillating circuit which retains the full signal strength and faithfully reproduces the original. Complete instructions with each set. 1 in carton.

Receiving Set Without Any Equipment

3H758—Aladdin "Big Four" 4 tube receiving set. Each **$48.50**

Complete Receiving Outfit

3H759—Aladdin "Big Four" 4 tube receiving set with the following equipment which makes a complete receiving outfit.

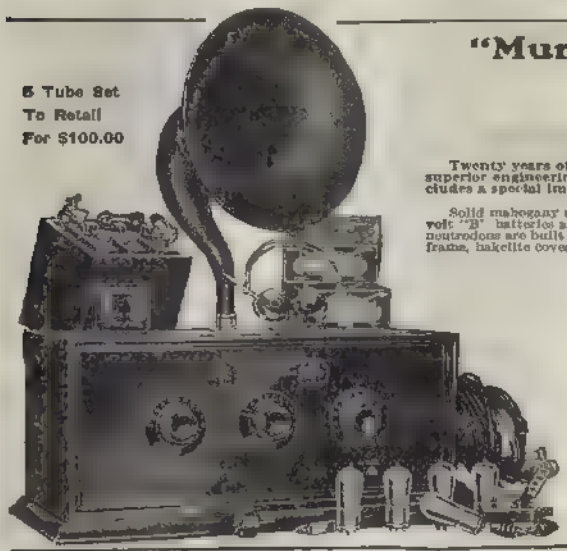
1 Pair "Murdock" head phones, 3,000 ohms.
1 "Aladdin" loud speaker.
1 Antenna outfit.

Each **$83.50**

"Murdock" Neutrodyne Set and Outfit

BUILT-IN LOUD SPEAKER

NEW FEATURE—"C" Battery to Cut Down "B" Battery Consumption



5 Tube Set To Retail For $100.00

Twenty years of exclusive radio manufacture has enabled the William J. Murdock Company to produce through superior engineering and volume production the first 5 tube Neutrodyne Set to retail for $100. This new model includes a special improved type built-in loud speaker.

Solid mahogany cabinet, handsome piano finish, 27 in. long, 13 in. wide, 12½ in. high, ample room inside for 2 large size 45 volt "B" batteries and one 4½ volt "C" battery. Loud speaker stands 22½ in. above top of cabinet, bell 14 in. diam. Special neutrodons are built in the condensers, thus eliminating extra parts and increasing efficiency. Entire unit mounted on aluminum frame, bakelite covered, practically all wiring concealed in sub-base.

RECEIVING SET

Built-in Loud Speaker and Phone Plug

3H4509—New "Murdock" 5 tube Neutrodyne receiving set with built-in loud speaker and phone plug only. Retails at $100.00. Each **$70.00**

Complete Receiving Outfit

3H4511—New "Murdock" 5 tube Neutrodyne receiving set with built-in loud speaker and the following equipment which makes a complete receiving outfit.

5 tubes, 201A type.
1 storage battery, 6 volts, 90 ampere.
2 "B" batteries, 45 volt.
1 4½ "C" battery.
1 pair Murdock headphones, 3,000 ohms.
1 phone plug.
1 antenna outfit.

Each **$111.25**

READ THIS

During the Summer season, from May to September, we have reduced our catalogue showing of radio. Should you desire anything not listed in this catalogue kindly refer to our MARCH book. We have a complete stock of all items listed in our MARCH catalogue. As usual, the cost will be in accord with prevailing market prices. Your orders will receive our usual prompt attention.

→ IMPORTANT ←

Due to the nature of Radio merchandise, we are compelled to follow the trade custom with respect to claims and return of goods.

All of our Radio Sets and Supplies are well known brands, carry the manufacturer's regular guarantee, and are carefully inspected and tested before shipment and delivered to transportation company in perfect condition.

Radio Sets and Supplies may not be returned for credit unless our consent is obtained in advance.

If you desire to return any Radio material which you have bought from us, write to us, explaining the reason and ask for Authorization Return Tag.

We can accept no returned Radio Sets or Supplies unless the Authorization Tag is filled out and attached securely to the outside of the package.

All shipments containing Radio Sets or Supplies should be examined immediately on receipt as no claim of any nature will be allowed unless submitted within five days after receipt of goods.

PLUMBING GOODS

You won't find any "seconds" in this line—they are first quality standard goods and so marked. There are no lists and discounts to figure here—only one price and that a net price. In stock ready to ship.

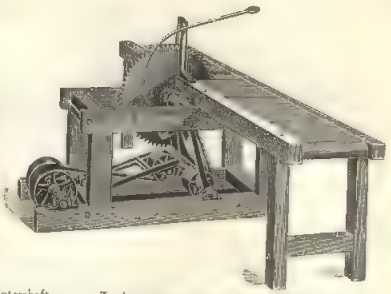
New Model Cut-Off Saw

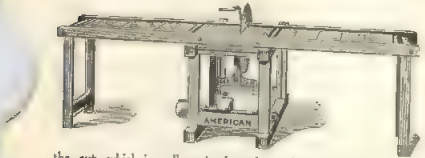
No. 2920



Our new model Cut Off Saw Table is a heavier and more powerful machine than our Perfection. It is for use in Saw and Planing Mills or any woodworking establishment and will handle any lumber from boards up to dimension stock 6" x 14".

The frame is made of seasoned timber accurately framed and strongly bolted together. The table is 20" wide, 12' long, fitted with four 4" rolls and a substantial guide rail at rear to insure rapid, easy handling and accurate sawing. The Mandrel is steel, runs in babbitted boxes in a substantial cast iron swinging frame which is drawn forward by strong iron handle. The Countershaft is placed well back at rear of frame allowing the use of a long drive belt which is kept tight by means of an idler pulley in an iron frame. This prevents the belt from slipping and insures a strong, positive drive to the saw. Any size saw can be used from 18" to 32".

Timbers in main frame $3\frac{1}{2}$" x $5\frac{1}{2}$". Timbers in table frame $3\frac{1}{2}$" x $3\frac{1}{2}$". Mandrel $1\frac{1}{4}$", fitted for saws with $1\frac{1}{4}$" hole Mandrel pulley, 4" x 6". Size of saw furnished, 30" Pulley on countershaft, 12" x 6", speed 350 r p m. Floor space required, 12' x 6' Weight, 900 lbs.



"Perfection" Cut-Off Saw

No 2921

Every Saw Mill or Planing Mill must have a Cut-Off Saw. In many places a Table Cut-Off Saw is handier than a Swing Saw To meet the demand for a low priced, yet GOOD machine, we offer our "Perfection" Cut-Off Saw shown in the cut, which is well made throughout of best materials and workmanship.

The frame is strongly bolted together the table is 20" wide and 10' long being fitted with four 3" idle rolls and a guide rail at the rear providing for easy and accurate cutting

The mandrel is steel, runs in babbitted boxes and is carried in a strong, solid cast iron swinging frame which is trunnioned to the countershaft below thus insuring rigidity and durability Any size saw can be used from 18" up to 24".

Timbers in main frame $3\frac{1}{2}$" x $3\frac{1}{2}$".
Timbers in table frame 2" x 4".
Mandrel (steel) $1\frac{1}{4}$" for saws with $1\frac{1}{4}$" hole
Mandrel pulley, 4" x 4".

Size of saw furnished, 20".
Pulley on countershaft 6' x 6", speed, 700 revolutions.
Floor space required, 4' x 10'.
Weight, 460 lbs

Combined Lath Mill and Bolter

No. 2922

Capacity, 30,000 to 50,000 Lath per day
Less Than Two Days' Work Pays For A Machine

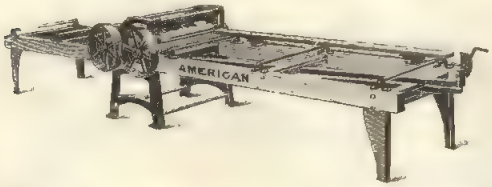
Best Lath Mill, Bolter, Slat and Picket Machine on the market. Heavy Steel Mandrels.

Powerful Feed Rolls top and bottom, all driven by sprockets. Easy adjustment. Handy Stop Lever. 3 to 6 Lath Saws, as desired.

Cuts Lath, Slats or Crate Stock any width from $\frac{1}{2}$" to 3 inches of any thickness up to 3". Also small dimension stock from $\frac{1}{2}$" x $\frac{1}{2}$" to 3 x 3 inches.

"Junior" Gang Edger 33 Inch

No. 2917



Make with Single or Double Pressure Rolls. Right or Left Hand. For Mills Having a Capacity of 15,000 to 30,000 feet Board Lumber per day.

Made with two or three 16" saws, solid or inserted tooth. All working parts carried by the strong iron central section which is self-contained and independent of the extensions.

Feed Rolls are 3" fluted and grooved and strongly driven. Guide is easily and quickly set. Saws easily adjusted by levers from operating end and securely held in position.

Steel mandrel 1 11/16" with babbitted boxes. Driving pulley, 10" diameter, 8" face; speed about 1,500 revolutions per minute. Extreme length and width, 18' 3" by 47". Extreme width between guides, 33". Weight, double roll machine, about 1,600 lbs.

"Senior" Gang Edger 46 Inch

No. 2918

For large mills cutting 30,000 to 60,000 feet or more per day.

This is a heavy, powerful Edger, made throughout in the most thorough manner. It is intended for mills cutting from 30,000 to 60,000 feet per day. It is 46" wide between housings, and will work stock up to 4" thick. Mandrel is 2 11/16" with 10" x 10" pulley, and is fitted with three or four saws 16" diameter. Machine is 22' long and 6' 6" wide over all, and weighs 2,800 lbs.

Extreme distance between tight saw and inside adjustable saw, 30".

Extreme distance between tight saw and outside adjustable saw, 38".

Smallest distance between tight saw and adjustable saw, 2".

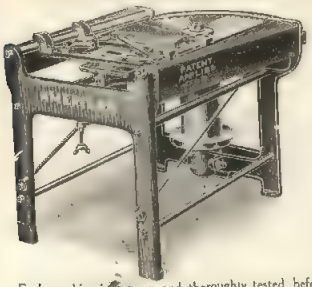
Smallest distance between adjustable saws, 4".

Junior Two-Saw One-Man Trimmer

No. 2919

Our Two-Saw Lumber Trimmer is made of best material and workmanship, and possesses many valuable improvements not found in any other Trimmer. Shifting device is operated by crank, and the indicator is in plain view of the operator. Mandrel is steel, 1 15/16" diameter, having four adjustable self-oiling boxes. Mandrel pulley 8" x 8" placed at either end as preferred. Each machine is furnished with two 18" saws, and is knocked down and crated for shipment. Made in four sizes and lengths:

6 to 16 feet, weight—2,250 lbs. 6 to 18 feet, weight 2,300 lbs. 6 to 20 feet, weight —2,400 lbs. 6 to 24 feet, weight—2,600 lbs.



"Crown" Shingle Machine

No. 2923

Our Crown Machine cuts 16" to 18" shingles and carries a 30" to 36" saw. The Frame is composed entirely of iron and steel, the two upper rods forming the carriage ways.

The Arbor is 1 5/8" in diameter, and runs in self-oiling, self-adjusting boxes. The Carriage is constructed of steel and wood, making it very strong as well as light. It runs on polished steel guides, and is constantly lubricated by oil pockets cast in same. Cast steel dogs, backed up by hard wood strips, hold the shingle blocks and allow the stock to be worked up with the least possible waste.

The Tilt Works are adjustable in each direction, securing thereby a fine adjustment for different thickness of shingles. This machine is furnished with balance wheel pulley.

Each machine is set up and thoroughly tested before shipping, insuring proper adjustment of all parts. Capacity, 10,000 to 20,000 shingles per day. Weight, 600 lbs.

Friction Log Hauls

These machines are strong, reliable, easily managed, and save labor and hard lifting. We can furnish the iron parts only or the complete machines as shown. Made in two sizes. Furnished complete, or iron parts only, as desired.

	No. 2925-1	No. 2924-2

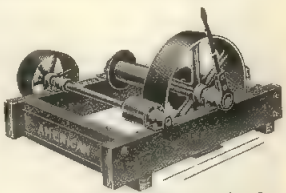
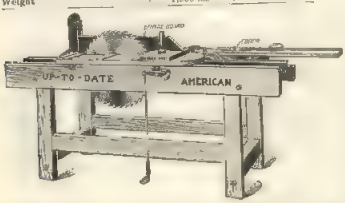
Drive Pulley	16"x8"	20" x10"
Speed	200 R.P.M	250 R.P.M
Weight	1,000 lbs	1,800 lbs



Up-to-date Power Feed Shingle Machine

No. 2924



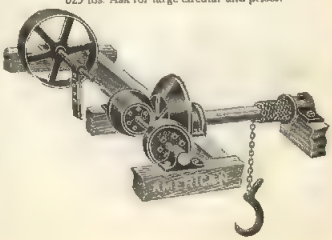
A reliable low priced machine. Just right for small mills, farmers and others having light power who want to make a few thousand shingles a day. Makes a perfect shingle any length from 16" to 24". Has knot saw and edger for edging or jointing the shingles when made from round or split stock. Makes heading or crate slats. By removing the Tilt Frame at rear of carriage it can be used for Bolting and other kinds of sawing. Steel mandrel 1 5/8", Shingle Saw, 24". Edger Saw, 8". Weight, 625 lbs. Ask for large circular and prices.

Friction Log Turner or Canter

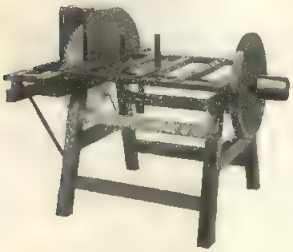
This log turner is the well-known type which has proven so satisfactory to mill men everywhere. It is simple and easy to operate, yet strong and absolutely reliable. It should be erected directly over the carriage with the drum parallel thereto. Self-oding bearings are furnished, but chain and hook are extra.

Furnished in two sizes as follows

	No. 2926 1	No. 2926-2
Driving pulley	24" x6	24 x8"
Driving shaft	1 7/8	2 7/8
Paper friction cones	8 x5"	10 x1"
Bevel iron friction	24 x5	30 x1
Drum with 10" flanges	24 x1	30 x6
Weight	600 lbs	750 lbs



Saw Frames



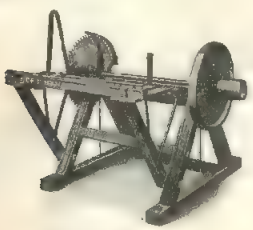
Sliding Table Saw Frame (Left Hand)

These Saw Frames are made of hardwood, well braced and painted. As will be seen from the following specifications, they are high grade, durable machines suitable for use with Type "Z" oil or gasoline engines.

The mandrels are of 1½" cold rolled steel, grooved at the bearings to prevent end play and running in heavy babbitted bearings. These frames will accommodate saws from 20" to 30" in diameter with 1⅜" arbor hole. The arbor flanges are 5" in diameter. Right hand cut is regularly furnished, but left hand cut can be furnished without extra charge. The driving pulley on each is 5" diameter with 6" crown face. The balance wheel weighs 95 pounds. All saw frames are shipped "knocked down," with full instructions how to set up and operate. Saws are not regularly included with the frames.

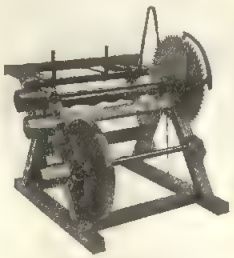
No. 2927-21—Sliding Table Saw Frame, weight, 360 lbs.

No. 2927-23—Tilting Table Saw Frame, weight, 310 lbs.



Tilting Table Saw Frame (Left Hand)

Pole Saw Frame



Pole Saw Frame (Left Hand)

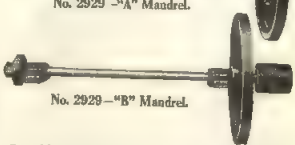
This frame is built especially for sawing long poles or fence rails, although it saws cord wood equally as well. The balance wheel is hung under the frame out of the way of the table. Upper shaft is 49" long and lower shaft 45" long. Will take saws 20" to 30" diameter; arbor 1⅜"; 95 lb. balance wheel; three 5" x 6" pulleys. Right hand cut always furnished unless otherwise ordered.

No. 2928-22—Weight, 400 lbs

Special—Balance wheels, different from ones regularly furnished, can be furnished to order direct from factory; 60 lb., 75 lb., 95 lb. or 125 lb. balance wheels for any of the above frames, or for saw mandrels shown on page 657.

Saw Mandrels

No. 2929 –"A" Mandrel.



No. 2929—"B" Mandrel.

In addition to the frames listed, we furnish a saw mandrel, designed to be bolted on rear end of the frame mounted on trucks and used in connection with an engine. This outfit consists of main shaft 1½" cold rolled steel, 49" long, one end fitted with 1⅜" arbor with 5½" flanges, the other end fitted with a pulley 5" in diameter and 6" crown face, and a 95-pound balance wheel. Babbitted boxes are furnished, suitable for bolting to timbers. Furnished in two styles, as shown in cuts. Both the same price. Always specify whether Style "A" or "B" is wanted.

NOTE

It is very important when ordering repair parts for washing machines to give the correct number of the machine for which the parts are wanted. In addition to this it is also well to mention the name of each part as well as the number. It will save days of time and untold inconveniences to be governed by these simple instructions.

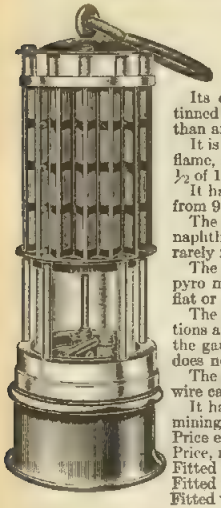
✚**No. 0 F. O. B. Ohio Factory Only.**



The American Wolf Type Miner's Safety Lamp

An American Made Lamp Similar to the Imported Wolf Safety Lamp

Its construction has proven the most satisfactory. It is made of heavy cold rolled steel tinned with brass trimmings. It is stronger, more serviceable and costs less to maintain than any other safety lamp on the market.

It is very sensitive to gas, indicating plainly as low as ¾ of 1 per cent with the luminous flame, and is extensively used for testing purposes. With a non-luminous flame, as low as ½ of 1 per cent of gas may be detected and ¾ of 1 per cent shows a distinct gas cap.

It has from 1 to 1½ c. p. illuminating power and the light remains practically constant from 9 to 12 hours.

The maintenance cost is very low and should not exceed 1 cent each lamp per shift, for naphtha, repair parts and supplies. The fuel burns as a gas. The wick does not char and rarely requires renewal.

The standard lamp for general use. Burns naphtha and is fitted with double gauzes, pyro metal or match tape internal ignit r, key or magnetic lock, and burner for either flat or round wick.

The shield, or bonnet, is corrugated to increase the radiating surface, and the perforations are so made as to prevent the high velocity currents from impinging directly against the gauze. A plain steel bonnet can be furnished, but it has less radiating surface and does not keep the lamp as cool.

The gauzes are of the best grade charcoal iron wire carefully woven. Brass or copper wire can be furnished at small additional cost.

It has passed the most exacting tests and been formally approved in practically every mining locality. It has been tested in high velocity currents up to 2500 feet per minute

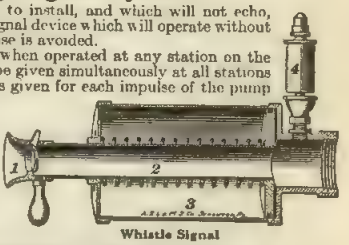
Price each, as described above	$ 9.00
Price, made from light weight aluminum alloy, round wick only	12.00
Fitted with 1 lens, extra	3.30
Fitted with 2 lens, extra	6.70
Fitted with 3 lens, extra	9.50

The American Pneumatic, Signal System

A thoroughly reliable pneumatic signal system, durable, easy to install, and which will not echo, nor repeat the signal given. It is positively the only pneumatic signal device which will operate without an echo, an inestimable advantage, as all confusion from this cause is avoided.

It consists essentially of a specially designed air pump which when operated at any station on the line compresses the air sufficiently to cause the desired signal to be given simultaneously at all stations on the line. One blast of the whistle or one stroke of the gong is given for each impulse of the pump piston.

The signal pump is entirely self-contained and no fittings are required for its erection. All that is necessary is to erect a suitable pipe line connecting the points between which it is necessary to signal, and attach the pumps. One pump for each station.



Whistle Signal

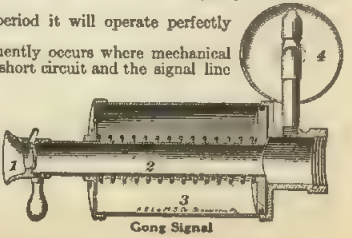
Line Can Be Used as Speaking Tube

The piston rod is hollow and upon opening the check valve near the mouthpiece the line is open as a speaking tube. Sound is transmitted sharp and clear in the very deepest shafts. This feature is invaluable when the mine telephone is out of order, or if an accident should occur and more than one method of communication is desired.

Once properly installed there is practically no maintenance expense. The pump is heavily constructed of cast and drawn brass and has no delicate parts. Signals installed for 10 to 20 years still give perfect service, the only expense being an occasional new packing ring.

It cannot get out of order. Left untouched for an indefinite period it will operate perfectly at first impulse of the piston.

Materials falling down shaft cannot cause a false signal, as frequently occurs where mechanical signals using wires are employed. There are no wires to break or short circuit and the signal line is not readily damaged by fire or water.



Gong Signal

Prices

M220. Pneumatic signal pump complete with one gong or whistle, 6x9¼x2½ inches, for signaling up to 900 ft. Each **$55.50**

M222. Pneumatic signal pump complete with one gong or whistle, 8x13½x3 inches, for signaling up to 2000 ft. Each **$75.00**

Vanadium	⅝ in.	$3.50

MASTER CUTLER

Round and square points. Mirror colored blade with gold etching, back and tang crocus polish. Heavy vulcanized black rubber handle, beveled edge.

	Blade	Each
Master Cutler	⅝ in.	$3.50

Each razor in individual box, six in a carton.

Weight of above per carton of six, 1 pound.

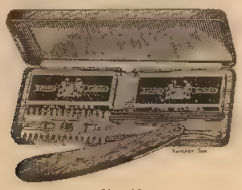
SAFETY RAZORS

DURHAM DUPLEX

No. 6

The case is flat and compact, with an attractive pebbled blue water-proof covering; inside lined with blue velveteen and champagne colored satin. Has highly polished nickel plated "Hoe Type" razor and two packages blades; 5 blades in a package.

No.	Wt. each	Each
6	7 ozs.	$1.50



No. 10

Long, flat case of blue fabrikoid stamped in gold; inside lining of blue velveteen and champagne colored satin. This set contains the regular long handle razor, nickel plated blade holder and safety guard. Handle of mahogany finished celluloid. Ten blades.

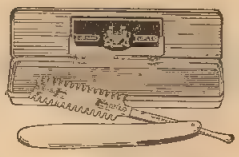
No.	Wt. each	Each
10	5 ozs.	$1.50

No. 7

Case of attractive grained white celluloid with form fitting platform for razor. Contains the regular long handle razor, nickel plated blade holder and safety guard. Handle of mahogany finished celluloid. Ten blades.

No.	Wt. each	Each
7	3 ozs.	$1.50

All above, one in a box



No. 1

Sanitary ivory grained celluloid case. Outfit consists of one Durham Duplex Razor with attractive white handle, safety guard and package of five blades.

No.	Wt. each	Each
1	3 ozs.	$1.00

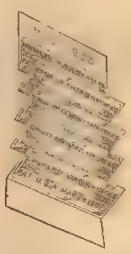
No. 2

Soft red leather roll case. Handy and convenient. Contains razor and safety guard. Also has two pockets, which hold stropping attachment and package of five blades. Patent fastener.

No.	Wt. each	Each
2	3 ozs.	$1.00

Above, one in a box

BLADES



Made of finest Swedish steel, oil tempered, hollow ground, double edged. Wrapped in attractive tabbed folder.

	Wt. per carton	Per pkg.
Blades, package of 5s	7 ozs.	$0.50

Twelve packages of five blades in a carton.

BLACKSMITHS ANVILS

ARM AND HAMMER BRAND

Regular

Made of American ingot or wrought iron, welded at the waist, thus making a solid forging, to which is welded a solid plate of crucible cast steel, making a perfect weld Special temper of edges to prevent chipping; face level and true and of correct proportion, horn and heel of correct proportions; hardy and pritchel holes of correct sizes and accurately placed. Base with sufficient area or spread so as not to require strapping down, thus insuring greater stability and absence of rocking or tipping.

SOUTHERN CRESCENT

Steel Face

The face is one solid piece of tool steel, tempered, highly polished and warranted to be true The horn is covered with, and its extremity made entirely of tough untempered steel. Body of anvil made of best grades of pig iron, and being much more solid than wrought iron, the work being forged receives the full force of the blow. Face and horn warranted to be thoroughly welded to the body of the anvil and not separate

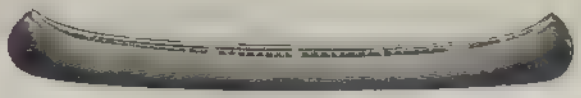
CANOES



Selected cedar ribs and planking, covered with water-proof duck. Made with a wide flat bottom and at the same time has a comparative narrow appearance along the gunwhales, this being accomplished by the use of the tumblehome or incurve of the ribs, above the waterline. The hardwood stems are well curved and set off the smooth sweep of the open gunwhales and the 18 inch arrowhead decks. This type especially adapted for western usage in swift streams and shallow lakes.

The Fairform Flyer Sportsmen 42 which features both a large cabin below and a roomy cockpit for fishing and recreation

FAIRFORM FLYERS

IN MANY MODELS

WITH six Quadraconic Hulls, maturely developed through many years and over two million miles of fleet operation from Maine to Australia, as basic chassis, the Huckins Yacht Corporation of Jacksonville offers a wide variety of twin screw models, to suit any pocketbook or purpose.

Among them are the Sportsman 32, 36 and 42, which combine excellent facilities for fishing and cruising. The 42 is actually 43 feet 4½ inches long with a beam of 12 feet 2 inches, making it a fine large boat. The smaller pair are arranged with a single cabin while the 42 has two cabins with sleeping accommodations for up to six persons. The Sea Horse 32 and 33 are generally similar differing only slightly in size. They are intended primarily as day boats and, therefore, not provided with large cabins arranged for sleeping accommodation. There is a small cabin which houses the lavatory and provides some shelter, but the main portion of the boat is occupied by a rather large cockpit in keeping with its use as a day boat.

Sedan models are produced in a number of sizes. These begin at 32 feet and step upward through 38, 42, 45 and 48 feet lengths. All are featured with a snappy sedan enclosure amidships which serves as a deck saloon and affords permanent shelter to the helmsman as well as the passengers. The difference in size obviously makes possible a more roomy and commodious craft in the larger sizes, and permits accommodations and comforts not possible in the smaller models. The increase in size also allows fuller and more complete accommodations in the cabin space below.

A fast commuter of 32 feet is also on the lists. This is an extremely fast boat and can be driven as high as 50 m.p.h. with a suitable power plant. As its name indicates, it is of the commuter type intended more particularly for fast ferry service rather than for more extensive cruising.

Largest of the Fairform fleet are the Offshore 48, 56 and 60-foot yachts. These are large handsome seagoing craft of exceptional ability. Any reasonable combination of power plant can be supplied ranging from a single to quadruple engines and propellers. Speeds as high as 45 knots are promised.

The 48 Sedan is available with diesels for speeds to 26 m.p.h. and with Scripps V-12-300 series engines for a top speed of 35.2 m.p.h. and sustained ocean cruising at 27.4 m.p.h.

The first of the new Offshore 60's is scheduled for launching late in February. She is equipped with a pair of Gray-General Motors 6 diesels and will have a cruising radius of 1,800 nautical miles. Her Pacific Coast owner plans a cruise to Alaska and to the tip of the Aleutian Islands. If the international situation permits, he may likely continue to Kamchatka and Siberia. Her designer, Frank Pembroke Huckins, faced no small problem in retaining her planing qualities while carrying some 12,000 pounds of fuel oil, not to mention the weight of electrical refrigeration, and a heating system with hot water radiators in every cabin.

This same 60 model has optional arrangements for twin, triple and quadruple screw diesel or gasoline engines, for speed to 45 knots.

Although the impression persists that the Fairform Flyer is high priced, such is not the case. The new Sportsman 42, illustrated, is typical. Her selling price is no higher than a number of single screw boats on the market of comparable size, yet she is powered with a pair of gear reduction eight cylinder Kermath engines.

She has an excellent stateroom forward, followed by a hallway, big wardrobe and toilet room with the Fairform electric toilet. Then comes a roomy main cabin, followed by a well equipped galley. Berthing for eight is available. The cockpit is sixteen feet long, with clear floor space almost big enough to pull a whale aboard.

New Cars and Models

Packard Refinements

Many Changes Made in Engine and Chassis

THE Packard Motor Car Co. has introduced a number of refinements in both its Six and Eight cylinder models, chief among which are the Skinner oil rectifier at the engine, the Bijur chassis lubricating system and an unconventional front spring layout in which shackles are located at front and anchors at the rear.

In addition, detail changes have been made in practically every unit of the two models. Improvements have been made in the clutch and universal joint construction. The engine oiling system has been refined, the valve mechanism has been the subject of detail improvements, and counterbalances have been placed on the crankshafts. The bore of the Single Six engine has been increased from 3¾ to 3½ in. No changes have been made in the prices although complete accessory equipment, balloon tires and disk wheels are now furnished on all models.

A total of 45 points are lubricated by the Bijur system throughout the chassis. All these points can be lubricated when the car is in motion or at the curb by merely pulling back the plunger of the hand pump and then releasing it. Changes in the universal joints make lubrication at these points necessary less frequently as oil is now used.

In the place of the former metallic joint at the front end of the torque arm, a fabric construction has been substituted. Another outstanding chassis change is in the front spring layout. Where the front springs usually are anchored at the front and shackled at the rear, this arrangement has been reversed and the springs have been underslung on the axle, with the idea of reducing wheel shimmy.

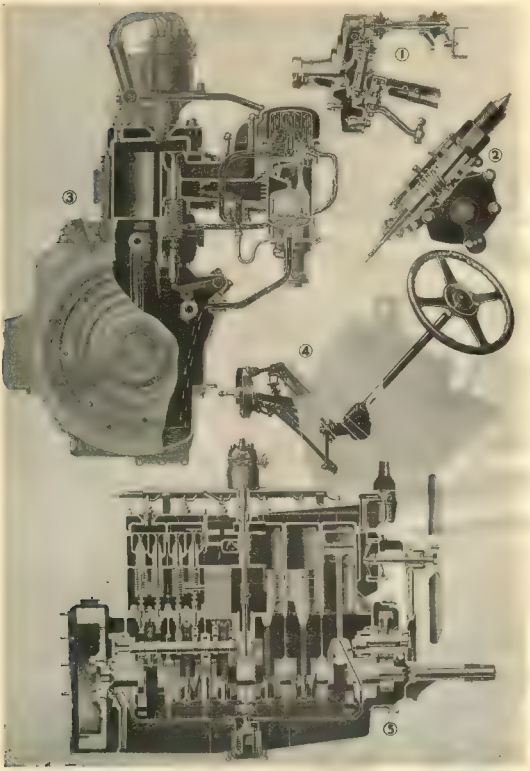
In conjunction with the new spring arrangement, the depth of the frame side channels has been increased to 8 in. on both Six and Eight. At the rear end of the frame, the characteristic Packard spring horn has been supplanted by the more usual type, together with a provision for mounting of the bumper.

The Skinner oil rectifier is carried on the exhaust manifold just aft of the carburetor and fuelizer, and in the Single Six engine, the crankshaft bearings have been made the same diameter as those of the Eight, the main bearings being 2⅝ and the crankpins 2⅛ in. in diameter. In the six cylinder engine additional weight has been added to the rim of the flywheel.

On both models, the dry plate, multiple disk clutches are continued, although the construction of the outer member or housing has been modified to eliminate dirt. Gear-shifting has been improved by decreasing the weight of the transmission gears. Gears are finished all over and the teeth are ground.

The length of the rear springs on the six has been increased two inches. No changes have been made in body styles with no additions or eliminations in the choice of bodies.

Packard Six chassis showing the Bijur chassis lubrication system



Mechanical details on Packard Six

1. Section view showing front axle details. 2. Worm and sector steering gear that has replaced the older worm and nut type. 3. Cross section of Packard Engines showing roller tappets, tip on the piston skirt, and details of the rectifier installation. 4. Walnut steering wheel and steering connections. 5. Valve side of engine. Note the counter weights on the crank shaft.

No. S29—Capacity 15 tons; height 28 ins; lift 18 ins; wt each 92 lbs 81 00

Packed loose.

SAND DRYING STOVES

—BLUE GRASS—

These stoves are in general use by railroads, trolley lines contractors, coal companies, etc. Adopted by the United States Government for the Navy Yards and Panama after a competitive test.

The wet sand is shoveled into top skirting and as it dries, will, of itself, run through the holes in the [illegible] at the bottom. The amount of sand the stove will dry depends upon how wet the sand is and upon the condition of the fire in the stove.

The stove may be fed with hard or soft coal, coke or wood. Clear sand only can be used, as earth or clay bakes hard.

Complete Without External Gratings.

Nos.	1BG	2BG	3BG

EXTERNAL GRATINGS FOR SAND DRYING STOVES

—BLUE GRASS—

Upright cast iron grating which surrounds the main body of the sand dryer, leaving an air space of about 1½ inches between grating and body of stove. This prevents the wet sand from coming in contact with the hot furnace. It permits it to dry much more rapidly and adds greatly to the life of the stove by preventing baking of sand and consequent burning of castings.

"MEPHISTO" 1 PC. RUBBER CASE STORAGE BATTERIES

We can furnish batteries for all popular cars. If car is not mentioned below, write us for our low price.

1 Piece Rubber Case

"Mephisto" storage batteries are a quality product throughout. Highest quality plates are used, insuring long life and high powered service. Abnormal buckling and sulphation of plates eliminated. Sealed joints where posts rise from covers, improved filling and vent device, preventing leakage. Representing one of the greatest values in the Battery market today.

To avoid breakage or damage to battery, shipment should be made by Express. Batteries are shipped direct from our Battery Station in Minneapolis. All storage batteries are filled with acid and charged ready to use when shipped.

OUR GUARANTEE

"Mephisto" batteries are guaranteed, when used under reasonable conditions, for a period of eighteen months. This guarantee does not cover carelessness, accidents, neglect or abuse. When batteries are returned to us for our examination, we will repair or replace same at our option if we find the battery defective. When batteries are replaced by us, we will make a charge to cover the service you obtained from the battery you return.

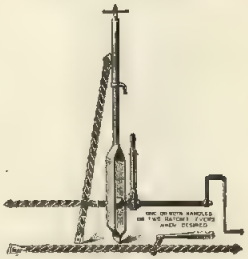
ROCK DRILLING MACHINES

HARDSOCG'S RATCHET



Specially designed to drill rock, fire clay and other hard substances. Very efficient, strong and durable.

Illustration shows rock machines complete, with 2, 4 and 6 ft. 1¼x½ square edge rock augers. Single and double cranks and ratchet.

Rock Machine—Complete with one each 2, 4 and 6 ft. augers. Weight each about 40 lbs....Each $21.50

Price above includes single and double cranks and ratchet.

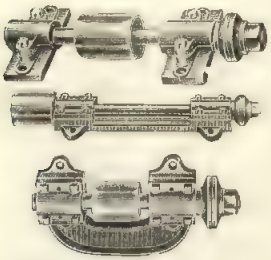
EXTRA PARTS FOR ROCK DRILLING MACHINE

No.	Name of Part	Each
	2-ft. rock augers, 1¼x½, square edge	$2.25
	4-ft. rock augers, 1¼x½, square edge	4.50
	6-ft. rock augers, 1¼x½, square edge	6.25
55	Thread bar, single slot; 8, 10, 12 or 14 threads per inch	3.00
56	Thread bar, double slot; 8, 10, 12 or 14 threads per inch	3.75
37B	Boxing	1.65
254	Ratchet.	3.40
255	Double crank	3.00
135C	Single crank	1.65
101	Jack screw	1.60
17	Ring for boot	.40
	Cog for ratchet	.55
	Pawl for ratchet	.20
	Spring for ratchet	.20
	Boot complete, 2 ft. long	4.50
	Boot complete, 2½ ft. long	5.25
	Boot complete, 3 ft. long	6.00

Above machine made with posts adjustable from 5 to 7 ft.

When ordering, give height of adjustable post desired, number of threads per inch on thread bar and length of augers wanted.

Saw Mandrels



Our Saw Mandrels are made of best grade of steel with self-oiling, babbitted bearings, with ample oil pockets in lower half of box, which should be kept full. They are fitted in the most careful manner and will run true and cool We can furnish them in any style shown in the cuts, and of any size given in the tables. All our Standard Mandrels are made with pulley to the right of the collars and with left-hand threads But we can furnish them with right-hand threads, when so desired. Saw is not included. Double-end mandrels at 1½ price of regular mandrels. For larger pulleys, add the difference in price of iron pulleys No allowance will be made for smaller pulleys.

Larger sizes or special mandrels made to order. When ordering, give length over all, and whether pulley is wanted to the right or left as saw runs toward you.

BENCH VISES

PRENTISS MACHINISTS SELF-ADJUSTING JAW

Solid steel faced jaws. Back jaw self adjusting and conforms by automatic action to any angle; adjusts itself and makes firm the material held whether straight, beveled or wedge shaped. By inserting pin, jaw becomes fixed, thus making a parallel solid jaw vise. Self-adjusting jaw rests and works up on and against solid body of vise, strong and durable as a solid jaw.

SINGLE SHOT RIFLES

PAGE-LEWIS

In design and construction particular care has been given to the selection of material best suited to the use of most modern 22 caliber ammunition.

MODEL C OLYMPIC

Take Down, Lever Action

24 inch round steel barrel; blued heavy steel frame; steel lever; tool steel hammer and trigger; oil finished walnut stock; length 13½ inches; steel butt plate. **Sights:** Combination Front; Sporting Rear and Peep Tang sight.

No. C—22 caliber; plain extractor shoots 22 short, long and long rifle R. F. cartridges; weight 4¾ pounds . . . . . Each $15.00

MODEL B SHARPSHOOTER

Take Down, Lever Action

24 inch round steel barrel; blued steel frame; steel lever, hammer and trigger; oil finished oval walnut stock; lengths 13½ inches; steel butt plate. **Sights:** Bead Front and Sporting Rear.

No. B—22 caliber; plain extractor; shoots 22 short, long and long rifle R. F. cartridges; weight 4¾ pounds . . . . . Each $13.50

MODEL D BOLT ACTION

20 inch round special steel barrel; oil finish dark color stock and fore arm; length over all 37½ inches

No. D—22 caliber; shoots 22 short, long and long rifle R. F. cartridges; weight 3 pounds . . . . . Each $7.50

DAISY AIR RIFLES

A 50 Shot Repeater, Lever Action

New Military; beautiful walnut finished stock; barrel and metal parts finished in gun blue; detachable bayonet with rubber tip; knife type front sight, open and adjustable rear sight; complete with sling and swivel.

No. 40—Length over all including bayonet 45 inches; weight 3¾ pounds . . . . . Per Dozen $60.00

Half dozen in a case

Take Down Model

Pump Action Repeater; loads automatically, forced feed; magazine holds 50 shots; non-rusting gun blue frame and barrel; hand polished genuine black walnut stock; adjustable front and rear sights; operates by pulling the slide toward the stock.

No. 25—Length over all 38 inches, weight 3¼ pounds. . . . . Per Dozen $60.00

Half dozen in a case

DAISY AIR RIFLES

LITTLE DAISY POP GUN

Steel metal parts, nickel plated; walnut stock. Shoots a cork and makes a loud noise with absolutely no danger.

No. 10—Length 17 inches; weight 7 oz. . Per Dozen $5.40

One in a pasteboard box.

BIG DAISY POP GUN

Steel metal parts, nickel plated; genuine walnut stock. Shoots rubber ball or cork; makes loud noise; absolutely no danger

No. 14—Length 21 inches; weight about 1 pound. . . . . Per Dozen $9.00

One in a carton

SINGLE SHOT

For Air Rifle Shot and Darts

Single shot; lever action; single piece steel barrel, nickel plated; genuine black walnut stock; barrel is removable

No. 11—Length over all 31½ inches; weight 1¾ pounds. . . . . Per Dozen $24.00

One dozen in a case.

REPEATER

Shoots Air Rifle Shot

Automatic Repeater; lever action magazine holds 350 shot; single piece steel barrel nickel plated; genuine black walnut stock. A very sturdy gun-like air rifle.

No. 12—Length over all 31½ inches; weight 1¾ pounds. . . . . Per Dozen $18.00

One dozen in a case

LITTLE DAISY SINGLE SHOT

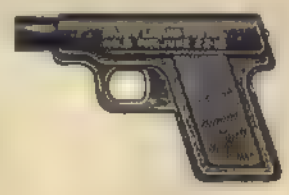
For Air Rifle Shot

Single Shot; designed to meet the demand for the small boy. Smaller and lighter than the No. 12 Daisy. Nickel plated steel barrel; black walnut stock.

No. 20—Length over all 29 inches, weight 1½ pounds. . . . . Per Dozen $10.80

One dozen in a case

DAISY LIQUID PISTOL



Automatic Design

Made from steel, blue finish; simple to load and discharge; no rubber bulb to get out of order; throws a fine stream of water 25 feet

No. 8—Length 5½ inches; weight 5½ oz. . Each $0.25

One in a carton.

BING'S GUARANTEED MECHANICAL TRAINS

These are unquestionably the finest mechanical trains built; all are equipped with extra strong clock work mechanism and fully guaranteed; every number is handsomely finished in bright colors and striped; where type trains are mentioned colorings correspond with the painting and trimmings of the lines designated.

STEEL LOCOMOTIVES

Four sections curved track, length of train 15 ins.

T3226—Consists of 5½ in. steel locomotive 3⅛ in. tender and 4½ in. Pullman coach; New York Central type; 4 sections curved track; total length of train 15 ins.; each in box. Dozen.....8.50

Four sections curved track, length of train 20½ ins

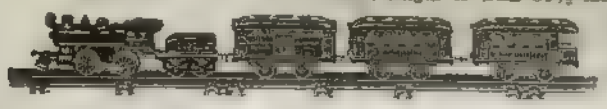
T3228—Consists of 5½ in. steel locomotive, 3⅛ in. tender, and two 4½ in. Pullmans; complete with 4 sections curved track; New York Central type; total length train 20½ ins.; each in box. Dozen 8.50

AUTOMATIC STOP TRAINS

Four straight, eight curved sections track; length of train 23 ins.

T3230½—Consists of 6 in. cast iron locomotive; 3½ in. tender, two 4 in. Pullmans; start and stop lever in cab, New York Central type; (train can be stopped by brake section); complete with 8 curved and 4 straight sections track; total length train 23 ins.; each in box. Each..... 1.75

Four straight, eight curved sections track, length of train 31½ ins.



T3231½—Consists of 7½ in. cast iron locomotive, with start and stop lever operating from cab; 3½ in. tender; one 5½ in. baggage car with sliding door; one 6¼ in. Pullman, and one 6½ in. observation car; New York Central type; complete with 8 sections curved and 4 sections straight track; total length of train 31½ ins.; each in box. Each.....2.75

Four straight, ten curved sections and right and left switches; length of train 32 ins.

T3232½—Consists of 7½ in. cast iron locomotive, nickeled piston rods, 4 in. tender; 5½ in. baggage car with 2 sliding doors; 5½ in. Pullman and 5½ in. observation car; start and stop lever in cab; (train can be stopped by brake section); New York Central type, complete with 10 sections curved, 4 sections straight track and 1 pair right and left switches; total length train 32 ins.; each in box. Each 8.75

AUTOMATIC REVERSIBLE TRAINS

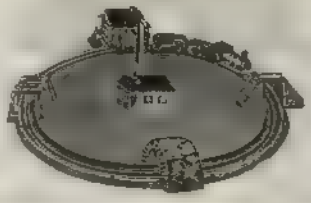
Six straight, eight curved sections track; length of train 36 ins.

T3239—Consists of 3¼ in. cast iron locomotive, nickel plated trimmings; 4⅛ in. tender, one 6¾ in. baggage car, one 6½ in. Pullman and one 6½ in. observation car; automatic reversible control from track; complete with 8 sections curved and 6 sections straight track; total length of train 36 ins.; each in box. Each 5.50

Four straight, eight curved sections, one switch section track; length of train 38 ins.

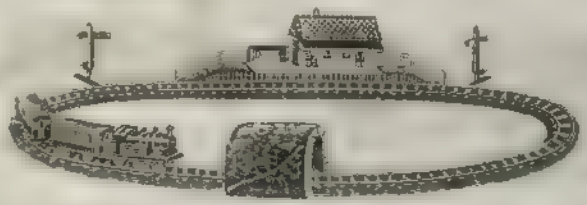
T3240—The finest mechanical train built; consists of 9 in. cast iron locomotive, nickeled piston rods and nickeled trim, 5 in. tender, loaded with imitation coal; one 6½ in. baggage car, one 6½ in. Pullman and one 6½ in. observation car; with automatic reverse from track; complete 8 sections curved, 4 sections straight, and one special switch section; total length of train 38 ins. Each in box. Each 9.00

MINIATURE TABLE MECHANICAL TRAIN



T8157—Lithographed metal landscape center; train consists of locomotive, tender and 2 passenger coaches, mounted on circular revolving track, with power house, station, foot bridge, railway bridge, tunnel and semaphore; with stop lever; all parts lithographed in attractive colors; diameter 10½ ins.; each in box. Dozen 10.50

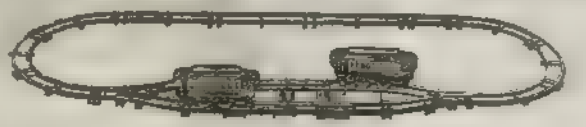
T3223—Consists of 4 in. sheet steel locomotive, 2 in. baggage car, 3 in. Pullman and 3 in. observation car; 12 sections curved and 4 sections straight track (one section with stop lever), making oval 24x42 ins.; total length of train 15 ins.; each in box, complete. Each 1.25



T3224—Consists of 4 in. sheet steel locomotive, 3 in. baggage car, 3 in. Pullman and 3 in. observation car making train 15 ins. long; 12 sections curved track; each complete in box. Each 1.50

T3225—Same as T3224, but with 24 sections curved track, one cross-over, making figure 8 track; 1 double and 2 single arm semaphores, 2 telegraph poles and railway station; each complete in box. Each 2.25

TWO TROLLEY CAR OUTFIT WITH MECHANICAL SWITCH

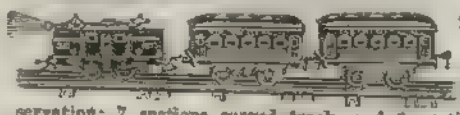


T8165—Outfit consists of 2 mechanical trolley cars 3½x8⅛ in. high, double tracks, nicely finished in colors, with strong clock work spring; 12 sections straight and curved track with switch, so cars can pass each other without colliding; track makes oval 56x23 ins.; each in box. Each 4.50

BING'S GUARANTEED ELECTRIC TRAINS

You cannot buy a better made, or more handsomely finished train anywhere than this line; and remember we guarantee them; all with headlights.

T3202—Steam type 7½ in. cast iron locomotive, with headlight; 3½ in. tender; two 4¾ in. Pullmans; C. M. & St. P. type; 7 sections curved track, 1 section with connection post and speed control; length of train 21 ins.; finished black and yellow, brown and red striped; each in box. Each 8.75



T3203 — N. Y. Central type; 8⅛ in. locomotive, with headlight, brass trim; one 5½ in. Pullman and one 5½ in. observation; 7 sections curved track, and 1 section with connection post and speed control; finished in gray, brown, black and green; yellow striped; each in box. Each 4.50

Automatic reversible engine; switch control

T3295—Pennsylvania type; 8¼ in. reversible locomotive, with headlight; one each 5½ in. baggage, Pullman, and observation car; 8 sections curved, 1 section straight track and 1 section straight with speed control; finished in maroon, black, buff and gray, yellow striped; length of train 27 ins., each in box. Each 5.50

EXTRA CARS FOR LIONEL TRAINS

Sheet steel all perfectly enameled in bright colors and handsomely striped

Bissell's Spring "Decorator" Display

THIS new spring Display is aptly named for it certainly makes a decorative and attention-getting piece for a window or departmental showing of merchandise. Of course this black and white illustration is wholly inadequate to visualize the real beauty of the "Decorator" Display which has a background of gold bronze with Grecian motif scroll work in light green, gold lattiwork, rich blue borders for the snappy jet black reading panels, and a final touch of red and white to season.

Altogether a forceful yet dignified Display —a charming color combination carrying a direct invitation to "Buy Now," at your store.
Even the shape is out of the ordinary. It looks big and commanding but is economical of space, having a spread of 39 inches and is 35 inches high.
A broadly helpful Display offered to merchants who sell Bissell's Sweepers, for use to our mutual advantage.

A Beautiful Display that is an Invitation to "Buy Now."

Helps You Sell Bissell Carpet Sweepers

ANVILS

GUARANTEE

Should a Belknap's Wrought Anvil break at the waist or its steel face become loose within one year from date of purchase it will be replaced without charge.

CAUTION

This anvil is tempered in a manner to suit the majority of smiths. No claim for defective temper will be allowed. To remedy the trouble caused by the unfair advantage taken of the liberal guarantee heretofore made by the manufacturers of wrought anvils, they have decided to qualify the guarantee as above, and all anvils are now sold with no guarantee other than as above.

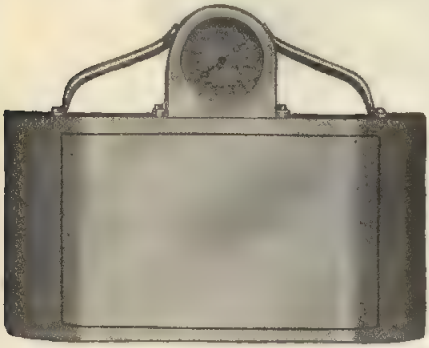
The Black & Decker "Drive-on" Loadometer

A portable weighing instrument designed primarily for use by State, County and City officials for conveniently weighing trucks which are suspected of overload.

A Loadometer weighs only 40 pounds, and owing to their portability a suspected truck may be weighed wherever found. This saves the inspectors time and avoids the resentment often provoked by causing the suspect to drive to the nearest permanent scale.



The Loadometer is constructed in conformity with the best accepted principles of scale design. Accurate readings are very readily made from large dials graduated in pounds.

The "Drive-on" Loadometer is constructed of special aluminum alloy, heat-treated, giving a maximum of strength yet reducing the weight to a minimum. The "Drive-on" Loadometer is easily portable, weighing only forty pounds, and is supplied with conveniently located handles for ease in carrying and placing in position on the road. Complete outfit consists of two machines as described above, no extras being required.

The Black & Decker "Drive-On" Loadometers will repay their original cost in a very short time and will result in the saving of thousands of dollars in road repairs.

Price, each $200.00

Showing Truck on Loadometers

BOYS' WAGONS

Sheet steel body, top edge flanged over heavy ¼ inch steel rod. Kiln dried bottoms. Inside finished in green, outside in red.

Wheels and Gears—Black baked enamel finish; cold rolled sheet steel hubs. The spoke is of high tensile strength, one wire making two spokes.

The tripod is strongly riveted to steel plate resting upon the fifth wheel connecting all parts with an eye bolt, through the lower end of which passes the axle, producing a perfectly rigid gear, preventing the axle from springing out of shape, and affording an easy revolving motion without loosening the eye bolt nut, as it is firmly screwed down to the collar of the fifth wheel.

(Sold in full carton lots only).

One doz in carton, K. D.

BOYS' WAGONS

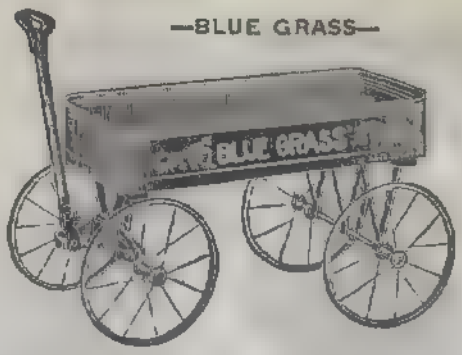
—BLUE GRASS—



Cotter pins with nickel caps are used on all Blue Grass Wagons, eliminating lost nuts and wheels from coming off. The wood bottoms are thicker than others and are double tongued and grooved, and glued together.

Reinforced Steel Hub.

This especially constructed hub is used on our Blue Grass Wagons Nos. 1 to 4 inclusive, also on our "Blue Grass Special". It is made with a large barrel around a small or inner barrel in which the axle works. Spokes are extra heavy making a strong, substantial wheel. The hub flange is bent down over each wire, forming a solid recess for the spokes to pull up against; spokes are then riveted to tire, which forms the strongest possible construction and makes hub and wheel absolutely rigid.

Strong Fifth Wheel.

The pull is evenly divided between axle and body; this with the additional advantage of a simple and rigid fifth wheel, allows no strain on axle to pull bolster out of shape. The fifth wheel has an extra plate which gives additional wear and strength.

Entire gear, bolsters and fifth wheel made of pressed steel; open hearth steel axles. Nos. 04 to 1 with ⅜ inch axles and Nos. 2 to 4 with ½ inch axles; body of 27 gauge sheet steel flanged over ¼ inch round steel rod; have two beads of corrugations near top edge and single bead near the bottom. Nos. 0 to 4 fitted with double plate 5th wheel, and three braces on rear axle and two hardwood cleats on bottom boxes. Workmanship and material the very best; wooden tongue with metal grip and steel attachment; outside with two coats of red and neatly striped and stenciled; inside and bottom painted green; gear and wheels enameled black.

No. 04 one-third doz, balance one-sixth doz in carton, K. D.

BOYS' WAGONS

—BLUE GRASS SPECIAL—

Heavy High Grade.

The wheels on this wagon are the same construction as on the Blue Grass. The fifth wheels are very similar to the regular Blue Grass, being equal to them in every way. They have double brace in the center of the rear axle. The tires are wider than the corresponding wagons of other makes. The wood bottoms are thicker than others and are double tongued and grooved and glued together, whereas, other makes are not tongued and grooved but simply stuck together with glue. The steel in the body is extra heavy and an extra heavy wire is placed around the top; an extra heavy shaped loop is used on the handle; all handles are packed inside the body thus avoiding any loss of parts in shipment.

Reinforced Steel Hub.

Same as on Blue Grass; spokes made of No. 10 wire.

Strong Fifth Wheel.

The front piece goes over the axle and bends down, the axle pressing through it. This piece is made of No. 10 gauge steel and is ⅞ inch wide. The axles are 11/16 inch in diameter.

This construction makes the Blue Grass the ideal wagon to withstand the rough usage of boys.

The construction of these wagons is the best— the materials used are of the highest standard—the workmanship and finish cannot be excelled. These combinations of high quality make the best boys' wagon that has ever been placed on the market.

Highest grade enamel is used in finishing, with two coats of varnish; letters in gilt; packed two in a carton, assorted finish as follows: 1 with red body, black gears and wheels; 1 with green body, black baked enamel gears and wheels; red body finished green inside, green body finished red inside.

Nos.	401	403
Body, ins	12x26x4⅛	14x30x5¼
Wheels, ins	10	11
Tires, ins	11/16	13/16

Original Bosch Automotive Equipment is identified by the trade mark shown above and the full name, "Robert Bosch". Be sure to specify "Robert Bosch" when ordering. Only then can you be sure of getting original and genuine Bosch quality as known the world over since 1887.

There is more than just "money profit" for you

in selling the Original Bosch Horn

The progressive automotive merchant is constantly on the watch for quality products that will net him good profits and, at the same time, help him build up a quality reputation in his town.

That is why dealers everywhere have been quick to receive the Robert Bosch Horn and to offer it to their trade.

The Robert Bosch Horn (an *original* Bosch product), is already on thousands of fine motor cars. The musical, penetrating tone of this new high-frequency warning signal compels attention whether in crowded thoroughfares or on country roads.

It is suited, alike, to fine motor cars, motor busses, commercial cars, taxicabs and motor boats. Write for price schedules and agency details for selling Robert Bosch Automotive Equipment.

NEW PRICES
The Robert Bosch Horn is made in three sizes—one quality.

ROBERT BOSCH MAGNETO COMPANY, INC.

The horn they're all talking about

THE VOICE OF THE FINE CAR

Visit us at the Bosch displays—

January 11th to 15th, American Road Builders' Convention, at the Coliseum, Chicago.

January 18th to 23rd, National Motor-cycle, Bicycle and Accessory Show, New Madison Square Garden, New York.

January 22nd to 30th, National Motor-boat Show, Grand Central Palace, New York.

January 30th to February 6th, Chicago Automobile Show, Coliseum, Chicago.

EVERYWHERE you hear it now: the resonant, staccato note of the *Original* Bosch Horn. No automobile accessory in a long time has taken so well with motor-car owners.

Why aren't you sharing in the profits of this remarkable success? Perhaps you have been tempted by one of the numerous imitations of this Horn. But remember:

There is more money for the dealer in selling an *Original* Bosch Horn than there is in selling an imitation. And to your purchaser of an *Original* Bosch Horn, you can offer *Original* Bosch spark plugs, generators, spot lights, hydrometers, etc., each product of the same masterly workmanship as characterizes the Horn.

The *Original* Bosch line is being increased by still other products so that it is becoming always more attractive from the dealer's standpoint.

Real Sales Features—

The insulator used in the Bosch RED Spark Plug is made of "Amboslte," a granite hard substance with wonderful insulating properties.

It is not porcelain or china—there's no clay in it. It is a new chemical composition which intense heat will not crack, and high electric voltage cannot puncture.

The electrodes are long wearing, too. They're made of manganese nickel—not steel. They don't burn away like ordinary electrodes. Their crescent shape makes bigger sparks and easy starting.

The plug body and threads are zinc plated —they won't rust in stock or in reserve.

The Bosch RED Plug is the QUALITY Plug you've been looking for—absolutely gas tight, long-lived and dependable.

It is backed by the Bosch guarantee and by an enviable reputation it has made for itself. Five types service all popular cars—a small stock gives a quick turnover and a good profit.

Ford size 75c. Other sizes $1.00

The BOSCH Long Line of Automotive Necessities

Here's a complete line of Quality accessories—all made by one firm. It's no longer necessary to deal with one company selling shock absorbers, another selling spark plugs, etc. If you handle the Bosch Long Line, you have the selling rights to 10 popular accessories—every one high grade, thoroughly dependable, moderately priced and a real necessity.

You have the Bosch reputation and prestige to back you up, Bosch advertising and dealer helps to aid you in selling, and the liberal Bosch discounts to assure good profits.

Furthermore, there are over 2500 official Bosch Representatives throughout the world to keep Bosch Products properly serviced.

Ask About the Bosch Dealer Franchise

You can profit still more by becoming an Official Bosch Dealer. The requirements are simple—the benefits many. Some of the advantages you would get are:—

Special discounts on all Bosch material.
Greater profits through increased sales.
Personal assistance from Bosch salesmen.
New markets and added prestige locally.
Reference books, sales literature, etc.
Sales promotion and advertising service.

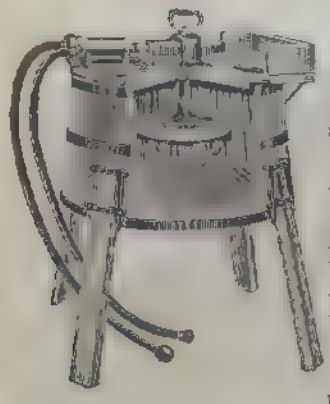
WASHING MACHINES

BOSS, WATER MOTOR

Piston Type.



Selected red Louisiana Cypress; tub finished with several coats of high grade water proof varnish; lid double thick, hinged on with strong slip-off hinges.

Dolly made entirely of wood Can be raised above clothes in tub by a metal handle, this preventing the clothes from clinging to dasher post when lid is raised.

All iron parts such as screws, nuts, bolts and all other hardware are galvanized and rust proof.

Equipped with large wringer box, securely bolted and braced to tub.

Guaranteed to operate on any water pressure over 25 lbs.

Each

No. BPM—Wt each 70 lbs ..... ◆$55 50

One in crate.

◆F. O. B. Ohio Factory Only.

WASHING MACHINES

—BLUE GRASS—Water Motor.

Dolly Type.

Best Quality Selected Cypress tub highly varnished and very strong in construction.

Gearless water motor. This prevents noise and lost motion and insures the easy running qualities necessary in a motor that will operate, on a very low water pressure.

No frictional parts; self-draining and non-freezing; requires no oiling; will not wear or rust.

Diameter of tub at top 22 inches; diameter of tub at bottom 24 inches; height of tub 14½ inches; height over all 28½ in.

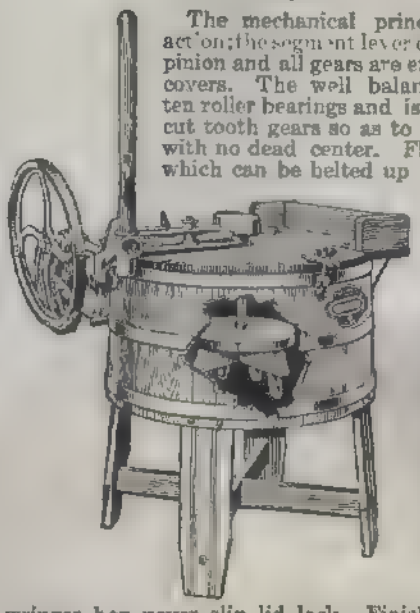
Motor guaranteed for three years. Tubs are not guaranteed and are not returnable. If motor proves defective it should be detached and sent back for repair or replacement. Each

No. BG1M—Wt each 65 lbs $50 40

One in crate.

—BLUE GRASS—HAND POWER

High Speed.



The mechanical principle is positive in its action; the segment lever directly drives the fly pinion and all gears are encase in accident-proof covers. The well balanced fly-wheel runs on ten roller bearings and is geared direct with the cut tooth gears so as to produce a mechanism with no dead center. Fly-wheel has a flat rim which can be belted up if desired. The lever socket is designed with two different positions to permit the operator to change the angle of the lever.

The dolly is made of selected seasoned hardwood, has smooth well anchored pins and is of a design capable of heavy duty.

Tub is made of Virginia white cedar, corrugated on the inside. The legs are bolted securely to the tub and are well braced with hardwood sections bolted through from side to side; well braced wringer box never slip lid lock. Finished with a coat of mahogany stain and complete with a coat of highly quality coach varnish.

No. BGHS—Outside dimensions: diam of tub: top 21½ ins; bottom 23 ins; height of tub 12¼ ins; height over all 27 ins..... Each $39 60

Crated; wt each 115 lbs.

IMPROVED FARM

With Telescope

No. 2

The outfit consists of level with telescope, tripod, plumb bob, graduated rod and target, with full instructions for adjusting and operating. With varnished wooden case, with hinged cover and handle for carrying level. The telescope is equipped with focusing eye cap, and contains a system of magnifying glasses by which the target may be read one-quarter mile distant. All iron parts are black enameled. Telescope tube and level are polished brass. This level meets every requirement of all classes of farm work, such as ditching, irrigating, terracing, fencing, road building, grading, foundations and building.

"MAZDA" AUTO BULBS

Mazda bulbs have been standardized to such an extent that over 90% of the demand for auto bulbs can now be supplied from these few numbers. If you limit your ordering to these, you're assured the smallest investment, the quickest turnover and the largest total profit on auto bulbs. Remember, all Mazda filaments are made of tungsten, the best material yet discovered for the purpose.

"MAZDA" B

The filament in all "Mazda" B lamps operates in a vacuum. All are the type C 6 with threads that they are globe shape and that the maximum diameter of the bulb is ¼ in. Packed 10 in carton.

Single Contact

Double Contact

An Ever-visible and Lasting Reminder of your Thoughtfulness

THE MOTO-METER COMPANY, INC.
LONG ISLAND CITY, N. Y.
THE MOTO-METER COMPANY OF CANADA, LTD., Hamilton, Ontario.

BOYCE MOTO-METERS

The **Boyce Moto-Meter** is a motor heat gauge, attached to the radiator cap of automobiles, trucks or tractors, it accurately registers condition in which gasoline motor is operating by registering the temperature of the vapor directly above the water in the radiator. As the water in the bottom of the radiator is several degrees cooler than at the top, the temperature of the air over the water represents the average temperature of the entire cooling system, rather than just one part of it. Therefore the **Boyce Moto-Meter** gives an accurate reading irrespective of the quantity of water in the radiator. Under normal conditions no modern automobile engine will overheat. It is only through negligence in applying water and oil, or the breakdown or failure of operation in some of the parts of the engine, that causes overheated engines, with the consequent damage.

De Luxe

Standard

Universal

De Luxe Model with Thief-Proof Lock

Has a triple nickel plated frame, with beveled crystals both front and rear, a broad column of indicating fluid easily visible even at a distance, and is equipped with a Schlaich Chain Lock, protecting the instrument from both theft and damage.

A special nameplate which may be chosen by the purchaser from a long list of attractive designs, including three engraved initials, club insignia, fraternal emblems, and car nameplates, is supplied upon request in exchange for the postcard which is packed with each De Luxe Model instrument

De Luxe Model 5⅜x3⅜ inches; weight each packed in carton 1½ pounds.....Each **$15 00**

Standard Model

A perfect heat recording instrument of the highest type with extremely broad ribbon-bore thermometer tube. Because of its perfection of workmanship the Standard model has been selected as regular equipment on America's leading cars.

This model is supplied in an all-nickel finish, or in black enamel with nickel retaining rings. It has beveled crystals both front and rear. Special nameplates are provided without extra charge in exchange for the "Free Nameplate" post card packed with each instrument

The Standard Model Boyce Moto-Meter is inexpensive insurance for any car It will save its cost many times over by preventing expensive repairs. Size 5½x3⅜ inches, weight each packed in carton 1 pound

Standard Model—Black enamel with nickel retaining rings .....Each **$10.00**
Standard Model—All nickel finish .Each **10.00**

Universal Model

This attractive instrument is especially for use on passenger cars of medium size.

Though slightly smaller than the Standard Model, it fulfills the same functions with the same high standard of efficiency.

The Universal Model has beveled crystals both front and rear. The frame of the instrument is finished in a durable highly polished nickel

Universal Model—5x3 inches; weight each packed in carton 12 ounces.....Each **$7.50**

Junior

Midget

Ford Special

Junior Model

The Junior Model Boyce Moto-Meter is a durable, accurate instrument, embodying all the features of the larger models. It has a heavy nickel plated frame, and the same temperature range as the larger instruments.

Junior Model—4⅞x3 inches; weight each packed in carton 8 ounces .....Each **$5 00**

Midget Model

This attractive instrument has a distinct appeal to every small car owner. Its high standard of efficiency, as well as its accuracy have made it one of the most popular instruments in the line.

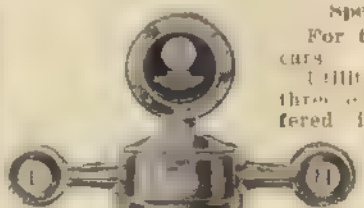
A heavily nickeled frame with beveled crystals, make it as well as a useful addition to any car.

Midget Model .....Each **$3 50**

Special for the Ford Model

Consists of a Midget Model Boyce Moto-Meter mounted on a handsomely designed locking radiator cap; complete unit is nickel plated, and offers an article of great utility as well as beauty for the Ford car.

Ford Special—Width 4⅜ inches; 4¼ inches high; weight 9½ ounces .....Each **$4 00**



Special Aristocrat Model

For the Ford and other small cars

Utility beauty and protection—three elements combined—are offered in the Aristocrat Model Boyce Moto-Meter.

Note—Aristocrat Models are furnished with the nameplate of the car. Specify for car desired

A genuine Midget Model Boyce Moto-Meter mounted on a handsomely designed locking radiator cap, and the complete unit nickel plated and assembled ready for installation. The purchaser may add a touch of individuality by inserting initials or club insignia back of the bulls eyes in either end of the cap. Two of the special initial plates are furnished gratis in exchange for the "Free Nameplate" post card, packed with each instrument.

The Aristocrat Model Boyce Moto-Meter for Chevrolet, Maxwell, Overland, Star and Gray is furnished complete with adaptors for these cars. No adaptors are necessary when installing on the Ford

While the Midget Model Boyce Moto-Meter is regularly furnished with the Aristocrat, the hole in the cap is sufficiently large to permit the use of the Universal Model without interference from the stem of the instrument in opening the cap. Those desiring the larger instrument can have change made by dealer at a slight additional cost.

Complete with adapter and special dial or name plate showing the monogram or name plate of the car it is to be used on, ready to install.

Aristocrat Model—For Ford cars .....Each **$7.00**
Aristocrat Model—For Chevrolet, Gray, Maxwell, Overland and Star cars.....Each **$7.50**

RADIATOR CAPS

MONOGRAM

Makes motor heat indicator or ornament thief-proof; screws on, no tools needed; cap, motormeter or ornament cannot be screwed off except by using shop tools and considerable time, or by turning radiator upside down; protects from carelessness; permanently attached, heat indicator or ornament cannot be mislaid, dropped or stepped on during filling; has steam tight, water tight multiplex gasket, which, when hinged cover is latched, provides resistance, effectively preventing any turning of the cap from its proper position.

Hinged for quick, easy filling; no unscrewing, no keyes, no threads to cross or strip, no delays or inconvenience just a push of thumb opens or closes it in two seconds. The heaviest gloves make no difference, it is a wonderful time and trouble saver in winter, no danger of burning fingers from hot radiator; nothing to jamb or work loose; remains in position at all times regardless of vibration; attaches instantly without tools.

Senior Model

Heavily nickel plated complete with standard finish shield (black finish with white background).

Note—Eight numbers of Senior caps fit about 95 per cent of all popular cars

Senior—For mounting motormeter with standard stem ⅝ inch diameter .....Each **$6 00**
Senior—With adapter for mounting meter with larger stem diameter .....Each **$6 50**

Junior—For mounting meter with either ⅝ or ¾ inch stem diameter .....Each **$4.00**

Shields

A shield is furnished free with each cap. For emergencies where purchaser's choice of shield is not in stock a certificate can be substituted, which is sent direct to manufacturer, and proper shield is then sent to purchaser prepaid. Shields are furnished as above or blank for engraving without additional cost.

Shields or Certificates when Purchased Separately
Senior Shields or Certificates.....Each **$**....
Junior Shields or Certificates.....Each

Note—Always mention style of cap, name of car and kind of shield wanted when ordering.

AUTOMOBILE RADIATORS

McCORD TUBULAR

Type "T" for Ford Cars

Tubular construction because Ford, like many other of the largest and best known car makers, has always used it as standard equipment—and replacement. Tubular because this construction has always been first from the standpoint of durability and strength. The large tubes permit the passage of the greatest volume of water with the least possibility of clogging.

Strongest construction—The rows of continuous crosswise fins are soldered to the straight up-and-down tubes, giving a reinforced type of construction that withstands shocks and blows

Armored protection—The fins are reinforced by a turned edge on the front and the tubes are set back fully a quarter of an inch giving the maximum protection against injury.

Non-clogging water passages—Large unobstructed straight up-and-down water passage tubes—95 in all—no plugging or clogging from sediment or dirt

Rapid heat dissipation—The tubes are soldered to the continuous brass cross fins giving maximum cooling efficiency

Protected against corrosion—Each of the large straight tubes is full solder coated, inside and out—full protection against the action of chemical or mineral substances in water

Interchangeable shell—both shell and core are interchangeable with the present car equipment.

Easiest to repair—Tubular radiators are the simplest type to repair—ask the radiator repair man

Better resale value—A McCord tubular radiator is the same type of construction and similar in appearance to the original, making for a better resale value.

No. R117—Radiator complete; for cars 1916 to 1923; weight crated 36 pounds.....Each **$17.00**
No. R118—Radiator complete, less shell; for cars 1916 to 1923; weight crated 33 pounds.....Each **$15.75**
No. R119—Radiator complete, less shell, for cars 1924 and later; weight crated 36 pounds..... Each **$17 00**

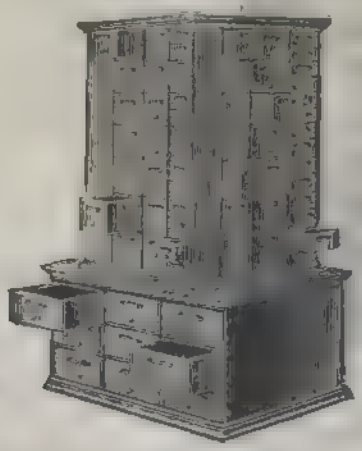
BOLT AND SCREW CASES

BROWN'S PERFECTION



Revolving Combination; made of good Tennessee oak, hard oil finish, plain, is the same as Nos. 40 and 80 shown in preceding column, except the corners are left square and filled in with small drawers for screws.

WITHOUT BASE, Mounted on a Block.

Height 50 ins; 24 ins square.

Each

No. 112—For bolts and screws, 112 drawers; 56 for bolts and 56 for screws; weight each crated 300 lbs.. ✦$143 25

No. 168—For screws only, 168 drawers, same size as No. 112; wt each crated 300 lbs..... ✦177 75

WITH BASE, Top Revolving.

Mounted on base, 30 ins square, 20 ins high; floor space 30x30 inches; height over all 69 ins.

Each

No. 130—For bolts and screws, 130 drawers; 74 for bolts and 56 for screws; 112 in revolving portion and 18 in base; wt each crated 480 lbs..... ✦$177 75

No. 200—For screws only, 200 drawers, same size as Nos. 130, 168 in revolving portion, 32 in base, otherwise same as No. 130; wt each 480 lbs..... ✦225 75

Drawers of 112 cases labeled as follows:
Washers, ¼, ⅝, ¾, 1.
Bolts, ¼x1, 1¼, 1½, 1¾, 2, 2¼, 2½, 2¾, 3, 3½, 4, 4½, 5.
Bolts, ⅜x1¼, 1½, 1¾, 2, 2¼, 2½, 2¾, 3, 3½, 4, 4½, 5, 6.
Bolts, ½x1½, 1¾, 2, 2½, 3, 3½, 4, 4½, 5, 5½, 6, 7, 8.
Bolts, ⅝x2½, 3, 3½, 4, 4½, 5, 6, 7, 8, 9, 10, 11, 12.
Screws, ½x3, 4, 5 (in one drawer).
Screws, ½x3, 4, 5, 6.
Screws, ⅝x4, 5, 6, 7.
Screws, ¾x5, 6, 7, 8, 9.
Screws, ⅞x6, 7, 8, 9.
Screws, 1x7, 8, 9, 10, 11.
Screws, 1¼x8, 9, 10, 11, 12.
Screws, 1½x9, 10, 11, 12, 13, 14.
Screws, 1¾x11, 12, 13, 14.
Screws, 2x11, 12, 13, 14.

This leaves 14 small drawers with blank labels which can be used for tire bolts or stove bolts, etc.

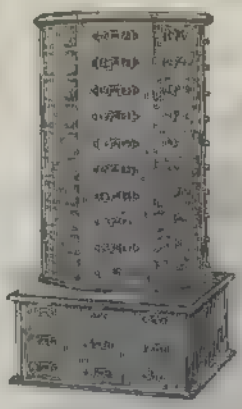
Drawers of 130 case labeled as No. 112 with additional drawers in the base as follows:
Washers, ⅝, ¾.
Bolts, ¾x5, 6, 7, 8, 9, 10, 11, 12.
Bolts, ¾x7, 8, 9, 10, 11, 12, 14, 16.

One in crate.

Note—Labels can be easily changed to any size desired—Special cases made to order.

✦F. O. B. Tennessee Factory Only.

BOLT CASES



AMERICAN

Revolving, Octagon Shape.

Made of poplar, cherry stained; metal drawers, with wood fronts, white porcelain knob on each drawer, top part revolves on base; the drawers are all provided with stops to prevent their removal from the case; each drawer holds a package of bolts of the size and number indicated on the front of the drawer.

Nos.	5-B	6-B
Drawers	98	104
Height, ins	60	65

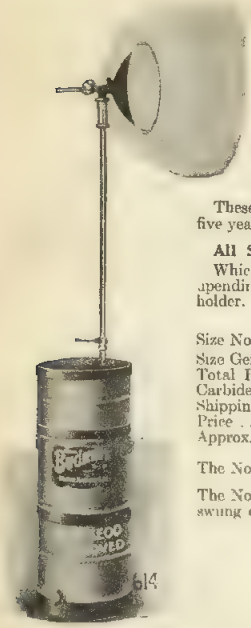

Fig. 614

Latest Improved Buckeye Carbide Lights

Figs 613-615

These lights embody every improvement made during an experience of twenty five years in the development and perfection of portable lights for construction work

All Standard Lights are Fitted with Ezyclean Carbide Holders.

Which prevent after generation of the gas, and are exceedingly easy to clean—no upending of tank to clean out the sludge, every thing comes away with the carbide holder.

Sizes and Prices

Size No.	613	614	615	616
Size Generator Tank	9x30	12x30	14x36	14x36
Total Height inches	66	72	78	78
Carbide Charge lbs.	5	8	12	16
Shipping Wt. lbs.	75	100	120	160
Price	$48.00	$72.00	$84.00	$112.00
Approx. Cp	3,000	5,000	8,000	15,000

The No. 616 is filled with a double Burner and Reflector.

The No. 613 is filled with a swivel joint just above the tank so the reflector can be swung down almost to the ground level.

Buckeye Lights

For Dredges, Cranes and Steam Shovels

No. 618 is fitted with hose as shown by the cut herewith. No. 617 has the same generator tank, except is fitted with a stand pipe like our standard types.

Generator Tank	14x36
Carbide Charge	16 lb
Shipping weight	140 lbs.
Price No. 617	$ 90.00
Price No. 618	100.00
Approx. Cp	10,000

All the above lights use ordinary commercial carbide. Do not have to use cake or other special carbide. Standard commercial carbide can be procured almost everywhere.

Fig. 618

Pyle-O-Lytes For Floodlighting

Types 1045
AC and AG

Types 1460
AC, AG, IC and IG

Types 1445
AC, AG, IC and IG

Pyle-O-Lytes are built in a wide range of styles and sizes to meet every floodlighting need; constructed of the finest materials, and of scientific design to give absolute control of the light. They can be depended upon to give continuous, uninterrupted service under all kinds of treatment and under all weather conditions. They are equipped with reflectors and lenses to give a long distance beam or a flood of perfect illumination.

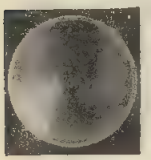
The units are of cast aluminum alloy, a new principle of floodlight construction, a material that is absolutely proof against weather, rust or the action of gases or acids. They are light in weight, easy to handle, and their life of usefulness is practically endless as compared with that of the ordinary short-lived sheet metal unit.

The Pyle-O-Lyte "NONGLARE" reflector—the heart of the unit is fully guaranteed to give lasting and efficient service, without blistering or discoloration. All Pyle-O-Lytes furnished with silver-plated copper or non-glare glass reflectors, as specified.

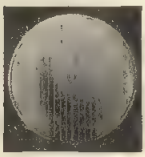
Pyle-National light control lenses represent tremendous advancement in light distribution methods. They make possible a wider range of devirgence, with assurance of even distribution and elimination of glare. The circular divergence lens accomplishes a very widespread dispersion of the light rays, the rectangular divergence lens forms the reflected and nonreflected light rays into a relatively flat rectangle, thereby conserving light which would ordinarily be lost.

Cab, Housing, or
Pilot Hou se Control

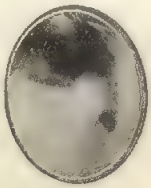
A device that enables the operator to control the light in any direction from within cab, housing or pilot house. May be used with any standard type of Pyle-O-Lyte.



Circular
Divergence Lens



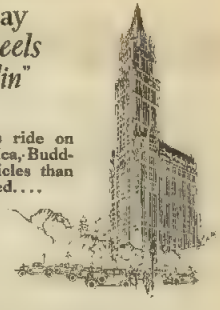
Rectangular
Divergence Lens



Crystal Glass Reflector, diffused beam type, great brilliancy

"NONGLARE" Glass Reflector, combination spot and flood-beam type, maximum utility

Two continents say "*Goodbye, buggy wheels ...here's Budd-Michelin*"



More than half of Europe's cars ride on Budd-Michelin wheels.... In America, Budd-Michelin carries more motor vehicles than all other steel wheels combined....

And thereby hangs a tale

WHEN BEN HUR won the Roman Derby the wood-spoked wheel was already so old nobody thought about it anymore . . .

Two thousand years later people were still trying to equal Ben Hur's speed on the highways—and still traveling on wood-spoked wheels . . .

Then came the revolution in highway travel. Speed jumped from six miles an hour to sixty. The weight of vehicles was multiplied. New problems of braking and steering were encountered . . .

The wood-spoked wheel had been adequate since the beginning of time, because horse-speed represented the maximum in highway travel . . .

But automobile-speed—automobile-weight—automobile-braking and steering—these are another story . . .

Good-bye, buggy wheels!

* * *

A great engineer quit thinking in terms of wood-spoked wheels and designed a wheel for the *automobile*. . .

He selected the material that makes possible the rest of the car—*steel* . . .

He gave his wheel strength to withstand collisions . . . beauty that adds beauty to any car . . .

Europe saw this wheel first, and was quick to adopt it. Now it is sweeping America . . .

Two continents say, "*Good-bye, buggy wheels.* Here's Budd-Michelin!"

Read the list of advantages:

BUDD

WHEEL COMPANY

Detroit and Philadelphia

BUDD-MICHELIN—***the All-Steel Wheel gives you these advantages:***

—a scientific convex form, increasing resilience, and permitting the placing of brakes and kingpins *within* the wheel, for better braking and easier steering—for greater protection of brakes from mud and water

Cross-section showing convex design

—a demountable wheel which hides the brakes but gives immediate access to them when adjustments are needed

—a light wheel (lighter than wood) tapering toward the rim, making starting and stopping

—five wheels to a set. An extra wheel to dress up the rear of the car, easy to substitute in case of tire trouble. No rims to remove

—everlasting strength, promoting safety. Triumphant beauty!

BONNEY
Water Pump
WRENCHES

Every Leaking Water Pump Means A Sale For You

This shows how easily the Bonney "CV" Water Pump Wrench can be used.

It is practically impossible to use an ordinary adjustable wrench in this case. The wrench will interfere with the crank case at one end and with the hood ledge on the other. This is typical of many cars

*C. V. is a Bonney trademark registered in the U. S. Patent Office

Chrome Vanadium registered August 11th, 1925

USE THEM YOURSELF

In the majority of cases it is extremely difficult, and frequently absolutely impossible, to tighten the water pump packing nut with an ordinary wrench. The illustration is an example of the conditions frequently encountered.

"ASK 'EM TO BUY"

Purchase an assortment of Bonney "CV" Water Pump Packing Nut Wrenches for the most popular cars, particularly the cars which you sell. Then, whenever a customer comes in to have his leaking pump tightened, do the job with a Bonney Wrench and then—SELL HIM THE WRENCH.

The cost to the customer is comparatively small and now that winter is approaching he can save the price of the wrench in alcohol or glycerine alone.

If you will write to us we will send you a schedule showing the sizes and prices of the Bonney Water Pump Packing Nut Wrenches for all of the important makes of cars.

You can buy them from your own jobber

Bonney Forge & Tool Works

Builders' and Architects' Levels

Builders' Dumpy Level

Is a low priced but reliable and well-made instrument and will meet all the requirements of the builder, contractor and millwright

Specifications

Telescope. Length 11½ inches, magnifying power, 18 diameters, achromatic terrestrial of good definition, focused by rack and pinion, eye-piece provided with a screw-like arrangement for precise focusing of cross hairs. Cross Bar Length, 8 inches, ribbed to increase stability and decrease weight. Level to Cross Bar. Length 5 inches, graduated on the glass. Horizontal Circle. Diameter, 5 inches, graduated to degrees, numbered 0 to 90 each way, with vernier reading to minutes. Finish. Telescope, level, Y and cross bar, nickel finished; all other parts bronzed and lacquered. Weight. Instrument 4 pounds; tripod 6 pounds.

No. 1600 Dumpy Level with tripod, complete **$75.00**

Architects' Level

Level is of superior quality and workmanship. Highly satisfactory for architects' and contractors' use and for the draughtsman, where lines are to be run with stadia but at short distances apart

Specifications

Telescope. Length 11½ inches, magnifying power 18 diameters, achromatic terrestrial of good definition, focused by rack and pinion, eye-piece provided with a screw-like arrangement for precise focusing of cross hairs. Telescope Length, 5 inches; graduated on glass. Bar Length, 8 inches, best composition metal. Level to Cross Ways. Provided with a new locking device which secures the cups. Horizontal Circle. Diameter 3 inches, graduated to degrees, numbered 0 to 90 each way, with vernier reading to 5 minutes. Parallel Plates. Of large diameter, the upper consisting of four well-braced arms, four leveling screws; provided with clamp to spindle. Weight, 5 pounds; tripod, 6 pounds.

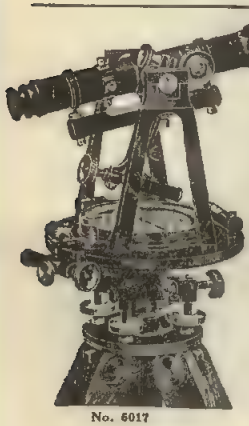
No. 6005. Architects' Level with tripod, complete **$90.00**

No. 6006 Same as No. 6005, but with tangent screw **95.00**

Transits

No. 6166

Reconnoissance Transit



No. 6017

Specifications

Telescope. Length, 9 inches; magnifying power, 21 diameters; balanced, and reverses at both ends; line of collimation true for all distances; object slide and eye-piece with dust protecters; fixed stadia hairs. Object Glass. Diameter, 1 inch. Eye-Piece. Improved, giving a flat field. Horizontal Axis. Length, 4 inches; cast hollow to reduce weight. Level to Telescope Length, 4½ inches; graduated on the glass, indicating a variation of 30 seconds of arc to 1/10-inch motion of the bubble

Standards. Phosphor bronze.

Horizontal Circle. Diameter, 5 inches to edge of graduation; graduated on solid silver to half-degrees, with one double vernier reading to single minutes, placed at an angle of 30 degrees to line of sight; marked from 0 to 180 each way.

Compass. Graduated to half-degrees, figured from 0 to 90 on each side of North and South; magnetic needle, 3½ inches, variation plate with vernier and rack and pinion.

Plate Levels. Length, 2 inches; indicating a variation of 1 minute of arc to 1/10-inch motion of the bubble

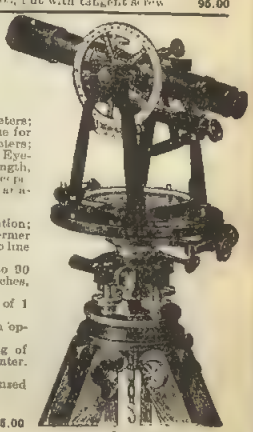
Tangent Screws. Phosphor bronze; improved form, with opposing spiral spring.

Parallel Plates. Of large diameter, the upper consisting of four well-braced arms; four leveling screws. Shifting Center. Range of shift, ¾-inch.

Finish. Standards, cloth-finished; all other parts bronzed and lacquered.

Weight. Instrument, 10 pounds; tripod, 9 pounds.

Price **$225.00**



No. 6166

No. 6017

Builders' Transit

It is especially serviceable in the determination of points in a vertical plane above or below the level line, or for the repetition of angles.

Specifications

Telescope. Length, 8 inches; magnifying power, 16 diameters, achromatic terrestrial, of good definition, focused by rack and pinion; eye-piece provided with a screw-like arrangement for precise focusing of cross hairs. Level to Telescope. Length, 4½ inches; graduated on the glass

Horizontal Circle. Diameter, 5 inches; reads to degrees; graduated on brass, silvered

Vernier. One, reading to 2 minutes; vernier plate fitted with two spirit levels placed at right angles to each other.

Tangent Screws. Phosphor bronze, improved form, with opposing spiral spring

Finish. Standards, cloth-finished; all other parts bronzed and lacquered.

Weight. Instrument, 6 pounds; tripod, 6 pounds.

No. 6015. Builders' Transit, with tripod No. 6202, box, etc. Each **$165 00**

No. 6017. Builders' Transit, like No. 6015, but having compass with raised rim, silvered, graduated to degrees, with vernier on plate, needle about 3 inches, tripod No. 6202, box, etc. Each **$200 00**

Handy Articles for Campers

CAMPER'S KNIFE

Imported Camper's Knife. Consisting of knife and fork. Knife of high grade polished steel, handle separates in center and forms two individual tools—a knife and fork. Composition handle. Size closed 3⅝ inches. One dozen in package.

No. 10C050. Per dozen..... 4.00

IMPORTED TOOL KNIFE

Imported Tool Knife. Stag handle, brass lined. One large spear blade glazed, one punch blade. Equipped with pliers for cutting wire and shackles for chain. Polished steel bolsters. Size closed 4½ inches, ½ dozen in box.

No. 10C00A. Per dozen.... 16.50

CAMPER'S OUTFIT

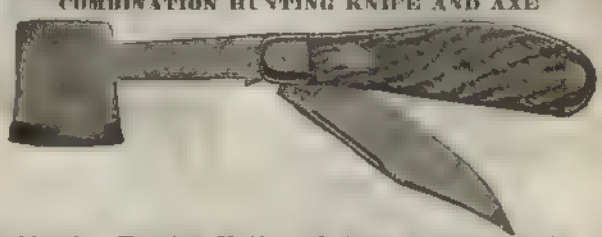
Imported Camper's Outfit. Consisting of knife, fork and spoon of high grade steel, nickel finished. Handle separates and forms three individual tools—knife, fork and spoon; ebony finish composition handle. Size closed, 3⅝ inches. ½ dozen in package.

No. 10C051. Per dozen.. [illegible]

No. 10C419. Camper's Knife and Fork Combination in one, separates in the middle. Each half is a complete tool, one fork and one knife, nickel silver bolster, brass lined, bone handle, long clip blade and one fork, good polished steel; both fasten together with button in slot; entire length, 6¾ inches. An ideal camper's knife.

Per dozen..... 12.00

COMBINATION HUNTING KNIFE AND AXE



Combination Hunting Knife and Axe, American Made. A real "trail blazer." Extra strongly built bone stag handle, heavy brass lined nickel silver bolsters. 2 blades, large clip and axe; length of blades 3⅝ inches. Made of extra heavy forged steel, perfectly tempered and ground to a keen edge. Length closed, 6 inches.

No. 10C808. Each..... 1.85

IMPORTED POCKET KNIFE TOOL KIT

Imported Porket Knife Tool Kit. Comprising a cocobolo handle jack knife, 6½ inch open, and 5 extra tools which can be attached to handle. High grade steel carefully tempered. File, reamer, cork puller, screw driver and chisel, in leather pouch. Size 3x4½ inches.

No. 10C79. Per dozen kits..... 14.50

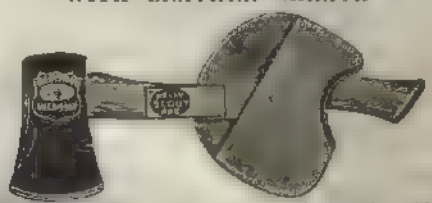
Per kit..... 1.25

HUNTER'S AXE WITH LEATHER SHEATH

Hunter's Axe with Leather Sheath. Made of high grade material, special temper, hand forged finish; cutting edge raced. Stained axe shaped handle; weight of head 1¼ lbs. Sheath made of high grade leather. ½ dozen in box.

No. 3C228. Per dozen..... 10.50

KELLY FLINT EDGE SCOUT AXE WITH LEATHER SHEATH



Kelly Flint Edge Scout Axe with Leather Sheath. Made of one piece high grade tool steel, hand tempered. Special luster black finish, cutting edge honed. Beveled nail slot. Stained axe shaped handle. Weight of head 1¼ lbs. Sheath made of high grade grained leather. ½ dozen in box.

No. 3C229. Per dozen..... 15.00

Superior Soft Drinks

"Not how cheap but how good" has been our slogan in the preparation of our Superior brand of soft drink powders and liquid flavors.

Before adopting the "Superior" brand and placing it on the market, all items listed were subjected to a most rigid test by expert chemists, who reported that all powders and liquids submitted were far superior in every detail to all others.

"Superior" Soft Drink Powders, an artificial product—composed of a citrus base, flavored with true Italian flavors, and artificially colored. A delicious drink suggesting the rich fruit flavor of the true fruit itself is obtained by using "Superior" powders.

There is 85c profit on every dollar taken in.

"Delicious"

"Superior" Soft Drink Powders and Liquid Flavors are prepared especially for us. We guarantee these products to be made from the very best materials. We have had them analysed by chemists and they comply fully with all pure food laws. By using "Superior" soft drink powders and flavors you will double your sales.

Superior Liquid Flavors in Bottles

"Superior" Liquid Flavors are produced from the highest quality ingredients obtainable. Our idea of putting them up in bottles is the handy way of making soft drinks rapidly. Always use glass or earthenware containers when mixing or dispensing, as drinks should never come in contact with metal.

A tablespoon of "Superior" liquid flavor mixed with sugar and water will make a gallon. Makes excellent Sherbets, Ices, Frappes and other delicious concoctions. Soda dispensers will find it ideal for Soda and Sundae syrups.

Each bottle contains 4 oz. and will make 10 gal. of liquid. Made in the four flavors as listed below.

All Drink Powders and Flavors Comply Fully with all Pure Food Laws

Raspberry. 4-oz. bottle makes 10 gallons or about 200 glasses.

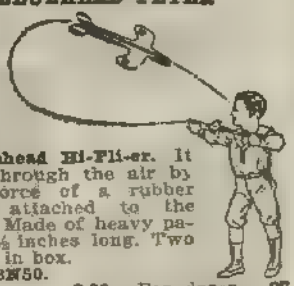
No. 23N24.

Per gross . 4.00

Per dozen.... .35

BLUEHEAD FLYER



Bluehead Hi-Fli-er. It flies through the air by the force of a rubber band attached to the head. Made of heavy paper, 8½ inches long. Two dozen in box.

No. 38N50.

Per gross . 3.00 Per dozen .27

IT ROLLS UP HILL

"Gum Back" is an interesting novelty that defies the laws of gravitation, cylinder shape, 2½x 2½ inches, with rolled rim metal cap ends, covered with ornate paper. Roll it on the floor or down the hill and it will come back to you. This is accounted for by the peculiarly poised metal ballast inside. One dozen in box.

No. 2N25.

Per gross.. 7.50 | Per dozen.. .65

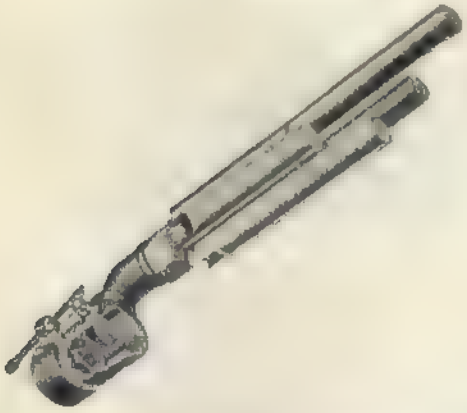
Wood Pistol, decorated with burnt-out flower. By turning revolving trigger it produces a loud sound. Can be used as souvenir. 5 inches over all. Two dozen in box.

No. 13N72.

Per gross 4.50 Per dozen. .40

EXHAUST HORNS AND EXPLOSION WHISTLES

AERMORE EXHAUST HORNS



Aermore Exhaust Horns. A thoroughly satisfactory exhaust signal. Four notes sounded together produce a harmonious chord that is heard above traffic and carries a long distance. Warns but does not frighten. Operates by exhaust of the engine, and all numbers are furnished with Aermore valve.

Built on the pipe organ principle. The four tones sounded together produce a pleasing chord easily heard over the din of traffic or in the country.

Easily installed, nothing to get out of order. A great favorite with discriminating motorists.

No. 000. The largest of the Aermore Horn family. Tubes are larger and the tone is low and deep.

No. 000 Aermore Exhaust Horn.....each **$16 00**

No. 00. 21-inch Aermore Motor Bus Special, complete with hand control. This horn is especially designed for heavy trucks and other high powered motors, gives a very deep tone.

No. 00 Aermore Exhaust Horn.....each **$14 00**

No. 0. 17-inch Aermore Outfit complete. With hand control. Horn is especially designed for large cars and tractors; gives a deep, rich chord.

No. 0 Aermore Exhaust Horn.....each **$12 00**

No. 1. 15-inch Aermore Outfit complete. With hand control. Recommended for medium weight cars and light tractors. Can be used on Fords if an especially deep tone is desired.

No. 1 Aermore Exhaust Horn.....each **$10 00**

Ford Special Outfit. Including Aermore (Ford size) valve, elbow, etc., and hand control, all in one container.

Ford Special Outfit.....complete **$7 00**

Note: If Aermore Outfits are desired including valves over 3 inch inside diameter, add $1.75 to the above prices.

AERMORE EXHAUST HORN VALVES

Aermore Horn Valve. For exhaust horns, heaters, etc., to be attached between engine and muffler, by cutting a section of exhaust pipe and inserting valve. Recommended as the best valve possible to install in this position. Sizes, 1½ to 4¼ inches.

Aermore Horn Valve. Sizes 1½ to 3 in., incl. each **$1 80**

Aermore Horn Valve. Sizes, 3⅛ to 4¼ in., incl. " **3 50**

BUELL EXPLOSION WHISTLES

Chime Model

Chime Model. Suitable for all sized motors. It is a very satisfactory signal for even the most expensive cars. Has a mellow sound blown lightly and a commanding tone when opened full.

Single Tone with Plug for Ford

Single Tone Model. Also suitable for all sizes motors and works satisfactorily through the spark plug opening. This model is equipment with eighty-two manufacturers. It has a clear powerful note that makes it very effective.

Buell Junior

Buell Junior. This is a smaller design capable of providing a good clear warning note. It is not as heavily built as the standard Buell model but is operated on the same principle. Particularly adapted for use with spark plugs.

	Regular	With Special Screw Adapter
Chime Model. Complete with Valve, ⅛-inch pipe	$6 00	$7 00

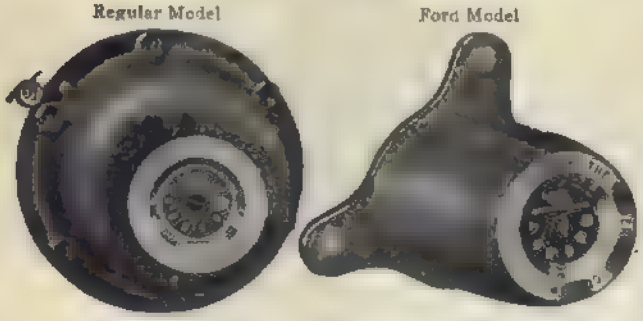
HUB ODOMETERS, SPEEDOMETERS AND PARTS

VEEDER HUB ODOMETERS

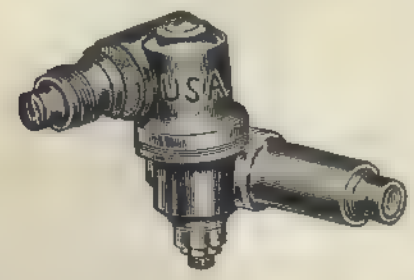


Odometers. Parts subject to hardest wear are made of hardened steel. The studs on which the dials revolve are of copper-nickel alloy, and will not rust or corrode. There are five dials indicating miles, and one registering tenths of a mile, recording to 100,000 miles, then repeating. No oil or axle grease can leak in on these dials; a stuffing box prevents it. The dials revolve upon comparatively small shafts or studs, reducing friction. The dials are locked and prevented from turning except when driven by the mechanism (and this is not accomplished by means of springs). The locking mechanism is similar to the so called Geneva motion and has been employed in the Veeder counting mechanism for many years. The crystal, about ⅛-inch thick, is fastened into the outer casing by a metal bezel forced in under pressure, making it absolutely water-tight.

The Veeder always adds mileage, whether truck runs forward or backward. Seals onto the hub—there's no falsifying the figures—no disconnecting the instrument by throwing gears out of mesh.

Veeder Hub Odometer, Regular Model.....each $20 00
Veeder Hub Odometer, Ford Model..... " 15 00
In ordering, give make, model, year of manufacture of car, and size of front wheel.

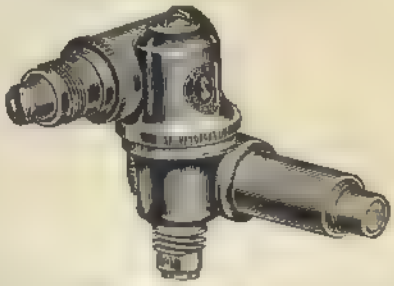
CIRCLE S SWIVEL JOINTS



Model 909. Built to meet the growing demand for a cheaper swivel joint. It has hardened cut steel worm gears, long bearings, solid durable construction, steel end thrust washers and steel center bearings, all features necessary to a durable and efficient swivel joint. The large worm gear is carried on a perfectly centered steel post, solidly anchored at both ends. All parts are removable and interchangeable. Case is die-cast from specially selected metal that is hard, tough and unbreakable under any condition to which a swivel joint would ordinarily be subjected.

No. 909. Right Hand Swivel ..... each $2 25
No. 909. Left Hand Swivel..... " 2 25

CIRCLE S SWIVEL JOINTS



No. 209. An efficient and everlasting swivel joint. Extra large, one piece, all steel gears. Steel end thrust bearings serve as grease cups. Every working surface steel against steel. Extra large steel center bearing specially constructed to prevent warping and insure perfect fit. Instantly interchangeable for right or left hand drive. All parts renewable and interchangeable. The most efficient, most durable and in every way the best swivel joint ever made.
No. 209R. Right Hand for Stewart Speedometers, 2½-1 ..... $2 75
No. 209L. Left Hand Swivel Joint, 2½-1 for Stewart Speedometers 2 75

F. W. S. SHAFTS

Flexible Tubing or Housing. Made of the best rolled steel with positively locked joints to make it absolutely waterproof.
For Stewart Speedometers.
This shaft is very strong and yet it gives the maximum amount of flexibility. The shaft is sold complete (in lengths from 54 to 84 inches), including inside drive and end fittings for Stewart speedometers.
Shaft .....complete $3 50
Outside Housing Only..... 2 00
Specify length of Shaft.

F. W. S. SHAFT FITTINGS

No. 1, 2 or 3. Cutter Pin Fibre Gears .....each $0 25
Specify Number.

IGNITION SYSTEMS, GENERATOR CUT-OUT AND COILS

WELLS DISTRIBUTOR FOR FORD

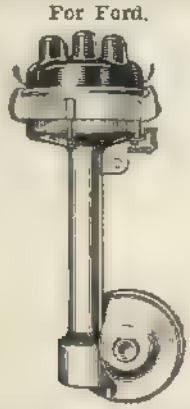
Wells High Tension Distributor. Especially designed for Ford cars, trucks and tractors. Eliminates timer, carbon trouble, fouling of plugs and vibration. Increases the spark, and will last as long as the car. Saves gas and assures easy motor starting and smooth running motor.

For Fords not equipped with starting and lighting, the Wells system is operated on the current from the Ford magneto using one Ford coil without screwing the vibrator down. This same system works equally as well on storage battery equipped [illegible] cars, only the Ford coil and coil box can be eliminated by substituting the Wells Type S-9 non-vibrating coil.

The Wells Distributor is distinctive in its simplicity. Anyone can install it in thirty minutes without removing the radiator and without the use of special tools. It has only two moving parts—nothing to get out of order or adjustment which will require an expert to adjust.

Type S-4 Wells Distributor.....complete $9 00
Type S-9 Coil.....each 5 00

ATWATER KENT TYPE LA IGNITION SYSTEM For Ford.



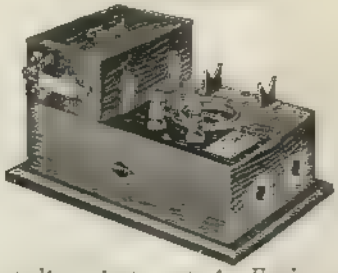
Type LA System. Easily installed without removing radiator. The LA system is operated on the current from the storage battery using one Ford coil with vibrators screwed down tight. This leaves three spare coils for emergency.

Eliminates timer, noise of vibrator; motor runs smoother due to increase in spark heat from battery and more accurate timing. Spark is of uniform intensity for all four cylinders, because the battery is a constant source of current supply, only one coil is used and the spark is accurately timed for each cylinder. Combines automatic spark advance with auxiliary hand advance.

No. 3321. Type LA System, including resistance unit, all cable and fittings.....complete $10 80

Special coil for Ford.

B-W TESTERS



Type A. For alternating current. Equipped with transformer. A. C. ammeter, cord with standard plug for use in any 60 cycle, 110 volt alternating current lamp socket. Can also be furnished in 25 cycle, 110 volt, and 60 cycle, 220 volt, when specified on order.

Type A Tester.....complete $12 75

Type D. For direct current. Equipped with direct current ammeter with cord and clips for conveniently connecting to standard six volt storage battery or 4 good dry cells in series.

Type D Tester.....complete $10 00

M & M GENERATOR CUT-OUT FOR FORD

Type CO1 M & M Generator Cut-Out. Curved base. Ford type. For generator mounting. With cover and mounting bracket for replacement purposes. Is dust, oil and water proof. Has a rugged construction. Cover is of drawn brass. Contact points are made of the finest silver. Well proportioned as to size and thickness. The M & M Cut-Out is efficient and reliable. Has simplicity of design. Every steel part is zinc plated to prevent rusting.

Type CO1 M & M Generator Cut-Out.....each $1 10

VLCHEK TOOLS

(Easy to Say "Vul-chek")

Keep Mechanics Good Tempered

Customers Want To Handle Them!

And When They Do They Buy

MOST every man has it in mind to buy *some* tool. He sees what he wants on the Vlchek board - - he hefts a hammer, or critically examines a wrench or a chisel - - a sale is made!

The Vlchek Self-Merchandising automotive tool board is the most complete thing of its kind ever put out. This attractive display of tools in popular demand gets results! We have the proof in many letters which enthusiastic merchants have voluntarily written us. They've tried it out and they know!

Taking the place of an extra clerk this board prominently displays the Vlchek line of high grade tools before all who enter the store. The Vlchek board *does* sell more tools.

To the right you see the Vlchek board with a representative outfit of tools. Just below it is the coupon that will bring you more information. Take advantage of our profit-making plan now.

Chas. J. Graham Co.
Auto Accessories Hardware

The Vlchek Tool Company
Cleve and, Ohio
Gentlemen

We have had your mo splay board in our store seven weeks. As a merchandising feature it is one of the best we have ever had. Since the board was put on we have sold more screw drivers, hammers and wrenches than we ever said before in the same period of time.

We are highly pleased with the board. We have placed it in a prominent position because a display of such variety of tools so attractively arranged, merits the best position we can give it. Our customers are pleased with the quality of Vlchek tools.

Yours very truly,

Chas. J. Graham

This shows the Vlchek Self-merchandising Board in Mr. Graham's store—a real "ask-'em-to-buy" Salesman.

He picks up the tool that attracts him most and examines it. You've got him!

Somehow, the Vlchek Self-Merchandising board does more to make men buy tools than any other kind of display. It does the business, that's sure.

MAIL THE COUPON

Add to your sales-force by having the Vlchek Board in your store. It costs you nothing. The coupon on the other side of this page will bring you full information.

WASHING MACHINES

ELECTRIC

The 1900 Cataract Washer is quiet running in every respect, every part accessible, is sanitary because it is easy to keep clean, mechanically good in every detail.

The tub is of heavy, solid copper, heavily tin planished inside and smooth as a glove.

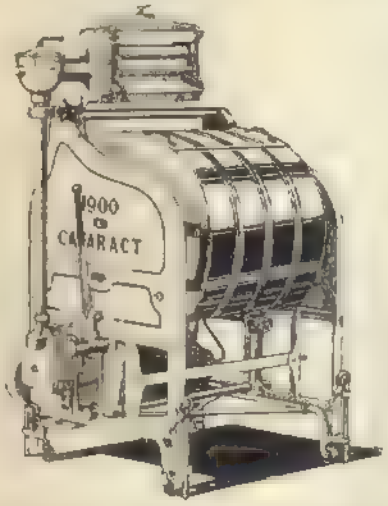
Wringer swings to any position, locks rigidly and operates equally well at any angle and can be reversed and kept going while washer is running; is made of high grade metal, enameled and rust-proofed.

The rolls are made of para elastic soft rubber.

The washer is mounted on casters which makes it easy to move to any desired position.

Adjustable rods when lowered make it possible to level up the washer on an uneven floor

1900 MODEL D CATARACT WASHER



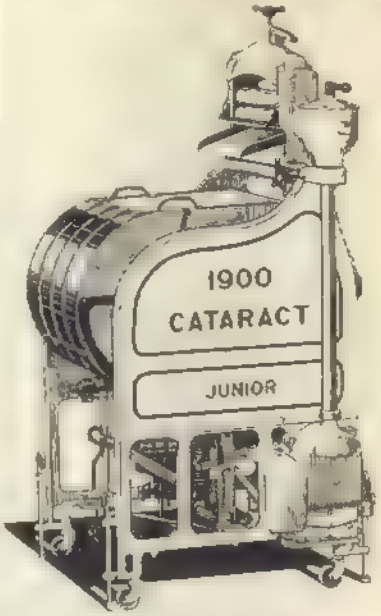
With New Safety Wringer

The capacity of this machine is 8 double sheets or 12 pounds of dry clothes

Motor to operate on 110, 220 or 32 volt current, direct or alternating, can be furnished.

1900 Model D Cataract—Floor space required 29x33 inches; height to top of wringer frame 51 inches; weight each 270 pounds .....Each $330.00

1900 MODEL F (JUNIOR) CATARACT WASHER



With New Model D Wringer

The capacity of the "Junior" is 6 double sheets or 9 pounds of dry clothes.

Motor to operate on 110, 220 or 32 volt current, direct or alternating, can be furnished.

1900 Model F (Junior) Cataract—Floor space required 25 ¾ x 26 in., weight each 225 pounds...Each $270.00

WASHING MACHINES

EAGLE

Hydra, Water Motor

The Hydra works on a lower pressure than any other motor. It is simple and sturdily constructed and is fool and trouble proof. Motors have only one stuffing box; the double cupped leather piston makes them perfectly water tight No coil springs, no exposed gears.

Reinforced brass cylinder protected by a heavy galvanized iron casing; has brass strainer over inlet chamber to protect the valves and insure their opening and closing properly.

Hydra—Louisiana red cypress, high grade water proof varnish; kiln dried and corrugated sides and bottom; weight each about 70 pounds.....Each $50.00

IRONING MACHINES

ELECTRIC

1900 Ironer

Shoe and roll type. Has a 44 inch roll and cast iron ironing shoe. Automatic heat control operated by positive thermostat maintains uniform and correct temperature of ironing shoe. Quiet running motor, sturdy and reliable. Steel cut gears with foolproof oiling system Foot treadle extends across entire width of machine

Adjusting wheel allows leveling up machine on an uneven floor. Drying rod fits either end and swings to any desired position. Heated by gas or electric. Motor furnished for 110, 220 or 32 volts, direct or alternating current; heating units 110 or 220 volts.

1900 Ironer—With thermostatic gas control; ironing speed 10 ½ feet per minute.....Each $400.00

1900 Ironer—With electric heating units...Each 430.00

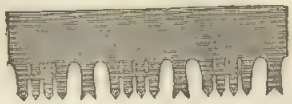
Made of thoroughly seasoned selected stock. Extra heavy cast steel clasp and washer. Malleable iron bolt, with lock rivet feature, preventing rivet from being detached.

Price per dozen pairs $5.00
Price per pair ..... .50

Two Man Cross Cut Saws

Silver Steel Perfection No. 4



This saw is made from a special steel which takes a very high temper and will hold its cutting edge longer than any other saw made. It is ground 14-gauge on tooth edge and 19-gauge in the center on back and 16-gauge on ends of back. In filing, it is only necessary to set the teeth to clear top at gullet. It will run in green or dry lumber with less set and greater ease than any other saw. It has four sets of cutting teeth set between a set of swaged shaped rakers and is perforated. The perforations strengthen the tooth and when teeth have been filed down to the perforations it is only necessary to file through them to regum the saw. The Perfection is especially adapted for sawing hardwood and frozen timber.

Length, feet	4½	5	5½	6
Price each	$3.60	$4.10	$4.60	$5.60

Tuttle or Champion Tooth

Made from high grade crucible steel, ground 14x16 and 14x18 gauge. This saw has two sets of cutting teeth between a set of rakers, and is a good medium-price tool.

Common or Tenon Tooth

When ordering specify style of tooth required.

Tuttle and Common Tooth Cross Cut Saws

Length, feet	4½	5	5½
14x16 gauge. Price	$3.60	$4.10	$4.80
Length, feet		6	6½
14x16 gauge. Price each		5.60	6.40

Great American Tooth

Ground 14x16 and 14x18 gauge. The saw has no rakers and has three sets of cutting teeth between the gullets, the back of the teeth at the gullets acting as a raker.

Length, feet	4½	5	5½

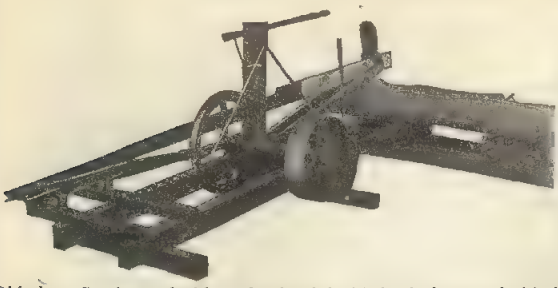
Each **$29.10** 5 or more, Each **$27.60**

Above quantity prices apply on all orders for 5 bicycles—one model or assrtd. models.

"Champion" Friction Feed Drag Saw



The friction is positive and effective. Will start, stop or reverse instantly by a very slight motion of the feed lever without any effort on the part of the operator. This enables the operator to feed logs ahead or back and stop at any point without running back or losing time.

Main frame is 26 inches wide and 8½ feet long, made of 3½x5½ seasoned hardwood. Track is 27 inches wide by 16 feet long, made of 2¼x4-inch timbers.

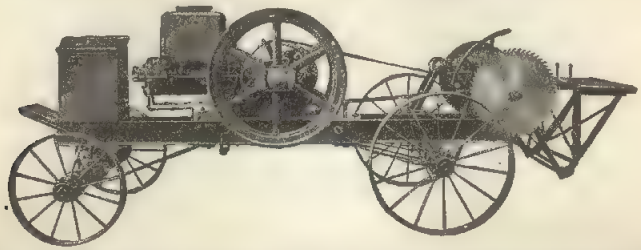
Balance wheel is counter-balanced, imparting a strong, steady motion and is arranged to change the stroke from 16 inches to 20 or 24 inches. Saw is raised with one hand and the friction feed operated with the other, thus changing and setting for a new cut without slowing down or stopping. Saw guide is provided.

Two to four horse power will operate this machine to good advantage. More power will give greater capacity. Capacity is 30 to 40 cords of wood per day. Speed recommended is 125 to 175 strokes per minute. Shipping weight complete is 1300 pounds.

Price complete with one saw and pulley or universal coupling **$170.00**
Price complete with one saw and tight and loose pulley **184.00**
Price complete with one saw and without power feed **155.00**

Channon Portable Wood Sawing Outfit

Horizontal Hopper Cooled Engine, Hit and Miss Type for Gasoline or Throttling Governor for Kerosene



The truck is of steel construction throughout and equipped with a substantially constructed steel tilting saw table. This rig has an additional I-beam extending from the center of the truck to the rear end, thus giving the sawing table a three-point bearing, making a very rigid support. This is an exclusive feature of these outfits and one to be carefully considered by the purchaser. This outfit is shipped completely assembled as illustrated above, including saw, belt, belt tightener, pole, neckyoke and doubletrees. The above illustration shows the hit and miss gasoline type of engine. The throttling governor type is identical with the exception of the engine proper. When ordering, use style numbers given in tables.

POST DRILLS

CHAMPION

Cast iron frame and feed table; machine cut gears; steel table post, shafts, axles, and chuck; adjustable table can be swung out of way; automatic self-feed.

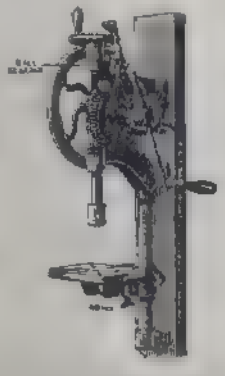
The cups and cones on Nos. 1900, 95 and 91 are both made from die steel and will save 20% to 50% in power, depending on size of hole being bored.

Ball-bearing; has two speeds with double journal bearings; the automatic quick return lever saves ⅓ the time, it can be thrown into place, where it remains until the bit is raised out of the work when it automatically stops, requiring no attention whatever, and is again ready to start the next hole; round table, diameter 7x8 inches; drill bolted to hardwood board 46x6 inches

Each

No. 96—Diam fly wheel 14 ins; drills holes up to 1¼ ins, and to center of 15½ in. circle; has 3 in. up-and-down run; never slip chuck takes ½ in. shank bits..... $63 00

One in crate; wt each 135 lbs.

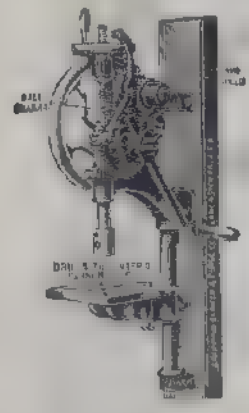


Ball-bearing; a very useful and valuable drill; capable of doing a great range of work; square table, size 7x8 inches; drill bolted to hardwood board 46x6 inches.

Each

No. 1900—Diam fly-wheel 14 ins; drills holes up to 1¼ ins, and to center of 16 in. circle; has 3½ in. up-and-down run; never slip chuck, takes ½ in. shank bits..... $48 00

One in crate; wt each 116 lbs.



Ball-bearing; a strictly first class drill, has full back gears with two speeds of the crank, and crank has forward motion on both the first and second speeds—no need of reversing crank; square table, size 7x8 in.; drill bolted to hardwood board, 46x6 inches.

Each

No. 95—Diam fly-wheel 14 ins; drills holes up to 1¼ ins, and to center of 15 in. circle; has 3 in. up-and-down run, never slip chuck takes ½ in. shank bits..... $47 25

One in crate; wt each 110 lbs.

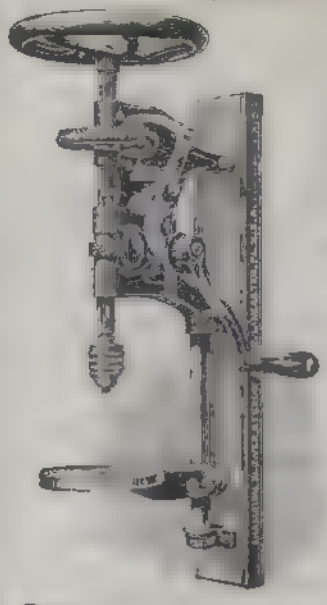
Ball-bearing; this is a strong, stout proportional drill for a drill of this size; it has full back gears and built in same careful manner as our better grades; square table, size 7x8 in.; drill bolted to hardwood board 46x6 inches.

Each

No. 91—Diam fly-wheel 14 ins; drills holes up to 1 in., and to center of 14½ in. circle; has 3 in. up-and-down run; spindle 1⅛ ins in diam; never slip chuck takes ½ in. shank bits $35 25

One in crate; wt each 92 lbs.

POST DRILLS



CHAMPION

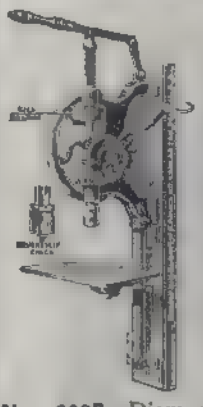
Worm Gear.

Runs absolutely noiseless; equipped with automatic self-feed, which feeds practically continuous, cutting at a variety of speeds. Finished in black enamel.

Each

No. 300—Travel of spindle 2⅝ in capacity; from smallest to ½ in; height over all 32 ins; drills to center of 12 in circle; greatest distance between chuck and table 7 ins; length of column 25 ins; diam column 1¼ ins; chuck has three jaws taking straight shank bit up to ½ in..... $42 00

One in crate; shipping wt 73 lbs



CHAMPION

Lever Feed.

Back geared drill designed for light and quick work in connection with drilling holes in batteries; it is furnished with a large table together with an extensive up and down run of spindle. Spindle has end thrust ball-bearings made of lathe turned tool steel. All bearings ground out of solid metal without use of babbitt.

The drill will bore holes from 0 to ¾ inch, and will drill to a 14 inch circle.

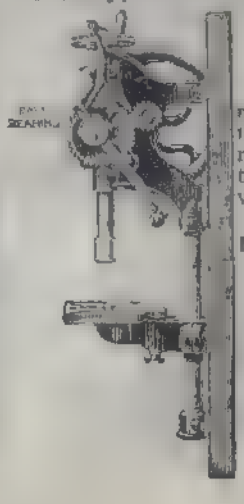
Each

No. 1008—Diam spindle 1 in; up and down run of spindle 3½ ins; greatest distance from table to spindle 24 ins; height of drill 52 ins; spindle bored to take ½ in. shank bits..... $39 75

Crated; shipping wt each 147 lbs.

CHAMPION

Cast iron frame and feed table, machine cut gears; steel table post, shafts, axles, and chuck; adjustable table can be swung out of way; automatic self-feed.



Ball-bearing; the gears in this drill revolve on studs in full back gear with two speeds to the crank; motion of handle must be reversed on second speed; square table size 7x8 in.; drill bolted to hardwood board 46x6 ins.

Each

No. 93½—Diam fly-wheel 14 ins; drills holes up to 1¼ ins, and to center of 15 in. circle; has 3 in. up-and-down run, spindle 1⅛ ins in diam; never slip chuck, takes ½ in. shank bits..... $40 50

One in crate, wt each 109 lbs

POST DRILLS

CHAMPION

Cast iron frame and feed table, machine cut gears; steel table post, shaft, axels and chuck; adjustable table can be swung out of way; automatic self-feed.

Ball-bearing; the bearings for the spindle are all ground from the solid metal; back gear with one speed. Round table, diameter 7¼ in.; drill bolted to hardwood board 40½x5½ ins.

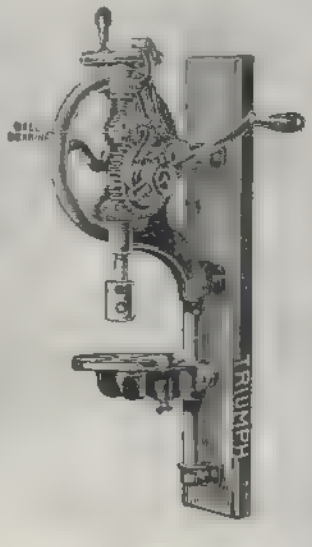
Each

No. 98—Diam fly-wheel 14 ins; drills holes up to 1 in, and to center of 14 in. circle; has 3 in. up-and-down run; spindle 1 in. in diam; never slip chuck, takes ½ in. shank bits.....$32 25

One in crate; wt each 90 lbs

TRIUMPH

Cast iron frame and feed table; steel table post, shaft, axle and chuck. Adjustable table can be swung out of way.



Automatic Self-Feed.

With back gears and with one speed for the crank. Lathe turned and slotted round table, diameter 6½ ins.; drill bolted to hardwood board 36x5¼ in.

No. 71—Diam fly-wheel 12 ins; drills holes up to ¾ in. and to center of a 12 in. circle; has 3 in. up-and-down run; spindle ⅞ in. in diam; chuck takes ½ in. shank bits.....$28 50 — Each

One in crate; wt each 77 lbs.

Single Gear, Hand Feed. For Hand and Power.

The spindle is made of steel; bearings all ground out of solid metal slotted round table, diameter 6½ in.; drill bolted to hardwood board 36x5¼ ins. Each

No. 71½—Drills holes 1/64 to ¾ in. and to center of a 12 in. circle; has a 3 in. up-and-down run; spindle ⅞ in. in diam; chuck takes ½ in. shank bits.....$21 00

One in crate; wt each 55 lbs.

POST DRILLS

With Iron Standard. For Hand and Power.

Automatic self feed, round table 13¼ in. in diameter; rigid iron standard.

No babbitt is used, the bearings all being ground out of solid metal. Table is raised and lowered by a rack which is quick in action and can be turned back out of the way. It is furnished with a wheel hanger for drilling painted wheels.

Power required to operate ½ H. P. gasoline engine or electric motor.

Each

No. 203½P—Diam fly-wheel 25 ins; 11 in. tight and loose pulleys with 2½ in. face; should be operated at 80 R. P. M.; drills holes up to 1½ ins and to center of 21 in. circle; has up-and-down run of 5½ ins; spindle bored to take 9/64 in. shank bits diam spindle 1¼ ins; height over all 72 ins.....✣$291 00

Crated; wt each 625 lbs.

CHAMPION BACK-GEARED

With Iron Standard and Base.

Drills with perfect accuracy holes up to 1½ ins. All gears are machine cut. The bearings are large and powerful. The change from plain to back geared drill is done in an instant by simply sliding the gears. Has eight speeds with three distinct and complete feeds—Power, Wheel and Lever-Feed.

Power required to operate 1 H. P. gasoline engine or electric motor.

Speed 300 R. P. M.; hole in spindle bored to fit Morse Taper No. 4.

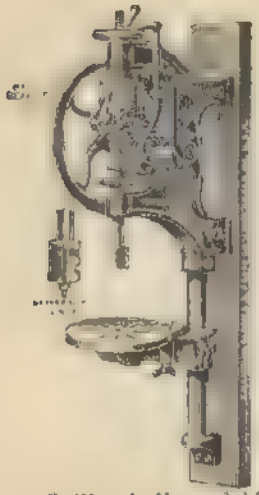
POST DRILLS

CHAMPION



Ball Bearing, Combination Automatic Self-Feed and Double Compound Lever Feed

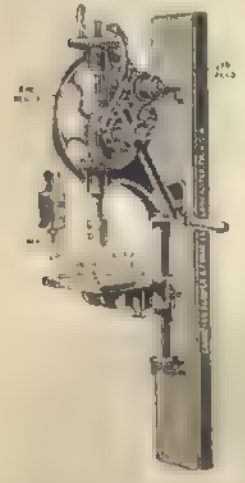
The double compound lever feed produces 80% more pressure at point of drill than any other power or hand drill. The automatic self feed and double compound link and rack lever feed are both independent of each other and are changed from one to the other in the fraction of a second. With either feed, the drill spindle has instantaneous return of the drill bit out of the hole drilled and again instantaneous return on the material for the next hole.

Drill spindle and bit are positively always raised up or down while using either feed, by the use of the quick acting lever. Has two speeds with three gears, in order to give the second speed same turning directions of the crank as the first speed. All end friction is taken from the drill spindle by the use of ball bearings. The lever makes it especially convenient for wood boring. Drills to the center of a 10 inch circle. Has spindle 1¼ inches in diameter has an up-and-down run of 4 inches. Greatest distance from table to spindle, 11 inches. Height of drill, 51 inches. Drills holes up to 1¼ inches

Spindle bored like Never Slip Chuck to take in ½ inch straight shank drill bits. If specially ordered will be bored for ⅝ inch or ¾ inch.

No. 200—With crank for hand power only; weight 200 pounds ..... Each **$65.00**

★**No. 200P**—With tight and loose pulleys, 6x2 inches; speed 250 R. P. M., weight 205 pounds..... Each **$75 00**



Ball Bearing, Self-Feed, Three-Geared.

Has three gears to give second speed same turning direction of the crank as the first speed

It has two speeds that turn the same direction

All bearings are ground out of the solid metal

No babbitt used on this drill.

The end thrust ball bearings save 20 to 50 per cent. in power and are made from the highest grade of lathe-turned tool steel.

Has automatic self-feed

It has lathe-turned and slotted table.

Champion drills are all machine jigged, therefore all parts are absolutely standard and interchangeable.

Spindle bored like Champion "Patented" Never Slip Chuck to take in ½ inch straight shank drill bits. If especially ordered to take in ⅝ or ¾ inch

Drills to the center of a 15 inch circle.

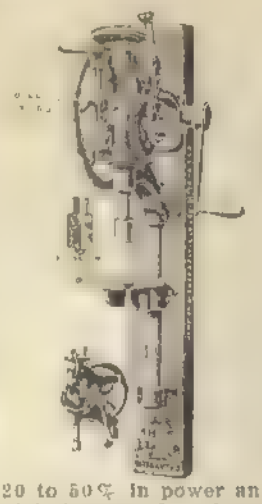
Drills from 0 to 1¼ inch hole

Spindle 1¼ inches in diameter; has up-and-down run of 3 inches.

Greatest distance from table to spindle, 10 inches Height of drill, 46 inches.

No. 95—With crank for hand power only; weight 120 pounds ..... Each **$35.00**

★**No. 95P**—With tight and loose pulleys, 6x2 inches, speed 250 R. P. M., weight 125 pounds..... Each **$40 00**



Ball Bearing, Automatic Quick-Return and Self-Feed

Has three back gears with double journal bearings to each gear, in order to give second speed same turning direction of the crank as the first

It has two speeds

Spindle has end thrust ball bearings

All bearings are ground out of the solid metal

No babbitt used on this drill.

The quick-return lever is thrown into place while the drill continues in motion, where it remains until the bit is raised out of the work and automatically stops, requiring no attention from the operator and is again ready for the next hole.

The end thrust ball bearings save 20 to 50% in power and are made from the highest grade of lathe-turned tool steel.

Has automatic self-feed.

It has lathe-turned and slotted table

Champion drills are all machine-jigged; therefore all parts are absolutely standard and interchangeable.

Drills to the center of a 15½ inch circle.

Drills holes from 0 to 1¼ inch.

Spindle 1¼ inches in diameter; has up-and-down run of 3 inches

Greatest distance from table to spindle, 9¾ inches. Heigth of drill, 46 inches

Spindle bored like Champion "Patented" Never Slip Chuck to take in ½ inch straight shank drill bits. If especially ordered to take in ⅝ inch or ¾ inch

No. 96—With crank for hand power only; weight 135 pounds ..... Each **$50 00**

★**No. 96P**—With tight and loose pulleys, 6x2 inches; speed 250 R. P. M., weight 140 pounds..... Each **$60 00**

Ball Bearing, Self-Feed

This drill does not have double journal bearings, or bearings on each side of the gears

It has two speeds

Spindle has end thrust ball bearings.

All bearings are ground out of the solid metal

No babbitt used on this drill.

The end thrust ball bearings save 20 to 50 per cent. in power and are made from the highest grade of lathe-turned tool steel.

Has automatic self-feed

It has lathe-turned and slotted table.

Champion drills are all machine jigged; therefore all parts are absolutely standard and interchangeable

Spindle bored like Champion "Patented" Never Slip Chuck to take in ½ inch straight shank drill bits. If especially ordered to take in ⅝ inch or ¾ inch

Drills to the center of a 15 inch circle.

Drills from 0 to 1¼ inch hole.

Spindle 1¼ inches in diameter; has up-and-down run of 3 inches

Greatest distance from table to spindle, 10 inches. Height of drill, 46 inches

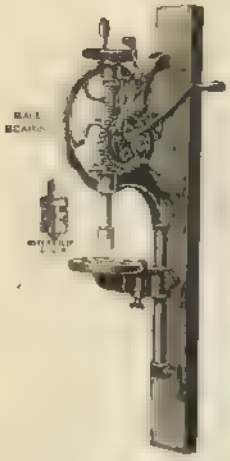
No. 93½—With crank for hand power only; weight 115 pounds ..... Each **$30 00**

★**No. 93½P**—With tight and loose pulleys, 6x2 inches; speed 250 R. P. M.; weight 120 lbs. Each **$38 00**

★Not carried in stock; for factory shipment only.

POST DRILLS

CHAMPION



Ball Bearing, Self-Feed

A first-class tool for light work. Spindle has end thrust ball bearings, all bearings are ground out of the solid metal; no babbit used on this drill

The end thrust ball bearings save 20 to 50 per cent in power and are made from the highest grade of lathe turned tool steel; has automatic self-feed; it has lathe-turned slotted table

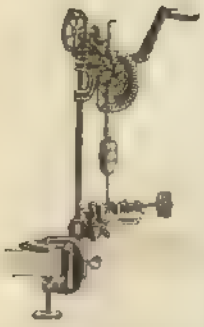
Champion drills are all machine jigged, therefore all parts are absolutely standard and interchangeable. Spindle bored like "Never-Slip" chuck to take ½ inch straight shank drills; if especially ordered can be had to take ⅝ or ¾ inch

Drills to the center of 12 inch circle. Drills from 0 to ¾ inch hole. Spindle ⅞ inch diameter; has up-and-down run of 3 inches; greatest distance from table to spindle 8¾ inches; height of drill 35 inches.

No. 101—With crank for hand power only; weight 80 pounds ..... Each **$20 00**

BENCH DRILLS

MILLERS FALLS



Wheel Feed

Easy to attach, can be swiveled into many positions and clamped at varying heights either above or below the bench

The vice is swung on a pin off center, and can be used in any position or at any angle with the frame, vertical to horizontal, or completely reversed and the table turned uppermost

Feed governed by hand wheel at top; rapid action; steel feed gears and post; two speeds, ratios even and 3 to 1. Three jaw chuck with protected springs; extensible crank handle, radius from 5 to 6½ inches; ball thrust bearing; cut gears; steel pinion; chuck, spindle and crank nickeled, post and machined parts polished, balance japanned.

No. 21—Capacity 0 to ½ inch round shanks; height of standard 24 inches; net weight 21 lbs...Each **$25 00**

One in a wood box; shipping weight 30 pounds.

Lever Feed

Drill can be fed as rapidly or as slowly as desired by means of sensitive compound lever. Well made and makes a convenient and effective tool

Cast iron frame, black japanned polished steel standard and lever nickel plated chuck, drill spindle and crank

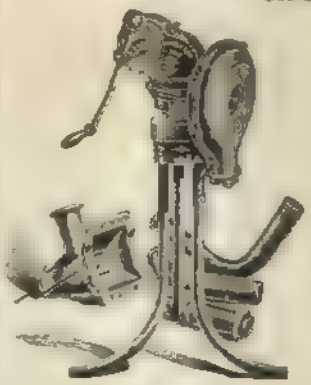
Three jaw chuck with improved protected springs.

No. 23—Capacity 0 to ⅜ inch round shank drills; height of standard above bench 15½ inches; weight 9 pounds .....Each **$10 00**

One in a box.

BLACKSMITHS BLOWERS

CHAMPION



High Speed Spiral Gearing, Adjustable Ball Bearings

Crank turns either way to make a blast. Each turn of the crank produces 46 complete revolutions of the blast wheel

Note — Made for either right or left hand fires. Right hand blowers always furnished unless otherwise specified

Phosphor bronze spiral gear and tool steel spiral shaft with gear and spiral shaft meshing in 8 full teeth continuously, makes noise and lost motion impossible. Furnished complete with Whirlwind blast, anti-clinker, heavy nest tuyere iron and piping. This tuyere in combination with high speed of the blower, produces a circular, rotary white heat blast which heats iron at least one-third quicker and with an equal saving in coal, as no heat is wasted by being blown up the chimney

No. 400—Diameter of fan 12 inches weight each 160 pounds ..... Each **$55 00**

CHAMPION LANCASTER

Geared

Direct driven; supplied with Champion patent adjustable nozzle tuyere iron and pipe complete. Extra large gears, accurately cut, running in an oil bath. High speed spindle equipped with a case hardened end-thrust ball bearing. It is smooth running; crank turns in either direction to make the blast. Improvements consist of increased size gear case, allowing larger gears and bearings, also fan case is constructed heavier and stronger

No. 40—Cast iron pedestal; diameter of fan 12 inches weight each 120 pounds.....Each **$35 00**

BLACKSMITHS FORGES

CHAMPION

With Half Hood

Heavy steel plate hearth 6 inches deep. If so desired can be bricked up to suit the wants of any blacksmith. Furnished with No. 400 blower and No. 400 tuyere iron. The benefit received from the condensation of heat to center of fire from the rotary whirlwind blast with no waste of heat going up the chimney will save enough in cost of coal to soon pay for forge.

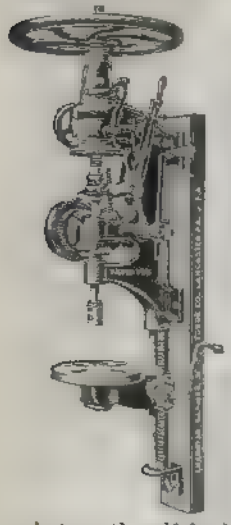
Crank turns either way to make blast. Each turn of crank produces 46 complete revolutions of blast wheel Angle steel legs and braces

No. 408—Hearth 30x36 inches, height 30 inches, diameter of fan 12 inches; weight 310 pounds...Each **$100.00**

POST DRILLS

CHAMPION

Ball-bearing, cast iron frame and feed table, machine cut gears and ball bearings; steel table post, shafts, axle and chuck. For hand or power—high or low speed; light or heavy work—changed in an instant.



The double compound lever-feed on Nos. 202 and 203 produces 80% more pressure, drills holes 80% larger and saves 200% in time and labor in drilling holes, reaming, counter-sinking, etc., makes a first class wood boring machine.

Automatic self-feed, round table, diameter 13¼ in. Drill bolted to hardwood board 62x7½ in.

Each

No. 202—Diam fly-wheel 25 ins; drills holes up to 1½ ins and to center of 22 in. circle; feed screw has 6 in up-and-down run; spindle 1¼ in. diam, never slip chuck, takes ⅜ or 41/64 in. shank bits; complete with tight and loose pulleys..... $258 00

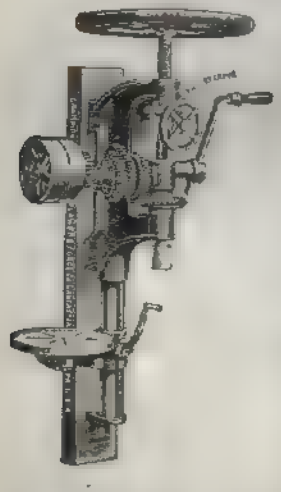
One in crate; wt 475 lbs.

Automatic self-feed; square table, size 11¾ in.; drill bolted to hardwood board 62x6 inches.

Each

No. 203 Diam fly-wheel 25 ins; 11 in. tight and loose pulleys with 2½ in. face; should be operated at 80 R. P. M.; drills holes up to 1½ in. and to center of 21 in. circle; has up-and-down run of 5½ ins; never slip chuck takes 41/64 in. shank bits, complete with tight and loose pulleys. When used with power use 1 H. P. gasoline engine or electric motor..... $198 00

One in crate; wt 125 lbs.



The automatic self-feed is complete and practical; meets many demands for quick work for machine shops, carriage builders, railroad shops, etc.; has also a quick acting adjustable table and can be swung entirely out of way; furnished with wheel hanger for drilling tires; automatic self-feed; round table, diameter 13¼ inches; drill bolted to hardwood board 62 x7 in.; drills holes up to 1½ in., and to center of 22 in. circle; has up-and-down run of 6¼ ins; never slip chuck takes 41/64 in. shank bits; diameter fly-wheel 25 inches. Tight and loose pulleys, 11 inches in diameter, with 2½ inch face; should be operated at 80 R. P. M. Nos. 25P and 25CP when used with power use 1 H. P. gasoline engine or electric motor.

Each

No. 25—For hand only, without pulleys; wt each 400 lbs..... $195 00

No. 25P—For hand or power, with tight and loose pulleys; wt each 425 lbs..... 207 00

No. 25CP—With cone pulley and countershaft; wt each about 500 lbs..... ♦247 50

One in crate.

♦F. O. B. Pennsylvania Factory Only.

POST DRILLS

CHAMPION

Cast iron frame and feed table; machine cut gears and bearings; steel table post, shaft, axles and chuck; adjustable table can be swung out of way; automatic self-feed; crank has forward motion on both the first and second speeds—no need of reversing crank.

Ball-bearing. The propeller wheel hand-feed and self-feed are independent of each other and for quick work the hand feed is unsurpassed and acts as the quick return for the drill bit. Quick-acting; end thrust ball bearings; lath-turned and slotted table; all bearings are ground out of solid metal, no babbitt used. Square table 8x9 in.; drill bolted to hardwood board 46x6½ ins.

Each

No. 97 Diam fly-wheel 15 ins; drills holes up to 1¼ ins; and to center of 16½ in circle; has 5½ in up-and-down run spindle 1⅝ ins in diam, never slip chuck takes ½ in. shank bits..... $69 00

No. 97P—Same as No. 97 except furnished with tight and loose pulleys, 6 ins in diam and 2 in. face for power; speed 250 R. P. M.; power required to operate ½ H. P. gasoline engine or electric motor .. 79 50

One in crate; wt each 180 lbs.

Ball-bearing; the greatest advantage of this drill is the instantaneous raising of the drill bit out of the hole bored and replacing the bit for boring the next hole; saves 95% time and labor; the adjustable lever-feed saves 50% time in drilling small holes, reaming, countersinking, etc., and makes this drill a first class wood boring machine for blacksmith shops; round table diameter 12 in.; drill bolted to hardwood board 46x6½ ins.

Each

No. 200—Diam fly-wheel 15 ins; drills holes up to 1¼ ins, and to center of 16 in. circle; has 4 in. up-and-down run; spindle 1¼ ins in diam; never slip chuck takes ½ in. shank bits $94 50

One in crate; wt each 180 lbs.

Ball-bearing; designed for large and heavy work; has two speeds with double journal bearings; entire drill swings to side when wanted with 18 inch sweep; square table size 8x9 in., drill bolted to hardwood board 51½ x 7½ ins.

Each

No. 4—Triple gear; diam fly-wheel 15 ins; drills holes up to 1¼ ins, and to center of 18 in. circle; has 5 in. up-and down run; spindle 1¼ ins in diam; never slip chuck takes ½ in. shank bits.... $66 00

One in crate; wt each 200 lbs.

BENCH DRILLS

YANKEE

Cast iron frame, dead black finish; steel cauck, nickel plated and polished; machine cut gears and bearings; steel table post, feed screw and axle; automatic and friction feeds; adjustable table. A bracket at top of frame with right and left arms, disengages the ratchet feed at extreme up and down movements of spindle, so that parts cannot be jammed. At lower end of column is slide to carry an adjustable bracket for table. This table can be adjusted vertically by hand wheel and screw, independently of bracket. Furnished with wrench for nut holding table bracket.

Single Speed.

Each

No. 1003—For round shank drills up to ½ in. in diam; diam of shank 1 in; diam of table 4¾ ins; adjustment of table 1¼ ins; diam of hand wheel 8 ins; height over all 18¾ ins $34 50

One in wood box; wt each 10½ lbs.

Double Speed.

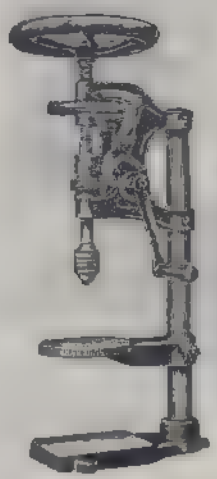
Each

No. 1005—For round shank drills up to ½ in. in diam; diam of shank 1⁹/₁₆ ins; diam of table 6¾ ins; adjustment of table 1¾ ins; diam of hand wheel 4½ ins; height over all 28 ins $57 00

One in wood box; wt each 29 lbs.

BENCH DRILLS

CHAMPION



Equipped with automatic and feed which feeds tool by convenient cutting at a variety of speeds which can be adjusted according to work.

The worm gear is absolutely noiseless. The spindle is equipped with end thrust ball bearing with hardened steel races, making a frictionless durable bearing. The fly-wheel makes two revolutions to each turn of the crank, developing momentum which carries the drill bit through the work without exerting the energy required in operating a drill which is furnished without a fly-wheel.

Each

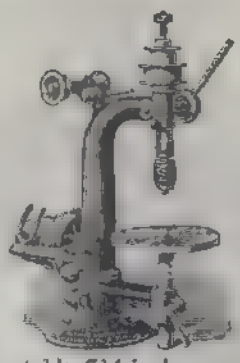
No. 301 Travel of spindle 2¾ ins; capacity from smallest to ½ in; chuck has three jaws taking straight shank bits up to ½ in; height over all 32 ins; drills to center of 12 in. circle; greatest distance between chuck and base 19 ins; length of column 25 ins; diam of column 1½ ins. . . . . ✦$60 00

One in crate; shipping wt each 75 lbs.

✦F. O. B. Pennsylvania Factory Only.

POWER BENCH DRILLS

CHAMPION



Especially adapted for light, accurate and rapid drilling, in garages, pattern and machine shops

Driven exclusively by belt and with the aid of cone pulleys two separate and distinct speeds can be furnished.

The countershaft is furnished with a belt shifter on the tight and loose pulley and the feed lever can be returned without effecting the position of the bit by a patented automatic device in the feed lever hub.

Double flange top cone; table swings 180 degrees horizontally; end thrust ball-bearing; adjustable spindle stop; greatest distance from spindle to table 7½ inches; up and down movement of the spindle 2½ inches; up and down of the table 7 inches.

Each

No. 50—Diam of table 8 ins; drills to center of 10 in. circle; drilling capacity ¾ in; in steel, fitted with champion 3 jaw chuck taking straight shank bits up to ¾ inch; size of tight and loose pulleys 4x1½ ins; speed of driving pulley 650 R P M; extreme height 27½ ins. $73 50

One in crate; shipping wt each 65 lbs.

CHAMPION

Made of ball-bearings, fitted with three step-cone pulleys giving three spindle speeds. Top of drill base is planed off to use as a table when regular drill table is turned to one side giving a space of 18 ins; between the chuck and base table; upper cone pulley is between two bearings equalizing the strain and making drill more powerful. Counter shaft is supplied with a belt shift on the tight and loose pulley. Feed lever manipulated with a spring arrangement to automatically keep the lever and bit up and out of the work. The drill will bore all size holes up to 5/16 in and will drill to a 10 in circle adapted for garages, pattern makers and machine shops Where light, accurate and rapid drilling is done.

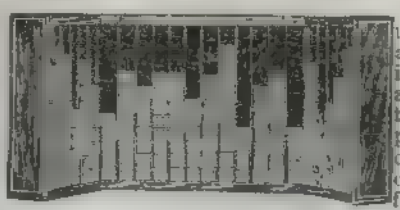
SPARK PLUG MERCHANDISER

CHAMPION ASSORTMENTS



(Rear View)

This case with the car index chart attached enables any clerk to select instantly the proper size and type of spark plug that is requested for any passenger car, commercial car, tractor, motorcycle, motorboat, and farm and stationary engines. Adapted for use on counter, show case or shelf; and it occupies but little space compared to the complete assortment that it carries. Finely finished and is an ornament to any store or counter; made of metal and each compartment will hold an original package of spark plugs. Size 29x14½x9¼ inches.

A-1BC—This merchandise case will be given free with orders for 100 champion plugs and 50 insulators at the 100 lot price.

Stock Shipment—Cabinet will be shipped only when order is accompanied by factory requisition form properly signed by dealers on which he agrees to post metal signs and other advertising matter in a conspicuous place. No dealer will be furnished more than one case for one store. A separate case may be had for each branch. Salesmen sending in order for cabinet when dealer has one will be charged $9 00 net for cabinet. Under no circumstances will a dealer be given more than one cabinet in one store.

✣F. O. B. Ohio Factory Only.

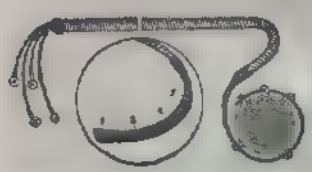
TIMER WIRING ASSEMBLIES

POPULAR, For Ford Cars.



Assembly made of flexible oil and waterproof metal hose, encasing the four new coil insulated wires; 250 volt Underwriters laboratories inspected, having the usual spark coil terminals at one end. At the timer end the cords are enclosed in a fabric, the wires being permanently connected to eyelet terminals spaced to fit the Timer Terminal Studs. The fabric is treated and sealed by a special chemical process making it impervious to the action of oil, water or dirt, yet leaving it flexible. **Guaranteed for five years.**

With Separate Lighting Wire.

Channon Feed Bags

We are the largest manufacturers of feed bags in the country, and show herewith the styles we have found from our long experience to be the strongest and most satisfactory bags for all around use. These are the popular bags with the dealers because most easily saleable.

No. 1

A first-class cheap bag. Made of heavy 12-oz duck wired onto a carefully selected hardwood bottom. Rope head strap. Price per dozen.....$7.00

No. 2

Our most popular seller. Heavy 12-oz. duck top. Large leather bottom and ventilator. Four-foot head strap. Price per dozen.....$14.70

No. 5

Harness leather throughout. The strongest feed bag made. Special No. 8 duck top. Extra large leather bottom and half leather body as shown in cut. Four-foot leather head-strap. Heavily sewed and riveted. For those who want the best. Price per dozen.....$31.95

No. 6

Heavy No. 6 duck top, 16 in. deep and 18 in. across opening when laid out flat. 4½-foot head-strap made of 1-in. leather. Oval bottom 8x10 inches. Made of best leather. Large leather ventilator. Price per dozen.....$26.70

No. 7

While this bag is similar to our No. 2 style, it is better and stronger in every way. The top, which is cut larger to make it suitable for large horses, is made of genuine 12-oz double-filling duck. Leather bottom, ventilator and 4-foot head-strap. The most serviceable all-around feed bag on the market today. Price per dozen.....$15.30

Coal Bag, Style 18

Coal bag style, 18 inches wide by 17 inches deep. Made of 12-oz. double-filling duck, with double bottom, adjustable canvas head-strap, heavily sewed and riveted throughout. A light bag, strong and durable. Price per dozen.....$28.00

No. 8

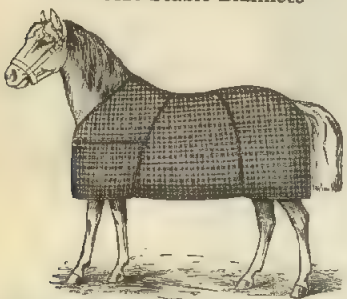
Harness leather throughout. Special quarter leather body, adding greatly to the strength and durability of the top, which is made of No. 8 duck. This 4-inch strip of leather, heavily sewed onto the canvas top and riveted to the leather bottom reinforces the bag where it is necessary and prolongs the life of the bag 100 per cent. Large leather ventilator and head-strap. Price per dozen.....$25.40

Channon Horse Blankets

Nos. D112 and D113 Horse Blankets

No. D112—Plain Fawn Color, fine all wool blankets with fancy border of scarlet stripes. Fast colors.
Size 84"x90" Weight about 8 lbs. Price each $15.00
Size 90"x96" Weight about 10 lbs. Price each .. 18.75
No. D113—Same as above, except made of long staple cotton
Size 84"x90" Weight about 7 lbs. Price each .$6.25
Size 90"x96" Weight about 9 lbs. Price each 7.75

No. D1120 Stable Blankets



D1120—"Brigadier" stable blanket. 10-oz. satin finish burlap, with full sized good lining. Edges turned up and hemmed all around. Fitted with two 1¼-inch web surcingles and straps. Reinforced on top of neck and breast.

		Price Each

No. 20. Special carpenters' aprons, made of 10-oz. brown duck, with two large pockets extending across entire bottom and two small individual pockets near top. Corners of all pockets are reinforced with leather.
Price per dozen $8.00

Carpenter Mechanic

Features that sell the new Chevrolet

UTILITY — is one of the important reasons for the great volume of Chevrolet sales.

The car supplies an unusual degree of usefulness because of its ease in handling, quick acceleration, fine appearance, durability and economy. It sells to an unusually large market because its low cost puts it within reach of any one who can afford to own a car.

This wide range of utility appeals especially to business men, farmers, salesmen, doctors, women—and those desiring a second car.

Barometers, Stage Money and Resurrection Plants

MARINER TYPE BAROMETER

Accurately constructed Combination Barometer and Thermometer. The Barometer shows with two needles. One is controlled by the condition of the atmosphere and foretells changes of weather nearly 24 hours ahead. The other needle may be moved by turning thumb screw and should be set daily with the atmospheric needle. Changes may then easily read as one needle remains stationary while the other moves. A house thermometer registering up to 120° is also attached. The barometer is made of wood, hand carved by foreign artists.

No. 2N364. Per dozen 6.00

MINIATURE SWISS CHALET WEATHER HOUSES

House made of wood with openings through which a man and a woman move backward and forward to indicate the weather. This action is the result of humidity upon a catgut cord support and acts will amazing accuracy. When the man comes out watch out for bad weather. The woman comes out to prophesy nice weather. Height over all 8 inches. Each in box. 200 in case.

No. 2N363.
Per dozen 3.50

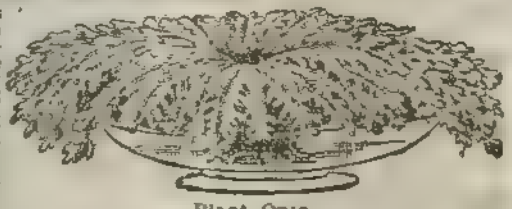
Per 1,000 (in lots of 10,000) 2.25

Resurrection Plants. Biblical Rose of Jericho

Plant Closed



Plant Open

The Sacred Resurrection Plant (Siempre Viva). Botanically known as Anasta-Tico. Latin name. Selaginella Lepiodiphylla. These rare and curious plants grow and stay green by placing them into water; will also grow in light drained soil. When taken out of water they dry and curl up and go to sleep. They will keep in this state for years and reawaken directly upon being put into water. It's an interesting and pretty house plant, grows in winter if not allowed to freeze. To grow it, simply place the mummified plant in water; it will open up and start to grow in about twenty minutes; after that simply keep the roots in water; change the water once in about four or five days to keep from becoming rancid. 100 in package.

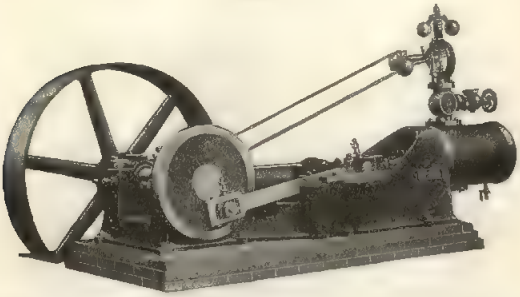
		115	354	**425**					
		130	**400**	480					

Engine complete includes: Bare Engine with Continuous Oiling Devices consisting of Brass Pipes, Wipers and Troughs, with large size Sight Feed Stop Feed—Oil Cups and Cylinder Cocks Throttle Valve, Governor and Belt, Two Double Connection Automatic Sight Feed Cylinder Lubricators, one for each cylinder, and two Spanner Wrenches, Band Flywheel, Receiver Pipe between cylinders, Foundation Bolts and Washers

These engines are designed for high steam pressure, and to operate non-condensing. Under these conditions, they are more economical than single cylinder Corliss engines of equal capacity. On request we shall be glad to go into the question of economy more at length. The higher the pressure, the larger the engine, and the heavier the load the better the economy. The superiority in economy over a Corliss engine, becomes large at over-loads. The maximum over-load capacity is about twenty-five per cent. in excess of the rated horsepowers.

Class "A" Heavy Duty Engine

No. 1325

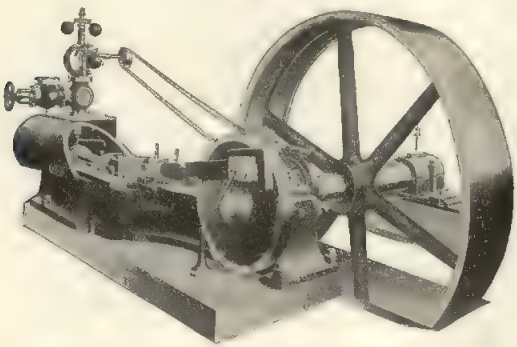


Side Crank. Self-Contained. Built Right-Hand or Left-Hand. Cut represents Right-Hand.

This engine has all the advantages of the side crank type, and is self-contained. The quarter boxes in the main bearings are adjustable. Removable heads at both ends of cylinder, with ground joints instead of gaskets.

Class "C" Heavy Duty Engine

No. 1326



Side-Crank, with Detached Outboard Bearing. Built Right-Hand or Left-Hand. Cut Shows Left-Hand.

This engine is simple in design; all parts are accessible; wherever wear can occur ample means for adjustment are provided. The construction is the same as the installation illustrated above.

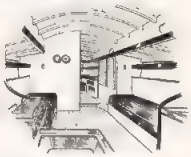
**Price subject to change without notice.*

BOUNTY, your dream boat, is now in the water, sailing. Others are under construction. Still others are ordered, awaiting their turn at the builder's yard. You can have your boat for the coming sailing season *if you enter your order now*

A fast single hander with reliable auxiliary power, BOUNTY is built primarily to satisfy the cruising requirements of most sailormen. Yet her lines and construction, and her practical, comfortable accommodations all compare favorably with auxiliaries of much higher price. Only the volume building of BOUNTYs and the fact that you deal directly with the company in back of this boat, make this low price possible. BOUNTY is built *and* sold by the same organization. Her sponsors are ready and able to guarantee her honest workmanship and the quality of her materials.

BRIEF DETAILS

Mahogany planking. 1⅝" square white oak frames on 9" centers. White oak keel and timbers. Exterior trim mahogany. Hollow spars, permanent backstay. Electric lights and full cruising equipment.



View from the main cabin looking into the forward stateroom on the Bounty.

BOUNTY is built closer to New York than any other stock auxiliary of her size. You can see BOUNTY in various construction stages, the guaranteed quality of her workmanship and materials. Write for brochure and line drawings of this splendid yacht which anyone would be proud to own—which practically everyone can afford to buy.

Fairmorse Fire Extinguisher

A 2-gallon extinguisher approved by the Underwriters Laboratories.

In operation the gas formed mingles with the water contained in the extinguisher and is thrown with great force on the fire where it expands forming a heavy blanket which effectually smothers the fire.

The gas given off is odorless and harmless.

One of these extinguishers is as effective as a 100-gallon stream of water.

Directions for operations are in both French and English.

No. 2285 Fairmorse Extinguisher, **each** **$15.00**

No. 2286—Refill for Fairmorse Extinguisher **each** ..... **.75**

Pyrene Fire Extinguisher

Pyrene Recharge One Quart Can

Pyrene Extinguisher with Bracket

The Pyrene Fire Extinguisher will throw a continuous jet of chemical 30 feet.

It is simple and easy to operate and will extinguish gasoline or oil fires almost instantly.

Pyrene is non-freezing at 50 degrees below zero, does not corrode or deteriorate, is a non-conductor of electricity and will not damage the finest fabric.

A Pyrene Extinguisher will reduce car insurance 15 per cent.

Use Pyrene liquid in Pyrene Extinguishers, other liquids may damage the mechanism.

BIG VALUES IN PILLOW TOPS

Embossed Leatherette Pillow Tops—Sateen Sides Rich, Assorted Colors

The 12-Inch Panels are made of a composition so nearly resembling leather that even the experts are fooled. These centers are heavily embossed with selected Art Subjects and then tinted in beautiful rich colors.

The complete Pillow Top is 18 inches in diameter when flat. The sides are made of a good grade of glossy Sateen in bright solid colors. The backs are a heavy patent leather black finish oil cloth with two patent snap fasteners for quick filling. We list below some of the subjects. Any you do not want will be left out on request, or if you prefer to order any one subject you can do so at the price quoted. There may be some delay, however, in filling such order as we do not always have all subjects in stock.

Some of the Subjects

Pearl Keys and Hand Engraving on Every Instrument

Read this Letter

I have played several makes of fine pearl keyed but I prefer your Leader to every one for tone, ease of blowing, and it is a beauty. I fully trust and believe it is the best ever to pass. You are right in saying it is the best instrument on the market for the price.

Henry Johnson
Columbus, Ind.

This is just one of the thousands of letters from pleased customers telling the satisfaction we with Ward C. cert. ur instruments.

Our Leader Concertone Cornet

$7.95

B-Flat Cornet—Long Model

To secure the finest Cornet that could be made, we had it made for us by one of the largest manufacturers in Europe and had this instrument made according to our specifications.

You will say it is a wonder at this low corner low price. It is perfect in every way and has a rich full and even tone. Made in bright brass, polished keys, silver plated Bell. It has seven pearl keys, large medium bore which makes it easy to fill with wind, ground valves and tuned and correct, and unfailing in action. Three buttons are provided for the left hand. Has detachable mouthpiece and leather carrying case. Height 10¾ inches. Diameter of bell 4½ inches. Included length 57¾ inches. Diameter 1 bell, 4½ inches.

One in cardboard box; wt per doz 1 ⅛ lbs

SOUTH BEND, TROUT-ORENO

Red cedar body, enameled with several coats of high grade water-proof enamel, treated to prevent cracking and swelling. Has a wobbling erratic motion; floats when not in motion and darts, dives and swims when reeled in. An irresistable game fish lure.

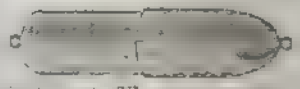
Length 1¾ ins.; one hollow point double hook.

	Per Ass't
No. 381—Consists of 12 minnows, assorted colors	$17 25

One ass't in cardboard box; wt per ass't 3 ½ lb.

HYDROPLUGS

STUBBY'S



Aluminum shell containing a cork large enough to make it float. When empty it weighs ⅝ ounce before making the first cast fill with water, when full weight 1 ½ ounces. This added weight enables the fisherman to make a long cast. Upon striking the water it resumes its weight of ⅝ ounce and the cork makes it float. With the cork removed it will sink and is ideal for bottom fishing. The light weight does not interfere with the natural movements of live bait. Can be made to answer almost every purpose by using larger or smaller corks.

	Per Doz
No. 1L Diam 1 in, length 4 ins	$19 50

One in carton; wt per doz about ¾ lb.

ARTIFICIAL BAIT

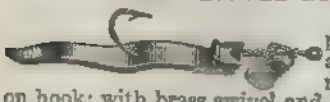
FOSS' SHIMMY WIGGLERS

Made of brass, heavily nickel plated. Designed to work successfully in any kind of water, deep or shallow, clear or thickly grown up with weeds. Practically weedless as it always rides hook up passing over weeds and obstruction, and will not twist the line. Each furnished with Foss' Bucktail streamer and one hook.

	Per Doz
No. 5SW—With No. 3-0 hook; wt each ⅝ oz	$25 20
No. 6SW—With No. 1-0 hook; wt each ½ oz	25 20

One in metal box.

FOSS' LITTLE EGYPT WIGGLERS



Made of brass, heavily nickel plated. A successful lure for all kinds of game fish; pork rind is clamped on, and impaled on hook; with brass swivel and nickel plated spinner.

	Per Doz
No. 1LEW—With No. 3-0 O'Shaughnessy hook; wt each ½ oz	$18 90

One in metal box.

FOSS' JAZZ WIGGLERS

Brass, heavily nickel plated; tip of spinner dyed red. An excellent lure for small or large mouth bass muskellonge, pike, pickeral, trout or any game fish. Has the lowest center of gravity of any weighted hook and positively cannot turn over.

Price does not include Pork Rind.

	Per Doz
No. 10—With No. 3-0 hook; wt each ¼ oz	$14 40
No. 9—With No. 5-0 hook; wt each ⅝ oz	14 40

One on a cardboard; 1 doz in cardboard box.

FOSS' SHIMMYETTE FLY ROD WIGGLERS

Made of brass, heavily nickel plated; spinner shaft made of music wire. Can be cast effectively with a five ounce rod, an excellent line for bass or trout.

	Per Doz
No. 7—With No. 3 Sprout hook; wt each 1/16 oz	$12 60
No. 8—With No. 6 Sprout hook; wt each 1/20 oz	12 60

One in metal box.

FOSS' ORIENTAL WIGGLERS

Made of a solid celluloid composition, practically indestructable. A good all around bait for those accustomed to casting a plug and using a line and rod that is too heavy to successfully handle the lighter and more deadly lures.

Regular Size.

	Per Doz
No. 30W—All white; with No. 3-0 hook; wt each ⅔ oz	$25 20
No. 30RW Red and white; with No. 3-0 hook; wt each ⅔ oz	25 20

Junior Size.

	Per Doz
No. 40W—All white with No. 2-0 hook; wt each ½ oz	$25 20
No. 40RW Red and white; with No. 2-0 hook; wt each ½ oz	25 20

One in metal box.

PREPARED BAIT

FOSS' PORK RIND STRIPS

These pig skins are run through a leather splitting machine, then chemically treated to remove the grease, punched and perforated for ready attachment, then bottled in brine which will preserve them for years.

	Per Doz
No. 1PRB—Fly rod size 2 ins long, ¼ in. wide; 18 strips in bottle	$11 70
No. 2PRB—Regular, bass size 3¾ ins long, ½ in. wide; 12 strips in bottle	11 70

One doz bottles in case; wt per doz 4½ lbs.

CREEK CHUB and HEDDON BAITS

Minnow Assortment. These are well formed and finished wooden minnows of regulation style, fitted with nickel plated spinner and 3 treble hooks one on each side and one in back. Polished nickel plated spinners and connections. 1 dozen assorted colors on display card. One card in box.

No. 18R41.
Per dozen..... 1.96

Creek Chub Wiggler, Wiggler, Wobbler, Splatter. Removable reversible wiggler supersedes the Spinner. For surface, near surface and deep. Does not revolve. Weight under 1 ounce. Body 3½ inches. Each in box. One dozen boxes in carton.

No. 18R53. Natural Creek Chub Scale Finish.
Per dozen..... 7.45

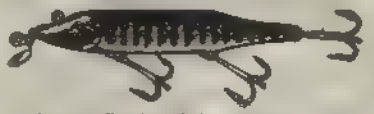
No. 18R54. Natural Perch, Scale Finish.
Per dozen..... 7.45

Baby Chub Wiggler. Has all the features of larger Wiggler, except does not run so deep. Weight ½ ounce. Length of body 2¾ inches. Each in box. One dozen boxes in carton.

No. 18R50. Natural Creek Chub, Scale finish.
Per dozen..... 7.45

No. 18R51. Natural Perch, Scale finish.
Per dozen..... 7.45

No. 18R52. White with red head.
Per dozen..... 7.45



Creek Chub Pikie Minnow is a new nature lure, so closely imitates the pike minnow in shape, color and movement that the combativeness of the bass is aroused and they strike to kill. Slim body is 4½ inches long, weight ¾ ounce, rust proof bronze hooks set in sockets. 3 treble hooks. Each in box. One dozen boxes in carton.

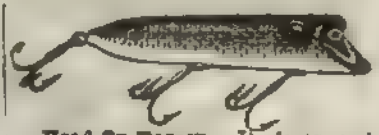
No. 18R48. Pikie Minnow.
Per dozen..... 7.84

No. 18R49. White with red head.
Per dozen..... 7.84

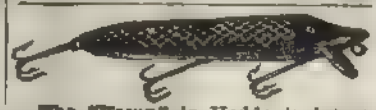
Baby Pikie Minnow. Thoroughbred from the famous Pikie Minnow. This neat little ⅛ ounce lure, 3¼ inches long, is in answer to the demand for a smaller bait than the now famous Pikie Minnow. It has a wicked wiggle, and all the good qualities of the large lure. A light, strong killer. Each in box. One dozen boxes in carton.

No. 18R47. Natural Pikie.
Per dozen..... 7.45

The Crawdad. Natural shaped body and tail, black eyes, rubber legs, bronze hooks, movement backwards, same as a crab. Wiggle mostly in tail. Floats until started. Only bait without nickel plate. Tail guards hooks from snags and bottom. Length of body 2¾ inches, weight ⅜ ounce. Casts like a bullet. Each in box. One dozen in carton.
No. 18R105. Natural Crab, Shell finish.
Per dozen..... 1.80



Head-On-Basser. It darts and swims in an irregular way. Very erratic in action but equally positive in results. Will run from one to three feet below the surface when retrieved. Floats when at rest. Has made wonderful records for bass, pickerel and muskellonge. Equipped with three treble hooks, non-rotating hook fasteners, eyes, and full Heddon finish. Weight ⅜ oz., length over all 4¼ inches. Each in box. One dozen boxes in carton.
No. 18R146. White body, red head and tail. Per dozen..... 6.66
No. 18R147. Shiner, Scale finish.
Per dozen..... 6.66



The "Vamp" is Heddon's latest bait. Flat-nosed to resemble a baby pike and enameled in natural fish colorings, it is a lure that few fish can resist. It floats well at rest and in action has a diving, wiggling and darting motion very like that of a live fish. Equipped with three gangs extra sharp treble hooks, it is a sure "GETTER." Those who have used it in hundreds of tests are enthusiastic over the results. It weighs ⅜ ounce, measures 4½ in. Each in box. One dozen in carton.
No. 18R148. White body, red eyes and tail. Per dozen..... 7.84
No. 18R149. New Pike Scale.
Per dozen..... 7.84

Heddon "Baby" Game Fisher Minnow, made in two sections. "Baby" is 3¾ in. long, weighs ⅛ oz., has two treble hooks, one at tail and one on the forward section. Each in box. One dozen in carton.
No. 18R143. Red head with white body. Per doz..... 9.80
No. 18R144 Shiner scale. Doz. 9.80
No. 18R145 Pike scale. Doz.. 9.80

New Heddon "Game-Fisher"

The "Game Fisher," floating while at rest, draws below the surface in a zig-zagging motion. Heddon sure-catch hook presentation and has the patented fastenings. While unlike other wooden baits the flexible body offers the hooked fish no purchase for shaking loose the barbs. This Lure is sturdily built to withstand the most savage attacks. Wonderful records made on Bass, Pike and Muskies. Length of body, 4¾ in. Weight ⅝ ounce. Each in box. One dozen in carton.
No. 18R152. Rainbow. Per dozen..... 9.80
No. 18R153. White, red head and tail. Per dozen..... 9.80
No. 18R154. Green Scale. Per dozen..... 9.80
No. 18R155. Shiner Scale. Per dozen..... 9.80

Now Hear Radio Music Better Than Ever Before

By the end of this year, we expect to see the beautiful new Crosley Musicone replace at least half a million of the best of present-day radio reproducing devices.

For the Crosley Musicone, designed and built on entirely new principles, covered by *basic patents* issued and pending, reproduces music and the speaking voice *true to life* - -

Without distortion, extraneous overtones, resonance vibrations or other horn noises;

Over the *entire* musical scale, from lowest to highest notes, on *any* instrument;

Without overloading; and without chattering, because its diaphragm is a floating cone;

Without adjustments or additional batteries;

Without directional properties or a horn;

And at a price that is revolutionary.

Ten thousand radio dealers are now displaying and demonstrating the beautiful Crosley Musicone.

Order Crosley Musicones from your jobber today. Here is one of the fastest profit-making radio devices on the market.

Crosley owns and operates station WLW, Cincinnati, the first remotely controlled super-power broadcasting station.

The Crosley Radio Corporation
6131 Sassafras Street, Cincinnati
Powel Crosley, Jr., President

Guarantee

Dealers are authorized to sell the Crosley Musicone on five days' trial in your home. Satisfaction guaranteed or money refunded upon return.

Crosley manufactures receiving sets which are licensed under Armstrong U. S. Patent No 1,113,149 and priced from $14.50 to $65, without accessories.

17.50

Add 10% west of Rocky Mountains.

The Crosley Musicone is artistically beautiful—an ornament in any home. Write for complete description.

Crosley
Super-Tridyn Special

The improved Super-Tridyn panel is assembled in a new, solid mahogany cabinet finished in duotone. This cabinet with its striking lines and simple detail decoration is of ample size to house all dry batteries required for dry cell tube operation **$60.00**

Performance
That Has No Peer in Any Field of Radio

Since the announcement of the present new Crosley models, Crosley sales have been leaping to sensational figures, literally taxing the production facilities of all Crosley plants.

This new leadership in sales is based on Crosley's new leadership in value; and this latter resolves itself into two simple propositions:

Crosley sets consistently deliver a performance that has no peer in any field of radio—and this matchless performance is offered at the lower prices that only the economies of tremendous production make possible!

On this page are shown four of the new Crosleys—the two famous Super Tridyns and the two Special De Luxe models. Not only do they offer an effective beauty and accurate workmanship, but they provide a performance that cannot be surpassed in the $23.50-$60 price range or many dollars above it!

Make your own comparison on the basis of selectivity, distance, clarity, and volume. Place the competing receivers side by side with lead-ins from the same antenna, and put them through their paces.

Forget the radical difference in price. Reach your conclusion solely on results. Then and only then will you understand why thousands upon thousands of radio buyers are singling these Crosleys out of the entire field—unwilling to pay more because a greater investment cannot provide greater enjoyment.

See the complete Crosley line at the nearest Crosley dealer's. Address Department 131 for his name and our illustrated catalogue.

THE CROSLEY RADIO CORPORATION
CINCINNATI, OHIO
Cable Address: Listenin-Cincinnati

Owning and operating WLW, first remote control super-power broadcasting station.

Crosley manufactures receiving sets which are licensed under Armstrong U. S. patent No. 1,113,-149 and priced from $9.75 to $60.00 without accessories. None of the prices quoted include batteries, tubes, headphones, etc. Add 10% to all prices west of the Rocky Mountains.

Crosley
Super-Tridyn Regular

Incorporating the famous Tridyn hook-up, this set brings in stations sharp, clear, and mellow on the Musicone. The cabinet is of oil rubbed solid mahogany, exquisitely simple in design and beautifully finished for sheer performance under all conditions the Super Tridyn cannot be surpassed **$45.00**

Crosley
3-Tube 52 S. D.

In this improved model are introduced radical refinements that increase its general efficiency. Refinement of parts and improvements in design have made it a truly remarkable value considering its nominal price. Genuine Armstrong regeneration with the double circuit to reduce radiation to a minimum. Beautifully proportioned with attractive sloping panel. Cabinet holds all necessary dry cells. A genuine long range radio, easy to tune, easy to enjoy, and easy to pay for..... **$32.50**

Crosley
2-Tube 51 S. D.

This superb long range set combines Armstrong regeneration and one stage of audio frequency amplification. The handsome mahogany finished cabinet, with sloping panel, holds all required dry batteries. Improvements include new worm type Hekler, new vernier plate condenser, and a new circuit to minimize radiation. Unusual selectivity and distance extremely easy of control. **$23.50**

We solicit inquiries from dealers interested in our sales and service station franchise.

The Harmony Musical Clock

A NEW DEPARTURE IN CLOCKS

The most beautiful and artistic design ever originated. It is not only an accurate timekeeper but also affords a great deal of pleasure as the musical part can be played as desired, independent of the clock which need not be disturbed. It is also an ornament and will add charm and grace to any room in the home.

A great deal of time, thought and study have been expended to make this a decidedly novel, useful, ornamental and desirable article. It is sure to become exceedingly popular.

Patent Applied For

Harmony Musical Clock, solid metal case, gold finish, height 11 inches, width 5 inches. This clock was originated and designed by us and is a strictly high-class article. The workmanship is unexcelled and it is the only clock of its kind on the market. The two figures of cherubs in the upper panel are well proportioned in bas relief. The ribbon streamer is attached to a lyre occupying the upper center of case. Directly under the cherubs are life-like bust figures of Wagner and Beethoven, the great composers; between these is a sheet of music showing cleff and notes. The oval border in center is neatly executed in a fancy scroll design. The lower half of case is an exquisite design of trees and mountains, producing a beautiful scenic effect. The figure playing harp is in bas relief and perfect proportion. The movement is guaranteed. A German made, 32-hour time, 2½ inch dial easily read from a considerable distance.

Below the movement is fitted a well constructed music box which play two different tunes. This is independent of clock and can be wound and played whenever desired, which is a very desirable feature. The clock is certain to appeal strongly to all lovers of music, which means almost everybody. It is suitable for use in parlor, den, or living room, and is so artistic that it will harmonize with any color scheme or style of furniture.

No. 60W72 Each..... 4.25

KEITH-SIMMONS CO., INC.
NASHVILLE, TENN.

WATER BAGS

DUNHAM

NOS. 122 TO 155

REGULAR STYLE—CLOSED TOP

Guaranteed to keep water fresh, cool and palatable.

Dunham Water Bags are made of superior quality of imported flax fabric especially woven for the purpose and have the peculiar property of holding water and yet exuding enough moisture to prevent the sun from having any effect on the water inside the bag. Cooling is a natural result of capillary attraction and evaporation.

SANITARY STYLE—OPEN TOP

Easy to put on, easy to take off, easy to clean.

The Dunham Open Top is the latest improved type of cleanable construction sanitary water bag and the only sanitary bag with opening full width of the bag to permit turning completely inside out for thorough cleaning and drying in the sun.

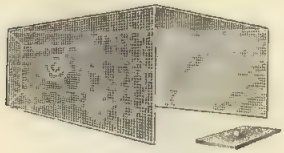
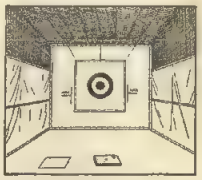
Indoor Golf Outfits



Outfits Nos. 1, 2 and 3



Outfit No. 3A

Indoor golf is the best substitute for the real game that has been found. You can use the same balls and clubs you use outdoors and by practice greatly improve your game. A realization of this fact has caused a rapid increase in the demand for these indoor outfits. Large numbers are now being used by Y. M. C. A.'s, Golf and Athletic Clubs, and by individual golfers, and many sporting goods houses are finding them to be an attractive and profitable line.

These outfits are made to withstand hard usage. Nos. 1, 2 and 3 consist of a back-stop, bullseye, netting top and side-walls, rubber mat and cocoa mat.

Prices

Outfit No. 1.	9 feet high, 12 feet wide, 20 feet long.	Price each	$100.00
Outfit No. 2.	12 feet high, 12 feet wide, 25 feet long.	Price each	150.00
Outfit No. 3.	12 feet high, 14 feet wide, 25 feet long.	Price each	175.00
Outfit No. 3A.	10 feet high, 12 feet wide, 23 feet long.	Price each	175.00

No. 3A is similar to Nos. 1, 2 and 3 except that it has canvas sides instead of netting, extending up 7 feet to insure privacy to the player.

Instructions for Erecting

First hang back canvas by ropes from the ceiling so that the outfit will stand about 2 feet away from walls. The net is then attached to the back canvas and its sides suspended from the ceiling at a height that will permit about one foot of the net to lie on the floor, to provide plenty of slack to prevent the ball from rebounding. The bulls eye should be suspended about one foot in front of the back-stop. The rubber mat should be nailed to the floor or to a board, while the cocoa mat is left loose so that its position may be changed to suit a right or left hand player.

Sizes other than above, to suit special requirements will be quoted on application.

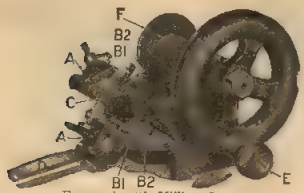
KEY CUTTING MACHINES

RUSSWIN



Equipped with Milling Cutter
For Cutting Pin Tumbler Keys
No. 50

Equipped with Cutting Saw
For Cutting all Keys except Pin Tumbler
No. 50

The Russwin Key Cutting Machine will cut duplicates of all makes of pin tumbler cylinder keys, all flat keys, double bit keys, and solid and hollow barrel or stem keys, by changing the cutter and gauge. It is the only machine made that will do this without complicated changes and adjustments, and possible loss of accuracy.

Equipped with two types of cutters, Milling Cutter (F) for cutting pin tumbler keys, and Cutting Saw (G) for cutting all other kinds of keys

The hinged vises (A, A) hold both original key and blank to be duplicated in rigid and correct position A shelf on the end of each vise supports the bow on the cylinder key. On each vise is a hinged stop, which serves both as a top shoulder stop (B1) and as a setting stop (B2). The top shoulder stop is indispensable when cutting cylinder keys as all cutting from the original cylinder keys should be started from the top shoulder. This stop (B1) insures accurate reproduction of the original key The setting stop (B2) gives the correct distance from the cutter to the guage (C) by resting the shoulder of one stop (B2) against the cutter, and the shoulder of the other stop (B2) against the gauge (C).

Two gauges (C, C), one for cylinder and one for other types of keys are furnished with the Russwin machine. They can be interchanged quickly, and easily placed in correct position. The exactness of each may be quickly proved by the setting stop (B2).

After the original key and blank to be cut are placed in position, raise lever (D) with left hand, turning handle (E) until cutter (F or G) engages and cuts into blank to be duplicated.

The Russwin machine may be operated by hand, or, if desired, driven by power.

Complete with saw and cutter.

"MAGIC" NON-ELECTRIC VACUUM CLEANER

Friction Drive

A new departure in a strictly high grade good looking serviceable vacuum cleaner. No electricity is needed to operate this friction cleaner. You have seen "friction toys" which run by themselves. This new invention operates on the same principle but is much more powerful.

DOES EVERYTHING electric cleaners will do

LIGHTER than electric cleaners, easy to operate and move about.

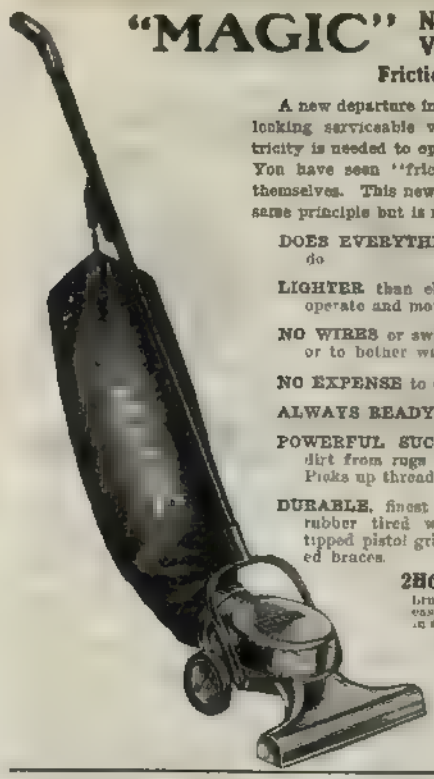
NO WIRES or switches to get out of order or to bother with.

NO EXPENSE to operate.

ALWAYS READY for instant service

POWERFUL SUCTION removes dust and dirt from rugs or carpets without injury. Picks up threads, hair, lint, etc. with ease.

DURABLE, finest workmanship throughout, rubber tired wheels, polished aluminum tipped pistol grip handle with nickel plated braces.



2H6995—12 in. nozzle, 14½ in. wide, 9½ in. revolving brush 3⅜ in. rubber tired wheels, easily removable dust bag. Each in shipping carton, 9 lbs.

Each **$24.00**
6 or more, Each **22.50**
12 or more, Each **21.00**

here's the LITE that leaves BOTH hands free

for every purpose, and it's a warning light, too

N.Y. Traffic Cops Use It!

The only light of its kind! Wears like a wrist watch. Guaranteed for two years. Longest battery service. Brightest light of any flash light on the market. Made of the best available materials. Lights without a switch—action by gravity. Endorsed by N.Y. City Police Dept. and many other municipalities where the department wore flash lights as a safety measure.

SAVE-A-LIFE LITE [Pats. Pends.]

CIVILIAN MODEL

"The Light That NEVER Fails"

FOR ANY USE REQUIRING A LIGHT INSTANTLY

Small aluminum electric light to be fastened to the front or back of either hand, connected by a fine wire to a battery in a leather holster which may be attached to belt or carried in pocket. Bright RED and WHITE light. Switch adjustable to operate automatically on raising or stretching out the arm. Gravity action which is automatic and positive and never fails. People find the Elgin "The Professional Timepiece" It is the natural reaction of anyone a time-piece of authority. An Elgin watch may be the plainest of practical time-pieces or it may be encased in the finest example of the gold and platinum smith's art. But it is always true to the one and only thing a watch is for—to tell time and tell it right.

Three Special Bargains

43 Piece Set

Imported German China
Garland Border Pattern

$9.98 43-Piece Set Service for 6 Persons

This German China Dinner Set has been selected as an excellent example of Ward a fine values in imported dinner ware. It is made in Germany by a pottery known the world over for good workmanship. The china is light weight, highly glazed and so clear that when held up to the light you can see the shadow of your hand.

Seldom is dinner ware of this quality priced as low as our Garland Rose set. This design shows garlands of pink roses and green leaves with a border of French blue and tan. The handles on this set are gold traced.

43-Piece Set—Service for six persons, as follows
6 Cups
6 Tea Saucers
6 Dinner Plates, 9 inch
6 Bread and Butter Plates, 6 inch
6 Cereals or Fruit Dishes, 5½ inch
1 Cream Platter, 7½ inch
1 Platter, 14 inch
1 Oval Open Vegetable Dish, 10 inch
1 Vegetable Dish
1 Covered Sugar (2 pieces)
1 Creamer
1 Salad Bowl, 7 inch
1 Platter, 11 inch

Shipping weight, per set, 45 pounds. Can be shipped by parcel post

450 C 112—43-Piece Set ... $9.98

We guarantee Safe Delivery of all our dinner ware. It is expertly packed and should reach you in perfect condition. However, if any pieces are broken in shipment we will replace them without charge.

American Semi-Porcelain
Floral Basket Design

$7.98 44-Piece Set Service for 8 Persons

Our American Dinner Ware is an excellent quality semi-porcelain The body has a rich creamy white color and a hard clear glaze similar to that found on imported china. Each piece bears the trade mark of a well known pottery

For this special 44-Piece set we have selected one of the most popular of the new patterns, a tasteful floral basket design combining French blue, rose, yellow and green. Blue tracings, applied by hand, outline the edges and handles.

This pattern is very attractive on the table providing just the right color in the gay basket of flowers and blue bowknots that fit the garlands. The 44 piece set in which it is offered includes service for eight persons as follows

8 Tea Cups
8 Tea Saucers
8 Dinner Plates, 9 inch
8 Sauce Dishes
8 Cereal Bowls, 6 inch
1 Cream Pitcher
1 Open Sugar Bowl
1 Oval Open Vegetable Dish
1 Platter, 12 inch

This pattern is also carried in open stock. A printed price list is sent with each set
Shipping weight, per set, 45 pounds. Can be shipped by parcel post ... $7.98

Genuine Imported Bavarian China
Exclusive Embossed Pattern

$11.98 45-Piece Set Service for 8 Persons

Only in genuine Bavarian ware will you find china of this fine quality. The pure white body and hard, clear glaze make it beautiful and durable. At this price it is a fine value.

Delicate shadow embossing forms wide bands on each piece—a decoration usually seen only in very expensive china. Colorful roses and small blue flowers, with green leaves, make the garland border just inside the gold fluted edges. Handles are gold traced. This 45-piece set includes service for eight persons as follows

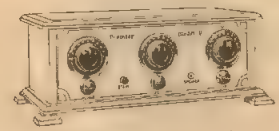
8 Tea Cups
8 Tea Saucers
8 Dinner Plates, 10 inch
8 Fruit Plates
8 Sauce Dishes
8 Cereal Bowls
1 Cream Pitcher
1 Covered Sugar Bowl (2 pieces)
1 Platter 12 inch
1 Round Open Vegetable Dish

This pattern is also carried in open stock. Printed price list sent with each set with prices within, per set, 45 pounds. Can be shipped by parcel post ... $11.98

RADIO RECEIVERS

PREMIER 5-TUBE "ENSEMBLE"

The Premier **"Ensemble"** in beautiful, attractive three-color display carton.



Showing the **"Ensemble"** as it appears when mounted in a cabinet.

"QUALITY RADIO AT A REASONABLE PRICE"

Through a new manufacturing idea and a new merchandising plan, quality radio is at last brought to the user at a reasonable price.

Premier **"Ensemble"** is not a "knocked down" kit—but a completely assembled, unwired quality radio set. The user receives it in two completely assembled parts, which are put together with a screw driver in thirty seconds. No drilling, tapping or other machine work to do No other tools required, except a soldering copper—and Premier furnishes that! The new, copyrighted Premier wiring plan with six color charts enables the most inexperienced to wire the set completely, and with certainty of success.

Premier **"Ensemble"** is quality radio throughout. Genuine Premier quality parts designed and built from raw material to finished product by the Premier organization, are used throughout. They have won the unqualified approval of thousands of engineers and experienced amateurs everywhere. Genuine Bakelite panels are used for Premier **"Ensemble."** Fullest filament control is provided by three Premier **"Full Floating"** rheostats. Nothing is sacrificed to a price in the **"Ensemble"**—yet mass production makes possible this revolutionary price for quality radio.

BEAUTIFULLY DESIGNED

In beauty, too, the **"Ensemble"** excels Its 7x21-inch genuine Bakelite panel is a perfect reproduction of selected black walnut. Its handsome black dials and knobs of special design give striking beauty to this quality **"Ensemble."** The **"Ensemble"** plan gives the user the privilege of selecting a standard cabinet from the many available styles to harmonize with the furnishings of his own home—and Premier **"Ensemble"** will grace the finest surroundings (We do not furnish cabinets.)

As the **"Ensemble"** comes. Two completely assembled units.

TUNED RADIO FREQUENCY

In engineering also, the **"Ensemble"** is a forward step. The unique circuit and special design of apparatus used set new standards of volume, distance, tone quality and selectivity. Unlike the average tuned radio frequency set, the **"Ensemble"** gives equally good volume and selectivity on all broadcasting wave-lengths, from 200 to 600 meters.

The experimenter, and the man who enjoys radio for its entertainment and educational value alone, alike find the **"Ensemble"** ideal radio. The experimenter, because the usual grief of set building has been eliminated, leaving only the delightful part, and the listener, because the **"Ensemble"** brings to him the utmost in radio at a reasonable price.

REDUCES DEALER'S INVESTMENT

The **"Ensemble"** comes packed in a beautifully finished carton, together with necessary wire and solder and understandable working instructions for assembling and wiring the set complete.

Dealers are finding the **"Ensemble"** a wonderful help to their business, by assembling sets in spare time for those of their customers who do not care to do this themselves, which gives them one really high grade set to meet all price demands, simply by placing this beautiful set in any type of cabinet the customer may desire In this manner it is not necessary for the dealer to carry as many sets on hand, yet gives both him and his customer a wider range of selection than would be possible under the old system of completely built sets. Quicker turnover and lower investment by this plan therefore increase profits—and, his customer cannot buy better radio at any price.

Though manufactured under mass production conditions, and sold by a modern merchandising plan, which results in big savings to the user, the Premier **"Ensemble"** is not a cheap set, except in price. Quality first is the Premier creed and it finds its highest expression in the **"Ensemble."**

The Premier **"Ensemble"** complete with all parts completely assembled in two units, and with wire, complete wiring charts and instruction book, colored varnished tubing, solder and soldering iron.

Showing **"Ensemble"** ready to wire

It is equally important to sell your customers good fishing tackle as it is to sell them good hardware, furniture or anything else. A cheap, inferior reel or rod soon causes a disatisfied customer. Selling them better quality merchandise creates friendship and good will.

Fairbanks Auto-Truck Scales

Auto-Truck Scales

The extensive use of auto-trucks by dealers in coal, iron, building material, grain and other commodities, to increase the efficiency of their delivery service, has pointed out the need for scales of the required capacity and reliability to weigh these loads accurately. The conditions of this service are far more severe than those surrounding the ordinary wagon scale. It is well known that the majority of auto-trucks carry approximately eighty five per cent of the total load on the rear axle. This load is thus concentrated upon one end of the scale. Furthermore, the shock of starting and stopping the motor on the platform produces an unusually heavy strain or impact upon the scale mechanism.

These considerations, in connection with the heavier loads carried, have led to the development of the Fairbanks Auto-Truck Scale—a scale of distinctive design and highest refinements—to successfully meet the needs of this service. The lever system follows the style of the well known Fairbanks Railroad Track Scale, covering equally well every advantage of construction to produce lasting accuracy. The parts are of heavy section, precisely fitted and assembled The pivots and bearings are of special hardened tool steel and of exceptional bearing length, to lessen wear. The design of the pit, foundations and lever supports is in keeping with that of the scale proper, concrete and steel being very generally used.

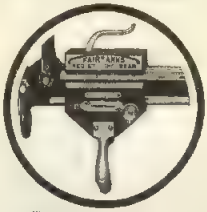
Fairbanks Wagon, Stock and Auto-Truck Scale Beams



Type-Registering Beam
Gives an Indisputable Printed Record of Every Weight

Weight records have little value unless they can be proved correct. Many annoying controversies originate from errors in entering or copying scale beam readings, and the loss due to allowance of claims which cannot be defended is a serious item in any business.

The Fairbanks Type Registering Beam prints a plain and accurate record of each weighing. When dated and signed, it becomes *an indisputable record*. Its appearance inspires confidence and in defence of claims for shortage or error, its exhibition puts an end to all argument.

Fairbanks Wagon, Stock and Auto-Truck Scales of any capacity can be equipped with Fairbanks Type Registering Beam, allowing the owner to furnish his customer an orginal printed record of the weight of the load at the time of purchase, at the same time keeping a copy for his own use.

The Fairbanks Type Registering Beam is a single full capacity beam, fitted with a metal type strip and a printing mechanism made part of the poise itself This poise runs on smooth turned rollers upon the milled top of the beam, the back roller having a V shaped groove corresponding to a rib milled on the beam, which prevents the poise from sticking or jumping off. The poise has a handle at the top, the end of which engages with notches on the beam, so that the poise must always rest *over a graduation* and not between two. A fractional poise is operated by a knurled knob on the front of the main poise The face of the beam is beveled for convenience in reading, of special advantage when the operator faces the light.

The type registering ticket is placed in a slot in the poise. The printing plunger is operated by a handle of convenient shape, in conjunction with a stationary handhold attached to the front of the poise, this combination allowing for the required pressure without twisting the beam in its hangers A slide on the poise allows for gross and tare weights. The entire mechanism is of the simplest character, without complicated or delicate parts no cogs or cams, wheels or moving type nothing to get out of order The type is of hard bronze, cast in short, interchangeable sections, convenient for renewal and is attached to the bottom of the beam in such a way that the correct alignment of figures is not disturbed by constant use. The beam is finely and precisely made, every notch being sealed individually by hand with standard weights It is handsomely finished in highly polished nickel plate, with black enamel body, an ornament to any office.

This beam is furnished on order only, in capacities as given below.

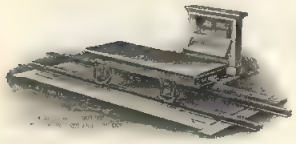
Metal Trades and Mining Scales

BUILT-IN SINGLE TRACK SCALE



For use at factories, foundries, steel works and the like, or weighing heavy materials and products in transportation.

21½-inch gauge track is usually employed.

The platform covering as illustrated, is of planking to which the rails are spiked, but may be of cast-iron plate with rails formed in the castings by proper shrinkages.

	Price
No 2294 4 tons 5′ 1″ x 30″ D. B —	$205.00

Extra for Type Registering Beam....	200.00

COAL TIPPLE SCALE

The successful operation of a coal mine is dependent upon its Tipple Scale more than upon any other single piece of machinery used. It fixes the labor cost of the operator—it measures the output of the mine. It is the place where interests of owner and miner meet. The scale should protect both—it can do so only through consistent accuracy.

The Tipple Scale is built into the tipple, having a weigh-hopper suspended from its levers, to take the coal directly from the mine cars, whence it is screened into the railroad cars below. Each scale is adapted to the design of the tipple and is arranged for greatest convenience, but we list below three regular modifications to meet general conditions.

Scale is equipped with a single beam, graduated 1,000 pounds by 2½ pounds, and scale mechanism is furnished to install the beam in an enclosed beam box above the levers. When especially so ordered at an extra price, the beam may be installed below the levers as shown in cut or placed in the office of the weighmaster. Scales may also be fitted with Quick Weighing attachment. All material for erection is to be supplied by purchaser.

Prices do not include Timber or Beam Box.

This illustration shows beam placed below mechanism, which calls for an extra price. Scales are regularly furnished for beam above mechanism.

Coal Tipple Scale adapted for Beam Box above the Levers.

No.	Capacity	Platform	List Price
2149	6 T. x 2½ lbs.	14′ x 7′ 6″	$260.00
2151	10 T. x 2½ lbs.	14′ x 7′ 6″	325.00
11347	15 T. x 2½ lbs.	14′ x 7′ 10″	405.00
11348	20 T x 2½ lbs.	14′ x 7′ 10″	495.00

Note.—Above code numbers include only scale mechanism and beam outfit.

Note.—In the platform sizes above, the first figure is the dimension parallel with the beam.

Metal Trades and Mining Scales

QUICK WEIGHING OUTFIT

This equipment is used at mine tipple, docks and terminals to give quickly the net weight in hopper or in coal car passing over the scale. It consists of a dial and counterpoise attached near the end of the beam and a dash-pot at the tip to prevent vibration. This dial is divided into alternate red and white blocks, each representing 50 pounds. Loose weights are used on the dial counterpoise. Tare is taken upon the beam, each reading of the dial and counter poise giving directly the *net* weight of the coal within fifty pounds. The loads can be weighed in succession, the dash-pot absorbing vibration and thus steadying the dial indicator each time.

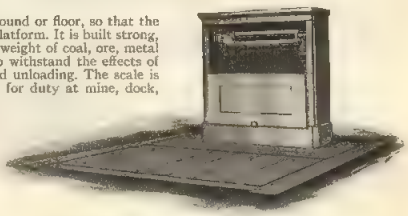
All parts are finely finished, the beam and poise being of polished brass. The outfit may be furnished complete for attaching to scale already in use, or as part of new scale. Furnished either single or double beam as below.

Quick Weighing Outfit

No	Capacity	Dial	Beam	List Price
10670	5 Tons	14″—5,000 x 50 lbs.	Double	**$260.00**
10671	5 Tons	14″—5,000 x 50 lbs.	Single	**260.00**
10672	5 Tons	8″ 2,000 x 50 lbs.	Double	**210.00**
10673	5 Tons	8″—2,000 x 50 lbs.	Single	**210.00**

Extra list price for Quick Weighing Outfit, complete, including Beam Box or Shell and Hangers, when furnished with Scales: For **10670** and **10671**, **$195 00**; For **10672** and **10673**, **$145 00.**

BUILT-IN OR INDUSTRIAL RAILWAY SCALES



This scale sets directly into ground or floor, so that the loads may easily come onto the platform. It is built strong, with heavy parts, to sustain the weight of coal, ore, metal and other heavy material and to withstand the effects of jar and shock due to loading and unloading. The scale is thus very practical and efficient for duty at mine, dock, terminal or industrial plant, being also suitable for use with narrow gauge track or industrial railways.

When desired, the beam outfit will be enclosed in a substantial beam box for pro tection under outdoor service and fitted with a convenient drop door. The distance between edge of platform and beam box is unusually great, to allow projecting loads to clear, and also to give standing room for the weighman near the beam.

The double *arrow-tip* beam shown above is recommended for general use, but the scale may also be fitted with full capacity beam or Dial Quick Weigher. The double beam is of brass, graduated 500 x 2 pounds on both bars of all scales. These scales may also be furnished with the charging beam outfits on special order. Foundations and timber to be supplied by the purchaser. Scales may also be framed entirely of steel.

Prices do not include Timber or Beam Box.

No.	Capacity	Platform	Platform to Beam Rod	List Price with D. B

Compound Suspension Scales

This form of scale is designed for weighing articles of all kinds in the act of being loaded, unloaded or otherwise moved by cranes. The goods are weighed as they are lifted, the time and labor of placing on and removing them from a platform scale being saved.

It is especially adapted for use in iron and steel mills, foundries, shipyards, etc., for weighing castings and forgings, plates, boilers and machinery of all kinds, and is also useful on docks and railway platforms for weighing material during removal from ships, canal boats, railway trucks, warehouses, etc.

These machines are constructed upon the same compound lever principles which have secured for all Fairbanks' Scales their reputation for durability and accuracy. There are no springs nor hydraulic appliances to get out of order. All the bearings are of the finest steel, carefully tempered and hardened, the other working parts being strongly forged of the best iron and steel.

All parts liable to injury are amply protected by an iron and steel box surrounding the levers

As the entire capacity of the scale is indicated upon the beam no loose weights are required.

A large balance ball is provided to take the tare of slings, etc. While adapted for much rough usage, the scale will prove more durable if used only for vertical lifts.

COMPOUND SUSPENSION SCALES

Prices are for Scales only, exclusive of Hoist

No.	Capacity	Height of scale Loop to Hook	Weight	Price Scale Only

WHEELBARROW SCALE

All metal, with incline brackets

The scale shown above is strongly built of metal throughout, adapted for weighing wheelbarrow loads or for general use in the metal, fertilizer or similar trades. A bracket is cast on each end of the frame to form a rest for an incline, so that a wheelbarrow load may be easily run on the platform. A set of two wooden inclines is furnished regularly with the scale without extra charge. The *arrow-tip* beam is regularly single, graduated 100 x 1 lbs., and is of brass with set-screw poise. The scale is furnished either with or without wheels. Finished durably and attractively in black, all well varnished for protection.

No.	Capacity	Platform	List Price With Wheels	List Price Without Wheels
1384	1,000 x 1 lbs	42" x 30"	$130 00	$124 00

Extra for Double Beam, $15 00

PORTABLE PLATFORM SCALE

With Rack Platform

For convenient weighing under severe service, this strong, heavy scale is provided with an extra iron-covered wood platform with iron racks. Large rubber cushions are placed between the two platforms to absorb the shock and strain of loading and unloading. Large solid, reinforced web wheels are used, bringing the platform high so that overhanging loads will clear the ground. A vibratory axle with convenient handle, allows scale to be easily turned in small space. The *arrow-tip* beam is single, of brass with set-screw poise.

Beam 200 x 1 lbs.

No	Capacity	Platform	Height of Platform	Price
1420	6,000x1lbs.	31" x 40"	22"	$364.00

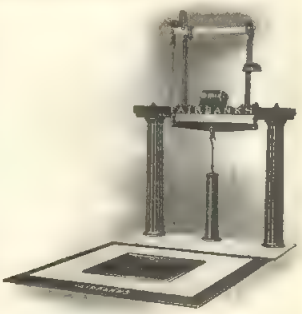
Grain and Flour Scales

SELF-CONTAINED HOPPER SCALE

This scale is adapted for use in the country elevator for receiving and loading out grain, for checking wagon scale weights, for mixing and blending grain, or for use in small grain warehouse, mill or floating elevator.

It is a self-contained scale with short iron pillar outfit. The platform is flush with the floor and has a framed square hole to receive the hopper. The grain is discharged from the hopper directly through the bottom of the scale.

The *arrow-tip* beam is single, of brass with brass poise and set-screw. Weights are supplied in combinations to make up the full capacity of each size. The hopper is in every case to be supplied by the purchaser. Durable and attractive finish, well varnished.

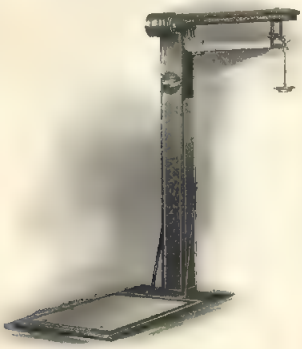


No.	Capacity	Platform	Hopper Opening	Beam	Platform to Beam Supp.	List Price
1608	60 bu—3 600 x ½ lbs.	42" x 44"	15" x 15"	100 x ½ lbs	12 x"	$185 00
1612	100 bu—6 000 x ½ lbs.	48" x 49"	22" x 22"	100 x ½ lbs.	23"	250.00

Extra for Combination Grain Beam, $70 00

Note.—In the platform sizes above, the first figure is the dimension parallel with the beam.

SELF-CONTAINED SCALE



For weighing barrels of flour or other material of any net weight up to 500 lbs. this scale offers special convenience and splendid accuracy. The platform is designed to set flush with the floor so that barrels may readily be rolled off and on, and its size is such as to accommodate these loads.

To withstand the jar and shock of this comparatively heavy service, the scale is built strong, with pillar well braced with iron rod. The *arrow-tip* beam is of brass with brass poise and set-screw and is graduated 50 x ¼ lbs. A small tare bar may be furnished to balance the weight of sacks, on special order at an additional price. Counterpoise weights of the effective value of 50, 98, 100, 196, and 200, respectively, are furnished with the scale to allow of conveniently weighing any standard sized barrel, sack or package.

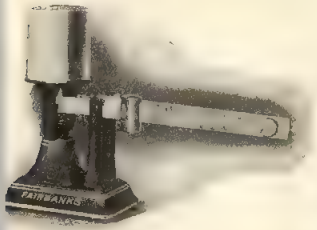
Durably and attractively finished in blue and gold, all well varnished for protection.

No.	Capacity	Beam	Platform	List Price
1668	500 lbs.	50 x ¼ lbs	16" x 25"	$78 00

Note.—In the platform size above, the first figure is the dimension parallel with the beam

Grain and Flour Scales

PERCENTAGE SCALE WITH CUP



The beam indicates by upper row the number of pounds per bushel, and by lower row the percentage of waste or dirt.

To ascertain the weight per bushel, fill the receiver and strike off level with the top. Move the poise to a balance, and read the graduation on the upper row.

To ascertain the percentage of dirt or foul seed, set the poise at 100 per cent, fill the receiver until the scale balances. Winnow or otherwise clean the grain, return the residue to the receptacle, move the poise till the beam balances, and it will indicate the percentage of good grain.

No. 3068—Capacity, 1 gill cup—**Price $16 00.**

Prices on larger sizes quoted on application.

PERCENTAGE SCALE WITH SCOOP

The market value of seed is determined by its purity as a mass. The seed is always accompanied by dirt, hulls, foul seed and the like, and the correct percentage of this dirt may be easily found.

Any kind of seed or grain may be tested, the scale being found particularly desirable for flaxseed. One pound of the seed as it comes, is weighed out on the scale and then thoroughly sifted. The remaining clear seed is then replaced in the scoop and the poise moved to a balance. The percentage of dirt in the seed may then be accurately read directly from the lower graduations on the beam.

The scale is of special design, with round iron plate to hold a brass seamless scoop narrowed at one end for convenience in pouring the seed. The beam is of brass with a brass sliding poise and graduated above to one pound in quarter-ounce graduations and below to 100 per cent by 1 per cent graduations.

No. 485—Capacity 1 lb. x ¼ oz.—**Price $18.00.**

GRAIN TESTER

All grains are graded into standard qualities for the purpose of fixing a definite market value, the grade being higher and more valuable as the grain is purer, sounder and heavier. To determine the weight and purity, a Fairbanks Grain Tester is customarily used as a standard. The scale shown below is small, compact, convenient and easy to use so that the grain can be readily tested as it comes into country elevator, terminal elevator, or into a plant as raw material.

This outfit is adapted to be held in the hand and may be easily carried around. A polished brass measure holds the grain to be tested and a brass beam with sliding brass poise gives the test results quickly and accurately. The beam is graduated on upper row to 65 x 1 lbs. to give the weight per bushel direct; on lower row to 100 x 1 per cent to measure the percentage of loss in cleaning; in the middle to the capacity of the measure to give the exact weight of the sample.

To determine the cleaning loss, set the poise on the 100 per cent mark and fill bucket with grain to balance. In the case of light grain two drafts may be necessary. After cleaning, the grain is returned to the measure and the poise moved to a balance. The figure indicated on the lower row is the percentage of good grain, the difference between this figure and 100 per cent giving the percentage of dirt.

No.	Capacity	Middle Graduation	List Price
3074	1 pint	1 lb. x ¼ oz.	$24.00
3076	1 quart	2 lbs. x ½ oz.	27.00
3078	2 quarts	4 lbs. x 1 oz.	30.00

Home Health Scale With Full Capacity Beam

The value of closely noting and following the continual changes in personal weight is today universally recognized by physicians, physical culturists and everyone interested in attaining and maintaining health. Every change in weight is the result of some physical condition—it may show the desired effects of beneficial treatment; it may point out the necessity for new or different treatment.

The Fairbanks Personal scale, placed in bathroom or bedroom offers every family the advantage of obtaining personal weight without clothes as frequently as desired. It is convenient and easy to use, takes up but small space, and is handsomely finished to ornament any home. Above all, its fine accuracy and sensitiveness give weights that can be absolutely relied upon to be authentic.

The tall iron pillar is surmounted by a full capacity beam on a level with the user's eye and free from shadow, so as to be easily read. This beam has the full 300 lbs. x 4 oz. capacity upon its bars, doing away with loose weights which may drop and injure floor or toes. The No. 1265 scale is furnished with an accurate, adjustable measuring rod for giving personal height, graduated from 2 feet 6 inches to 6 feet 6 inches by ½ inch. Beam and measuring rod may be graduated to metric or other standards, if desired. The finish is in white enamel, with *arrow-tip* beam, sliding poises and measuring rod, all of polished nickel-plated brass. Rubber mat for platform may be furnished at an additional price.

With Full Capacity Beam

No.	Description	Capacity	Platform	List Price
1263	Without measuring rod	300 x 4 oz	10½"x 14"	$47.00
1265	With measuring rod	300 x 4 oz.	10½"x 14"	63.00

Beam Graduations: Upper bar, 50 x ¼ lbs. lower bar, 250 x 50 lbs.
Measuring Rod: 2 ft. 6 in. to 6 ft. 6 in.
Height: Floor to tip of beam, 58½ in.

No. 1204-1 Standard Section Hand Car

Fairbanks-Morse Sheffield Standard Section Hand Car

No. 1204-1

These Hand Cars have a record for long service.

Platform, 6 feet 1 inch long, by 4 feet 4½ inches wide. Wheels, all-steel or wood center, 20 inches in diameter Steel wheels are standard and always furnished unless otherwise ordered. Wood center wheels can be furnished at an additional price.

Our steel wheel cars can be insulated for use on roads having the electric block signal system

Supplied with or without Hyatt Roller Bearings

Gauge. 4 ft. 8½ inches.

Capacity.—4,000 lbs

Weight. About 540 lbs.

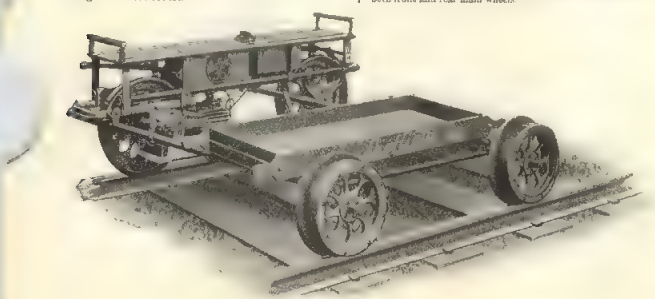
Fairbanks-Morse Sheffield Gasoline Maintainers Motor Car

No. 1205 36

The No. 36 is a light, powerful, all-steel inspection car—simple, efficient, dependable. For Signal Maintainers, Linemen, Road-masters, Bridgemen for any department that needs a light car

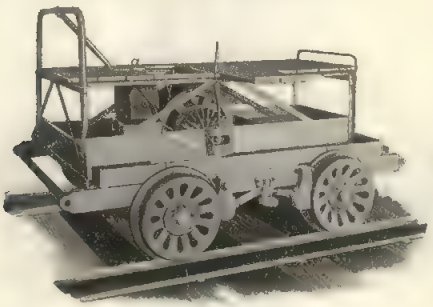
The horisontal, two-cylinder, two-cycle, air-cooled engine drives direct on the front axle—one cylinder on each side No valves, cams, gears or chains or other small parts to wear and give trouble —no water trouble.

The frame is all steel, giving light weight with strength the guide arms are steel firm and rigid There is an effective brake on both front and rear main wheels



No. 1205-36—Two Cylinder

Fairbanks-Morse
Section Motor Car and Power Unit



No. 1203-44

This car has pressed steel channel, automobile type frame securely riveted, especially designed for strength and lightness. Tubular cross members at front and rear.

Substantially built body is assembled to the steel frame. The seat is 70½" long x 27¾" wide with extra seat for the operator There is sufficient room for nine men and tools.

The No. 44 car is powered with a 4¾" x 4¾" horizontal, single cylinder, two-cycle, reversible, hopper cooled engine, especially designed for this car and giving remarkably high torque at low speeds. The engine is free running and is provided with a crank for starting

The connecting rod is drop-forged from high grade carbon steel and specially heat treated for strength and toughness.

The lubrication of the engine is automatic inasmuch as it is accomplished by mixing lubricating oil with the fuel.

The power of the engine is transmitted to the rear axle and wheels by means of a specially designed air cooled clutch, sprockets and chain. The clutch is of the self-contained disc type mounted on an extension of the crank shaft and so arranged that no end thrust is transmitted to the crank shaft bearings.

It is provided with the highest grade friction facings of large capacity thus insuring positive engagement and long wear. The clutch is operated by means of a lever extending through the seat top in the most convenient location for the operator

The car is equipped with a powerful braking mechanism exerting braking power on all four wheels and operated by means of a conveniently located foot pedal. Adjustment is provided for taking up the wear of the wooden brake shoes

Every engine and car is thoroughly run-in and tested for running efficiency and adjustment

Dimension—Extreme length overall, 7', 0"; extreme width overall, 5' 4"; extreme height above rail, 47½"; height from rail, to top of seat, 33½"; height from rail to top of deck, 18½"; width of deck each side of seat, 12", minimum clearance above rail, 3¾".

Weight -1,035 pounds.

Gauge—4', 8½".

Wheel Base—37".

Wheels—16" diameter, hot pressed steel wheels ⅜" plate, 3½" tread, M. C. B flange, forged steel hub, taper fit on axle. One bronze bushed loose wheel so that car may be readily removed from the track. This loose wheel is provided with means of lubrication thus preventing wear. All wheels have ground tread.

Axle Bearings The axles run in Timken tapered roller bearings housed in axle boxes made from certified malleable iron castings.

Fairbanks-Morse
Power Unit

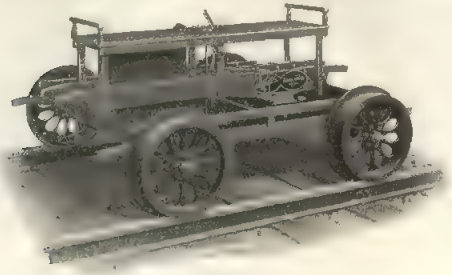
The complete power unit and transmission as used on the No 44 Motor Car, can be supplied for fitting on any well-built car.

In this outfit Fairbanks-Morse engineers have designed a unit that is remarkably efficient and at the same time is simple enough to enable the section man to install it without difficulty.

The engine and friction clutch are bolted solidly to the car and power is delivered to the rear axle by means of a sprocket chain. Various speeds of the car may be obtained and loads easily started by slipping the clutch which is so designed that it can be slipped continuously for several hours without harm.

Fairbanks-Morse Sheffield Light Center Load Car

For Roadmasters, Supervisors, Signalmen, Etc.



No. 1200-41

AIR COOLING

The **air cooling** eliminates pump and connections, radiator and other parts of a water cooling system—gives an engine of light weight—avoids water troubles handling and running out of water on the road, and the damage and delay from freezing.

DRIVE

The car is propelled by means of a 37-tooth spur gear on the rear axle, driven by a 24-tooth gear on the engine shaft the ratio thus being 1.54 to 1. These gears are of extra large proportions, being 6 pitch and 1¼" face, hardened steel forgings. The axle gear is secured to its shaft by means of a taper fit, nut and key. The engine shaft gear is integrally forged with the shaft. The rear axle has a steady-bearing at the center near the driving gear, the steady-bearing box being attached directly to the crank case—insures correct center distances and proper meshing of the gears. The center bearing is located on one of the crank cases, which is attached to the special engine sills. The sills are supported in turn by another cross sill extending to the rear axle boxes. Thus, by this rigid system, the alignment of the rear axle end bearings and center bearing is assured.

AXLES

Front axle is 1¾" diameter. Rear, or drive axle, is 1⅞" diameter.

WHEELS

17" diameter, wood center, ⅜" steel tires, 2½" tread, standard M. C. B. flange. They're put on with a taper fit—can't wabble or loosen. Loose wheel on front axle so that car may be easily removed from track.

AXLE BEARINGS

Both Hyatt roller bearings, 1¾" diameter journals. The axle boxes are malleable iron castings and are fitted with fibre thrust washers with integral mud guards.

LUBRICATION

The lubricating oil for the engine is mixed with the fuel before filling the tanks. From the tanks it is taken with the fuel through the fuel injection device into the crank case, giving automatic and positive lubrication to piston, cylinder and connecting rod bearings. This lubrication is always in direct proportion to the service the car is being called upon to perform, starting automatically when the car starts, stopping when the car stops and giving proportionately more or less oil as the speed of the car is high or low. The crank shaft bearings and the rear axle steady-bearing are provided with large grease cups. The axle boxes are provided with an easily accessible oiling system.

EASY STARTING

Here's a big exclusive feature of the No. 41 Car—an **automatic primer.** It makes starting easy, even in coldest weather. Just a few explosions of gasoline and she's under way on kerosene. No time wasted. No fussing to start. Simply close the air shutter by throwing the lever on deck, then a short push along the track. Result, a fine rich mixture drawn into the cylinder: a few drops of liquid gasoline taken into small well in the intake manifold. This gasoline is **atomized** by being sucked into the cylinder by-passes and blown into the combustion chambers—made easily ignitable.

IGNITION

Jump spark—a complete positive system.

TIMER

Special Bemus model, with hardened ball and roller contact, is easily accessible for inspection and lubrication.

BATTERY—Five dry cells.

INSULATION

Wood center wheels form effective insulation, preventing interference with automatic signals.

FRAME

Wood frame, reinforced with steel. A big feature of the No. 41 frame is the supporting of the engine and driving axle centre bearing on sills independent of the main frame members.

CONTROL

One spark lever and one throttle lever are provided on the seat top, and the needle valve of the fuel injection device is also extended through the seat for ready access. Likewise the lever of a two-way valve for controlling the gasoline and kerosene feed to the fuel injection device is extended through the seat top. The ignition switch is located on the seat near the other control members, and is so arranged that ignition may be provided or cut off from either or both cylinders. The operator can thus run the car from the seat, under complete and convenient control, with only one set of levers.

BRAKE

Powerful and long-lived band brake, acting on a malleable iron brake drum on the driving axle. Effectively operated by convenient hand lever at side of seat.

WHEEL BASE

40". Car cannot get crosswise of a frog. The light, well-balanced No. 41, with this wheel base, is easy to lift on and off the track.

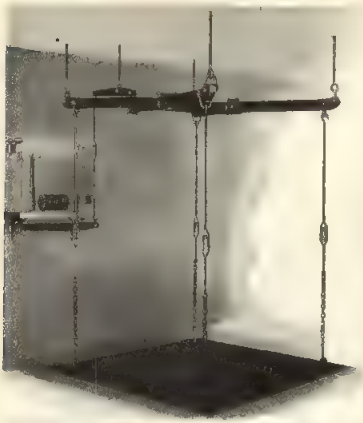
GAUGE—4', 8½".

DIMENSIONS

Length over all, 8', 7".
Width over all, 5', 3½".
Height from rail to top of brake handle, 33½".
Height from rail to top of seat handle, 22½".
Size of deck space each side of seat, 4', 2½" x 19½".
Distance from top of rail to top of deck 12".
Distance from top of deck to top of seat, 15¼".
Minimum clearance above rail, 4".

WEIGHT 460 pounds.

RAILWAY & CONTRACTORS' EQUIPMENT



Packing House and Market Scales

CEILING SUSPENSION SCALE WITH STEEL PLATFORM

This scale being suspended directly from the ceiling or timbers, no corner posts are necessary and connection is made to the beam fastened to a wall near the scale. It has the advantage of overhead mechanism, away from the effects of corrosion due to salt and moisture from meat, fish or other similar products on the platform below.

The steel platform is sanitary and durable, connection being made to the mechanism by iron rods and chains. The *arrow-tip* beam is double, of brass with brass poise and set-screw, and is graduated 100 x ½ lbs. on upper bar and 200 x 1 lbs. on lower bar.

No.	Code Word	Capacity	Platform	Height Platform above floor	List Price
19621.....	Obtain.....	4,000 x ½ lbs.	5′ 0″ x 5′ 0″	2″	$390.00

Note—Price includes scale mechanism with platform, platform rods to give 7′ 8″ from floor to ceiling, checking system and beam outfit, but no curbing.

OVERHEAD SUSPENSION SCALE WITH STEEL PLATFORM

The design of this scale adapts it for setting upon the floor, allowing for convenient trucking of loads onto the platform by means of wood curbing, as shown above. Where the scale is located on concrete flooring, this construction does away with the necessity of cutting a hole in the floor. For sanitary purposes, the removal of the curbing around the platform allows of flushing the floor directly underneath.

The platform is of steel plate, offering a smooth, easily cleaned surface. It is connected to the levers by iron rods and chains, giving a flexible suspension which protects the mechanism from impact of truck loads. Beneath the corner posts are placed iron base plates, giving strong, steady support to the frame-work. The *arrow-tip* beam is double, of brass with brass poise and set-screw, and is graduated on upper bar 100 x ½ lbs. and on lower 200 x 1 lbs. Scale furnished complete as shown.

No.	Capacity	Platform	Height Platform above floor	List Price
19630.....	4,000 x ½ lbs.	5′ 0″ x 5′ 0″	2″	$553.00

Packing House and Market Scales

BUTCHERS' MEAT BEAM

The scale shown here is adapted for use in retail butcher shop or market, for checking the weight of incoming sides of quarters of meat from the wholesale delivery.

It is made with a strong iron hanger to bolt against post or wall, suitably braced from above by a tension rod. The complete hanger with beams, hook and brace is supported in swivels, so that the entire scale be swung back against the wall when not in use.

A galvanized iron meat hook is suspended below the beams and mechanism, so that the working parts are not subjected to the effect of moisture. The construction is all metal, exceptionally strong and solid, to handle the large sides of meat safely and to weigh them accurately.

The full capacity beam is of brass, graduated on the lower bar to 100 lbs. x ½ lb., on the upper bar to the full capacity of the scale by 100 lbs. graduations.

No	Capacity	Price
451	600 x ½ lbs.	$84.00

OVERHEAD TRACK SCALES—STANDARD PATTERN

Wholesale pattern similar, but has pull up beam, with brass counterpoise weights and beam stands.

Extensively used in large cold storage and slaughter houses, markets, etc., for weighing dressed meat. A section of track is cut out and attached to the scale, and goods are weighed as they pass along the track. The weighing beam is ordinarily placed below the scale, but may be above if desired.

Regularly furnished with double beams, each bar 100 x ½ lbs., and shelf and beam stands. Prices carry extension levers not over 6 feet long; when over 6 feet but not over 10 feet, add $10; when over 10 feet, price special.

No.	Capacity	Length of Track	Distance Top of Track to Ceiling	Pattern	Price
1650	2 000x½lb.	4′	23″	Standard	$234 00

*When required a shallow pattern scale can be supplied

SAD IRONS

DOVER LAUNDRY SETS

Full nickel plated and polished, patent wedge lock.

Oval shape cast iron cores, asbestos covered stand 6x6 inches.

Set consists of one unlined hood, three cores and one stand.

Per Doz Sets

No. 60—Wt of hood and one core, 5 lbs. $51 75

One set in carton; 3 sets in wood case; wt per case 46 lbs.

SAD IRON HOODS

ASBESTOS

Nickel plated steel hood, asbestos lined, with black enameled wood handle, and patent lock.

Per Doz

No. 61—Unlined; fits No. 60 sad irons $17 25

No. 71—Asbestos lined; fits No. 70 sad irons 27 00

One in carton.

CHARCOAL SAD IRONS

SELF HEATING

Family and Laundry Sizes.

Cast iron; polished face and sides; gold bronzed top; japanned wood handle; bright tin shield.

Single flue, top opens at back to allow fuel to be put in; either charcoal or live coals from common wood may be used.

No.	4D
Wt each, lbs	6½
Size base, ins.	4¼x6¾
Per Doz	$50 25

Half doz in wood box.

GASOLINE SAD IRONS

ROYAL

Cast iron nickel plated base; nickel plated steel lid and handle frame; ebonized handle; brass burner through out with fount nickle plated. Quickly lighted; instantaneous heat regulator.

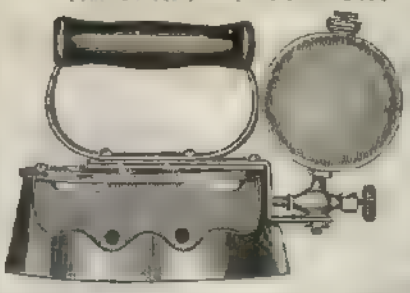
Each

No. RSHI—Size face 6⅞x3⅝ ins, wt each 6¼ lbs; capacity each 1½ pt $10 05

One in cardboard box

GASOLINE SAD IRONS

COMFORT



Cast iron nickel plated core, pointed on both ends; ebonized wood handle with heavy steel brace; protected from the heat by two asbestos pads and an air space; cast brass highly nickel plated gasoline fount.

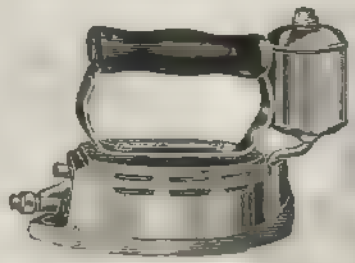
The iron is quickly lighted, and requires only ½ teaspoonful of gasoline to generate. The heat can be regulated to suit the operator. Operates 5 hours on one filling.

Each

No. CG—Size face 6⅞x3⅝ ins; wt 6½ lbs; capacity oil fount ¾ pt $11 70

One in cardboard box.

COLEMAN



Cast iron, nickel plated base, highly polished; nickel plated steel lid and handle frame; ebonized wood handle; heating element constructed of brass throughout. The lid consists of 2 parts separated by asbestos which prevents tarnishing and keeps handle cool.

Fuel for heating base flows from tank at front through one-piece feed pipe and generator to the control valve and burner. The burner extends the full length of the iron, giving the entire bottom an even heat. The gas flow is regulated by detachable key which fits on the outer end of the control valve. The ironing heat can thus be increasd or decreased as desired.

Complete with funnel, wrench and instructions. Size face 3⅝x7½ inches; weight each 7 lbs.; capacity oil fount ¾ pint.

No.	325
Less than doz lots, Each	$ 9 75
Lots of not less than 1 doz, Per Doz	108 00

One in carton

GAS SAD IRONS

FAIRY QUEEN

Steel base, highly nickel plated and polished, black enameled wood handle. Absolutely safe and odorless. Equipped with needle valve regulator and can be adjusted to gas pressure. Spreads a hot torch flame evenly over base of iron. Heats quickly and remains perfectly heated while ironing.

Furnished complete with 6 feet metal tubing and stand; size base 4x6¼ ins.

Each

No. FQN—For natural gas $9 90

One in carton, wt each 5¾ lbs.

SIRENS

FEDERAL

TYPE B—SINGLE HEAD

Desirable for small towns and villages. Also ideal for starting and quitting signal in mines, quarries, ranches, factories, etc. It can be heard approximately three-quarters of a mile on a quiet day. Of course, the wind will vary this some.

Dimensions: 22 inches long by 21 inches high by 19 inches wide. Base approximately 18 inches square. Weight boxed, 400 to 500 lbs.

F. O. B. Chicago, Ill.

	Each
Single phase, 60 cycle, 110-220 volts, 2 H. P.	$330.00
Two or three phase, 60-cycle, 110-220 volts, 1½ H. P.	300.00
Direct current, 110 volts to 600 volts, 1½ H. P.	300.00

TYPE B—DOUBLE HEAD

This type siren is designed for use as a general alarm in small towns and cities having volunteer fire departments. Has a sound penetration of about 1½ to 2 miles under ordinary weather conditions.

Has two revolving fans, or cylinders, in the sounding mechanism. Size, 38 inches long, 21 inches high, 19 inches wide. Weight, boxed, 500 to 600 pounds.

F. O. B. Chicago, Ill.

	Each
Single phase, 60-cycle, 110-220 volts, 3 H. P.	$455.00
Two or three phase, 60-cycle, 110-220 volts, 3 H. P.	400.00
Direct current, 110 volts to 600 volts, 3 H. P.	400.00

Extras

	Each
*General alarm control complete with motor and steel case	$60.00
**Remote control with two push button switches	55.00
Additional push button switches	5.00
Steel case with glass front for push buttons	10.00
***Coding motor	75.00

For sirens to operate on other than 60-cycle frequency, such as 25 to 45 cycles or 75 to 133 cycles, single phase, add $100.00 to list. For two or three phase, add $75.00. This is to cover special motor and gear connections to get required speed. Sirens so equipped are special and orders for same positively will not be cancelled after production has started.

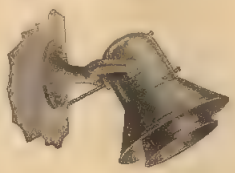
*This apparatus is used instead of the knife switch, and performs the "on and-off" operation automatically instead of manually. Invaluable for general alarm signaling. Complete with motor and weather-proof steel case for exterior mounting. 1/20 H. P. motor.

**Designed to control siren from distant points. Consists of self-contained double break magnet operated circuit breaker of standard construction and two momentary contact push button switches. If mounted outdoors, steel case is necessary.

***Coding motor is necessary where signals are given in code, such as a fire alarm signal.

TYPE A—DOUBLE HORN

This siren designed to replace bells, gongs, whistles and other vibratory type of signals. It cuts through all other noises and makes itself heard when all other devices fail. There are no vibrating parts to get out of order, no gears or diaphragms to be replaced or get out of adjustment. It may be connected to any standard time recording system.



Made for use in banks, factories, industrial plants, mines, schools, public buildings, warehouses, hotels and similar places.

Can be operated from any number of points by use of remote control switches.

Furnished with 1/10 H. P. universal motor for any standard voltage from 6 to 250 and any number of cycles up to 66 cycles.

Specify voltage.

	Each
Red painted enamel finish	$37.50
Red porcelain enamel finish	45.00
Brass or copper, polished or nickel plated	50.00

Length over all, 16½ inches; diameter of horn, 14 inches; diameter of body, 5¾ inches. Weight, 17 pounds.

TYPE A—SINGLE HORN

AUTO TYPE

For storage battery operation. Ideal for autos, motor boats, fog signals, fire apparatus, police apparatus, ambulances, grade crossings, etc.

Peculiar tone, may be heard approximately ½ mile under ordinary conditions.

Will be furnished either with a nickel plated bracket or cast iron pedestal, horn in copper, brass or nickel plated finish, and in all standard voltages from 6 to 250 volts.

Length, 14 inches; diameter of horn, 5 inches; ⅛ H. P. motor. Shipping weight, 10 pounds.

Specify kind of bracket, finish and voltage on order.

	Each
Type A, single horn	$40.00

FIRE ALARM SIGNALS

BENJAMIN

WEATHER-PROOF HOWLERS

No. 8360

Benjamin Fire Alarm Howlers are specially built for use on fire alarm systems operating under stringent regulations.

In series without condenser, eight 14-volt or fourteen 8-volt howlers may be used, but where fourteen 14-volt howlers are used, a condenser must be supplied on the panel board. The 110-volt howlers may be used for open circuit work where a time limit fuse or switch is inserted in the circuit. The use of combined 8-volt and 14-volt signals on one circuit is permitted

The sounding mechanism for Benjamin Fire Alarm Howlers is of the vibrator type

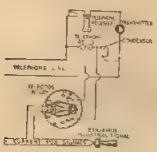
These signals have cast iron body, tapped for ½-inch pipe connection. A one-piece, drawn brass, bell type sound projector is rigidly attached to a pressed steel front cover. Signal is made weather-proof by gasket. Finish, red enamel.

No.	Voltage	Net wt. lbs	Each
8360	110 D C	5¾	$16.25
8864	8 A.C.	4¾	16.25
8865	14 A.C.	4¾	16.25
8866	110 A C.	4¾	16.25

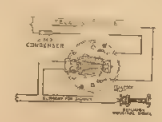
TELECODE RELAY

BENJAMIN

WIRING DIAGRAMS



The Telecode Relay is standard with open circuit contacts. To obtain the closed circuit type, it must be so specified on the order. The open circuit type has the secondary circuit open until the primary circuit is energized, while the closed circuit type has the secondary circuit closed until the primary circuit is energized



Relay is connected to telephone line at any point. When phone rings, relay closes the circuit which operates signal Common battery systems use a 2 M-F. condenser in series with relay coil. Condenser should not be used on private or magneto systems.

TELECODE RELAYS

BENJAMIN

No. 8313

Increases the efficiency of telephone signaling.

In factories, mines, quarries, foundries, machine shops, etc., where there is a great volume of noise, the ordinary telephone bell can seldom be heard. With the aid of the Telecode Relay it is possible to utilize Benjamin Industrial Howlers or any type of telephone system, telephone efficiency is not affected.

No. 8314

The Telecode Relay can be supplied for operation on telephone circuits using either A. C or D. C. as their ringing energy. For standard telephone circuits the relay is wound to the same* resistance as the bells of the circuit. In ordering, specify the resistance of the telephone bells on the same line. If used on Intercommunicating telephone systems having D. C. or A. C. for ringing energy, specify the voltage.

No. 8315

Construction—Relay mechanism is mounted on porcelain base, 4½ inches in diameter. Contact capacity is .8 ampere, 110 V., or equivalent to five Benjamin Signals. Wire terminals are binding screw type. Mounting screw spacings are 3½ inches on centers.

No. 8313, with back connections is for mounting on a panel and comes with cover as shown.

No. 8314 is mounted on a conduit fitting and has pressed steel cover, gasketed to make it weather-proof. Fitting is tapped at each end for ½-inch pipe.

No. 8315 has relay mounted in a 6x6-inch steel box with ½-inch knockouts, for use indoors.

No.	Net wt lbs. ea.	Each
8313	8	$12.00
8314	10	11.50
8315	9½	12.00

*Standard winding is 1000 ohms. A small extra charge is made for all special resistance windings, when specified on order.

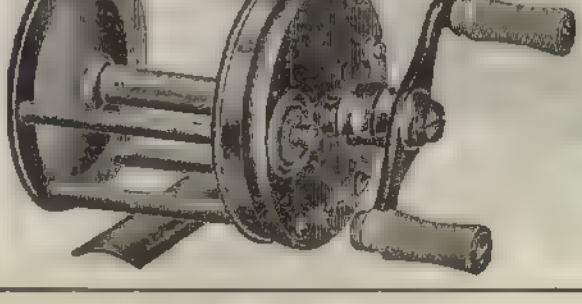
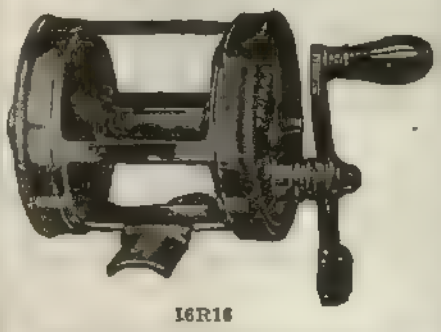
South Bend Anti-Back-Lash Casting Reel. Solid German silver, tvoroid grip, adjustable jeweled spool caps, quadruple multiplying worm side click and drag 100-yd. capacity. Absolutely guaranteed. Can be used with or without the anti back lash feature. Enables one to enjoy pleasures of night casting, which has always been so uncertain on account of inability to thumb properly in the dark. Strictly high grade and guaranteed indefinitely. Each in box, with full directions
No. 16R23. Each 6.54



HEDDON'S 3-15 CASTING REEL

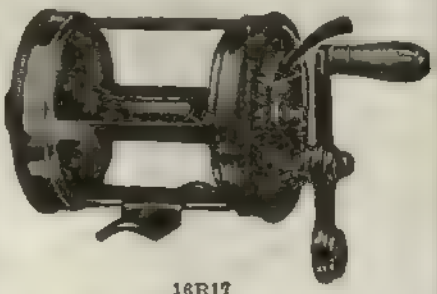
Heddon's 3-15 Casting Reel, is made of the best, tested, hard drawn, watch nickel; stud, shaft, pivots and pinion made of Stubbs drill rod, hardened, oil tempered, ground to size and highly polished. All gears made from special hard-drawn phosphor bronze. Has improved helical spiral gears, insuring strength, power and smoothness of action. Quadruple multiplier, outside diameter 2 inches, length of spool 1⅝ inches, weight 8 ounces, capacity 100 yards, 15 pound Heddon line. Equipped with Heddon design double handle with one inch radius, 2⅝ inches long, which insures better grasp in playing fish. Every part is easily oiled without taking apart. This is an individually built reel. Throughout its manufacture, the processes are in distinct contrast to the automatic production and a watch-like precision has been obtained in this hand made reel
No. 16R20. Each 13.06

MEISSELBACH FISHING REELS OF QUALITY



16R16

All Meisselbach Reels Are famous for their Patented Takapart Feature



16R17

Meisselbach Takapart and Tripart Fishing Reels. The entire frame including the reel seat, is made of one piece tubing. There are no screws or rivets to work loose. Fitted with an adjusting cap on the left side with which a friction of almost imperceptible degrees of fineness can be applied to prevent backlashing in casting. All wearing parts are made of steel, can be taken apart instantly by unscrewing one of the knurled bands, very free and smooth running. Highly nickel finished with satin finished ends. Tripart Reels are 60 yards size with an 80 yard capacity. Takapart Reels are 80 yards size with 100 yard capacity. Quadruple Multiplying. Each in box.

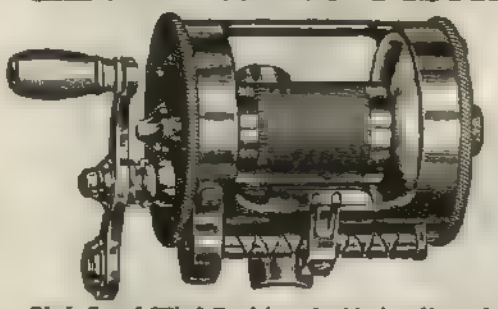
No. 16R30. Each 3.58

NO BETTER REEL FOR TROUT FISHING

"OKEH" LEVEL WIND FISHING REELS

The level wind mechanism only operates when winding in the line and when making a cast there is only the spool revolving. After the cast, the line guide automatically comes in position with just a slight turn of the handle, automatically catching the line and carrying it to and fro across the reel spool.



Okeh Level Wind Reel has double handle and cork arbor. Each in box.

No. 16R18. Each 7.84

Okeh Free Spool Level Wind Reel. Has single handle with cork arbor. Each in box

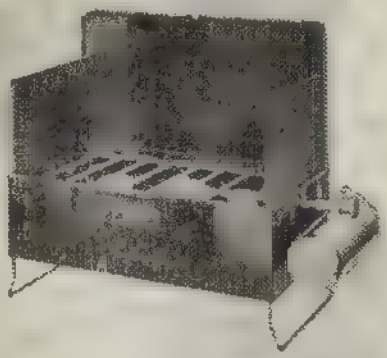
No. 16R19. Each 9.14

- Capacity—100 yards of 12 lb. test casting line
- Cork arbor
- Quadruple multiplying
- Nickeled silver spool flanges
- Seamless nickeled brass tubing housing
- Meisselbach "Takapart" feature for cleaning and oiling

KAMP KOOK KITS

Gasoline Syphon and Folding Stand

Prentiss Wabers Feature Stove No. 4

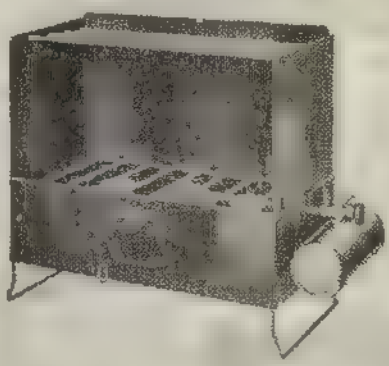


A moderateness of price distinguishes this two-burner stove as an exceptional value, for it embodies practically all the desirable features that would ordinarily be wanted in an efficient two-burner stove for camping and picnics.

It is built of 24-gauge sheet steel, with dark brown enamel baked on, has folding windshields and legs, strong hinged grate and tinplated steel tank. When not in use the tank packs inside and the legs fold over the cover, as illustrated below. Closed it measures 17x9x5 inches, and weighs approximately 12 pounds. A convenient funnel and brass pump are included in the equipment. For size, weight and all-round usefulness its value is unmatched. Each in carton

No. 23B1. Each **3.50**

Prentiss Wabers Feature Stove No. 5



This large two-burner stove of brown enameled 24-gauge sheet steel, has the unbreakable steel rod, hinged grate, and good sized tinplated steel tank, and a warming shelf attached to the cover strongly supported by the wind shields. A decided convenience to keep prepared foods warm while others are being cooked. Closes to compact size of 18½x10x5 inches, and weighs approximately 16 pounds. Priced complete with pump and funnel. Each in carton.

No. 23B2. Each..... **6.00**

Camp Stove Showing Case Closed

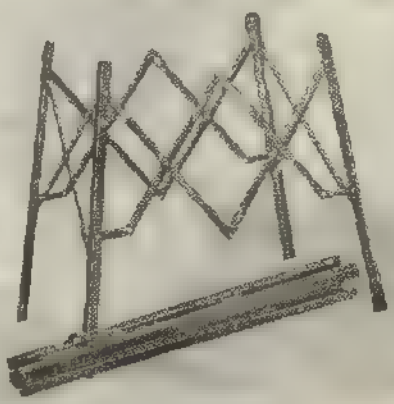
This illustration shows stoves Nos. 23R1 and 23R2 as they appear when closed

Gasoline Syphon

A most convenient adjunct to the equipment of the camper, as a slight pull on the plunger starts the gasoline flowing from your auto tank direct to the stove—simple, efficient and inexpensive.

No. 23R3. Each..... **.06**

Prentiss Wabers Folding Stand



Almost as great a convenience as the stove itself is the Folding Stand for Camp Kooking Kits. It raises the cooking surface to a height of 28½ inches, increasing the safety and comfort of camp cooking. It is strongly built and enameled to prevent rust and has riveted joints which extend to fit stoves No. 23R1 and No. 23R2 with equal satisfaction. It is exceptionally strong and rigid, and folds to the compact size of 21½x1½x1½ inches and weighs only 3½ pounds. Each in carton.

No. 23R4. Each..... **1.27**

FISHING TACKLE BOXES

Standard Tackle Box, size 11x5¼x2¼ inches, stamped from sheet steel with oval corners and edges. Easily carried in pocket of hunting coat. Box heavily galvanized and finished in hard baked, dull black enamel, thoroughly rust proof. One side fitted with 7 compartments including space for an 80 yd. reel. Centrally mounted partition prevents mixing of contents. Each in box. Two dozen in corrugated carton.

No. 19R75. Per dozen..... **10.00**
Each . . . . . **.85**

Enamel Tin Tackle Box, size 11½x8x1¼ inches. Well made with two main compartments; one large tray with six compartments, and two small trays each divided into three compartments. Inside finished in golden brown, outside in green. Wire handle with wood grip

This Tire Dealer Has Proved That *It Pays to Concentrate on Fisk Tires*

The photo above shows the store of a tire dealer in Indiana who began in a small vulcanizing shop with about $75 capital. He decided to take on a line of tires and signed up as an ***exclusive*** Fisk Franchise account.

In 1925 he has a thriving business in the best vulcanizing and tire shop in the community, doing approximately $35,000 worth of business per year.

This dealer writes: "We believe that Fisk quality merchandise together with their methods of doing business is really what put our little vulcanizing shop where it is today."

The Fisk Tire Company, Inc.
Chicopee Falls, Mass.

Fleming Electric Drill Tools now sold through BLACK & DECKER

The Fleming Electric Drill Tools have all been designed especially for operation with Black & Decker Portable Electric Drills

The Fleming Electric Drill Tools in the past have been sold only through jobbers who handle the Black & Decker line.

Because of the close association of the products, each supplementing the other, and because the channels of distribution coincide, arrangements have been made for consolidating the sale of Fleming Electric Drill Tools with the Black & Decker line.

Every Automotive Repair Shop should have at least one of these small drills for driving the Fleming Time Savers.

The following are just a few of the operations which can be performed with a Black & Decker Quarter-Inch Electric Drill in connection with the special Fleming Electric Drill Attachments.

Grinding valve seats.
Cleaning carbon from cylinders.
Cleaning valve stem guides.
Cleaning carbon from valves and valve stems.
Buffing tires and tubes
Cleaning cylinder head bolt holes and bushings.
Removing carbon from valve ports and tops of pistons.
Cleaning storage battery parts.
Cleaning welds.
Removing scale from forged and hardened parts.
Cleaning brass and copper before brazing and polishing.
Removing rust and paint from automobile bodies.
Cleaning rust and dirt from brake bands and other parts.
Removing file marks from aluminum bodies
Removing rust and dirt from tire rims, spring leaves, etc.
Roughing tires for vulcanizing (inside or out).
Drilling out storage battery connectors.
Sharpening drill bits and other tools.
Saw slotting storage battery plates.
Cleaning storage battery jar and cover for resealing.
Cleaning storage battery plate lugs, plate straps, plug terminals and cell connectors for lead burning.

Your Jobber can supply you

A new Catalog of Fleming Electric Drill Tools and many other useful accessories for Portable Electric Drills is now available.

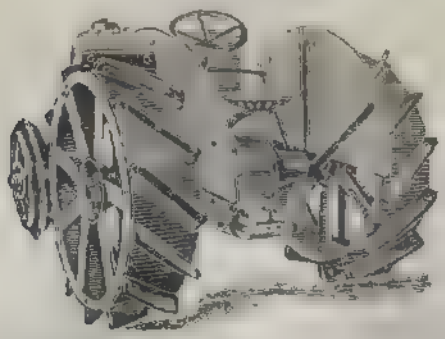
TRACTOR EQUIPMENT

MOTOLINE JUNIOR FENDERS

For Fordson Tractor.



Made of heavy gauge sheet steel, edges rolled over heavy wire; rigidly trussed and braced. Covers the entire upper half of the drive wheel on the inside next to driver, protecting the driver against injury due to hasty careless move. Throws off dirt clots, dust, etc.

Sold Only In Full Crate Lots of Six Sets.

	Per Set
No. A-81MJF—Painted gray	✚23 25
Six sets in crate; wt per crate 350 lbs.	*$10 00*

MOTOLINE EXTENSION CLEATS

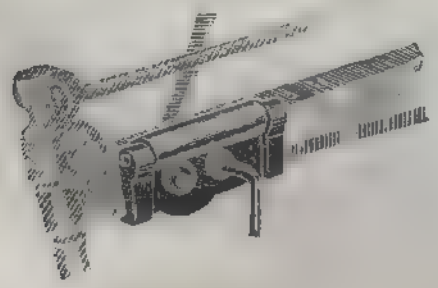
For Fordson Tractor.

They prevent drive wheels from digging in, thereby saving time, fuel, etc. Can not clog up as do drive wheel lugs and other non-slippage appliances, therefore traction always remains the same. They are particularly essential when listing as the cultipacker should be drawn immediately behind the disc harrow in order to entirely fit the soil, leaving the original moisture in it. Extension cleats are necessary when drawing these two implements at one time.

	Per Set
No. A-85MEC Set consists of 14 cleats with bolts nuts, etc.	✚60 00
	$25 00

Packed loose, wt per set 180 lbs.

MOTOLINE BELT ROLLERS



Prevents belt from scraping and wearing on the front axle. Specially treated and processed at the factory so that the roller needs no lubricating at all when in operation.

	Each
No. A-87MBR—Malleable iron frame; one solid piece hardwood roller, smooth finish; bearings run complete length of roller	✚7 95
	$3 50

One in carton; twenty-five in case; wt each 6 lbs.

✚F. O. B. New York Factory Only.

TRACTOR EQUIPMENT

MOTOLINE CLUTCH HOOKS

Used with or without pulley attachment. Operated entirely by foot, and acts as foot rest. Eases cranking as it holds the pulley disengaged. Acts as a brake on hill, in that the operator can leave tractor in gear without remaining in his seat. Holds clutch disengaged when hitching plow or other implements to tractor, eliminating the necessity of shifting gears to neutral, which always causes the tractor to lurch enough to throw the holes for the engaging pin out of line.

	Each
No. A-89MCH—Wt each 1¼ lbs.	✚5 70 *$2 75*

RADIATORS

PEERLESS, For 1909 to 1916 Ford Cars.

This is the same style radiator used on Ford cars for years, and will fit all models up to 1917.

The core is practically indestructible, as well as efficient. Has a large water capacity, and cooling surface is 33⅓% more than any ordinary type of core.

Has the same efficiency and capacity as No. A-11, which makes it of exceptional value on converted Ford truck units or tractors.

Capacity 11 pints; filler neck 2 inches in diameter.

Black enamel finish; honeycomb brass core, gray finish; heavily tinned malleable iron water connection; heavy wrought steel side brackets; parts coming into contact with water are brass.

Brass nickel plated radiator cap.

	Each
No. A-10-1—One in a crate	$31 05
No. A-10-3—Three in a crate	30 60
No. A-10-6—Six in a crate	30 30

Wt each 40 lbs.

PEERLESS, For Ford Cars.

On 1917 to 1924 Fords, this radiator will fit the hood that is furnished by the Ford Motor Co.

The core is practically indestructible, as well as efficient. Has a large water capacity, and cooling surface is 33⅓% more than any ordinary type of core.

It is also particularly efficient on converted truck units or tractors, which require an exceptional radiator to properly cool the engine under heavy load.

Capacity 11 pints; filler neck 2 inches in diameter.

Honeycomb brass core, gray finish; heavily tinned malleable iron water connection; heavy wrought steel side brackets; parts coming into contact with water are brass.

For 1917 to 1923 Models Inclusive.

Black enameled shell; complete with large nickel plated brass radiator cap.

	Each
No. A-11-1—One in a crate	$31 05
No. A-11-3—Three in a crate	30 60
No. A-11-6—Six in a crate	30 30
No. A-11NP—Nickel plated shell; complete with large nickel plated radiator cap	+39 00

For 1924 Models.

Black enameled shell; complete with large nickel plated, brass radiator cap.

	Each
No. A-24-1—One in a crate	$34 95
No. A-24-3—Three in a crate	34 50

RADIATOR HOODS

For Ford Cars.

Sheet steel, black enamel finish; concealed hinges, waterproof.

Will fit all model cars from 1917 to 1920; will also fit the 1921 or 1916 model car when used with No. A-12 combination.

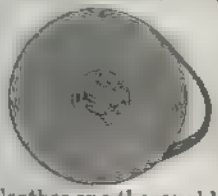
No.	**A-20PH**
Less than 5, Each	$11 25
Crates of 5, Each	10 50

Five in crate; wt each 27 lbs.

HOOD LACING

UNIFORM

Fender Strips, Body Cushion and Anti-Squeak Material.



Uniform hood lacing is a textile product of exceptional tensile strength and toughness. The exterior is treated with a special preparation, and is fireproof. The interior of the webbing forms an elastic, springy, anti-rattle material. Being so treated, it does not dry out quickly or pack down hard and develop a rattle like leather or a thoroughly permeated product. This lacing may be used wherever an anti-squeak or anti-rattle material is required.

Put up 100 feet in a roll.

FORD ANTI-CARBON AUTO OIL

5 Gallon Can

Ford Anti-Carbon Auto Oil is refined from pure paraffine base petroleum. It is filtered extra light in color and contains practically no free carbon, and on account of its extra high fire test, combined with its highest gravity, it is specially adapted for use in Ford motor, which is of high speed and has close-fitting parts; as one oil lubricates the motor and transmission of Ford motors, a light, free-flowing oil is required which will splash and reach all moving parts. This oil will keep a lubricating film between all moving parts at all times, and on account of its high viscosity or body under heat, the motor will not lose compression, which will result in greater mileage per gallon of gasoline and smaller consumption of oil.

One trial of Ford Anti-Carbon Auto Oil will show you the difference between it and the cheaper oils refined from asphalt base crude. Economy in motor oils is not dependent on price difference. Cheap oils are far more expensive than good oils on account of the larger upkeep bills for repairs.

HERCULENE MOTOR OILS

5 Gallon Can

Herculene Motor Oils are refined from pure paraffine Pennsylvania Petroleum. Are made in three weights, light, medium and heavy. Each grade has especially high flash and fire tests which means that they will hold their lubricating body under the intense heat in a motor. The oil will not thin out rapidly, consequently a good seal of oil is kept between the cylinders and cylinder walls which assures maximum power, greater mileage on gasoline and lower upkeep cost on the saving of repair bills.
